ARRL DXCC Manager Bill Moore, NC1L, reports that two operations on Tristan Da Cunha and Gough -- the 2010 ZD9AH operation and the 2010-2011 ZD9T operation -- have been approved for DXCC credit. "If you had these operations rejected in a recent application, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to heavy e-mail volume, you may not receive a reply. Results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts, as well as online on the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK ON THE RADIO

This week:

- April 22 -- NCCC Sprint Ladder 0230Z-0300Z, Apr 22
- April 23-24 -- South Dakota QSO Party; 10-10 International Spring Contest (Digital); SP DX RTTY Contest; Helvetia Contest
- April 25 -- Low Power Spring Sprint
- April 27 -- SKCC Sprint; 432 MHz Spring Sprint (local time)
- April 27-28 -- CWops Mini-CWT Test

Next week:

- April 29 -- NCCC Sprint Ladder
- April 30 -- BARTG Sprint 75
- April 30 May 1 -- Nebraska QSO Party; Florida QSO Party; SBMS 2 GHz and Up WW Club Contest (local time); QRP to the Field
- May 1 -- AGCW QRP/QRP Party
- May 3 -- ARS Spartan Sprint
- May 4-5 -- MIE 33 Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 22-24 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-
fest>,
Monroe, Louisiana; ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
>,
Raleigh, North Carolina
- May 7 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest
>,
Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac)
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>,
Seaside, Oregon; ARRL Wyoming State Convention
<http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne,
Wyoming
- June 4 -- ARRL Atlantic Division Convention
<http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-
1>,
Rochester, New York; ARRL East Bay Section Convention
<http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley,
California; ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>,
Marietta, Georgia
- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1008
BID: $OPDX.1008
April 25, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, K8ME, K8YSE, W8GEX (60m News), K9MM, AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, G3KMA, I1JQJ/IK1ADH & 425 DX News, LA9VDA, M0VFC, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, UT3UZ, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and YT3W for the following DX information.

*** SPECIAL NOTE FROM EDITOR (by KB8NW): I was able to put together a short bulletin before leaving for Murfreesboro. Have a great holiday weekend.... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 16-April, through Friday, 22nd-April there were 230 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T31, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO. Andrea, IZ2LSC, will be active as 3A/IZ2LSC from Monaco during the weekend of April 30th and May 1st. Activity will be on 40-10 meters using CW and SSB. He plans to use a light multi-band vertical antenna with 100 watts. Andrea requests to PLEASE be patient with him because he is a newbie on CW . QSL via LoTW or by the Bureau via his home callsign. He suggests to follow him on Twitter at: @iz2lsc

5R, MADAGASCAR. Giorgio, IZ4AKS, will be active as 5R8KS in another Micro-DXpedition, this time from Nosy Be Island (AF-057) between May 31st and June 6th. Activity will be holiday style on 40-10 meters using CW, SSB and RTTY. QSL via IZ8IYX. Suggested frequencies are:
CW - 7025, 10105, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 7085, 14270, 18155, 21295, 24945 and 28495 kHz
RTTY - 7040, 10145, 14080, 18105, 21085, 24920 and 28080 kHz
Visit the 5R8KS Web page at: http://www.dxcoffee.com/5r8ks

9J, ZAMBIA. Chris, ZS6RI (ex-ZD9IR, 5H9IR, EL8RI), will be active as 9J2RI from Zambia for a year or two. However, operations will be on a "6 week on/6 week off" due to his work schedule (6 weeks off he will return home to South Africa). Activity will be on all HF bands using CW, SSB and the Digital modes. QSL via LoTW or direct to: Chris J de Beer, Box 333, Bethlehem, GA 30620 (w/SASE [USA] or SAE w/return postage for other countries). Bureau QSLs are OK, but very slow. LoTW will be uploaded at least once every 6 week rotation, and probably even weekly. Bureau cards will be sent annually.

9M8, WEST MALAYSIA. Mirek, VK6DXI, will once again be active as 9M8DX/2 from Kuala Lumpur between April 25-30th. Activity will be limited since this is a business trip, but he will operate on some CW during his local evening hours. QSL via SP5UAF.

ASIAN AND IOTA TRIP. Vincent, F4BKV, plans to be active as VR2/F4BKV from a small apartment on the 35th floor in the Lai Chi Kok area (Kowloon side), in Hong Kong, between April 27th and May 6th. He will use a balcony vertical mobile antenna with a Yaesu FT857D. He also plans to be active as YB9/F4BKV from Bali (OC-022), Indonesia, between May 7-9th. Activity from both locations will be casual using low power (100w) and operating SSB and the Digital modes. QSL via LoTW, by the Bureau or direct. Logs of his activities are available online at: http://www.f4bkv.net
If you want a QSL by the Bureau, you can request it by AE-mail or via the Online QSL Request System. No need to send paper QSL.

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following has been approved for DXCC credit:
ZD9AH • Tristan Da Cunha & Gough; 2010 Operation
ZD9T • Tristan Da Cunha & Gough; 2010-2011 Operation
If you had these operations rejected in a recent application send a note to dxcc@arrl.org to have your record updated. Note, due to extremely heavy e-mail DXCC may not respond to your message. Once updated, this will be reflected in your LoTW account or in the live, daily DXCC standings on the Web site. (www.arrl.org/dxcc).

EM25, UKRAINE (Special Event). In connection with 25th anniversary of the accident at the Chornobyl Nuclear Power Plant, radio amateurs from the "Ukrainian State Centre of Radio Frequencies" together with a number of Ukrainian radio amateurs will operate from Chernobyl city between the period April 22-30th, using the callsign EM25U. QSL via UT3UZ: Alex Arbuzov, P.O. Box 7, Kiev-232, 02232, Ukraine.

HB0, LIECHTENSTEIN. Operators Tony/IZ3ESV, Gabriele/I2VGW and Andrea/IZ2LSC will be active as HB0/homecall between June 2-5th. The trio is planning a micro-light and holiday-style operation using CW, SSB and RTTY. The main focus will be on the 30/17/12 meters and the upper HF bands depending on the propagation. They will also try 6 meters. QSL via their home callsigns.

IOTA 50TH ANNIVERSARY MARATHON (Janaury 1st, 2012, through DECEMBER 31st, 2013). A press release by Roger Balister, G3KMA, RSGB IOTA Manager, states: "The year 2014 marks the 50th anniversary of the launch of the Islands On The Air (IOTA) Programme by British SWL Geoff Watts, BRS-3129. As a build-up to our celebrations on this occasion, the RSGB IOTA Manager and Committee announce an exciting activity period in which all licensed amateurs world-wide are invited to participate.
For a two-year period during 2012 and 2013, IOTA chasers are encouraged to contact as many different IOTA groups as possible, and IOTA activators to play their part by operating from as many groups as possible, with special emphasis on the less-frequently activated ones. The points system adopted rewards 'Activators' with higher scores for activating the rarer IOTA groups. Certificates and awards will be available to both 'Chasers' and 'Activators' to reflect attainment of graduated bands of performance together with attractive prizes for top scorers.
The challenge provides a level playing field for everyone, whether they are complete newcomers to IOTA or are holders of the prestigious IOTA 1000 Islands Trophy, because everyone starts with a clean slate on 1st January 2012.
We hope that all our readers will consider ways in which they can support this event. We would like to see work starting now to schedule activity from as many IOTA groups as possible throughout the 24 months. Let us target 500 groups initially in the hope and expectation of being able to raise this higher as the Marathon progresses."
The complete rules of the IOTA 50th Anniversary Marathon will appear in the forthcoming 'RSGB IOTA Directory' to be released at Dayton. They can also be seen on G3KMA's website at: http://www.g3kma.dsl.pipex.com They will also be uploaded to the RSGB IOTA Web site shortly when key personnel return from Visalia at: http://www.rsgbiota.org

IOTA NEWS.....
AF-019. Members of the Valle Brembana DX and Contest Team (VBDXC) will be active as IG9E from Lampedusa Island (IIA AG001) between May 18-23rd. Operators mentioned are Enzo/IZ2GLU, Fabio/IZ2GMT, Andrea/IZ2AJE, Diego/IW2MZX and Ezio/IK2AHB. They plan to have three stations active simultaneously "on air" on various bands and modes. Special attention will be given to the 30/17/12 meter bands and the Digital modes. QSL via IK2AHB, by the Bureau or

direct. Visit the VBDXC Team's Web page at:
http://www.vbdxc.altervista.org

EU-016. Leo, S50R, will be active as 9A/S50R from the Island of Lastovo
(ACIA IC-869, CIA-23, IOCA CI-051, MIA MC-196, WLOTA 0815)
between April 25-30th. Activity will be on the HF bands, on
or near the usual island and IOTA frequencies. QSL via his
home callsign, direct or by the Bureau and the LoTW.

EU-079. Members of the QLF DX-Team will once again be active as LA6Q
from More Og Romsdal County South IOTA Group between April
29th and May 1st. Operators mentioned are Bjorn/LA5UKA and
Trond/LA9VDA. Activity will be on 80-10 meters using CW, SSB
and RTTY. QSL via LA9VDA. Cards can be requested via E-mail
at: la9vda(at)gmail.com
For a direct QSL, please add 3 USDs or 1 new and stamped IRC
and SAE. Cards without this will be sent through the Bureau.

EU-123. Members of the Camb-Hams will be activating the Isle of Arran
between May 1-8th. They will be operating as GS3PYE/P and
GS6PYE/P. Activity will be on all bands 160-2 meters, and
70cm via satellites. For VHF, the island lies in IO75. More
information is available at:
http://dx.camb-hams.com/dx-peditions/arran-dxpedition-11/
On Twitter at: http://twitter.com/g3pye
On Facebook at: http://facebook.com/ArranDX

KH6BZF PROPAGATION FORECAST/REPORT (April 25th-May 1st)....
Apr 25 AN SOLAR REFERENCE KEYS
Apr 26 HN --------------------
Apr 27 HN BN - Below Normal
Apr 28 HN-LN AN - Above Normal/Geomagnetic Level is QUIET
Apr 29 HN-AN LN - Low Normal
Apr 30 HN-AN HN - High Normal/Geomagnetic Level is UNSETTLED
May 01 HN-AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

OJ0, MAKET REEF. Operators Dervin/PD9DX, Marc/ON8AK and Max/ON5UR will
be active as OJ0UR from Market Reef (EU-053, ARLHS MAR-001, TWLHD WLH
OJ0-001, WLOTA LH-0542 and Admiralty C4472) between August 13-20th.
Activity will be on the HF bands using a Stepp-IR Big Vertical and a
Stepp-IR 2 element beam. QSL via M0URX, direct (w/SAE plus 1 IRC/2 USDs),
by the Bureau, or LoTW. Alternatively, QSLs may be requested using
M0URX's OQRS form at: http://www.m0urx.com/qsl-request-form
For more info, visit their Web page at:

9M6TMT QSL INFORMATION. As of April 18, 2011, Buzz, NI5DX, will no longer be assisting 9M6TMT as QSL Manager. Tom has decided to handle the QSL duty himself with assistance from his XYL. Please do NOT send any 9M6TMT cards to NI5DX either direct or via the Bureau.

DENMARK POSTAL RATE INCREASE. John, K9MM, was informed by OZ3PZ that international postal rates from Denmark increased on April 1, 2011. Two USDs are no longer enough for a letter to the USA. He requests either 3 USDs or 1 IRC. See his Web page for additional details at: http://oz3pz.dk/ox3xrweb/index.php?page=I

YF1AR QSL INFO UPDATE. QSL Direct/OQRS/W2 Bureau via QSM N2OO/Bob Schenck. Budi, states, "Do not send to my home QTH or my Bureau."

QSL RECEIVED VIA LoTW: 4O3A, 4Z1TL, 8P5A, 8P6DR, 9H1SP, 9K2MU, 9Q50ON, CN8KD, CT3MD, ES5GP, G3WPH, GW4OGO, HB9CVQ, HP1/IZ6BRN, HK1MW, IG9/IW9ELR, J39BS, JA0FVU, LX7I, MU0FAL, OK2CQR, PV8ADI, R7BN, RG4F, RU3ZX, SM0EJR, SV9CVY, XE1GZU, V44KAI and ZS1EL

QSLS RECEIVED VIA MAIL: 4Z5RT, 5B8AD, 6W/AA1AC, CS2C, E21EJC, FM4LV, FM5WD, J37BO, J39BS, J5NAR, J68UN, J88DR, JE1LFX, JY5HX, KH0/G3ZEM, MJ/K3PLV, OH0BP, R1ANP, R1ANP/A, T88ZM, TO3A, TI5KS, TJ3AY, UA2FR, V51AS, VK4LDX/P, YO3FRI and ZL8X

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SHORT PACIFIC TOUR. By the time you read this operators Carlos/EA1IR and Hrane/YT1AD should be QRT as 3D2IR and 3D2AD from the Fiji Islands and should be now active as A35IR and A35AD from Tonga until April 26th, before heading back to Fiji for a few days (between April 26-29th). Both operators will finish their short Pacific tour from American Samoa as KH8/EA1IR and KH8/N9YU between April 29th and May 1st. QSL all the above callsigns for YT1AD and EA1IR via Carlos, EA1IR.

T31, CENTRAL KIRIBATI (Update). By the time you read this, T31A should be on the air. Some members of the team have opted out from the DXpedition before the team left Apia. Operators Charlie/W6KK, Carlos/EA1IR and Hrane/YT1AD decided not to go to Kanton island due to obligations and there was

no clear date on a return from the DXpedition. Also, there were some other personal reasons which made them decided not to board the boat. However, Carlos/EA1IR and Hrane/YT1AD made a decision to make a short DXpedition to some of the Pacific islands (See Short Pacific Tour). For updates on the T31A team, see the Web page at: http://www.T31A.com

T8, PALAU. Shigehiro, JA8CCL, is active as T88KR from the Palau Rental shack (See the following Web page at: http://palau.rental-shack.com/english)
until April 25th. QSL via his home callsign.

VU, INDIA. Operators Ren�/DL2JRM and Daniel/DL5SE are now active as VU3RYO from New Delhi until April 25th. Activity will be on 160-10 meters using CW only. QSL via DL2JRM.

ZA, ALBANIA. Operators Mitko/LZ1UQ and Andy/LZ2HM will be active as ZA/homecall between April 26th and May 5th. Activity will be on all HF bands and 6 meters. Operations will be on CW, SSB and RTTY. QSL via their home callsign using the info on QRZ.com.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

415. Amateur Radio Newsline(tm) Report 1758 - April 22 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-04-22 09:00:22 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <20110422090005.48F0033C54@panix2.panix.com>

Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

Amateur Radio Newsline(tm) Report 1758 - April 22 2011

(Please note that this weeks newscast runs 32 minutes, 32 seconds and contains three breaks)

Amateur Radio Newsline report number 1758 with a release date of Friday, April 22, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC issues its decision on an appeal to keep law enforcement robots out of the 70 centimeter ham band, the one of two Global Simulated Emergency Tests is cancelled, post earthquake ham radio relief operations continue in Japan and ham radio says goodbye to one of the true legends of the hobby. Hear it all on Amateur Radio Newsline(tm) report number 1758 coming your way right now.

(Billboard Cart Here)

**

RADIO RULES: FCC ISSUES SPLIT DECISION ON CHALLENGES TO RECON ROBOTICS USING 70 CM HAM BAND

Call this one a draw so far on for ham radio. This as the FCC has given radio amateurs a partial victory and a partial defeat in response to a challenge by members of the Amateur Radio Service and its national society. This, to an FCC waiver permitting ReconRobotics, Inc. to domestically operate its surveillance robot called the Recon Scout in the shared 70 centimeter amateur band. We have more in this report:

--

The FCC has denied several requests from the ham radio community, including an ARRL Petition for Reconsideration, of a rules waiver that permits the certification and licensing of the Recon Scout. This, to operate in the 430 to 448 MHz band.

In an Order on Reconsideration released on April 15, the FCC said that it found objections to use of 430 to 448 MHz as being unfounded. This based on the nature of the device, the way in which it must be sold and deployed, and that no other spectrum is as suitable for its operation.

In relation to the latter, the regulatory agency noted that operation of the Recon Scout in the 900 MHz band or high would require increased transmit power while still not guaranteeing the same quality of surveillance as afforded by operation on 70 centimeters. It also noted that the Recon Scout waiver states that these devices may not interfere

with federal or non-federal stations operating from 420 to 450 MHz and those agencies using the Recon Scout must accept any interference received from all other spectrum users. In other words, as applied to ham radio operations, its users could not complain to the FCC if it received interference from any Amateur Service operations, but hams could complain if they were interfered with by operation of a Recon Scout.

On the plus side, the FCC did grant a request from the ARRL for changes in the labeling and instruction manual requirements of the Recon Scout. This, to insure that users of the device are aware of its limitations in regard to interference to its operation. As a result, Recon Scout transmitters delivered after April 15th are required to carry a warning on its product label and in its instruction manual basically stating that the Recon Scout must accept any interference received from federal or non-federal stations, including interference that may cause undesired operation.

The FCC Order also acknowledged that the ARRL was correct in arguing that the waiver was insufficient in that it did not waive applicable provisions of Section 2.106 of the Commission's Rules, which contains the Table of Allocations of frequency bands to the various radio services. The Commission's solution was to retroactively waive the Table of Allocations to the extent necessary to permit distribution and use of the Recon Scout.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW in Los Angeles

--

For those not aware, ReconRobotics bills itself as a world leader in tactical robotic systems. It claims that more than 1,200 of the company's robots have been deployed world-wide by the U.S. military and international friendly forces, federal, state and local law enforcement agencies, bomb squads and fire rescue teams. More about the company is on-line at www.reconrobotics.com. (FCC)

**

RESCUE RADIO: MAY GLOBAL SET CANCELLED

There will be only one Global Simulated Emergency Test or GlobalSET in 2011. Writing on the IARU Region 1 website, Greg Mossop, G0DUB, the IARU Region 1 Emergency Communications Coordinator says that the only GlobalSET will happen November 12th from 1100 to 1500 local time.

According to Mossop, the cancellation of additional GlobalSET's this year is due to work pressures on the organizer who has limited the time to prepare reports from earlier events and properly set up the needed activities for the now cancelled Simulated Emergency Test which had been slated to take place in May.

The Emergency Communications Coordinators for Regions 2 and 3 have been consulted on the cancellation of the May event. Thus far neither has voiced any objections to the change. (Southgate)

**

RESCUE RADIO: POST QUAKE HAM RADIO RELIEF EFFORTS CONTINUE IN JAPAN

Amateur radio relief operations are continuing to help with disaster recovery area struck by the worst earthquake in Japan in 140 years. We have more in this report from Amateur Radio Newsline's Norm Seeley, KI7UP:

--

Ken Yamamoto, JA1CJP, is the International Amateur Radio Union Region 3 Secretary. He reports that there are several stations on 7.030 and 7.043 MHz who are handling medium distance information exchanges, but the majority of ham radio operations appear to be on the VHF and UHF bands.

As previously reported here on Newsline, JA1RL the headquarters station of the Japan Amateur Radio League in Tokyo, became a disaster communication center in the days immediately following the giant killer quake. Yamamoto is quoted as saying that some 250 transceivers holding Japan Amateur Radio League licenses are being used for communications between various refugee camps and local government offices. He says that two sets of 430 MHz repeaters have been delivered to the disaster area. They are operational and being used to augment the existing repeater coverage and provide easier communications between those using the hand-held transceivers.

JA1CJP says that some towns are so heavily disrupted that the local government offices are also serving as refugee centers and the residents are staying in multiple locations. In such cases, amateur radio can contribute quite a lot in maintaining the ties between the local government and displaced residents.

The earthquake, now graded at nine on the Ritcher scale, and followed by a tsunami hit north-eastern Japan on March 11th. It has so far been blamed for over 13000 deaths and the destruction one of Japan's major nuclear power facilities. That plant near Fukushima is still the site of an intense campaign to bring several damaged reactors back under control and stop the leakage of radio active waste water into the ocean.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching the situation from Scottsdale, Arizona.

--

It's expected that the ongoing emergency communications being provided by amateur radio will continue for a considerable time to come. A presentation on the Japanese earthquake triple disaster and the role played in relief efforts by radio amateurs will be made at the 2011

Global Amateur Radio Emergency Communications Conference. It's slated for in Sun City, South Africa, in August. (VK3PC)

**

INTRUDER WATCH: BRAZILIAN FREEBANDERS HEARD ON 10 METERS

The IARU Region 1 Intruder Watch newsletter reports that Brazilian CB-like or so called Freeband stations using full carrier AM is now often audible between 28.000 and 28.305 MHz. Most of these stations are being heard in the evening hours. The report says that the Brazilian telecommunications regulator Anatal seems to have no interest in this problem or in keeping these stations from operating in the 10 meter Amateur Service band. (IARUMS -R1)

**

INTRUDER WATCH: MOROCCAN FISHING FLEET HEARD ON 15 METERS USB

And Ulrich Bihlmayer, DJ9KR, says that he has not only heard a Moroccan fishery operations on 21 MHz using upper sideband, but that he has also researched the matter and has found out the ship names and other details. The vessels in question are registered in Agadir, Morocco. DJ9KR has already informed the Moroccan Amateur Association of the situation. (IARUMS - R1)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Baton Rouge Amateur Radio Club repeater serving Baton Rouge, Louisiana.

(5 sec pause here)

**

RADIO RECORDS: UK LIGHT COMMUNICATIONS DISTANCE RECORD CHALLENGED

The optical distance record claimed in the U-K may not be a record after all. Amateur Radio Newsline's Frank Haas, KB4T, has more:

--

Since our light communications record claim story aired on last weeks newscast, we have received numerous e-mails and even a few phone calls that say the accomplishment in the U-K falls far short of other claimed distances set in elsewhere around the globe. In fact, the number of such claims far outweighs the space we have available to report them all.

But as pointed out by one of our listeners, the 90 kilometer distance claimed in the U-K is only about 56 miles and there are a number of well-documented communications over longer distances. This includes

one as early as 1962 in southern California. Another listener points out a more recent accomplishment over a 173 mile path.

But as another of our listeners also points out, there is really no official record-keeper of optical distance records. At least not here in the United States. This he says is partly because until very recently, the ARRL did not recognize non-coherent communications for contest purposes. Also, since the FCC does not claim to regulate communications above 400 GHz, some might question whether a QSO that does not require a license is really an amateur radio contact at all.

But the 90 kilometer contact we reported last week took place in the United Kingdom, and the way that light communications distance records are looked upon over there may be quite different than the way they are viewed on this side of the Atlantic, or the way that they are viewed elsewhere in the world.

For the Amateur Radio Newwsline, Im Frank Haas, KB4T, in Holly Hill Florida.

--

The bottom line: If hams are going to lay claim to optical distance records, then what is needed is an organization respected and accepted by all of the worlds ham radio community to corroborate any claims made, and to declare who has set a valid record and who has not. (ARNewsline from listener input)

RADIO LEGISLATION: CBO ESTIMATES THAT AR ENHANCEMENT ACT WOULD COST ABOUT $1,000,000

The Congressional Budget Office says that implementing the Amateur Radio Emergency Communications Enhancement Act, also known as S. 191, would cost about $1 million over the next five years. This, based on the fact that pay-as-you-go procedures do not apply to this legislation because it would not affect direct spending or revenues.

As written, the proposed legislation would direct the Department of Homeland Security to conduct a study on the uses and capabilities of the Amateur Radio Service during and after a disaster or emergency. The bill also would direct the Inspector General of the Department of Homeland Security to report to the Congress on the cost of grant programs operated by the Federal Emergency Management Agency and to what degree those programs provide duplicative or overlapping assistance.

The Congressional Budget Office estimates that based on similar past examinations, that the cost of producing both studies would be about $1 million in 2012. This, subject to the availability of appropriated funds. (Congressional release via WA6ILQ)

D-STAR CORNER: A CHANCE FOR YOUR CLUB TO GET AN ALMOST FREE D-STAR REPEATER

ICOM America Inc. has announced a two week D-Star Deployment promotion that could bring D-Star operation to your local ham radio community.

>From April 25th to May 9th, your radio club can purchase either a 2 meter or 70 centimeter D-Star repeater package direct from Icom America for only $3000 plus shipping costs and any applicable taxes. What you get for your $3000 is a D-Star controller, a 2 meter or 70 centimeter D-Star R-F module and the G2 D-Star Gateway Software package. These are the three essential building blocks needed to bring D-Star to your area. You supply the necessary peripherals such as an antenna, power supply, a high speed Internet connection and of course a site to hose the new D-Star machine.

But the best is yet to come. If you can meet a number of requirements within 90 days from the date of purchase, Icom will refund the original $3000 purchase price excluding the taxes and shipping costs. These requirements include installing the new D-Star repeater in permanent location that you must identify at the time of purchase. Also, the machine must be fully operational on the U-S ROOT trust server with Icom G2 Gateway Software and within the requirements outlined by the U-S ROOT Administration team; have a minimum of 10 users registered on the repeater and you must guarantee to keep the system on air for minimum of one full year from date of installation.

This program is limited to the first 70 qualifying clubs located in the certain priority areas. Also, your proposed system cannot be located within a 100 aeronautical mile radius an existing D-Star repeater already on the air.

To see if your club qualifies for this rather enticing offer, please send a club bio and an outline of how your new D-Star repeater will be used in your community to DSTAR.Promo@icomamerica.com. (ICOM America release)

HAMVENTION 2011: W5KUB TO AGAIN NETCAST FROM THE DAYTON HAMVENTION

Tom Medlin, W5KUB, says that he will one again be streaming live audio and video from the Dayton Hamvention. According to Tom, this will be the 9th year that he will be netcasting live on w5kub dot com beginning with his 550 mile ride from his home in Memphis, Tennessee, right to the Hamvention site at the Hara Arena in Dayton.

The W5KUB dot com webcast from Hamvention has become very popular over the years, especially with folks who have never attended Hamvention or have no way to get there. Tom tells Newsline that there are viewers are in over 150 countries and during the 2010 Dayton Hamvention broadcast, he had over 50,000 hams watch and follow us for the entire show.

And during this years netcast, Tom will also be giving away over $5000 in prizes to give lucky viewers. Some of the prize donors include Heil Sound, Kenwood, Yaesu, MFJ, Kantronics, LDG and the ARRL. That alone is something that you won't want to miss.

So if you cannot make it to Hamvetion 2011, you can attend vicariously from May 18th to the 22nd thanks to Tom Medlin, W5KUB, and his crew at W5KUB dot com. (W5KUB)

HAM HAPPENINGS: 2011 QCWA NATIONAL CONVENTION - SEPT 7 - 9

The QCWA 2011 National Convention this year will be held September 9th to the 11th at the Crowne Plaza Hotel at the Crossing, Warwick, Rhode Island. A partial list of presentations include QRP Made Easy by Steve Kercel, AA4AK. Al Coderman, W3ZD, will will present a history of his fathers ham radio operation from 1912 to 1985 while Phil Temples, K9HI will detail his volunteer work with the HandiHams Program. More about this gathering is on-line at www.qcwa.org/2011-convention.pdf. (QCWA)

**

HAM HAPPENINGS: ATLANTA RADIO CLUB TO TURN 100

And congratulations to the Atlanta Radio Club Announces which is celebrating its 100th Anniversary with a series of events. Among these is a joint special event operation on May 6th, 7th and 8th in conjunction with Coca-Cola's 125th anniversary. The call sign to be used will be K-Zero-K. Then on June 4th, the club will take part in the 82nd Atlanta Hamfest, where it will release its 100th Anniversary archive DVD. June 25th and 26th will see the club operating station W4DOC slash 100 during Field Day.

By way of background. the Atlanta Radio Club is a special service club affiliated with the American Radio Relay League and has operated continuously since 1911. Currently it is comprised of more than 150 licensed amateur radio operators with a mission to serve the community and advance the hobby. As part of these missions it provides more than 10 local repeaters. For more information on the club and the plans for its 100th anniversary celebration, please visit www.atlantaradioclub.org. (Atlanta Radio Club)

NAMES IN THE NEWS: NASA HONORS JSC FIRST FLIGHT DIRECTOR

NASA's first flight director says he regrets that the shuttle program is coming to an end because he believes it's the finest spacecraft ever built. Christopher C. Kraft said after a recent ceremony honoring him at the Johnson Space Center that he thinks space shuttles could be used for another 30 years and could take us to the moon or even Mars.

The 87 year-old Kraft was NASA's first flight director for human spaceflight and helped create the concept of Mission Control. He also

directed the Mercury and Gemini flights and was a part of the team that put men on the moon during the Apollo program. He went on to serve as director of Johnson Space Center from 1972 to 1982.

At the ceremony, the Johnson Space Center unveiled its new name for Mission Control. Its new designation is the Christopher C. Kraft Jr. Mission Control Center. (NASA)

HAM RADIO NEAR SPACE: PROJECT BLUE HORIZON ACROSS THE ATLANTIC

Yet another attempt to float a balloon carrying ham radio gear across the Atlantic may be taking place as we go to air. Project Blue Horizon, a multi-year effort to design, construct, and launch an amateur radio carrying balloon was expected to be launched on April 22nd at 03:30 U-T-C.

According to predictions posted at the Project Blure Horizon website, the balloon will leap skyward from near Oswego, New York and then follow the Jetstream out over the Atlantic. During the flight, radio amateurs around the world are being asked to monitor 7.1023 and 10.1466 MHz CW. It will also carry a GPS based APRS tracker outputting the call KC2ZJH on 144.390 MHz FM. The High Frequency downlink exact frequencies may vary up to 10 hertz or so with temperature and accurate recording of frequency will be useful.

Anyone hearing any of these three signals is asked to send reception reports of the balloon's progress by e-mail to PBH15.data(at) gmail (dot) com. More information about the program, including the latest projected flight path, can be found on-line at www.projectbluehorizon.com (KC2TUA, Project Blue Horizon, Southgate)

HAM RADIO IN SPACE: ARISSAT-1 GAGARIN COMMEMORATIVE A FAILURE

The planned operation of ARISSat-1 on April 11 and April 12 from inside the International Space Station as part of the commemoration of the 50th anniversary of Yuri Gagarin's flight was not successful. As of airtime, not one terrestrial station on the ground reported hearing transmissions on the ARISSat-1 downlinks of 145.950 MHz for FM analog or 145.920 MHz for digital.

The planned retransmission of the satellite's FM downlink via the Kenwood TM-D700 transceiver used for ARISS regular contacts was also not successful. This, as no reports were received of signals heard on 437.550 MHz. (ANS)

**

HAM RADIO IN SPACE: FASTRAC SATELLITES RECEIVE OSCAR DESIGNATIONS

The two newly launched University of Texas FASTRAC satellites now have OSCAR designations. According to Bill Tynan, W3XO, who issues the OSCAR titles, FASTRAC 1 is now FASTRAC OSCAR-69 while FASTRAC 2 has the honor of being renamed FASTRAC OSCAR-70. In making the OSCAR designations public, AMSAT-North America says that it is very pleased to welcome F Oh-69 and F Oh-70 into the family of amateur radio satellites. (ANS, W3XO)

**

DXCC: TWO OPERATIONS APPROVED FOR CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that two operations on Tristan Da Cunha and Gough have been approved for DXCC credit. The two are the 2010 ZD9AH operation and the 2010 through 2011 ZD9T operation.

According to Moore, if you had these operations rejected in a recent application, please send an e-mail to the ARRL DXCC Desk. He also says that due to heavy e-mail volume, you may not receive a reply, however updates will be posted in Logbook of The World accounts as well as online on the daily listings. (ARRL DXCC)

**

DX

In DX, word that EI9FBB will be operational April 20th to the 22nd portable 3A from Monaco. Listen out for him mainly in the European afternoons. QSL direct to EI9FBB.

YL2GM will be active as from Azerbijon as 4K3AC between April 25th and May 3rd. Operation will be on all of the High Frequency bands using 100 atts and operating CW, SSB and RTTY. QSL via YL2GM.

The special calls 4X20HC and 4Z20HC have been aired over the past two months to celebrate the 20th Anniversary of the Holyland Contest in Israel. The calls will remain on the air until the end of April. This is a good opportunity for the prefix hunters to get a couple of new ones. QSL only via 4Z4TL.

M0DOL and M0NNH will be active as GB4RW on April 29th to celebrate the Royal Wedding of Prince William and Catherine Middleton. QSL via the information fund under GB4RW on QRZ.com.

Lastly, a group of Brazilian operators are off to the island of Mayotte where they plan to use the call TO2FH through April 25th. Operation is on all bands from 160 through 10 meters using SSB, CW, RTTY and PSK.

Plese do not send paper QSL's either direct or via the bureau. The only acceptable way to get your TO2FH QSL will be electronically via dxwatch dot com. Full QSL information in several languages is on the TO2FH page on QRZ.com.

THAT FINAL ITEM: GOODBYE TO WRL FOUNDER LEO MEYESON, W0GFQ

And finally this week we take a look back at the amazing life of a man who devoted most of his century on Earth to electronics and especially amateur radio. Bill Pasternak, WA6ITF, is here with the story of Leo I. Meyerson, W0GFQ:

--

In my 52 years as a ham, I only met Leo Meyerson, W0GFQ, twice. The first time was in the early 1960's at some radio store meet and greet -most likely in New York. The second time was at the 1997 Dayton Hamvention banquet where W0GFQ was honored with the prestigious Radio Amateur of the Year Award.

Yet in some ways its like he has been a close friend for years. That's because some of the best contacts I ever made on the air was with a Globe Scout 680A transmitter that came from the manufacturing plant of his famed World Radio Labs -better known in ham radio circles simply as W-R-L. But I do have several friends who knew him a lot better. In fact, one of them, Joe Eisenberg, K0NEB, of Lincoln, Nebraska, was lucky enough to have W0GFQ as a family friend and the person brought him into the hobby:

--

KONEB: "Leo was a close friend of my parents, and at the age of 7 I was introduced to ham radio when thet took me to his house and he sat me next to him and he made a couple of contacts on HF. Following that, a couple of days later my father took me to his store and factory at World Radio Labs in Council Bluffs which is right across the river from Omaha where I lived. And my dad purchased me a Hallicrafters S-120 general coverage receiver which Leo showed me how to use. And (also) one of those kits that makes several different devices by wiring

components to terminals. And that's how I kind of got started building kits.

"After that, every once in a while we would go back over there. My dad would find me more kits to build and we would talk to Leo more. And when I got older Leo got me registered and signed up for the Novice classes which were held in their factory where they built the Globe and later the Galaxy radios. And that's where I learned my CW.

"And during that time period I got to watch my very first HF radio being built step by step. Each week it would be further down the assembly line. At the very end of the class we bought that radio. It was a Galaxy GT 550."

--

According to Joe, Leo Meyerson was more than a radio manufacturer. He was in many ways an ultimate Elmer, especially to those just joining the hobby.

--

K0NEB: "Leo was always a very kind individual and very helpful. He always had suggestions and was always glad to show someone how to set their mic gain, how to tune up a radio properly, what to llok for, how to set up an antenna and all sorts of things. He was always willing to help new hams and get them started.

"And he was definitely my personal Elmer. He sat down with me for my very first Novice CW QSO and kind of walked me through the paces so I knew what to do."

--

Only a few weeks ago on February 24th, the Quarter Century Wireless Association hosted a 100th birthday celebration for Leo Meyerson at his winter residence near Palm Springs, California. One of those attending was film and TV producer Dave Bell, W6AQ, who shared this personal vignette of his encounter with W0GFQ, at that event:

--

W6AQ: "Well I've known of Leo Meyerson ever since I got into ham radio because his beaming face was in all of his ads for World Radio Labs in all of the magazines. And I desperately wanted to get a couple of his AM amplifiers back when I was young, but I couldn't afford them. And I told Leo that several times - and he just smiled."

--

Leo Meyerson, W0GFQ, was not only there at the dawning of the electronic communications age. He was quite literally one of the pioneers who made it happen and who also made it available to all of mankind. And in the process he lived to see telecommunications grow

from the age of spark gap transmitters and crystal receivers to the modern broadband systems we all enjoy today. It must have been truly exciting for him and he was a blessing to all of us.

Sleep well Leo. Your job is now complete.

I'm Bill Pasternak, WA6ITF

--

Leo Meyerson, W0GFQ, was laid to rest on Sunday, April 17th at the Temple Israel Cemetery Chapel in Omaha, Nebraska. The man may be gone, but the legacy he left behind will be a part of our service as long as any of us are left to sit down before a radio with a mic or key. (ARNewsline(tm))

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a

young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

** MMMonVHF and the 144 MHz SPORADIC E saison 2011 **

The VHF-DX-Portal MMMonVHF normaly does not publish reports for
Sporadic E on frequencies below 144 MHz. However, it seems that the
season is on it's way as there was some Sporadic E on 50 MHz to the
southwest. Also in 2011 we like to invite to to send your Sporadic E
logs to MMMonVHF. We will try to have them online as soon as
possible. Be aware that this is not an automatic process so it takes
to to see your log show up in the list. No need to send it twice the
same day! ... more: http://www.mmmonvhf.de/es.php

** QSL service for Ed, LU7DZ (SK) by Ray, WA4NJP **

Hello All. I have in my hand the log book of LU7DZ (SK), I am not
sure that all of his work is contained. The first entry is dated
20-4-86, a 144 MHz CW QSO with W5UN. The last entry is dated
10-10-09 a 432 MHz CW QSO with K1RQG. The log contains about
650 QSOs on 144 and 432. If you did not receive a QSL directly from
Eduardo and your QSO is within the above times, send me an email
with ?LU7DZ QSL? in subject, stating date, time, freq and mode. I
will look at log and reply I am having some QSLs printed and will
send to those who request and are verified by the log that I have
plus cost ($1 for stateside, $2 for others) please no IRC as my
post doesn?t like them?This will be an all summer project as there
are many noted as not QSLed , Please be patient Enjoy the hobby,
any mode, any time the moon is up, its our hobby...

** DXCC: PJ2 ; Square: FK52 ; FINISHED **
LOG and details at our REVIEW: http://www.mmmonvhf.de/review.php

Johan PA3FPQ, Jurgen PE1LWT and Rene PE1L was on travel (after their
PJ4X activity) to PJ2, the new DXCC Curacao in FK52NC. Its finished now!
The A-team dismantled this morning the PJ2/PE1L station. Within one
hour the Antenna system was down and finally we could use our dreamhouse
(Dushi Korsou www.vakantiewoningenincuracao.nl/Villa-Dushi-Korsou.html)
where it was mentioned for, relaxing at the pool. While swimming around
we discussed the pro and cons of the expedition and we made a list of it
Even new trips to exciting places where discussed. Total results for the
PJ2 trip are 245 inits in 41 countries on 144MHz. We made tropo qso with
PJ4X Meteorscatter with WP4G (beside a EME qso), A CW qso with OZ1HNE on
144 MHz. A CW qso with DL9KR on 432 MHz. 12 QSOï¿½s on 432MHz via EME
PJ4X will be still active at 144MHz till the end of April and the
results will be published then... About sponsoring: All sponsors for
PJ2 expedition will be mentioned on the website
www.emelogger.com/curacao?page=sponsor and tomorrow our maid will pick
blind folded 10 callsigns out a bowl for the shorthand sunglasses.
All stations who do send extra money with QSL card will be mentioned on

this page as well (10$ or more) About QSL: All QSL wil go via PE1L and we kindly ask you to keep in mind that if you want QSL from both countries that you include enough to cover the costs. A order for QSL cards will go out soon, based on earlier experience with the printer, this can take some time (C56EME cards where lost in mail and are resend now) You can see your QST status on the log page and www.emelogger.com/curacao and www.emelogger.com/bonaire
If you do a logsearch you can see if you are in the log, if your card is received and if our card is send to you.If you have a non confirmed QSO with PE1L, PE1LWT or PA3FPQ please send your card with the card for the expedition. SOURCE: tnx to Rene, PE1L and Team, direct to MMMonVHF

** Grid Trip DN00/01/02/03/04/11/12 by Dennis, K7BV **

LATEST NEWS from K7BV Dennis, dated 2011-04-14: Below is the operating schedule as I know it today for my 6 Meters DNxx Grid Trip Apr 19-29. The trip is based on a roundtrip drive from Southern California to Boise, ID for a Hamfest. My wife and I will make the trip in our SUV recently outfitted for portable 6m operating. Barry KS7DX will be my Pilot Station and serve as my contact person. Barry will have my cell phone number. SOURCE: Dennis K7BV @ Reflector
Take details and schedule from: www.mmmonvhf.de/latest.php?id=3760
LATEST NEWS from K7BV Dennis, dated 2011-04-17: Plans for the DN Grid Trip are coming along smoothly. Below is the revised schedule for the trip with a few changes included...but all the grids still covered. DN14 is now included as a result of moving the DN04 operation to a DN04/14 border. I have also noted a possible stop on the way home on the DM17/18 border if I can determine there is enough interest... we would have to rely on evening instead of morning rocks... Weather Alert: The current weather forecast for the first half of the trip includes rain and snow. The grid stops are generally at an elevation where snow will be possible. I hope this less than perfect weather will not slow me down or otherwise affect the schedule. If it does,

I will immediately get the word to Barry KS7DX so that he can post that news... 2011-04-19: My cancer doc today gave me the final green light to make the trip so my wife and I will depart as planned early Tuesday AM. The weather forecast for the first grid stops continues to be unfavorable but I will do my very best to deal with whatever Mother Nature has to throw at me. SO CHECK OUT FOR DENNIS....

** 6m from 5W0GJ in AH36un **

In order to provide the most possible advance time for stations to get ready, I am now announcing the upcoming 6m EME DXpedition from the northeast corner of Savai'i Island, Samoa during the final week of August, 2011. License and airline tickets are now in hand.
The planned operation schedule, DXpedition details and Google Earth photo of the operating QTH are shown on my web page:
http://www.bigskyspaces.com/w7gj/Samoa2011.htm
As you can see on the above website, any contributions are gratefully being accepted. Last year's operation from 3D2LR resulted in contacts with 52 different stations via 6m EME (26,000,000 miles' worth of contacts), and there are more and larger stations QRV now, so I sure will do my best to try to better that record...

** KD5ZZK/P on SOTA W5/MA-001 in EM35ee **

Tuesday 26th April 2011 15:00Z KD5ZZK/P on SOTA W5/MA-001 in EM35ee, 50.125-ssb, My first activation attempt.
SOURCE: (Posted by KD5ZZK) via Andy N8OFS GOT6??? direct to MMMonVHF

** VE9AA qrv in May as Newfoundland, as VO1TTT/M **

I will be active aprox May 7-16th from many grids all across VE9, VE1 and (mostly) Newfoundland, as VO1TTT/M using 100w and a large vertical (HS-1800/Pro). This will be holiday style and not a dedicated expedition, but I will probably call CQ beacon style while in motion (QRG to be determined) QRV from 40m thru 2m, mostly CW and concentrating on 6m. May also monitor 28.885MHz when no 6m prop. No Internet access while mobile. 73

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php) to the next MMMonVHF Newsletter will be next wednesday 2359 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the VHF-DX-Portal MMMonVHF and as well by a lot of free usable HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats

like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and News **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

GB2RS NEWS

Sunday 24th April 2011

The news headlines:

* Royal Wedding Prefix NoV deadline looms

* QSL arrangements for Royal Wedding Prefix

* Radio Spectrum for the London 2012 Olympic and Paralympic Games

The deadline for UK amateurs to apply for a Royal Wedding prefix expires at 6pm on Tuesday 26 April. If you want to be able to use GR, MR or 2R, according to your licence type, you must apply for a free Notice of Variation before that time. Details are on the Society's website at www.rsgb.org.uk/weddingcall. All NoVs will be provided by close of business on 28 April. Please note that no postal applications can be accepted and all NoVs will be sent by e-mail.

As the Royal Wedding prefix GR, MR and 2R replaces the traditional regional locator for G, M and 2 callsigns, it has been necessary for the QSL bureau to create a temporary special sub group to handle the expected large influx of cards. Martin Coles, G0VXC has kindly accepted the challenge of handling GR, MR and 2R calls. NOV holders wishing to receive incoming cards must deposit separate, C5 size, stamped and numbered envelopes with him, clearly showing the special callsign in the top left hand corner. Please be advised that in line with conventional GB cards, special Royal Wedding QSLs will not be re-directed via the home callsign or QSL manager, even if it is written on the card. Contact details for Martin, G0VXC are as per the RSGB Yearbook and RSGB website.

As expected, the RSGB has been approached by Ofcom to help determine sections of the 70cm amateur band that could be released for a limited period around the London 2012 Games next year. As a secondary user of the band, we as radio amateurs have no specific rights to any of those frequencies. Rather than just imposing changes, Ofcom has approached the Society in the spirit of cooperation to work together to solve the problem. The RSGB intends to work constructively on this matter to reach agreement with Ofcom on the segments that can be released on a temporary basis. Ofcom has given clear and unambiguous assurance that the segments used will be returned once the London 2012 Games are over. The RSGB is looking closely at how the spectrum is used in the designated geographical areas in and around London, Weymouth and South Essex in order to minimise the impact. We will be responding to Ofcom

shortly. The RSGB's response is being coordinated within the RSGB Spectrum Forum by Murray Niman, G6JYB.

The RSGB and BATC have worked together over the last couple of years to webstream the Society's AGM via live video. BATC again offered the facility this year. The RSGB has considered its position and has reluctantly taken the decision that this year it would not be prudent to go ahead with live streaming. BATC has accepted the Society's position on this but hopes to be able to offer the Society the facility again in 2012. The RSGB Contest Committee holds short evening contests each week, in which individuals compete and can also build up a score for their Affiliated Society. These take place on 80m on various modes, and also on bands from 6m to 3cm. The Committee is pleased to announce that the SHF contests, covering 13cm, 9cm, 6cm and 3cm, have been extended from 2 hours to 2&#65533; hours because of their increasing popularity. Please go to www.rsgbcc.org for more information.

We have been made aware of a scam that is currently being operated via email to obtain money from unsuspecting radio amateurs. An email, purporting to be from a well known amateur and signed with that amateur's first name, explains that they have been mugged in some foreign city, losing passport and money. Needless to say, it requests financial support to get the amateur out of difficulties. Several different prominent callsigns have been used by the scammers. Members may like to be aware of this, so that they can ignore such bogus requests.

The RAIBC audio reading team has updated the Foundation Licence Course talking book to the latest edition of Foundation Licence Now. The disks are produced with the permission of RSGB for the use of anyone with visual impairments, text reading difficulties or disabilities that restrict the ability to read printed material. The disks are available post free for the use of VI and dyslectic students and all the RAIBC ask in return is a small donation to funds to cover the cost of the disk and packing and to further their work for amateurs with disabilities. RAIBC has an expert team with experience of assisting amateurs with disabilities and if you require any help in a personal capacity or as an instructor please contact the RAIBC Helpline on 08000 141 743 or email russell.bradleyg0okd@ntlworld.com. Full details of RAIBC Services and activities are available at www.raibc.org.uk. The RAIBC would like to thank the authors of the books for the excellent material and the RSGB for permission to copy them to audio format.

A new QSL sub manager has been appointed for the G0V series. John Joll, G0TQT now holds both the G0U and V series as a single group. Details can be found on the RSGB website. G0V call holders need to send new envelopes to John as soon as possible. The bureau has recently learned that the family of the former manager, the late Peter Eames, M0AXD, returned all SAEs to the originators direct and there are none available to transfer.

And now for the details of rallies and events for the coming week

We are not aware of any rallies taking place over the Easter weekend, 24 and 25 April.

The Dambusters Hamfest will take place on 1 May at Thorpe Camp Visitor Centre, Coningsby, Lincs LN4 4PE. Entry is £3 and under 12s are free. There is free parking and overnight camping is available. The doors open at 10am and there will be an RSGB bookstall.

Monday 2 May sees the Dartmoor Radio Rally take place at Tavistock College, Crowndale Rd, Tavistock, Devon, PL19 8DD. Doors open at 10.30am and there will be trade stands and a bring & Buy. More details can be obtained from Peter, M1AYI on 01822 860277. Now for the news of special events

The Spirit of Speyside Whisky Festival will take place from 28 April to 2 May. Moray Firth Amateur Radio Society is celebrating this event by running three Special Event stations. GB3SWF will be located at Strathisla distillery, GB2SWF will be at the Craigellachie Distillery and GB4SWF will be at Cragganmore Distillery. A commemorative QSL card will be sent to all stations that contact the club during the weekend.

Sands Contest Group is running a special event station to celebrate the Royal Wedding between Prince William and Kate Middleton. Weather permitting they hope to run four stations using the callsign GB4HRH. They will be on air between 10am and 5pm on Saturday 30 April and Sunday 1 May. All QSL cards should be sent as EQSL. Details are available on QRZ.com.

Tamworth Amateur Radio Society will be operating GB1WK on Friday 29 April from 2pm hours to celebrate the wedding of Prince William to Kate Middleton. Operation will be on HF and 2m.

A team of GMDX members will activate Lunga in the Treshnish Isles 28 April to 1 May. Treshnish Isles are one of the rarer British IOTAs, EU108, and Islands Of Scotland Award NH17. There will be two stations on the air from Thursday 28 April through to Sunday 1 May. Equipment will include K3s, amplifiers and verticals near the waters edge. Operation will be on the 10m to 80m bands using CW, SSB and RTTY. QSL cards should be sent direct to MM0BQI. Bureau cards should be requested from gb5ti.qsl@gmail.com. Cards will sent out in June.

GB4FPR will be on the airwaves for Marconi Day on 30 April. In addition to the normal amateur frequencies they will also be transmitting on 502 to 503kHz CW, replying on the same frequencies to suitably equipped stations and crossband to 3570 or 7030kHz for non suitably equipped stations. Signal reports are welcomed and QSLs should be sent to M0BZZ direct or via the bureau.

M0HAZ & Thorpe Camp Museum ARG will be active on 5MHz from the WW2 Museum on 30 April from 9am to 1pm using CW and from 1pm to 5pm on SSB. They will be using the callsign M0HAZ/A/TCM and will be looking for SINPO reports. For more information please go to www.m0haz.btck.co.uk.

Ballymena ARC will be participating in the Steam Traction Rally at Shanes Castle, Antrim on 1 and 2 May. They will be putting on displays of amateur radio for the public as well as activating the castle as part of castles and stately homes on the air Northern Ireland. The club will be using callsign GN4KPT, utilising all modes and bands.

On Saturday 30 April, subject to weather for landing, two members of the Barry Amateur Radio Society will be activating a Marconi Day International Special Event Station from Flatholm Island located in the Bristol Channel, which is IOTA reference EU 124. They plan to operate on many of the HF bands and perhaps also via amateur satellites when access is possible using the callsign GB4MBC. On Friday 29th and Sunday 1 May also look out for them using the club callsign GB4BRS/P. Further details will be posted on QRZ.com. And now the HF DX news compiled from 425 DX News and other sources

Mirek, VK6DXI will be active as 9M8DX/2 from Kuala Lumpur, West Malaysia on 25 to 30 April. This will a business trip with some CW activity during the local evening hours. QSL via SP5UAF.

Francois, ON4LO will be active on 10 to 40m SSB as F/ON4LO/P until 4 June. He plans to operate from a few lighthouses during his trip. QSL via his home callsign, direct or bureau.

Ben, DO1BEN and Barbara, DO1IQ will be active as OZ/homecalls from Lolland Island, which is IOTA reference EU-029, until 30 April. They will operate SSB and some RTTY and PSK31 on 10 to 80m. QSL for both via DO1BEN, either direct or via the bureau.

Look for Noel, OO4O to be active as OZ/OO4O from Fyn Island, which is IOTA reference EU-172, between 1 and 6 May. He will operate mainly SSB on the HF bands. QSL via the Belgian QSL bureau and LoTW.

The XF2P expedition to Isla de Lobos, which is IOTA reference NA-221 has a website at http://xf2p.puebladx.org. Twelve operators will be active on 80, 40, 20, 15, 10, 6 and 2 metres between 29 April and 1 May. QSL via XE1P, direct or bureau.

Now the contest news

The IRTS 2m Counties Contest takes place for two hours on Easter Monday, 25 April between 1300 and 1500UTC. Exchange a report and serial number. Irish stations also give their county. In each of the five entry categories there are awards for the top station outside of EI. Although the outside-EI awards usually go to someone in GI, several categories often attract no entries at all from outside of EI, which looks like a clear opportunity for certificate hunters to get themselves some wallpaper.

Tuesday 26 April sees two contests taking place between 1900 and 2130UTC. The first is the 50MHz UK Activity Contest. Using all modes the exchange is signal report, serial number and locator. The other contest is the SHF UK Activity Contest. Again using all modes on the 2.3GHz and up bands, the exchange is signal report, serial number and

locator.

The BARTG Sprint 75 Contest takes place on Saturday 30 April from 1700 to 2100UTC. The rules can be found on the BARTG website www.bartg.org.uk/index.asp. Look under the contest tab.

And now the solar factual data for the period from the 11th to the 17th of April, compiled by Neil Clarke, G0CAS on the 12th of April.

On the 11th a small sunspot appeared and grew rapidly into a complex group. This was joined by another complex group that rotated into view during the 13th. Between them they produced numerous C class solar flares every day. Other smaller groups were visible but they remained stable and quiet. Solar activity was low every day but increased to moderate levels on the 15th when an impulsive M1 solar flare took place. These solar flares had little effect on propagation. What they did though was to increase solar flux levels from 106 units on the 11th to 129 by the 15th. The average was 116 units. The 90 day solar flux average on the 17th was 103, that's two units up on last week. X-ray flux levels increased from B3 units to B6.2 by the 15th. The average was B4.9 units. Geomagnetic activity started at quiet levels but on the 12th the Ap index increased to 23 units due to the effects of a recurring coronal hole disturbance. This continued into the 13th when the Ap was 14 units but after that quiet conditions returned. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 300 kilometres per second on the 11th to 670 by the next day. Speeds then gradually declined back to 320 kilometres per second by the end of the period. Particle densities were low except for the 11th which saw an increase to 22 particles per cubic centimetre. Bz varied between minus 2 and plus 4 nanoTeslas on the quiet days and between minus 9 and plus 13 nanoTeslas during the 12th.

And now the solar forecast. This week the quieter side of the Sun is expected to be rotating into view. Saying that, solar activity should be low on most days and a slight chance that activity could increase to moderate levels, especially during the next couple of days. Solar flux levels should decline and be around the 110 mark by the weekend. Geomagnetic activity is expected to be at quiet levels at first but towards next weekend a coronal hole disturbance could arrive and consequently activity will increase. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 1600 and 2100 hours. Sporadic-E should take place on some days where small openings could occur as we are still at the start of the summer season.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 25 April Gloucester Amateur Radio & Electronics Society is operating at Crickley Hill. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 25 April South Birmingham Radio Society is closed for Easter Monday. Contact Don, on 0121 458 1603.

On Monday 25 April South Normanton Alfreton & District Amateur Radio Club is closed for Easter Monday. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 25 April Stratford Upon Avon District Radio Society is having an informal evening. Contact G0CHO, on 01608 664488.

On Tuesday 26 April Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 26 April Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 27 April Hinckley Amateur Radio Society is having a workshop evening. Details from John, M0JAV, on 07836 731544.

On Wednesday 27 April Lincoln Short-Wave Club is having a talk on the future of amateur radio by RSGB President Dave Wilson, M0OBW. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 27 April Midland Amateur Radio Society is having laptop computer training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 27 April Telford & District Amateur Radio Society is having a talk on the history of telegraph keys by Roy, G4WPW et al. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 28 April Leicester Radio Society is having a talk and demo on digimodes including Airlink Express by Kevin, G1GEV. Contact Alex, G8FCQ, on 0753 120 1640.

On Thursday 28 April Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk. On Thursday 28 April South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 29 April Coventry Amateur Radio Society is having a radio workshop evening. Contact John, G8SEQ, on 07958 777363.

On Friday 29 April Lincoln Short-Wave Club is keeping the shack open all day as a Royal Wedding- free zone. For more information contact Pam Rose, G4STO, on 01427 788356.

On Friday 29 April Nunsfield House Amateur Radio Group is celebrating the Royal Wedding. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 29 April South Birmingham Radio Society is having a construction evening.. Contact Don, on 0121 458 1603.

On Saturday 30 April Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 25 April Angel of the North Amateur Radio Club is closed. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 25 April Bolton Wireless Club is having a social get-together at The Three Pigeons. For details, send an email to boltonwireless@gmail.com.

On Monday 25 April East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Monday 25 April Sheffield Amateur Radio Club is closed. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 25 April South Manchester Radio and Computer Club is holding its monthly technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 25 April Thornton Cleveleys Amateur Radio Society is closed. Details on the web at www.tcars.org.uk.

On Tuesday 26 April Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Wednesday 27 April Hambleton Amateur Radio Society is having a demonstration of Peak test equipment by Tony, G8FLV. More information from Tony Wilson, G3MAE, on 01609 881530.

On Wednesday 27 April Hornsea Amateur Radio Club is having a talk by G3TLI. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 27 April Mid-Cheshire Amateur Radio Society is o the air and having an activity night. Contact Peter Paul Fox, G8HAV, on 01606 553401. On Thursday 28 April Grimsby Amateur Radio Society is having a talk on D-Star by Andy, G0VRM. Contact Cliff, G4YHP, on 01472 328 830.

On Thursday 28 April Ripon & District Amateur Radio Society is having a club night on the air. Details from Rob Hall, M0RBY, on 0787 608 5631.

On Thursday 28 April South Manchester Radio and Computer Club is having a talk on the Pickaxe chip by Dave, G4UGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 28 April Wakefield & District Radio Society is holding its AGM. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 29 April South Tyneside Amateur Radio Society will commence their weekend of operations at Souter lighthouse for International Marconi day. Details at www.starsradio.co.uk.

On Friday 29 April East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR THE SOUTH WEST On Monday 25 April Bristol RSGB Group is having a talk on meteor detection with the GRAVES radar by Dr Dave Knight, G3YNH. Details from Robin, G3TKF, on 01225 420442.

On Tuesday 26 April Blackmoor Vale Amateur Radio Society is having a talk on Clansman by Peter, M0PDM. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 26 April West Devon Radio Club is holding an open evening with visits and chats from local clubs. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 27 April Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 28 April Newquay & District Amateur Radio Society is having a talk on measuring VHF beam radiation patterns using Polarplot by Keith Holland, G3MCD. Contact Joe Bell, M6JOE, on 01726 891557. On Thursday 28 April South Bristol Amateur Radio Club is on the air. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 28 April Swindon & District Amateur Radio Club is closed. Contact Den, M0ACM, on 07810 317750.

On Friday 29 April Cornish Radio Amateur Club is operating GX4CRC at Perranarworthal Church Hall. Non members are welcome. Details from Steve, G7VOH, on 01209 844939.

On Friday 29 April North Bristol Amateur Radio Club is having an operating evening. More information from Dick on 01454 218362.

On Friday 29 April Torbay Amateur Radio Society has cancelled its 90/10 sale. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 30 April Cornish Radio Amateur Club is celebrating International Marconi Day GB4IMD. Details from Steve, G7VOH, on 01209 844939.

On Sunday 1 May Cornish Radio Amateur Club is running special event station GR4CRC at Perranporth airfield. Details from Steve, G7VOH, on 01209 844939.

NEWS FOR WALES On Monday 25 April Llanelli Amateur Radio Society is closed. Contact Craig, MW0MXT, on 01269 840292.

On Thursday 28 April Marches Amateur Radio Society is on the air, having a natter night and welcoming the return of Dave CTO's construction group. For more information contact Dave, MW0AYM, on 01691 777242.

SARL NEWS - SUNDAY 24 APRIL 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

SOCIKWA REAPPOINTED TO ICASA COUNCIL

ARISSAT SILENT ON YURI'S NIGHT

SARL MEMBERSHIP NOW AT 1533

ATTEND DAYTON HAMVENTION VIA WEBCAST

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SOCIKWA REAPPOINTED TO ICASA COUNCIL

The Minister of Communication has reappointed Dr Marcia Socikwa to the Council of ICASA. After graduating at the University of the Witwatersrand, Dr Socikwa completed her postgraduate studies at City University and the University of Stirling in the United Kingdom. She has served as Acting Executive Director: Corporate Affairs, Deputy Chair of the Department of Communication Science and Senior lecturer and Section Head of the Telecommunications Programme at the University of South Africa. She was involved in projects commissioned by the International Telecommunications Union (ITU) and USAID.

She served in national policy review committees and in the ICT Empowerment Charter working group. She has contributed towards projects dedicated to increasing regulatory capacity in the region through a regional body known as Nettel@Africa. She has also presented several papers on a variety of regulatory issues, ranging from interconnection to trade in e-commerce.

Dr Socikwa chaired the recent public hearings on the draft Frequency Spectrum Regulations.

ARISSAT SILENT ON YURI'S NIGHT

It was disappointing that ARISSat did not transmit from the International Space Station to celebrate Yuri Gagarin's first flight of man into space. Many antennas were pointed skywards but nothing was heard. Lou MacFadin, the principal designer and builder of ARISSat, recently had a teleconference with his Russian colleague. It emerged that the Russian suit battery that was intended for use on ARISSat was used during testing both on the ground and on board the International Space Station when it first arrived. When it was tested prior to the planned April 12 operation, it was discovered that the battery was low on charge.

The suit's battery is specified for only five cycles of charge. It was decided to not recharge the battery at this time in order to keep the number of cycles as low as possible and thus saving the battery for the actual mission. That deployment is currently scheduled for July 26.

MacFadin said, 'We are still trying to get more information on the storage status and the battery health from the Russian team.' For more on ARISSat, visit www.amsatsa.org.za.

SARL MEMBERSHIP NOW AT 1 533

This week we welcome the following new members to the SARL. We trust that our association will be mutually beneficial:

ZS1ABV - Anthony van Tonder ZSL1014 - Gabriel Swart ZSL1016 - David MacGregor ZU5GB - Graham Bowles ZR1LSK - LS Kirstein

With the new financial year ahead, we invite non-members to join now and enjoy member benefits free of charge during May and June. The fee for ordinary members is R380 which is payable on application. Details of the fees for other classes of membership can be found on www.sarl.org.za. Click on 'members' on the left-hand side of the home page.

ATTEND DAYTON HAMVENTION VIA WEBCAST

Tom Medlin, W5KUB, says that he will once again be streaming live audio and video from the Dayton Hamvention.

The W5KUB.com webcast from Hamvention has become very popular over the years, especially with amateurs who have never attended Hamvention or have no way to get there. Medlin says there are viewers in over 150 countries and during the 2010 Dayton Hamvention broadcast, he had over 50 000 radio amateurs watch and follow the entire show.

During this year's netcast, Tom will also be giving away over $5000 in prizes to lucky viewers. Some of the prize donors include Heil Sound, Kenwood, Yaesu, MFJ, Kantronics, LDG and the ARRL. That alone is something that you won't want to miss.

So if you cannot make it to Hamvention 2011, you can attend from 18 to 22 May thanks to Tom Medlin, W5KUB, and his crew at W5KUB.com.

NOMINATIONS FOR 2011 NSN RADIO AMATEUR OF YEAR AWARDS NOW OPEN

Nominations for the 2011 Nokia Siemens Networks Radio Amateur of the Year Awards are invited. There are three awards:

Garth Milne Technical Innovation Award

The award is made for the support, development and application of technological innovation in amateur radio in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or tertiary education institution.

NSN Radio Amateur of the Year Award

The award is made for the support and development of the amateur radio service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a person who has given of his or her expertise and time to the promotion of amateur radio in South Africa.

NSN Amateur Radio Community Service Award

The South African Amateur Radio Development Trust annually recognises a radio amateur or a group of radio amateurs for service to the community.

Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

Nominations close on 25 May 2011 and the awards will be presented on 8 June 2011 at the Midrand Protea Hotel. For full details and a nomination form visit www.amateurradio.org.za.

NO FORUM IN THE PUBLIC HOME PAGE

Following an overwhelming decision at the SARL Annual General meeting to limit participation in the forum to SARL members from 1 July 2011, the Council of the SARL has decided to remove the active forum slot from the public home page. It will remain on the members' only home page.

Till the end June 2011 non-members will be able to access the forum by clicking on the forum link at the top of the public home page. If you are not yet a member and would like continue to have access to the forums, join now. Application forms and rates are available on www.sarl.org.za, select members on the left hand page menu.

RTA in CAPE TOWN

Diarise Saturday 7 May 2011 when the SARL Radio Technology in Action Symposium will be held at the Cape Peninsula University of Technology. As in previous years it will be a great event with a mixture of presentations covering technology in amateur radio as well as operational amateur radio.

Learn about field programmable gate arrays (FPGA): how they work, where you can use them, and how they are used in amateur equipment. This presentation will show you how to start using FPGA in your projects.

Find out why amateur radio is a valuable resource for further education and how you can enhance your enjoyment of amateur radio.

The day will cost members R50 and for non-members R70. This includes refreshments and a light lunch as well as participation in the lucky prize draws throughout the day.

You can pay at the door or register and pay online at www.sarl.org.za - select RTA on the left-hand menu.

CONTEST NEWS

It is with great pleasure that Eddie Leighton, ZS6BNE, announces the winners in the 3rd RaDAR Contest.

68 stations were logged during the contest. The last date for log submissions was 17 April and the following logs and scores were taken into consideration:

Home stations: ZR6NGB, 104 points ZS2EC, 38 points ZS6A, 40 points ZS6GRL, 32 points with a check log

Field stations: ZS6XT, 468 points ZS6AGF, 128 points

RaDAR stations: ZS6AG, 792 points ZS6BNE, 360 points ZS2J, 252 points ZS1AFU, 144 points

Many thanks to all that competed.

On a special note, the log submitted by Pieter, ZS6XT, is one of the most complete, neatest logs Eddie has ever seen. Pieter also did very well in the contest. Those QRP signals were AWESOME!

The overall winner was Anton, ZS6AG, who worked as a 'True RaDAR' station and QRP. Congratulations, Anton!

Anton was assisted by Nico, ZS6MAJ, as Anton's eyesight is not good. Anton and Nico climbed a hill, carrying their equipment to the top. Their log was also well documented.

Anton and Nico will be receiving RaDAR shirts sponsored by Eddie, ZS6BNE.

Results of the second SARL 80 m Club Championship Contest.

Only 4 logs were received for the contest.

1st West Rand ARC, ZS6WR, 20 points from 2 logs 2nd Antique Wireless Association, ZS0AWA, 5 points from 1 log Dirk, ZS6AKU, submitted a check log worth 10 points.

Looking at the combined scores for the January and March contests, the results look as follows:

1st West Rand, ZS6WR, 162 points and 11 logs 2nd Antique Wireless Association, ZS0AWA, 51 points and 5 logs 3rd PEARS, ZS2PE, 17 points and 1 log 4th Sandton, ARC, ZS6STN, 9 points and 1 log.

ZS3 Sprint.

The ZS3 Sprint, a phone and CW contest on the 40 metre band, will be on the air on Sunday 1 May 2011 and runs from 14:00 to 15:00 UTC. This is a fun activity to promote contacts between radio amateurs in the Northern Cape and radio amateurs in Southern African countries. The exchange is RS(T) and provincial or country abbreviation.

The scoring for ZS3 stations is 1 point for a contact with a ZS3 station and 2 points for a contact with stations in other ZS call areas or Southern African countries. For stations outside ZS3, the scoring is 2 points for a contact with a ZS3 station and 1 point for a contact with stations own or other ZS call areas (excluding ZS3) or Southern African countries. Contacts with the Northern Cape ARC, ZS3NC, Namaqualand Aero Sport Association, ZS3FLY, or the Kalahari Karoo ARC, ZS3ARK, are worth 5 points each. Only one contact per station is allowed.

Log sheets shall be submitted within 7 days after the contest and can be sent by e-mail to zs3nc@qsl.net or by normal post to ZS3 Sprint, PO Box 1049, Kathu, 8446. The closing date for log submissions is 7 May 2011.

Marconi day celebrations.

The Boland Amateur Radio Club is airing a DX station with callsign ZS1BAK on Saturday 30 April, Marconi Day. The object of the station is to give amateurs and visitors the opportunity to experience this wonderful mode at first hand. The station will be on the air between 09:00 and 14:00 SAT from the Kuils River Voortrekker site. The preliminary frequencies are 3,520 and 7 020. Visitors are welcome to try their hand on different types of keys. The proceedings will close at 14:00 with a bring and braai. For more information contact Raoul, ZS1REC, at 082 466 4327.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Numerous C-class flares are taking place around sunspots 1193 and 1195 and the new sunspot 1196. The massive sunspot group 1193 stretches more than 130 000 km from end to end. Its leading dark core is more than three times wider than our entire planet. With such dimensions, you'd think the active region would be, well, more active;

but the behemoth is quiet, producing no more than a few minor C-flares over the past several days. So why is this giant so quiet? It has an uncomplicated magnetic field with relatively little mixing of polarities. Explosive magnetic reconnection is simply not happening. The situation could change if the sunspot's continued growth results in a tangling of magnetic field lines. For the people doing their own frequency predictions, the expected effective sunspot number for the week is about 60.

With the increase in the solar flux the improvement of the DX conditions are also very noticeable. DX openings are now once again occurring on a daily basis and even 6 m is showing signs of life.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

30 April - Marconi Day, also ZS1BAK on the air. 30 April - West Rand Amateur Radio Club flea market from 12:00 CAT. 1 May - ZS3 Sprint runs from 14:00 to 15:00 UTC a phone and CW contest on the 40 metre band. 7 May - RTD in Cape Town. 18 to 22 May - Follow Dayton Hamvention via W5KUB.com. 25 May - Closing date for nominations for NSN awards, visit www.amateurradio.org.za. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Hester van der Walt and checked by George, ZS6NE.

Thank you for listening, 73.
/EX

A. G. Lisi's E8 model may be showing us what both our space & time really are.

(Click link below.)

http://www.amperefitz.com/e8.htm

Crystals and chemical compounds are tied up with group theory which best explains (mathematically) exactly why they form the particular way they do.

Lisi's E8 model is a group theory model that may be showing us why our space forms the way it does via frequencies that cannot be directly measured from inside of our particular space-time realm (Wheeler - Feynman).

Radio News Bulletin
Sunday 24th April 2011

Up-Coming IRTS Contests

1. 2m Counties Contest Monday April 25th 2011. From 2pm till 4pm. Log to be submitted by May 25th.

2. CW Field Day Sat 4th/ Sun 5th June 2011. Log to be submitted by July 5th.

Calling all active VHF and Higher operators we are trying to get the 2010 Squares table finalized on IRTS.ie. So can anyone that was active on the VHF bands last year please send your Square totals or your log and I can work it out for you to EI2GLB /at/ hotmail / dot/.com . To see the squares table go to www.irts.ie and click on vhf/uhf/shf on the right side of the home page.

Theory Examination

The next theory examination for the Harmonised Amateur Radio Examinbation Certificate (HAREC) will be held on Thursday, 7 July next at 2.00 p.m. in the ComReg offices in Dublin. The examination may also be held on that day at other centres if warranted by the number of candidates.

Full details, including entry procedure and examination fee, are available at www.irts.ie/exam

---

Echo Ireland - new issue

The latest issue of Echo Ireland includes a full report on the society's recent annual general meeting, along with a copy of the Committee Report and accounts which were submitted to the AGM; a list of awards presented at the AGM is also included.

Anthony EI2KC has taken over the "HF Happenings" column of the newsletter, and his first report includes a roundup of recent DXpeditions, a report on propagation conditions and news of upcoming DXpeditions and other rare-DX activations.

The newsletter also includes a report by Jack EI7HO of his magnetic loop experiences, which will be of particular interest to those with restricted space for antennas; also included is a report by Lisa EI9GSB on the CASHOTA ("Castles and Stately Homes on the Air") activation of Blackrock Castle in February of this year.

All of this and plenty more - including club news, contest results, upcoming contests and rallies - can be found in the April Echo Ireland, which will be posted to members early this coming week.

Digital Modes Presentation

Mike EI3DY made a presentation dealing with the digital modes used by radio amateurs at a recent meeting of South Dublin Radio Club. The modes covered ranged from RTTY to the more recent JT65 and WSPR modes. Mike illustrated his presentation with the equipment used to operate these modes, including some of the equipment used before computer sound cards became a key component of digital transmission and reception.

The presentation also details of the propagation reporting web sites of PSK Reporter and the "whisper" Weak Signal Propagation Reporter. Read about it in the latest edition of ECHO Ireland.

Introduction to Amateur Radio the practical way

The Mayo Radio Experimenters Network plan on holding a series of practical, hands on, open days throughout the summer months, commencing Sunday May 8th. The events will start at 13.00 approx (weather permitting) and will take place on the following dates: Sunday May 8th Sunday June 12th Sunday July 10th Sunday August 14th Sunday September 11th Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence. The locations will be chosen in the Mid Mayo area in order to encourage attendance from all parts of the County or further afield. If you would like further details including full details of locations please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/ eircom/ dot/net) , email David Hatfield EI3ECB on ei3ecb/ at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

Duhallo Voice Repeater

The Duhallow Voice Repeater EI7SMR is back on air since Monday last the 11th of April 2011. The repeater which is located on Musheramore Mountain, in north Cork was off air undergoing repairs and is now

operating with a new antenna installed on site. EI7SMR operates on RU74, 430.925mhz, input is 438.525mhz (7.6mhz split) and requires a ctcss tone of 103.5Hz.

Louth Erne Rally Thanks

Many thanks from Lough Erne Amateur Radio Club to the 300 who set up, attended, traded or displayed their amateur radio interests at our Pearl Anniversary Rally in SHARE last Sunday. Nevada, the big amateur radio retailer donated an Alinco DJ 596 E hand held transceiver for the raffle. It was won by Phillip Hosey, MI�MSO and EI8GPB, the efficient and effective Secretary of West Tyrone Amateur Radio Club.

Peter Grant, EI4HX and Pat Fitzpatrick, EI2HX were there with the IRTS stand. Angus Annan MM1CCR represented the RSGB. He presented the Northern Ireland Club of the Year Award to the club's youngest member, Gemma Nelson Mi6GDN, and Congratulations Certificates to nine new Intermediate licensees. It was good to see Willie Long, EI6IA in attendance.

A full report with pictures by Ken O'Reilly Gi7UIP will be sent to Echo Ireland.

Old Time Amateur Radio

Cliff Corderoy Gi4CZW, who was a founder member of Lough Erne Amateur Radio Club, was in attendance at Sunday's Pearl Anniversary Rally in SHARE.

Cliff ran his first RAE course in Fermanagh Technical College back in 1975. The Club came out of that course and others that followed. Cliff was Secretary when the Club held its first rally in April 1982. On another table, Jimmy Lappin Gi0OND displayed material from the Radio Amateur Old Timers Association. Terry Barnes GI3USS was also in attendance at the SHARE rally.

International Marconi Day

International Marconi Day takes place this year on Saturday 30th April. The Howth Martello Radio Group will be participating once again as an award station using the call-sign EI0MAR. For more information please visit the club's website http://crac.g4usb.net/cracblog/

EI0MAR operates from the Martello Tower overlooking the East Pier in Howth.

North Cork Radio Group will be active from the 29th of April through 2nd of May and during International Marconi Day.

The call used will be EI-0-IMD from the Mizen head Signal Station, Goleen in West Cork and the duration will be 24hours. NCRG will also use EI1NC/P for the remainder of the weekend until May 2nd. Members attending are Anthony EI3GAB, Pat EI2GHB, Padraig EI5GEB and Claus EI7JZ although other members may operate in short burst while visiting the station.

The Cork Radio Club will use the callsign EI5IMD will be activated from Brow Head near Crookhaven in West Cork to celebrate the 110th anniversary of the setting up of Marconi's Wireless Station in 1901.

Ballymena ARC

Ballymena ARC (GI3FFF) will be participating in the Steam Traction Rally, at Shanes Castle, Antrim from the 1st May till the 2nd May 2011. They will be putting on displays of amateur radio for the public, as well as activating the castle as part of CASHOTA-NI (castles and stately homes on the air-ni). The club will be using callsign GN4KPT, utilising all modes and bands, please feel free to call in if heard. See http://gi3fff.synthasite.com/ or www.cashota-ni.org

---

DX News

PY2ZA is travelling to the Island of Trindade and hopes to land there around 29 April. He plans to use the callsign PP0T and will be there until sometime in June. The only inhabitants on the island are 32 Brazilian Naval personnel who man a Naval Base there and PY2ZA will be dependant on the Brazilian Navy for transport to and from Trindade. This is quite a rare DXCC entity and also counts for IOTA with the reference SA-010. QSLs for this expedition go via EB7DX.

The special callsign R25CH will be activated up to 29 April from different districts in the Bryansk area to mark the 25th anniversary of the Chernobyl nuclear disaster. QSL info is via RW3YC.

Prefixes chasers will have the opportunity of several new ones as UK stations have the option of using the prefixes GR, MR and 2R to celebrate the upcoming Royal Wedding in London. The prefixes will appear on the bands during the period 29 April to 9 May.

Yuris YL2GM will be active from Azerbaijan using the call 4K3AC from 25 April till 3 May. QSLs go via his home callsign.

A group of Scottish amateurs will be QRV from Lunga in the Treshnish Isles from 28 April till 1 May. This island group counts as EU-108 for the IOTA award. QSL manager for this one is MM0BQI.

A German team is at present on the Island of Phu Quoc in Vietnam using the call XV4YY. The IOTA reference is AS-128 and the QSL Manager is DH7WW.

UN - Special Event stations

UN50, UO50, UP50, UQ50 will be active in Kazakhstan from April/2011 то May 31/2011 - of 50th Anniversary of the first human flight to outer space which was done by Yuri Gagarin. To commemorate this event Kazakhstan information website "UN Amateur Radio News" together with Almaty Amateur Radio League have established a special award - "The Columbus of the Cosmos".

Solar Activity Heats Up

Sunspots have returned and they are crackling with activity. On February 15th and again on March 9th, Earth orbiting satellites detected a pair of "X-class" solar flares--the most powerful kind of x-ray flare. The last such eruption occurred back in December 2006. Another eruption on March 7th hurled a billion-ton cloud of plasma away from the sun at five million mph (2200 km/s). The Coronal mass ejection (CMT) delivered a blow to the earth's magnetic field. It seems that solar cycle '24' in now on its way. Is this good news for DX'ers?

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

:Product: Weekly Highlights and Forecasts
:Issued: 2011 Apr 26 1649 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
18 - 24 April 2011

Solar activity ranged from low to moderate levels. Region 1195 (S16,
L=129, class/area Ekc/340 on 22 April) produced the majority of the
flares observed during the period. Solar activity from 17-21 April
was limited to C-class or lower x-ray flares. Activity increased to
moderate for a day on 22 April as Region 1195 produced two M-class
flares, an M1.8/SN at 0457Z and an M1.2/1N at 1553Z. Neither
significant radio emissions nor coronal mass ejections (CMEs) were
associated with these flares. Activity returned to low levels, with
only C-class or lower flares observed for the remainder of the week.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit began
the period at moderate levels and fluctuated between normal and
moderate levels each day during the week.

Geomagnetic field activity ranged from quiet to minor storm levels
during the week. The week began with with a 24 nT sudden impulse at
18/0634Z followed by unesttled to occasionally active levels at mid
latitudes, and minor storm periods at high latitudes. The
disturbance was attributed to the passage of a CME. Activity
decreased to quiet to unsettled levels on 19 April. Minor storm
levels returned on 20 April, briefly reaching major storm levels at
high latitudes with the onset of a coronal hole high speed stream
(CH HSS). Solar wind speed at the ACE spacecraft peaked over 540
km/s mid-day on the 20th, then gradually decreased through 23 April.
Quiet to unsettled levels prevailed on 21-24 April as the CH HSS
effects subsided.

Forecast of Solar and Geomagnetic Activity
27 April - 23 May 2011

Solar activity is expected to be at low levels through the period
with a chance for isolated M-class flares until Region 1195 rotates
```

off the visible disk on 01 May.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels during most of the period. However, an increase to moderate to high flux levels is possible from 02 - 05 May, 11 - 13 May and 19 - 22 May in response to coronal hole high speed streams.

Geomagnetic field activity is expected to be unsettled to active on 30 April - 02 May, 08 - 10 May, and 18 - 19 May in response to geoeffective recurrent coronal hole high speed streams. The remainder of the period is expected to be quiet.

427. The ARRL Contest Update for April 27, 2011

April 27, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Find Your Mini-Meter - VHF, 2 GHz, and EME Contests
- New England, FL, NE, and IN QSO Parties
- More Dayton Doings
- Newly Passed - Antenna Zoning by K1VR
- Visalia On Display
- 160 Meter and RTTY Roundup Articles Imminent
- HAMCALC - Needs Some Advice
- To Tube or Not to Tube
- Uncle Leo to All

NEW HF OPERATORS - THINGS TO DO

It's time to see if those sunspots are up to snuff - give the Ten-Ten
International Spring CW Contest a try. This is open to Technician class
licenses and most CW speeds are lower than in the Big Ones. While
you're at it, pick up some of the rarer New England states in their
regional QSO party.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

As entertaining as K5KG may be, his QTH is Siesta Key, not Fiesta! Ted,
NH6YK observes that the cloud over Juan de Nova referred to last time
is not likely volcanic - and he should know, living in Volcano, Hawaii.
And Kazu JK3GAD/M0CFW points out that the example call sign of a
Japanese ham operating in Russia under the new CEPT agreement is
incorrect as Japan is not a CEPT member. Nice to hear from these
sharp-eyed readers.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section
```

30 April - 1 May

- VHF Spring Sprints--432 MHz
- 2 GHz and Up World Wide Contest
- Worldwide EME Contest--5.7 GHz
- Nebraska QSO Party
- Florida QSO Party
- BARTG 75 Sprint
- ARS Spartan Sprint--CW (May 3)

May 7-8

- SNS and NS Weekly Sprints--CW (May 6)
- Microwave Spring Sprint--902+ MHz
- Worldwide EME Contest--2.3 GHz
- Ten-Ten Spring CW Contest,
- 7th Area QSO Party
- Indiana QSO Party
- Radio Club of America QSO Party--Phone
- ARI International DX Contest
- New England QSO Party

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The 16th VHF Weak Signal Group banquet will be held on Friday, May 20th, at the Doubletree Hotel in downtown Dayton. The speaker will be Dana Whitlow K8YUM, presenting "Noise at Arecibo- it's not just the Coqui". For more information contact Tony WA8RJF <WA8RJF@ARRL.net> directly. If you're still trying to decide whether to go to the Dayton Hamvention, Ken K4ZW reports that Tim K3LR will provide an overview of the myriad of contest related activities planned in an upcoming free PVRC webinar <http://www.pvrc.org/> on May 2. QRP operators can attend the Four Days In May <http://www.fdim.qrparci.org/> event, as well, with special programs and streaming video of the Thursday build-along exercise.

Researchers at the University of Technology in Sydney, Australia have created sheets of graphene <http://inhabitat.com/new-graphene-super-paper-is-10x-stronger-than-steel/> (a planar array of carbon atoms) ten times stronger than steel (under tension, presumably). It only a matter of time until there are golf clubs made from this new material - can tower sections be far behind?

Elecraft has announced the XG3 <http://www.elecraft.com/elecraft_prod_list.htm>, a miniature, programmable, 160-2 meter (and higher) synthesized RF signal source that generates RF with highly accurate levels of -107 dBm (1 uV), -73 dBm (50 uV or S9), -33 dBm (S9+40), and 0 dBm. Built into a T1-sized enclosure, the XG3 runs on an internal 9-V battery or from an external power supply. (Thanks, Wayne N6KR and Eric WA6HHQ)

The Boring ARC has decided to "sponsor" a summer Stew Perry Top Band Distance Challenge <http://jzap.com/k7rat/stew.html> (TBDC) event. This is a great time to get some activity on the band and take advantage of

the good propagation to the southern hemisphere. The date will be June 18th and 19th with the same 1500 UTC start and stop times. Scores will be compiled in a similar way to the existing PreStew "warmup" in October. Look for rules and scoring procedures on the Stew Perry TBDC web site. (Thanks, Brian N9ADG)

Technical papers are being solicited for presentation at the 30th Annual ARRL and TAPR Digital Communications Conference to be held September 16-18, 2011 in Baltimore, Maryland. Please send papers by email or in print to Maty Weinberg <maty@arrl.org> at the ARRL, 225 Main St, Newington, CT 06111.

If new home construction is using a metalized insulation board
<http://www.pcpro.co.uk/blogs/2011/04/14/whats-killing-your-wi-fi-wrapping-your-house-in-t
in-foil/>
it may be a hindrance in that it keeps WiFi and other wireless signals from making it outside. It might also be a boon to hams in providing a modicum of shielding to obnoxious radiated emissions from appliances and computer gear. It won't do anything about conducted emissions but it could also help keep our signals out of audio gear and the like. As an added bonus it keeps the aliens from reading your thoughts!

Dr Megacycle, aka Jim KK6MC, provided some resources for and studies of learning the code - a most important skill for the successful radiosport practitioner. He refers us to the Koch Method <http://hfradio.org/koch_1.html> which is summarized in a chapter of the ebook "The Skill of Radio-Telegraphy
<http://www.qsl.net/n9bor/images/The%20Art%20&%20Skill%20of%20Radio-Telegraphy%203rd%20edi
tion%204-02.pdf>".
There is an online trainer <http://lcwo.net/> with exercises for improving one's skill even if experienced with CW.

As long as we are on the subject of copying CW, Rich KL7RA notes that a recent biography of Johnny Cash mentions the singer as having been a CW circuit operator for the U.S. Air Force during the 1950's with a top speed of about 45 WPM. Rich goes on to wonder why a guy would give up copying code for $125 per month for a musical career worth "$1 million billion...seems odd you would give up a cool CW job...but to each his own."

The rules for the 2011 CQ WW VHF Contest, July 16 - 17, have been posted on the CQ VHF Contest website <http://www.cqww-vhf.com/>. If you missed the results for the 2010 contest in the February issue of CQ, the write-up, scores, and expanded results are also on-line there alongside records updated by Curt, K9AKS. (Thanks, CQ WW VHF Contest Director, John W1XX)

Kirk NT0Z has released a new book, "Stealth Amateur Radio <http://www.stealthamateur.com/>" and expects it to be available for the Kindle ebook reader soon. Kirk also notes that moving his auto-tuner into the backyard near his antenna helped to reduce RF noise pickup and common-mode current on his feed line that was causing RFI

inside. You may find that trick of use at your QTH.

Brian NJ1F wrote to let us know that the Yankee Clipper Contest Club <http://yccc.org/> has elected new officers and the full slate can be viewed on their web site. Similarly, Jack W6FB reported that the Northern California Contest Club <http://nccc.cc/> has new leadership, as well. Thanks to the volunteers who make our organizations go!

If you've been wondering where the Ukrainian hams have gone, they've lost some HF frequencies lately - 10100-10150 kHz (all of the 30 meter band) and 14250-14350 kHz. They've also lost a fair amount of UHF and microwave spectrum. (Thanks, Alex UY0LL)

If you want to keep up with the latest announcements about WRTC 2014, the organizers have set up a news reader feed <http://wrtc2014.org/feed/>. (Thanks, WRTC-2014 Co-Chair, Randy K5ZD)

Web Site of the Week - Finished just in time for Dayton, the 2nd edition of "Antenna Zoning" by K1VR is mostly new. Fred claims he's learned something in the 10 years since the last edition with new approaches to CC&R problems (now a whole chapter), plus a complete application for a TV antenna that would otherwise be forbidden by homeowner association rules. There is more on justifying the need for height, presenting at a hearing, and dealing with the press. Look for the sections on drafting a local ordinance, or state statute. VE6SH added a whole new chapter on Canadian regulation, too.

WORD TO THE WISE

BIP/BOP - No, those are not the sound of water dripping off your feed lines! BIP - Both In Phase - and BOP - Both Out of Phase are the phase relationships when driving a stack of two horizontally-polarized Yagi antennas. BIP aims your signal towards the horizon while BOP creates a high-angle lobe for working short-skip or high-angle signals. BIP-BOP switching is explained in this Array Solutions application note <http://www.arraysolutions.com/Products/stackmatchbop.htm> for modifying their popular StackMatch switching system.

==> SIGHTS AND SOUNDS

The recent International DX Convention in Visalia was a big hit for all as shown in these great photos in an online album <https://picasaweb.google.com/Hector.xe2k/VISALIA2011> by Hector XE2K and the photos elsewhere in this issue by Bob N6TV.

Mark K1RX and Geoff KA1IOR visited K5ZD's station during WPX SSB and recorded some SO2R operation. There are three videos <http://www.youtube.com/user/Geoffrey7b> - Part 1 is a general discussion about SO2R while Parts 2 and 3 are of SO2R operating.

>From the Daily DX <http://www.dailydx.com/> newsletter for April 25th, we learn of Rick NE8Z's recent gift-bearing visit to Mount Athos and Monk Apollo. He created an on-line slide show

<http://live.semdxa.org/tiki-list_file_gallery.php?galleryId=24> and coincidentally there was a CBS' "60 Minutes <http://www.cbsnews.com/sections/60minutes/main3415.shtml>" program on Mt Athos this past weekend.

EME for QRPers - not an oxymoron at all! - is discussed in this online video <http://www.ustream.tv/recorded/13724230> produced by Gary W9XT <http://www.w9xt.com/>. (Thanks, Rich KZ9K)

This Wired Magazine article <http://www.wired.com/wiredscience/2011/04/unidentified-scientific-tools/> asked for help in identifying any of these mysterious scientific instruments. Heck, hams probably have several of each in their junk boxes! (Thanks, Jim W6EU)

==> RESULTS AND RECORDS

The extended version of K9AY's 160 Meter Contest writeup is in final production and should be available online <http://www.arrl.org/contests> later this week. The first extended writeup of 2011 - WS7I's report on the RTTY Roundup - will follow. After the April 18th SSB Rookie Roundup, scores were received from several stations without filling out the required submission form. Please remember that scores must be submitted via the online submission form to be included in the results. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

In late-breaking news, the total number of CQ WPX SSB logs submitted topped 5000 for the first time ever according to CQ WPX Director Randy K5ZD.

The results of the 2010 New York QSO Party <http://nyqp.org/nyqp-2010-results> can be found at the updated NYQP website. Paul K2DB and Rick W1TY also thank the contest volunteers and webmaster Scott K2ZS for their help in producing the contest.

Tom K1KI reports that results for the 2010 New England QSO Party <http://www.neqp.org/> have been posted online. Certificates and plaques are going in the mail shortly - predominantly to the 9th call district!

If your logging program only creates ADIF files, try the new ADIF file converter <http://www.cqwpx.com/adif/> on the CQ WPX web site or use the excellent free LM software <http://contestsoftware.com/e/home.htm> by DL8WAA. LM is also a great way to type in your paper log and convert it to Cabrillo format. (Thanks, CQ WPX Director, Randy K5ZD)

OPERATING TIP

Jim K8MR observes that when trying to correct a logged call sign or exchange, the delay can cause the other station to repeat the information and create an unnecessary series of transmissions. His suggest is to simply use the "TU QRZ" key and catch up while the

computer is sending. Some logging software can be set up to send the corrected information as well so that everything is confirmed.

==> TECHNICAL TOPICS AND INFORMATION

George VE3ERP's <ve3erp@rac.ca> great package of software ham radio calculators, HAMCALC, has run into some significant issues in working with Win7 with the GWBASIC routines used by HAMCALC's many components. If you could provide guidance or assistance in this area, George is open for suggestions.

A method of increasing the efficiency of an inverted L or vertical antenna is to raise the point of maximum current well above ground as in this "Double L <http://www.yccc.org/Articles/double_l.htm>" antenna for 160 and 80 meters by K2LQ. The same idea could be applied to 80 and 40 meters. (Thanks, Rik van Riel)

Remember when oscilloscopes took two people to lift them and had to be rolled around on a cart? Well, Chris KL9A found that there's an app for that now as exemplified by this handy gizmo from Oscium <http://gizmodo.com/#%215791826/oscium-can-turn-your-ios-gadget-into-the-worlds-smallest-oscilloscope>.
Jack Ganssle of Embedded System Design - also known as N3ALO - took a good look at the latest offering in more traditional scopes from Agilent in his column "Scoping Out the New Scopes <http://www.eetimes.com/discussion/break-points/4214706/Scoping-out-new-scopes>".

Magnetic light - not as strange as it sounds - may be another intriguing technology for creating electricity from solar energy and does not require absorption. The "optical battery <http://ns.umich.edu/htdocs/releases/story.php?id=8368>" uses the surprisingly strong magnetic properties of light traveling through a non-conductive material to generate current.

Jim W7RY summarized some of the issues associated with dissimilar metals being used in amateur installations. "Copper should never touch galvanized material directly without proper joint protection. Water shedding from the copper contains ions that will wash away the galvanized (zinc) tower covering. Stainless steel can be used as a buffer material. However, be aware that stainless steel is not a very good conductor. If it is used as a buffer between copper and galvanized metals, the surface area of the contact should be large and the stainless steel should be thin. Joint compound should also be used to cover the connection so water cannot bridge between the dissimilar metals. This is why you want to use tinned wire (or suitable transition material) not bare copper when connecting to a galvanized tower."

Regular US rural type mail boxes are observed to work well for protecting outdoor gadgets as they have to seal well. The few drain holes let the water out so that they will protect most anything once the door is closed. (Thanks, Mike K5WMG)

Tom KK3OQ has posted videos <http://www.youtube.com/user/HamRadio2008> of homebrewed PCB fabrication, PIC chip experiments, high powered LED projects, Arduino applications, QRP kit builds, and Electronics Tourism.

More and more reports surface of "temporary" rope guys stretching or failing, leading to tower "incidents". Luckily, the reports don't mention fatalities but there have certainly been some near misses, such as to regular climbers Don K4ZA and John W2GD. Don't mess around - use steel or Phillystran guys if you or someone else is going to be on that tower. Field Day is coming and the temptation to take short cuts "just for the weekend" is strong - be safe!

Machinist's Workshop magazine tested penetrating oils for break-out torque on rusted nuts. They "scientifically rusted" nuts and bolts, treated them with various commercial penetrants and one home brew mixture, and then measured the torque required to remove them. The results?
- No penetrant - 516 pounds
- WD-40 - 238 pounds
- PB Blaster - 214 pounds
- Liquid Wrench - 127 pounds
- Kano Kroil - 106 pounds
A homebrew mix of automatic transmission fluid and acetone was also reported to have worked but that is disputed in several online discussions. (Thanks, Tim K3LR)

Technical Web Site of the Week - The theory and operation of RF amplifier tubes is by no means a dead technology as many contesters well know. There is plenty of good information about them on the web including this Eimac classic <http://www.cpii.com/docs/related/22/C&F1Web.pdf>. KK5DR also has a web page <http://www.kk5dr.com/Tubes.html> full of good material about the care and feeding of these beasties. You can read all this while waiting for the filaments to warm up. (Thanks, Dave WA3GIN)

==> CONVERSATION

Uncle Leo to All

I got into the ham radio game a few years too late for the reign of World Radio Labs gear but my Novice QSL collection included many cards from other Novices bearing that self-confidence-building "My QTH" arrow pointing right to your station's location. (My QSLs were from the Little Print Shop.) It is now, much later, that I am learning more about what Leo Meyerson, W0GFQ who passed away last week at the age of 100, meant to so many. I pass the editorial baton to my friend Rich Strand, KL7RA, for his wistfully wry recollections of his relationship with "Uncle Leo".

73, Ward N0AX

Ham radio lost one of its finest members last week when Leo Meyerson, W0GFQ <http://www.qcwa.org/w0gfq-sk.htm> went Silent Key. At a recent

gathering to help him celebrate his 100th birthday he mentioned he really didn't do that much for the hobby but as a young teenager with a new Novice license I can tell you that he did.

We called him "Uncle Leo" and he owned the magic ham radio store across the mighty Missouri river from Omaha, Nebraska [where Rich lived - Ed.] in Council Bluffs, Iowa. Every weekend I and my friends would try to make the pilgrimage to the World Radio Laboratories (WRL) just to walk the aisles of ham radio "stuff" and it was packed with "stuff". Of course all the famous WRL gear like the Globe King, Scouts and Chiefs with the Galaxy line, but also "stuff". All kinds of surplus military receivers and just about anything you could imagine as a kid but had no chance of buying ever in your life.

On the way out the door there was a large wooden box of crystals. All on 7173.333 kc and every Novice within three hundred miles had that frequency. It was Uncle Leo who told me not to keep the xtal's on top of the hot transmitter but to use his xtal holder case. I believe he also made xtals and I would skip lunch at school, so to speak, to have the few bucks to buy a new freq each visit. Back then a man's worth was measured in the number of rocks he had on the chief operating desk.

I bought a pair of headphones, probably WW2 B-29, and at 8 pounds with a head clamp pressure of 15 lbs per square inch just a tad uncomfortable. Uncle Leo to the rescue. I was able to find in the WRL the solution. What appeared to be toilet plunger cups were really headphone cushions that fit the B29 headset perfect. And they were cheap. No mention of the fact they caused your ears to sweat and the cups would heat weld to the side of your head and soon dispense an awful smell. They worked great.

WRL had copperweld wire. I was going to be cheap and buy the 18 gauge but finally did things right for once and bought the 12. Very heavy roll tightly wound in a surprisingly small package. Trying to get the exploded slinky of wire out of my bedroom that evening is best described by my mom. I had the world's first 80 meter dipole that was only 20 feet long counting the "coils" and even after some high Nebraska winds didn't really stretch out that much.

Uncle Leo would give a Novice a free WAS map, in color. If you can find a 1950-60's copy of Popular Electronics, look for the "Novice of the Month" column and often you would see that map on their shack wall. I hope all of you who covered Uncle Leo's picture with your QSL card have a few moments of guilt. I did.

The hams reading this from the 50-60's who knew Uncle Leo and the WRL, maybe got your first rig or built one of his transmitter kits and continued on in ham radio to be contesters, will recognize what he did for the hobby and we say, "73 Uncle Leo, BEST DX OM SK."

73, Rich KL7RA

==> CONTESTS

27 April through 10 May

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Nebraska QSO Party--Phone, CW, Digital, from Apr 30, 1100Z to May 1, 1700Z . Bands (MHz): 1.8-28, 50, 144. Frequencies: CW: 1.805 and 35 kHz above band edge, Nov/Tech--10 kHz above band edge; Phone--1.915, 3.865, 7.265, 14.265, 21.365, 28.465, 146.460. Exchange: RS(T), NE county or S/P/C. Logs due: May 31. Rules <http://www.hdxa.net/>

Florida QSO Party--Phone, CW, from Apr 30, 1600Z to May 1, 0159Z and May 1, 1200Z to May 1, 2159Z. Bands (MHz): 7-28. Frequencies: Multiple operating periods; CW 7.025-7.035, 14.040-14.050, 21.040-21.050, 28.040-28.050; Phone 7.18-7.19, 14.265-14.275, 21.340-21.350, 28.480-28.490. Exchange: RS(T), FL county or S/P/C. Logs due: 30 days. Rules <http://www.floridaqsoparty.org/>

BARTG 75 Sprint-- Digital, from Apr 30, 1700Z to Apr 30, 2100Z . Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Jun 1. Rules <http://www.bartg.org.uk/>

ARS Spartan Sprint-- CW, from May 3, 0200Z to May 3, 0400Z . Bands (MHz): 3.5-28. Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

** MOST WANTED SQUARES & DXCCs at the VHF-DX-Portal of MMMonVHF **

Hallo dear friends of MMMonVHFï¿½s Most Wanted 144 MHz european Square
inquiry. In past weeks we kindly asked you to update your standings
and lot people did follow our call - thank you very much! As well
there was around 25 Calls in the list who was not updating since more
than 3 years so we did scrap these Calls and ask the Gents please to
send in a new list if they want to paticipate again! Here are now the
RESULT (DATE April, 26th 2011) of the MWS 2011:
rank 1: KO42 (104x!) - rank 2: KO32 (91x!) - rank 3: JM57 (88x!)
4) KO22 5) JM37 & JM46 6) JM36 & JM47 7) JM26 8) IO42
Download the MAP from 26th: www.MMMonVHF.de/upload-news/DL8EBW/FOTO/MWS2011.jpg
TOP 5 DXCC DXCCs Ranking: 1) SV1/A 2) 3A 3) OD 4) R1FJ 5) 4X

For any updates, your votes are very welcome:

** MMMonVHF - MS Shower Info 2011, May - www.MMMonVHF.de/ms.php **

The most prominent shower this month is Eta ï¿½ Aquariids, peaking May
06, around 13h UT. This shower is characterized by a broad maximum;

predicted ZHR at peak for 2011 is 70 hr-1. Some daytime showers (Omicron ï¿½ Cetids, peaking May 20th being the most significant) will be also active this month; in addition to increasing Sporadic Meteors background, they will provide good conditions for MS DXing. Have a look to shower predictions for May 2011, together with a quick overview of 2011 Lyrids shower, at our MS-Propagationpage: http://www.MMMonVHF.de/ms.php
SOURCE: Massimo, IV3NDC, on behalf of the MMMonVHF Team

** Status QSLs : MD/DH7FB & MD/DF2ZC **

Hello All, We have received many QSL letters and also some substantial donations, many thanks. However, of the IRCs we have received many of them are expired IRCs and therefore useless. Please don't dispose of your old expired IRCs this way. To avoid this Frank and I ask you to no longer send IRCs but 1$ (Europe) or 2$ (Rest of the World) for return postage. I expect to have the QSLs here by the end of this week and will forward his share to Frank. He should have his cards next week and the QSLing process will then start. vy 73
Hello All, I have updated my website with a detailed dxpedition report (story, photos, log) of Frank DH7FB and my recent 144 MHz EME activity from the Isle of Man. Enjoy reading it:
http://www.df2zc.de/hamradioresults/dxp/
Due to time constraints also caused by the dxpedition there will be no 144 MHz EME Newsletter this April, the next issue will be uploaded at 9 May 2011. SOURCE: Bernd, DF2ZC, via MoonNet

---

** Bad news about our EME friend Guy, VK2KU **

To all VHF colleagues - We had a call last night from Catherine, Guy's XYL, to tell us that Guy underwent major cancer related abdominal surgery on Thursday night last. He is now out of intensive care in Goulburn Hospital, but faces a significant post operative recovery and treatment period. The further prognosis of this, and the surgical sequelae, will not be known until pathology tests are completed. Guy is a much liked and highly respected member of the VHF weak signal community, and I know we would all want to wish him the most successful possible outcome from his surgery and as speedy a recovery as is practicable. LATEST NEWS from 2011-04-26:
I spoke again with Catherine after her visit to the hospital this afternoon, and I gather he is now in a room of his own and is improving. I also gather a couple of his amateur friends from Canberra have paid him a visit. I have sent Catherine a compilation of your responses to me so that she can pass them on to Guy as he probably won't have any email access until he gets home from hospital which will be some days yet. SOURCE: John, VK2TK via VK Mail-List
The Team of MMMonVHF will send best wishes and get well soon, Guy!

** V55EME 6m EME from Namibia **

Dear Friends, On May 1 I'm travelling to Namibia to activate a 6m
EME station for 2 weeks, Martin V51W is living in Namibia and
operate a top class HF station, now he is expanding his operation

to EME and he will start with the "Magic Band", Hanspeter HB9PHJ travel 2 weeks ago to finish the Antenna setup, now we have a 2 antennas M2 6M7 with 7 elements already installed, first E-sporadic and tropo contacts was done during last days, power will be a 400W SSPA amplifier, no preamp, no elevation but we can move manually the array to any elevation and fix that position for some skeds.

** XF2P qrv on HF, 50 MHz and Sattelites from EL11 **

A group of enthusiastic Mexican ham radio operators, Ismael XE1AY, Gustavo XE1KKK, Francisco Javier XE1P, Ricardo XE1RZL, Ricardo Raymundo XE1SOV, Fernando XE1VGC, Jose XE1UYU, Martin XE1UZH, Modesto XE1UZU, Juan Manuel XE2IA, Jose XE2IVG and Ricardo XE3NMC will be active from Isla de Lobos (IOTA NA-221, WW Loc. EL11JK), Veracruz State, between 29th April and 1st May 2011. They will also activate the Lobos Island lighthouse (ARLHS MEX-035, TWLHD WLH

XE-016, WLOTA 0920). QRV on all HF bands, plus 6 metres and AO27, AO51 and SO50 Satellites. Modes: CW, SSB and RTTY. QSL via XE1AY. Website: xf2p.puebladx.org/XF2P/Bienvenida.html
SOURCE: ICPO Bulletin (22-29 April 2011)

** Niue, ZK2. By Chris GM3WOJ / ZK2V **

I am returning to Niue in October 2011, hoping to spend at least 2 months there. I will be at a new QTH, using new antennas on the LF bands to improve results (there is S9 QRN on 160m and 80m from the island ï¿½ 11kV AC distribution system over most of the island). I worked nearly 16000 stations in poor conditions at ZK2V 2009 ï¿½ my target is 40000+ this time ï¿½ hopefully with better conditions and a longer DXpedition. My friend Keith GM4YXI / GM5X is joining me for the first 2 weeks of the DXpedition and is hoping to be QRV as ZK2X in the CQ WW SSB contest ï¿½ Single-Operator All-Band. Please visit http://www.zk2v.com which will be updated periodically before the DXpedition. SOURCE: (Sixitalia Weekly) 21 Apr. 2011 - Dec. 2011
E.d. note Chris is know as a keen 6 meter DXer, hopefully he will activate ZK2. - CQ Six - 50 MHz DX News #20110421

** Jersey, GJ, Activity on HF and 50 MHz **

Operators Silvia/EA1AP (YL) and Alberto/EA1SA planned to activate Jersey between June 12-17th. The callsigns to be used are MJ/EA1AP, MJ/EA1SA. Look for activity to be on 80-6 meters using CW, SSB and RTTY. Suggested frequencies are (+/- QRM):
CW - 3504, 7004, 10104, 18074, 21024, 24894, 28024 and 50103kHz
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945, 28495 & 50120kHz
RTTY - 3580, 7035, 10140, 14080, 18100, 21080, 24920 & 28080 kHz
QSL via their home callsign. For more details, updates and log search, visit the DXpedition Web page at:
http://www.gdgdxc.net/channel_islands/index.php
SOURCE: (Ohio/Penn DX Bulletin #1007)

** Guernsey, GU, Activity on HF and 50 MHz **

Operators Silvia/EA1AP (YL) and Alberto/EA1SA planned to activate Guernsey between June 17-21st. The callsigns to be used are MU/EA1AP and MU/EA1SA. Look for activity to be on 80-6 meters using CW, SSB and RTTY. They plan to participate in the IARU 50 MHz Contest from Guernsey. Suggested frequencies are (+/- QRM):
CW - 3504, 7004, 10104, 18074, 21024, 24894, 28024 & 50103kHz
SSB - 3780, 7056/7180, 14195, 18145, 21295, 24945, 28495 &d 50120khz
RTTY - 3580, 7035, 10140, 14080, 18100, 21080, 24920 & 28080 kHz
QSL via their home callsign. For more details, updates and log search, visit the DXpedition Web page at:

The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and News **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

VK1WIA Is Off To Mars

VK4XJJ JEFF commences second transcontinental walk

VK3AUD Sarah Thompson, Secretary of the WIA on Darwin AGM

VK2ASD WIA Vice President Phil Wait on RAVEN

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS
INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MAY 01 2011.

VK1WIA Is Off To Mars, The Red Planet and you can come along for the ride!

Yes now YOU can send your call sign to Mars

NASA are collecting names to be put on a microchip that'll be onboard
the Mars Science Laboratory rover heading to Mars Later this year. Some
Radio Amateurs have been adding their call sign to last name field. As
well as having your call sign travelling around the Martian surface you
also get a electronic commemorative certificate to print out on your
home computer.

The rover has an unusual connection with radio, as we reported earlier in WIA National News it has special Morse Code indentations on its wheels that will spell out the initials JPL in Morse as it travels around Mars.

JPL stands for Jet Propulsion Laboratory, builders of the rover.

Put your name/call sign on Mars at
http://marsparticipate.jpl.nasa.gov/msl/participate/sendyourname/

(sourced from Southgate news)

Closer, here on the Blue Planet, last week, Sunday the 24th of April, Jeff Johnson VK4XJJ commenced his second transcontinental walk, this time from east to west.

He commenced on the east coast at Byron Bay and after 167 days he plans to reach the west coast at Steel Point in Western Australia.

He will be walking just below the VK2 / VK4 border, passing through Lismore, Tenterfield, Walgett, Bourke and going out of VK2 into VK5 at Camerons Corner.

On his walk Jeff is seeking funds for NETS with the goal of raising $80,000 towards a NETS ambulance.

The Walcha Radio Group has written to all Amateurs in the New England and North West area asking them to donate to Jeff's Walk as he passes through their region.

Brian Kelly VK2WBK is taking the donations.

Brian at P.O Box 223 TAMWORTH 2340.

3323wbk@tpg.com.au

0418 659 043

Jeff's web site lists sked times in the late afternoon when he will be on 40 metres - 7045 kHz at 1730 hours -then 1830 hours on 80 metres 3612 kHz.

Beware bogus requests for help

The RSGB is advising its members to be on the look-out for bogus emails purporting to be from other radio amateurs and asking for help.

They say: We have been made aware of a scam that is currently being operated via email to obtain money from unsuspecting radio amateurs.

An email, purporting to be from a well known amateur and signed with that amateur's first name, explains that they have been mugged in some foreign city, losing passport and money. Needless to say, it requests financial support to get the amateur out of difficulties.

Several different prominent callsigns have been used by the scammers.

Obviously the rule here is to ignore such requests.

(sourced from Southgate news)

A great for amateur radio and public relations

>From the Salamanca Lawns, Hobart, through to the displays at the Rapid Creek Business Village Sunday markets Darwin, down to Stirk Park, Kalamunda Western Australia, the flag was flown for amateur radio.

Sunday the 17th of April was indeed a very successful public relations day with 30-odd registered to participate in every state and the Northern Territory.

About half of those registered gave a summary of what they did on the day and were quickly posted in the WIA website for all to see.

>From the reports received people exposed to amateur radio for the first time, shown what it has to offer them, and it was a worthwhile exercise in terms of encouraging more licensees.

The displays ranged from the basic to the more elaborate. Always remaining as professional in their style and the nature of what people needed to know.

Clubs and groups are now thinking about the benefits including media exposure and recruits into amateur radio and even more will register next year.

Many agreed that lessons had been learnt and they have the opportunity to share them by making a formal entry that requires some photographic and log proof. The entries need to reach the WIA National Office by the 13th of May.

FROM ANDERSSON HOUSE THE WEEKLY WIA DIRECTORS SPOT.

WIA Emergency Communications

Several weeks ago I discussed the WIA's emergency communications training system, and how the $10,000 in seed funding allocated by the WIA Board last year has now resulted in over 100 people being awarded nationally recognised qualifications in emergency communications.

I would now like to tell you about the next step.

The emergency communications scheme was always intended to be a two-part process - training and accreditation. All voting-WIA members who have completed the training course and who have been assessed as competent will be able to apply for WIA accreditation as an emergency communications operator.

Accreditation will not be automatic, and only those people who meet certain criteria for availability, health and mobility will be accredited. This is necessary to ensure we provide an effective and useful resource to emergency services, and we don't want to put members at undue risk.

The WIA intends to promote the emergency communications program to emergency services and non-government organisations and is currently considering how that can best be done.

Also the new emergency communications system needs a name, and the name adopted so far is RAVEN - Radio Amateur Volunteer Emergency Network.

It is considered important that the term Radio Amateur is included in the name, and we wanted to avoid any confusion with WICEN.

In a few weeks I'll tell you how things are progressing and maybe tell you about some more initiatives in emergency communications from the WIA.

This is Phil Wait, VK2ASD, for the WIA.

WIA AGM

This is Sarah Thompson VK3AUD, Secretary of the WIA

As you know, the WIA Annual Conference is being held over the weekend of 27 to 29th of May at the Mirambeena Resort in Darwin.

Recently I outlined the full programme of events to be held over the weekend. If you missed it, you can catch up at the WIA website, wia.org.au by clicking on the front page photograph of the Darwin sunset.

Today I want to focus on one of the Sunday activities - our trip to Litchfield National Park. The information I'm presenting is from the "The Essential Top End Holiday Guide' - a publication each delegate will receive upon registration.

Named after Frederick Henry Litchfield, a member of the first European expedition to visit the area, Litchfield was the centre for tin and copper mining for 75 years until 1955. It then fell under pastoral lease until it was designated a National Park in 1986.

We will view the spectacular double waterfall set amid the monsoon forest at Florence Falls. Taking the 160 steps down to the plunge pool is optional!

We will visit the magnetic termite mounds. Thousands of two-metre high mounds reveal the architectural feats of these intriguing insects that build their mounds aligned north and south to minimise exposure to the sun and maximise temperature control.

Finally, we will have our BBQ lunch at the Wangi Falls - one of the Park's best swimming and picnicking spots.

Once again I urge you to please go to the WIA website now and register for this fantastic weekend. Accommodation can be booked at the special rates negotiated by the WIA by calling the Travelodge Mirambeena on 08 8946 0111 and speaking to Aleishia Good or Belinda Anthony, quoting the reference "WIA Conference"

This has been Sarah VK3AUD, on behalf of the WIA.

HAMS ACROSS AUSTRALIA.

Clairview Gathering Weekend over for another year

As the news goes to air this morning Radio Amateurs in Central Queensland are winding up yet another successful Clairview Gathering.

Some of the keener hams arrived at the Clairview Beach Holiday Village
- about 30 minutes south of Sarina on the Bruce Highway -
on Friday to quickly set up camp and get involved with one of the many
synergistic activities (a favourite drink, a yarn or two and some
serious loafing).

More arrived on Saturday and numbers swelled for the famous Saturday Night
Mega-Auction which again raised much needed funds for the Mackay and RADAR
Clubs.

Some hams are leaving this morning listening into the News by various means
whilst some lucky bods are going to enjoy another relaxing day and night
at Clairview by the Sea.

Thanks to everyone who rolled up to make the Gathering an enjoyable one!

(TARC)

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

>From time to time people raise their concerns over their perceptions of what the
radio club or the WIA has or has not done. This is a fair point of discussion
amongst amateurs and all organisations try to foster active involvement in
growing.

If we see that our metering is indicating a problem with our antenna, do we act
to solve the problem or ignore it and just complain and complain and complain?

Some of these well meaning amateurs seem to take the latter path and never join
their local affiliated club or pay the subscription and become an Institute
member. Without doing something positive to get the message across, they are
just baying at the moon.

>From our clubs, input can go to the state Advisory Committee or direct to the
Institute. As a member, we get Amateur Radio magazine delivered and anyone can
listen to WIA News.

If you believe what you say, please get it into the system to benefit all
VK amateurs.

I'm Geoff Emery and that's what I think......how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

I'm Ray, VK4CF with news from Redcliffe & Districts Radio club.

SILENT KEY - Roberto Benetti VK2ZEB

Last week the club was told of the passing of Rob Benetti, VK2ZEB. Rob died
last Thursday night after a debilitating illness and two falls. These together
caused him deteriorating health to which he finally succumbed. Rob was 72 years
old and a long time member of Summerland Amateur Radio Club and a good friend

of the Redcliffe club.

For many years he had a radio and TV repair business in Lismore. Rob's funeral, was held last Thursday at the Parkview Funeral Home, Goonellabah, with a large number of amateurs from NSW and several members of the Redcliffe club including John, VK4WX and Scott, VK4FLAE. All the members of the Redcliffe club express our sorrow and condolences to Elizabeth and all Rob's family and friends.

Last Wednesday, the usual club members had a good clean up of the surplus gear area and disposed of items which were of no use to anyone. However they still left some good "STUFF" behind and this can be collected from the club next Monday Night. Come along & help yourself to some of this preloved equipment that is now looking for a new home!

Club Secretary, Peter, VK4TAA has called for volunteers for the Bunnings BBQ fundraiser to be held on Saturday 11 June 2011, at the Bunnings store at Rothwell.

This fundraiser will require a lot of workers to man the Stall and as Bunning's have asked that the Sausages sizzle is operational (selling products) from 8am - 4pm as a minimum, with setup recommended at 7.30am. The stall will require 4 people on manning the kiosk at any point in time so if you can spare some 2 hours or so please contact Peter as soon as possible.

So now it's 73 from Ray, VK4CF from the Redcliffe club.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Radio Spectrum for the London 2012 Olympic and Paralympic Games

As expected, the RSGB has been approached by Ofcom to help determine sections of the 70cm amateur band that could be released for a limited period around the London 2012 Games next year.

As a secondary user of the band, we as radio amateurs have no specific rights to any of those frequencies. Rather than just imposing changes, Ofcom has approached the Society in the spirit of cooperation to work together to solve the problem. The RSGB intends to work constructively on this matter to reach agreement with Ofcom on the segments that can be released on a temporary basis.

Ofcom has given clear and unambiguous assurance that the segments used will be returned once the London 2012 Games are over.

The RSGB is looking closely at how the spectrum is used in the designated geographical areas in and around London, Weymouth and South Essex in order to minimise the impact. We will be responding to Ofcom shortly.

The RSGB's response is being coordinated within the RSGB Spectrum Forum by Murray Niman, G6JYB.

Radio Amateur's 50th Wedding Anniversary

The Derby Telegraph newspaper reports that Radio Amateur Michael Brundle G6EBL and his wife Sheila will celebrate their 50th Wedding anniversary on the day that Prince William and Kate Middleton are to be wed.

Ah but did they apply to OFCOM for THEIR special callsign as in "GR" for Kate and William !

Read the Derby Telegraph story at www.thisisderbyshire.co.uk/

Amateur Radio suffers setback in surveillance robot battle

A robot used to covertly transmit live video during military operations in Iraq and Afghanistan was approved by the Federal Communications Commission (FCC) for use by local and state fire-fighters and police, ending a legal battle between amateur radio operators and law enforcement over the device.

Called the Recon Scout Throwbot, the robot transmits over the 430-448 MHz portion of the 420-450 MHz frequency band, which is primarily used by the federal radiolocation service. The spectrum is also utilized by amateur radio enthusiasts. The latter group, spearheaded by the American Radio Relay League (ARRL), opposed a waiver request filed with the FCC by Recon Scout maker ReconRobotics Inc. to use the band.

The FCC approval does come with some limitations, however. The robot can only be used by state and local police and fire-fighters on the specific band. Operators must also first use the Recon Scout on 436-442 MHz bands. If those frequencies are inaccessible, then the 430-436 MHz and 442-448 MHz bands • where interference is more likely • can be accessed.

Use of the device is also limited to emergencies involving threats to the safety of life and training purposes. In addition, the Recon Scout is restricted from use near various radar installations and Air Force bases, and the amount of units that can be sold is limited to 2,000 the first year and 8,000 the second year. After that period of time, future sales will be re-evaluated, according to the FCC.

For those not aware, ReconRobotics bills itself as a world leader in tactical robotic systems. It claims that more than 1,200 of the company's robots have been deployed world-wide by the U.S. military and international friendly forces, federal, state and local law enforcement agencies, bomb squads and fire rescue teams. More about the company is on-line at www.reconrobotics.com

POST QUAKE HAM RADIO RELIEF EFFORTS CONTINUE IN JAPAN

Amateur radio relief operations are continuing to help with disaster recovery area struck by the worst earthquake in Japan in 140 years. We have more in this report from Amateur Radio Newsline's Norm Seeley, KI7UP:

Ken Yamamoto, JA1CJP, is the International Amateur Radio Union Region 3 Secretary. He reports that there are several

stations on 7.030 and 7.043 MHz who are handling medium distance information exchanges, but the majority of ham radio operations appear to be on the VHF and UHF bands.

As previously reported here on Newsline, JA1RL the headquarters station of the Japan Amateur Radio League in Tokyo, became a disaster communication centre in the days immediately following the giant killer quake. Yamamoto is quoted as saying that some 250 transceivers holding Japan Amateur Radio League licenses are being used for communications between various refugee camps and local government offices. He says that two sets of 430 MHz repeaters have been delivered to the disaster area. They are operational and being used to augment the existing repeater coverage and provide easier communications between those using the hand-held transceivers.

JA1CJP says that some towns are so heavily disrupted that the local government offices are also serving as refugee centres and the residents are staying in multiple locations. In such cases, amateur radio can contribute quite a lot in maintaining the ties between the local government and displaced residents.

The earthquake, now graded at nine on the Richter scale, and followed by a tsunami hit north-eastern Japan on March 11th. It has so far been blamed for over 13000 deaths and the destruction one of Japan's major nuclear power facilities. That plant near Fukushima is still the site of an intense campaign to bring several damaged reactors back under control and stop the leakage of radio active waste water into the ocean.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching the situation from Scottsdale, Arizona.

--

It's expected that the ongoing emergency communications being provided by amateur radio will continue for a considerable time to come. A presentation on the Japanese earthquake triple disaster and the role played in relief efforts by radio amateurs will be made at the 2011 Global Amateur Radio Emergency Communications Conference. It's slated for in Sun City, South Africa, in August.

==========

WEIRD AND WONDERFUL

FIGHTING FIRE WITH.... ELECTRICITY!

Harvard researchers are looking to replace the fireman's hose with a hand-held wand that shoots beams of electricity.

The idea that electricity can control a fire first came about 200 years ago. It was observed that electricity could twist, bend and even kill a flame.

Scientists believe electric currents make particles of soot within a flame move, which produces a flow of gas that weakens the flame and can cause it to die out. But in previous studies, chemists used direct current instead of alternating current to generate electric fields.

Now Harvard researchers have created an electric wand that puts these ideas to the test, but utilizes AC voltage instead.

The wand was connected to a 600-watt power source, and when shot at flames as high as 18 inches tall, the electric field produced a flow of charged particles that put the fire out completely, and almost instantly.

While the research is still in its early stages, it's noted that this technology has already shown greater benefit over water because it causes less damage to people's property. In addition, the wand allows fire-fighters to work from safer distances, and can even manipulate the flame to bend so they can enter burning buildings.

AWARDS

The year 2014 marks the 50th anniversary of the launch of the Islands On The Air (IOTA) Programme by British SWL Geoff Watts, BRS-3129.

As a build-up to celebrations on this occasion, the RSGB IOTA Manager and Committee have announced an exciting activity period in which all licensed amateurs world-wide are invited to participate.

For a two-year period, 2012 and 2013, IOTA chasers will be encouraged to contact as many different IOTA groups as possible, and IOTA activators to play their part by operating from as many groups as possible, with special emphasis on the less-frequently activated ones.

The complete rules of the IOTA 50th Anniversary Marathon will appear in the forthcoming 'RSGB IOTA Directory' to be released at Dayton. They can also be seen on G3KMA's website

W5KUB TO NETCAST FROM DAYTON HAMVENTION

Tom Medlin, W5KUB, says that he will one again be streaming live audio and video from the Dayton Hamvention. According to Tom, this will be the 9th year that he will be netcasting live on w5kub.com beginning with his 550 mile ride from his home in Memphis, Tennessee, right to the Hamvention site at the Hara Arena in Dayton.

During this years netcast, Tom will also be giving away over $5000 in prizes to give lucky viewers. Some of the prize donors include Heil Sound, Kenwood, Yaesu, MFJ, Kantronics, LDG and the ARRL. That alone is something that you won't want to miss.

So if you cannot make it to Hamvention 2011, you can attend vicariously from May 18th to the 22nd thanks to Tom Medlin, W5KUB, and his crew at W5KUB.com

UK LIGHT COMMUNICATIONS DISTANCE RECORD CHALLENGED

An optical distance record claimed in the U-K may not be a record after all.

Amateur Radio Newsline's Frank Haas KB4T, says they have received numerous e-mails that say the accomplishment in the UK falls far short of other claimed distances set elsewhere around the globe. In fact, the number of such claims far outweighs the space we have available to report them all.

But as pointed out by one of their listeners, the 90 kilometre distance claimed in the UK is only about 56 miles and there are a number of well-documented communications over longer distances. This includes one as early as 1962 in southern California.

The bottom line: If hams are going to lay claim to optical distance records, then what is needed is an organization respected and accepted by all of the worlds ham radio community to corroborate any claims made, and to declare who has set a valid record and who has not.

RESCUE RADIO THE MOVIE... well a 1959 movie called "Every Single Minute."

This is an historic amateur radio movie about AR and emergency communications, and is available on YouTube.

In 1955, The Phil-Mont Mobile Radio Club, an association of mobile amateur radio operators in the Philadelphia, Pennsylvania area in the US provided emergency communications during the devastating flooding along the Delaware River and in the Pocono Mountains following Hurricane Diane, the sixth costliest U.S. hurricane of the 20th century.

In 1959, the club produced this short film to explain amateur radio, and especially mobile communications as practiced by the club.

The main film begins after a three minute interview with Jim Spencer, W3BBB, produced by a local cable channel many years later (Jim was a very young man W3QQH in the original film, and is now SK.

(Southgate)

GAREC 2011

The International Amateur Radio Union - Region 1 website reports that the Global Amateur Radio Emergency Conference (GAREC) 2011 will be held in conjunction with the IARU Region 1 General Conference in Sun City, South Africa from 15th to 19th August.

As GAREC has to slot in between the main IARU meetings it is possible for IARU delegates to attend GAREC.

Registration for GAREC is now open for emergency communicators and more details are available at

www.iaru2011.org.za/GAREC2011.htm

The draft agenda for the conference should be posted to that website soon.

Information from earlier conferences is available at www.iaru.org/emergency/

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

DXNL 1725 - Apr 27, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

HI - DOMINICAN REPUBLIC, NA-096
Ronny,ON4ARV, will be active as HI7/OT4R from Punta Cana from May 2-20.
He will be active in SSB on 20m/15m/10m daily from 2000-2200 UTC.
QSLs are available only via LoTW and eQSL.
For more information click on: http://www.OT4R.net

Marcello,HI7/IK8DNJ, will be QRV in holiday style in SSB and digital
modes on 10m/12m/15m/17m/20m/40m between Apr 30 and May 13.
His QSL manager IZ8LKL confirms via bureau, direct or LoTW.

JD1 - OGASAWARA, AS-031
Makoto,JD1BLY (JI5RPT), Harry,JD1BMH (JG7PSJ), and
Masaru,JD1BMT (JE4SMQ), are staying on Chichijima (AS-031) again by
the end of April and beginning of May but will stay there for
different period of times. You can expect activities from:
JD1BLY: Apr 30 until May 7
JD1BMT: Apr 30 until May 4
JD1BMH: May 4-13
Activities are planned in CW, SSB and digital modes on 160m-6m and
via satellite. You can visit the websites of the OPs for news and logs:
JD1BLY: http://www.ji5rpt.com/jd1
JD1BMH: http://sapphire.es.tohoku.ac.jp/jd1bmh
JD1BMT: http://homepage3.nifty.com/maaberu/logsjd1/logsearch.html
QSL cards should be sent via bureau or direct to their homecalls.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Kan,JJ2RCJ/AB2RF, will show up as AH0/AB2RF from Saipan (OC-086) from
May 1-5. He will focus especially on RTTY and PSK. QSL via JJ2RCJ.
You can have a look at his rental shack at this site:
http://saipan.rental-shack.com/english

PY0T - TRINDADE & MARTIM VAZ ISLANDS, SA-010
Junior,PY2ZA, has left the Brazilian mainland on Apr 25 and should
arrive on Trindade Island (SA-010) around Apr 29. He will be active
from there for several months signing PP0T in CW, SSB, BPSK and RTTY
on 160m-6m until June. His preferred frequencies are:
CW: 1824, 3514, 7014, 10114, 14014, 18084, 21014, 24904, 28014 kHz
SSB: 1850, 3790, 7065/7185, 14195, 18140, 21285, 24940, 28475 kHz
BPSK: 1838, 3600, 7035, 10110, 14071, 18100, 21080, 24920, 28120 kHz
RTTY: 3582, 7038, 10140, 14082, 18102, 21082, 24922, 28082 kHz
6m: 50.104 (CW), 50.140 (SSB), 50.500 (BPSK) MHz
More information can be found at: http://www.trindade2011.com
Unfortunately QSL only direct or via LoTW to EB7DX.

VK0M - MACQUARIE ISLAND, AN-005
Denis,ZL4DB, will stay on Macquarie Island (AN-005) again for three
months starting in the end of April. He plans to work as VK0M/ZL4DB/p
only in SSB. Kevin,VK0KEV, who is working there until March 2012 helps
him to get started. QSLs via bureau or direct to ZL4PW.

XV - VIETNAM
Ken,JA2LLK, is going to hit the airwaves as XV9LL workin on all bands
from the Nikko Hotel in Hanoi starting in the end of April. Nothing is
known about the length of his stay. QSL via homecall, JARL bureau ok.

ZA - ALBANIA
Mitko,ZA/LZ1UQ, and Andy,ZA/LZ2HM, are working from Albania in
CW/SSB/RTTY on all bands between Apr 26 and May 5.
The QSL cards should be sent via their homecalls.

3A - MONACO
OM Andrea,3A/IZ2LSC, announced to show up in CW/SSB on 40m-10m on
Apr 30/May 1. He will be QRV with 100 watts and a multiband vertical.
Andrea asks for everybody's patience in CW since he is a beginner.
QSL via bureau or LoTW to his homecall.

6W - SENEGAL
Fernando,6W/EA1BT, will be active from May 3-12. QSL via homecall.

9G - GHANA
Kees,PE1KL, and Lisa,PA2LS, will sign 9G5LK from Ampenyi between
Apr 28 and May 6. You can expect activities in SSB, PSK31 and RTTY
on 80m-10m. QSL via bureau, direct or LoTW to PA2LS.
You can apply for a special award if you have at least two QSOs with
9G5LK on different bands or modes.
More information on the DXpedition website: http://www.pe1kl-pa2ls.com

AUSTRIA, SPECIAL EVENT STATION
The amateur radio section of the Austrian broadcasting company (ORF)
and the Documentation Archive Funk (QSL Collection) will activate the
special event station OE11M for only 72 hours from Apr 29 until May 1.
On Saturday, Apr 30, which is the International Marconi Day, OE11M
counts for the IMD award as one of the 25 IMD stations worldwide.
QSL via OE bureau or direct to OE1WHC. QSL cards without SAE and

sufficient postage (new IRC or US$) will be confirmed via bureau.
A QSL download is available at http://www.qsl.at/down/oe11m.tif (TIFF)
or http://www.qsl.at/down/oe11m.jpg (JPG).

CZECH REPUBLIC, SPECIAL EVENT STATION
Members of the radio club OK1KWN will activate OL950CHEB throughout
the month of May to celebrate the 950th anniversary of the city of
Cheb (see: http://www.mestocheb.eu). QSL via bureau or direct to OK1MO.
You can have also an eQSL but only for digital modes.

IRELAND, SPECIAL EVENT STATION
During the "International Marconi Day" on Apr 30 the "Cork Radio Club"
will be QRV in CW and SSB on all bands signing EI5IMD from Brow Head.
Brow Head is the place where Marconi made his radio experiments.
QSL via EI9FBB, via bureau or direct.

ITALY, SPECIAL EVENT STATION
The ARI section Frascati will show up as IY0ORP from the Geophysical
museum in Rocca di Papa near Rome on the International Marconi Day.
Activities are planned on 20m and 40m. QSL via IZ0FVD, bureau ok.

POLAND, SPECIAL EVENT STATION
The special callsign SQ100MSC remembers Maria Skodowska-Curie from
May 1 until July 31. She was the very first woman to win a Nobel prize
in 1911 (chemistry).
Please send your QSLs direct to his QSL manager SP5XSL and enclose
a SAE and a new IRC or two US Dollar.
More information about the Maria Skodowska-Curie award can be found at:
http://qrz.com/db/sq100msc

THE NETHERLANDS, SPECIAL EVENT STATION
The International Short Wave League (ISWL) celebrates its 65th jubilee.
Fred,PA0FAW, will activate the special callsign PC65ISWL especially in
digital modes and CW from May 1-28.
When you hear him in SSB it is very likely that he is working from the
nature reserve WFF PA-005.

PACIFIC TRIP: Charlie,W6KK, Carlos,EA1IR, and Hrane,YT1AD, have left the
T31A team since it was not clear if they return in time (due to the
delay). Carlos and Hrane were active from Tonga signing A35IR and A35AD
until Apr 26. Their next stop is Fiji (3D2IR & 3D2AD) from Apr 26-29.
Last not least they will visit American Samoa, where they plan to
become active as KH8/EA1IR and KH8/N9YU between Apr 29 and May 1.

WFF OPERATION: Phil,VE1WT, is working as VE1WFF from the Kejimkujik national
park in Nova Scotia from Apr 27-29. He plans to be QRV in SSB on 40m,
20m and 15m and maybe also in CW on 30m.
QSL via bureau or direct to VE1WT.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the

VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 1: AGCW-DL QRP/QRP-Party
May 1-7: SARTG New Year RTTY Contest
May 1-7: Activity week of the DTC

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-064, F: F4ELJ/p is working from Noirmoutier from Apr 30 until May 7.
QSLs via F4ELJ (bureau/direct).

EU-076, LA: The QLF-DX-Team members LA5UKA and LA9VDA will show up in CW,
SSB and RTTY on 10m-80m signing LA6Q between Apr 29 and May 1.
QSL via LA9VDA (bureau/direct).
Bureau QSLs can be requested also via e-mail to: la9vda@gmail.com

EU-108, GM: A group of the GMDX club is going to activate the
Treshnish Isles (IOSA NH17) from Apr 28 until May 1. They will work
with two stations, amplifiers and verticals signing GB5TI in CW, SSB
and RTTY on 10m-80m. QSL via LoTW or direct to MM0BQI.
Bureau QSLs can be requested via e-mail to: gb5ti.qsl@gmail.com

EU-123, GM/MM, Scottish Coastal Islands: Two members of the "Camb Hams" will
be QRV as GS3PYE/p and GS6PYE/p from Arran (IOSA CL-01, SCOTIA CS-14)
from May 1-8. QSLs for both calls via M0VFC (bureau/direct).

EU-146, PA: The special event call PD04ISLE celebrates the 4th anniversary
of the nature reserve on Tiengemeten Island during the whole month
of May. QSL via PD2GCM (bureau/direct).
More information is available at: http://pd04isle.webklik.nl

EU-172, OZ: Noel,OZ/OO4O, activates Fyn Island (DIA FY-001, WLOTA 2690)
mostly in SSB from May 1-6. QSL via ON bureau and via LoTW.

NA-221, XE: XF2P will show up from Lobos in the Gulf of Mexico between
Apr 29 and May 2. Only 17 % of all IOTA chasers have this group
confirmed already. QSL via XE1P (bureau/direct).

IOTA NEWS

The "2011 Honour Roll and Annual Listings" can be found on the website
of Roger,G3KMA: http://www.g3kma.dsl.pipex.com

The year 2014 marks the 50th anniversary of the launch of the IOTA
Programme. As a build-up to the celebrations on this occasion, an
exciting activity period has been announced in which all licensed
amateurs world-wide are invited to participate. For a two-year period
during 2012 and 2013 IOTA chasers are encouraged to contact as many
different IOTA groups as possible and IOTA activators to play their

part by operating from as many groups as possible, with special
emphasis on the less-frequently activated ones. The points system
adopted rewards 'Activators' with higher scores for activating the
rarer IOTA groups. Certificates and awards will be available to both
'Chasers' and 'Activators' to reflect attainment of graduated bands of
performance together with attractive prizes for top scorers.
The Marathon starts on 1 January 2012.
The full rules have been uploaded to G3KMA's website at
http://www.g3kma.dsl.pipex.com

==> + PUBLIC SERVICE: TORNADOES AND THUNDERSTORMS KEEP RADIO AMATEURS
BUSY IN MIDWEST, SOUTHEAST

As violent storms swept through Alabama, Mississippi, Arkansas and
North Carolina, served agencies called upon Amateur Radio operators to
help provide communications support and real-time weather observations.
The storms and flooding were the latest in the severe weather that has
pummeled much of the mid-South this month. Just a week ago, storms tore
a wide path from Oklahoma all the way to North Carolina. Read more here
<http://www.arrl.org/news/tornadoes-and-thunderstorms-keep-radio-amateurs-bus
y-in-midwest-southeast>.

==> + COUNTING DOWN TO DAYTON -- WHERE GLOBAL FRIENDSHIP TAKES CENTER
STAGE
```

The ARRL is making all the final plans and preparations to bring its "show and tell" exposition -- known as ARRL EXPO -- to the Dayton Hamvention® next month. Hamvention, sponsored by Dayton Amateur Radio Association since 1952, will be held May 20-22 at the Hara Arena Conference and Exhibition Center in Trotwood, Ohio. Read more here <http://www.arrl.org/news/counting-down-to-dayton-where-global-friendship-takes-center-stage>.

==> + SILENT KEY: JAMES MCLAUGHLIN, WA2EWE/T6AF, KILLED BY AFGHAN PILOT

James McLaughlin, WA2EWE/T6AF, was killed in Kabul, Afghanistan on Wednesday, April 27. News sources say that eight American troops and a US contractor died Wednesday after an Afghan military pilot opened fire during a meeting in an operations room of the Afghan Air Corps at the Kabul airport -- the deadliest episode to date of an Afghan turning against his coalition partners, officials with the NATO-led International Security Assistance Force (ISF <http://www.isaf.nato.int/>) in Afghanistan said. McLaughlin -- a retired US Army Lieutenant Colonel -- was a contractor serving as a flight instructor for Afghan pilots.

Licensed since 1972, McLaughlin was a career US military officer. Bob Magnani, K6QXY, told the ARRL that McLaughlin was just in the US a week ago, visiting his family: "His son Adam, KD6POE, works for me. He told me that his dad had been in Afghanistan and Iraq many times over the past few years, most currently serving as a flight instructor." McLaughlin posted on his qrz.com page that "almost every day, I operate at around 1230 - 1430 UTC. Sometimes I am QRV until around 1500 UTC."

Steve Herman, W7VOA/T6AD/HL9OA -- currently in Seoul, South Korea -- remembers meeting McLaughlin for the first time. "I first met Jim in August 2009 when we were the only two hams operating in Kabul," he wrote in an e-mail. "We exchanged tips on operating in our unusual environment. Jim had put together a fine radio shack in his quarters and was especially enthusiastic about his RTTY and PSK capabilities, as well as the ladder line-fed wire dipole he had managed to string up at a height of 50 feet through some trees.

"Less than 24 hours after our initial discussion, a suicide bomb went off in Kabul near the spot where we had arranged to meet. The blast killed seven people and injured nearly 100. The explosion site was also close to Jim's QTH and it blew out windows in his residence adjacent to the US Embassy. It was obvious from spending time with Jim that ham radio was an important morale-boosting pastime and he usually spent a couple of hours per day QRV, logging thousands of QSOs." As of March 26, 2011, McLaughlin had logged 4359 QSOs, most of them on RTTY and PSK.

McLaughlin was also an active MARS <http://en.wikipedia.org/wiki/Military_Auxiliary_Radio_System> operator. "He was one of our most dedicated MARS members in Army MARS Region 11," Dan Wolff, KA7AGN/DL4VCW/AEM1WF/AEA1RD, told the ARRL. Wolff is the MARS Region 11 Director. "He relayed and delivered

literally hundreds of MARSgrams every year for our region. I've known him for many years and he was always devoted to supporting our deployed service members. He will be deeply missed on MARS circuits and the ham bands as well." -- Thanks to Russ Bentson, K6KLY, CNN <http://www.cnn.com/2011/WORLD/asiapcf/04/27/afghanistan.violence/index.html?hpt=T2>
and Fox News
<http://www.foxnews.com/world/2011/04/27/afghan-official-afghan-officer-fires-nato/>
for the information

==> + FCC NEWS: ANCHORAGE VEC ASKS FCC TO GRANT LIFETIME CREDIT FOR EXPIRED LICENSES

In a Petition for Rulemaking filed with the FCC on April 15, the Anchorage VEC -- one of 14 Volunteer Examiner Coordinators in the US -- asked the Commission to give permanent credit to radio amateurs for examination elements they have successfully passed. This would, in effect, create a license exam credit that would be valid throughout an amateur's lifetime, never expiring. Read more here <http://www.arrl.org/news/anchorage-vec-asks-fcc-to-grant-lifetime-credit-for-expired-licenses>.

==> + ON THE AIR: FIND AN ARRL FIELD DAY STATION NEAR YOU

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator website <http://www.arrl.org/field-day-locator> and follow the instructions. ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 25-26, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Radio Service.

==> WX4NHC ASSISTANT COORDINATOR HONORED AT NATIONAL HURRICANE CONFERENCE

W4NXC Assistant Coordinator Julio Ripoll, WD4R, was awarded the Distinguished Service Award at the National Hurricane Conference -- held April 18-22 in Atlanta, Georgia -- for "exceptional service in providing emergency communication during hurricane events over three decades while leading [the] WX4NHC Amateur Radio station at the National Hurricane Center."

Ripoll not only serves WX4NHC as its Assistant Coordinator and an operator, he co-founded the station with then-NHC Director Dr Neil Frank in 1980. WX4NHC collects ground weather reports for areas that are -- or are about to be -- affected by approaching hurricanes, gathering thousands of these reports that are passed on to the forecasters. The station also broadcasts the advisories to ships at sea and to those coastal areas that do not have any other means of receiving them, saving many lives over the years. Read more here <http://www.arrl.org/news/wx4nhc-assistant-coordinator-honored-at-national-hurricane-conference>.

==> + ON THE AIR: SPACE WEATHER PREDICTION CENTER TO DISCONTINUE BROADCASTS ON WWV AND WWVH

Beginning Tuesday, September 6, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) will cease broadcasting its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. These messages inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Currently, the message is heard on minute 18 from WWV and minute 45 from WWVH. The information <http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt> will still be available on the SWPC website. If you care to comment on this, or if you have any questions, the SPWC -- part of the National Weather Service (NWS <http://www.nws.noaa.gov/>) -- would like to hear from you <swpc.wwv@noaa.gov>.

==> SOLAR UPDATE

Tad "The Sun is swimmin' on the rim of a hill <http://www.youtube.com/watch?v=Ss1CXo8QMi8>" Cook, K7RA, reports: Geomagnetic conditions are quiet this week, but they may become slightly unsettled over this weekend. The average daily sunspot numbers were down more than 18 points to 74.9, while average daily solar flux was off less than four points to 113.4. The predicted solar flux values for April 28-30 are 105, May 1-2 is 100, May 3-4 at 105 and 110 on May 5. The next peak in solar flux is May 11-13, with a value of 120. This is actually higher than the flux values over the last month, except for one day -- April 15 -- at 129. Over the last eight days, we have seen seven new sunspots emerge, but the daily sunspot numbers have fallen since April 22. Geophysical Institute Prague predicts quiet conditions on April 29, unsettled to active on April 30, unsettled May 1-2, quiet to unsettled May 3 and quiet May 4-5. Look for more information -- including a report from the Caribbean on 20 meter propagation and information on a new online propagation tool -- on the ARRL website on Friday, April 29. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song Surrey with the Fringe on Top <http://www.youtube.com/watch?v=Ss1CXo8QMi8> from the musical Oklahoma!

<http://en.wikipedia.org/wiki/Oklahoma%21>

==> VOTING NOW OPEN FOR MAY QST COVER PLAQUE AWARD

Now that you've thumbed through and read the May 2011 issue of QST cover-to-cover, we're sure that an article sticks in your mind. So go ahead and cast your vote <http://www.arrl.org/cover-plaque-poll> for your favorite article in the issue. The article with the most votes will receive the QST Cover Plaque Award.

- Supporting Portable Antennas Without Guy Wires by Dave Fisher, KG0D/7
- A Transmitter for Fox Hunting by Mark Spencer, WA8SME
- An Emergency Backup Solar Power System by Jim Talens, N3JT
- A Junk Box Power Line Frequency Monitor by Arthur Glazar, W2NN
- 3B8EME -- Moonbounce from the Indian Ocean by Eltje Veen, PA3CEE, Johan Meezen, PE9DX, and Rene Hasper, PE1L
- Youth DX Adventure #1 by Don DuBon, N6JRL, and Dave Kalter, KB8OCP

The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Headquarters staff members who write articles are not eligible to receive votes.

==> THIS WEEK ON THE RADIO

This week:

- April 29 -- NCCC Sprint Ladder
- April 30 -- BARTG Sprint 75
- April 30 - May 1 -- Nebraska QSO Party; Florida QSO Party; SBMS 2 GHz and Up WW Club Contest (local time); QRP to the Field
- May 1 -- AGCW QRP/QRP Party
- May 3 -- ARS Spartan Sprint
- May 4-5 -- MIE 33 Contest

Next week:

- May 6 -- NCCC Sprint Ladder
- May 7-8 -- New England QSO Party; 7th Call Area QSO Party; Indiana QSO Party; 10-10 International Spring Contest (CW); ARI International DX Contest
- May 8 -- Araucaria VHF Contest; Microwave Spring Sprint (local time)
- May 8 -- SKCC Weekend Sprint
- May 11-12 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page

<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 7 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest
>,
Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac)
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>,
Seaside, Oregon; ARRL Wyoming State Convention
<http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne,
Wyoming
- June 4 -- ARRL Atlantic Division Convention
<http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-
1>,
Rochester, New York; ARRL East Bay Section Convention
<http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley,
California; ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>,
Marietta, Georgia
- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1759 - April 29 2011

Now, Amateur Radio Newsline report number 1759 with a release date of Friday, April 29, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC will host a live emergency communications planning session and you can be there on the World Wide Web. Also, two senators ask Congress to protect the Global Positioning System from a proposed new terrestrial broadband system, information surfaces on what may have caused the failure of ARISSat One to operate from the I-S-S and we tell you how to send your name and callsign to Mars. Find out the details are on Amateur Radio Newsline(tm) report number 1759 coming your way right now.

RESCUE RADIO: HAM RADIO RESPONDS TO TORNADO OUTBREAK

Massive tornadoes cut a streak of destruction across the Southern tier of the United States on Wednesday, April 27th. The twisters killed at least 250 people in six states and destroyed countless homes and businesses in their wake. Alabama's state emergency management agency said it had confirmed 162 deaths, while there were 33 in Mississippi, 33 in Tennessee, 14 in Georgia, eight in Virginia and one in Kentucky. In many areas all normal means of communications was lost.

Two of Alabama's major cities were among the places devastated by the deadliest twister outbreak in nearly 40 years. Police and other first responder radio systems fell silent when winds in excess of 120 miles per hour ripped antennas off buildings and felled towers. But the storms did not silence ham radio.

As we go to air, a group of hams is reportedly assisting in restoring emergency communications in the city of Tuscaloosa where the entire emergency communications system was wiped out by a tornado. It was only through reports filed by radio amateurs that first responders began to learn the magnitude of the devastation to that city.

Meantime in Pell City about 30 miles east of Birmingham, the Emergency Operations Center lost all of its antennas to high winds. Amateur Radio operators from ARES were dispatched to that E-O-C where at last report they were still providing communications support to the storm ravaged area. Similar scenarios were being played out in Arkansas, Kentucky, Mississippi, Missouri and North Carolina as severe weather

hit those areas as well.

A spokesman for the National Weather Service's Storm Prediction Center in Norman, Oklahoma said it received 137 tornado reports into Wednesday night. An expert at the center said it appears some of the tornadoes were as wide as a mile and likely packed a wallop that only 1 in 100 storms ever reach. It will be days, however, before scientists make an official determination. We will have more on the role played by ham radio in next weeks Amateur Radio Newsline report.

I'm Don Carlson, KQ6FM. Jim. (Various news sources)

**

RESCUE RADIO: FCC TO WEBCAST LIVE EMCOMM PREPAREDNESS SEMINAR

An important Emergency Communications planning meeting is being held by the FCC and you can sit in vicariously. Amateur Radio Newsline's Burt Hicks is here with all of the details:

--

The Public Safety and Homeland Security Bureau of the Federal Communications Commission will host an Earthquake Communications Preparedness Forum on Tuesday, May 3rd from 9:00 a.m. to 1:00 p.m. Eastern Daylight Time.

In its announcement the FCC noted that catastrophic natural disasters such as hurricanes and earthquakes are large-scale emergencies that may affect substantial portions of the public. They can also have a significant impact on critical national infrastructure, including communications networks and services.

The FCC goes on to say that this forum will consider the preparations that should be made in advance of an earthquake and how to develop and implement national communications policies and emergency procedures to respond to an earthquake's potential impact on communications networks and services. The forum will also highlight those practices that best prepare the public and the communications sector for a catastrophic earthquake.

The venue for this gathering is the Commission Meeting Room at FCC Headquarters in Washington, D.C.. This workshop will be open to the public; however, seating and registration will be limited.

But if you cannot be there in person - and its very unlikely most hams involved in emergency preparedness can -- audio and video coverage of the meeting will be broadcast live with open captioning over the Internet from the FCC's web page at www.fcc.gov/live. The FCC's web cast is free to the public, and unlike being there in person, it does not require you to pre-registrar.

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

Again the URL is www.fcc.gov/live. If you miss it live, the forum will eventually be available for replay at beta.fcc.gov/videos. More is on-line at tinyurl.com/3av7m9o (FCC)

**

RADIO POLITICS: SENATORS ASK CONGRESS TO PROTECT GPS FROM INTERFERENCE BY LIGHTSQUARED PROPOSED HIGH SPEED NETWORK

Senators Pat Roberts of Kansas and Ben Nelson from Nebraska have sent an open letter to colleagues asking them to join together in asking the FCC to take all necessary steps to protect the Global Positioning System. This from any harmful effects of the FCC International Bureau's grant of a conditional waiver allowing LightSquared Corporation to build tens of thousands of high power broadband ground stations which some claim could cause widespread interference to the Global Positioning System.

LightSquared is building a state-of-the-art open wireless broadband network in spectrum directly adjacent to that in which the Global Positioning System operates. Experts seem divided on the impact such a system will have on GPS operations. Some claim that terrestrial interference could render GPS useless while others claim it will be minimal or not exist at all.

In their letter, Roberts and Nelson noted that the full Commission must be involved in this effort to fully protect the Global Positioning System. As such that it must require that LightSquared objectively demonstrate non-interference to GPS signals as a condition prior to operation of the company's proposed wireless broadband service.

The letter from the two Senators also stated that anything less than this is an unacceptable risk to public safety. It described how vital GPS is for public safety, national defense and the nation's economic recovery. The document ends with a request for members of Congress to join Senators Roberts and Nelson in requesting that the FCC make certain that GPS is not compromised in any way. (TV Technology)

**

HAM RADIO IN SPACE: WHY THE ARISSAT ONE APRIL 12th DEMO FAILED

The planned operation of ARISSat One from the International Space Station to celebrate the 50th anniversary of the first manned spaceflight likely failed due to an uncharged battery. At least that's the impression one gets reading the latest report about the incident published by the AMSAT News Service. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

Lou McFadin, W5DID, is the ARISS US Hardware Manager. He says that a teleconference was recently held with the ARISSat team in Russia at

which time the situation concerning the failed early April operation was described by them in this way.

It seems that the The Russian space suit battery that was intended to be used on ARISSat was used during testing both on the ground and onboard ISS when it first arrived. When it was tested prior to the planned April 12th operation, it was discovered that the battery was low on charge.

These space suit batteries are specified for only five cycles of charge. It was decided to not recharge the battery at this time in order to keep the number of cycles as low as possible in order to save the battery for the actual ARISSat One deployment mission that is currently scheduled for July 26th.

McFadin added that they are still trying to get more information on the storage status and the battery health from the Russian team. He says that he and his people will keep everyone informed as they prepare for the eventual deployment of ARISSat One.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The abortive attempt to operate ARISSat One from on board the ISS would have commemorated the 50 years since Russian Cosmonaut Yuri Gagarin became the first terrestrial being to venture into space. (ANS, W5DID)

**

RESTRUCTURING: RUSSIA JOINS CEPT LICENSING

Russia has become the latest nation to sign onto the pan-European CEPT licensing agreement. According to the IARU Region 1 website, the Russian State Radio Frequencies Commission decided on March 10th that the Russian Federation would join both the CEPT and ECC Recommendation. This makes it possible for every CEPT license holder to operate on the territory of the Russian Federation.

There are a few caveats. Among them is that Russia will only permit such CEPT operation by a foreign station for a limit of three months, without any additional permission needed. Also, the call sign to be used in CEPT operations will be RA followed by the foreign hams personal call letters. (IARU Region 1)

BREAKING NEWS: HAM RADIO OPERATOR ONE OF NINE AMERICANS MURDERED IN KABUL

Some sad news to report. Word that James McLaughlin, WA2EWE who also held the call T6AF, was one of the nine Americans that lost their lives in a shooting at Kabul airport on Wednesday, April 27th. According to Voice of America reporter and fellow amateur Steve Herman, W7VOA/T6AD, all were killed when an Afghan military pilot opened fire in an operations room of the Afghan Air Corps.

Reporting from Seoul, Korea, where he is chief of the Voice of America bureau, Herman said McLaughlin, who was also his friend as well as being a career U.S. military officer working as a contractor training Afghan pilots.

According to Steve Herman, he first met Jim McLaughlinin August, 2009, when they were the only two radio amateurs operating from Kabul. Herman said that McLaughlin had put together a fine radio shack in his quarters. He said that it was obvious from spending time with McLaughlin that ham radio was an important morale booster and pastime. As such, T6AF usually spent a couple of hours a day on the air.

So far this April, fourteen Americans have been killed by members of the Afghan military. An Afghan officer on the compound identified the shooter of McLaughlin and the others as one Ahmad Gul.

According to Steve Herman, this attack was the worst single episode of an Afghan turning against his coalition partners. (W7VOA, other published reports)

WORLDBEAT: RSGB DECIDES NOT TO LIVE STREAM ITS AGM THIS YEAR

The Radio Society of Great Britain's Annual General Meeting on Saturday, May 14th will not be streamed live to the Internet this year.

For the past several years the British Amateur Television Club and the RSGB have cooperated in making this event available world-wide. But an RSGB statement published on the British Amateur Television Club's website, the organization says that while the club has once again offered to do it again this year that the RSGB has decided to decline.

While no specific reason was given for the sudden cancellation there's speculation that it has something to do with the recent resignation of the Society's former General Manager Peter Kirby who the RSGB's says left its employ after the discovery of what national society termed as financial irregularities on his part.

The statement goes on to say that RSGB has considered its position and has reluctantly reached the decision that this year it would not be prudent to go ahead with live streaming.

In its own statement, the British Amateur Television Club says that it has accepted the Society's position on this but hopes to be able to offer the Society the facility again in 2012. More is on-line at batc dot tv. (Southgate)

**

ENFORCEMENT NEEDED: SCAMMERS TRYING TO RIP OFF HAMS WITH BOGUS E-MAILS

The Radio Society of Great Britain is reporting on a ham radio version on an old Internet scam. This as it advises its members to be on the look-out for bogus e-mails purporting to be from other radio amateurs and asking for financial help.

The scam works this way. An e-mail, purporting to be from a well known amateur and signed with that ham's first name, claims that they have been mugged in some foreign city. It says that the ham has lost his passport and money in the attack. I then requests financial support to get the amateur out of difficulties and back home.

The RSGB says that several different prominent callsigns have been used by the scammers. And unless the perpetrators are caught, its likely only a matter of time before this scam goes world-wide including here in the United States. (GB2RS)

**

RADIO LAW: FEMA TO REQUIRE MANDATORY EAS TRAINING

FEMA will require that emergency alert originators take training before accessing its Integrated Public Alert and Warning System to deliver next generation Emergency Alert System warnings using the Common Alerting or CAP Protocol. At least that is how EAS consultant and broadcast engineer Gary Timm characterized remarks by Damon Penn, assistant administrator for National Continuity Programs at FEMA, at the recent National Association of Broadcasters Convention held in Las Vegas. In blog updates at www.awareforum.org, Timm writes as part of a series on EAS that the FEMA Emergency Management Institute will conduct the mandatory training in the same manner as other National Incident Management System courses that first responders must complete. (RW)

**

RESTRUCTURING: BROADCASTERS VS THE WHITE HOUSE CLASH OVER SPECTRUM

The broadcast community is saying no to a White House demand that they give up some of their spectrum to create more broadband frequencies for mobile phones and the like. Jeff Clark, K8JAC, is here with the details:

--

It could soon be an open war of words between the Obama administration and the over-the-air broadcast community over who is going to keep the current broadcast spectrum and what purpose it will be used for. This

as the deadline dot com website reports that National Association Of Broadcasters chief Gordon Smith told station owners at the organization's annual convention in Las Vegas that the trade group is in full battle mode. This, to protect the broadcast spectrum it now has from being reallocated to broadband wireless.

FCC Chairman Julius Genachowski has already promised that no broadcaster will be forced to offer up spectrum for auction. Genachowski says that those who do will know exactly what the deal is before relinquishing any rights. But even that position is at odds to some degree with that of the White House which wants TV stations to give up some of their spectrum so it can be redeployed to offer Internet services. That's something that broadcasters are adamantly refusing to do even if the government offers some form of monetary compensation.

Regardless of what Chairman Genachowski might say, the National Association of Broadcasters biggest concern is that the government might simply seize spectrum without a broadcaster's consent if they do not voluntarily surrender it. This is a possible scenario if broadcasters do not comply willingly which at this point in time appears unlikely to happen.

I'm Jeff Clark, K8JAC.

--

And at the same convention, CBS chief Leslie Moonves echoed the NAB's position when he said that as long as the government's plan remains voluntary, we're fine with that. This is because we're not going to volunteer. You can read more about this situation on-line at tinyurl.com/3fyt5p4 (RW)

**

PUBLIC SERVICE: SOUTHERN OHIO HAMS NEEDED FOR IRONTON PARADE

The Southern Ohio Amateur Radio Association Amateur Radio Emergency Service is looking for additional operators to assist in communications for the Ironton Ohio Memorial Day Parade on May 30th. Amateurs will be used to call for help in case of an accident, to call for law enforcement or fire departments if needed, to help people find their parade division, to help parents find a lost child and a host of other situations. Any ham with a two-meter handheld transceiver who is interested in helping should contact Ken Massie by e-mail to hamwn8f (at) yahoo (dot) com. Between 25 and 30 operators are needed. So far 18 have signed up. (Ironton Tribune)

**

HAM HAPPENINGS: LIVERMORE CA LARK SWAPMEET FOLDS

The Livermore Amateur Radio Klub in northern California closed the doors on its famed LARK Swapfest. The sponsors blame declining

attendance by both sellers and buyers, rising costs and the difficulty in recovering from the loss of the swap being held at Los Positas college among the reasons that led to this decision.

Its announcement notes that it takes an enormous amount of work and resource to make these swaps successful. It says that as a club it has witnessed a steady decline in both revenue and manpower to make the swap a worthwhile venture.

But all might not be lost. The announcement also notes that the club is looking at the possibility of a bi-annual event that may look more like a hamfest including a swap meet. For that reason it is keeping its Yahoo swap list alive. (W6OMF)

**

HAM HAPPENINGS: AMATEUR RADIO AND SPACE DAY

Dave Taylor, W8AAS, says that, The Smithsonian National Air and Space Museum has invited AMSAT to organize displays and activities at Space Day to be held this Saturday, May 7th from 10:30 to 3:00 at the Air & Space Museum on the National Mall. ARISS is already slated to have various flight-type hardware on hand and also expects a radio contact with International Space Station. However Dave would like to hear from anyone who has other space-related amateur radio artifacts, posters, activities or anything else they'd like to display. Also needed volunteers who can staff the tables, help with setup and tear down, and various other tasks. To sign up contact Dave Taylor via e-mail to w8aas (at) amsat (dot) org (W8AAS, AMSAT)

**

NAMES IN THE NEWS: A HAPPY 220 TO SAMUEL F. B. MORSE

And a very happy 220th birthday to Samuel F. B. Morse, who introduced telegraph communications in the United States.

Morse was born on April 27th 1791 in Charlestown, Massachusetts. On 24th of May 1844, he famously sent the message "What hath God wrought" by telegraph from Washington D.C to Baltimore, Maryland and there-by ushering in the electronic information age that has continued to grow and become the world-wide broadband systems of today.

But the telegraph Morse code used in Morse's days differed in a number of respects from the International Morse code used in later times. A description of the differences can be found at tinyurl.com/4e9mxk (Southgate)

EMERGING TECHNOLOGY: MAKING LEDS THE ALL PURPOSE ROOM LIGHT

New technology may make Light Emitting Diodes practical boor everyday home and even hamshack Jim Damron, N8TMW, reports:

--

Researchers at the University of California, Santa Barbara, say they've figured out the cause of a problem that's made light-emitting diodes impractical for general lighting purposes.

Chris Van de Walle is a professor in the Materials Department at the University of California at Santa Barbara. He heads the research group that carried out the work. They investigated a phenomenon referred to as the drop in efficiency that occurs in these LEDs when they're operating at the high powers required to illuminate a room. The cause of this decline has been the subject of considerable debate, but the U-C Santa Barbara researchers say they've figured out the mechanism responsible for the effect by performing quantum-mechanical calculations.

Van de Walle says that identifying the root cause of the problem was an indispensable first step toward devising solutions.

Im Jim Damnron, N8TMW.

HAM RADIO IN SPACE: AO-51 INTO ECLIPSE PERIOD - OPERATION LIMITED

Amsat Oscar 51 has recently experienced a few shutdowns due to a low battery voltage trip. This is because of increasing eclipses now at 20 minuets per orbit and increasing, poor sun angles and a weak battery.

The transmitter power is down to about 550 milliwatts and AO-51 is now using the 67 Hz P-L tone required mode in order to turn the transmitters off when not in use.

The AO-51Command Team will continue adjusting various parameters, including transmitter power, trigger voltages, and the like in order to keep the battery temperatures reasonable. Keep in mind that the power management feature keeps the transmitters off during eclipses, so you can't bring it up even with a PL tone during those periods. (ANS)

**

ON THE AIR: THE INTERNATIONAL POLICE ASSOCIATION HG15IPA

On the air, keep an ear open for Hungarian special event station HG15IPA to be active through December 31st to celebrate the 15th anniversary jubilee callsign of the International Police Association. The station is expected to be on 160 through 10 meters using CW, SSB, RTTY, PSK31 and SSTV. For more information please visit www.qrz.com/db/hg3ipa or www.qrz.com/db/ha3jb on the World Wide Web. QSL via HA3JB.

**

ON THE AIR: CELEBRATING THE BATTLE OF NASEBY

The United Kingdom's Welland Valley Amateur Radio Society will operate special event station GB0BON on June 19th. This to commemorate the 366th anniversary of the Battle of Naseby which was the decisive battle of the English civil war.

The Battle of Naseby took place on the June 14th 1645 in the small hamlet of Naseby just south of the town of Market Harborough. In June 2010 members of the Welland Valley Amateur Radio society decided to put a special event amateur radio station on air to commemorate the historic event. It was deemed such a success that they are doing it again this year as well. If you contact GB0BON please QSL to G4XEX at the address on qrz.com. (DX Today)

**

RADIOSPORTS: THE 7TH HST CHAMPIONSHIP CUP OF NATIONS

The 7th International High Speed Telegraphy championship Cup of Nations will take place in Mogilev, Belarus from July 7th to the 11th. This is a traditional event and at airtime planners report that several top high speed telegraphy teams have already confirmed their participation. For more information on this event please contact Andrei Bindasov by e-mail to andrew_eu7ki (at) hotmail (dot) com. (Southgate)

**

DX

In DX, PD9DX, ON8AK and ON5UR will be active as OJ0UR from Market Reef between August 13th and the 20th. Their operation will be on the HF bands using a Stepp-IR Big Vertical and a Stepp-IR 2 element beam. QSL via M0URX, direct, via the bureau, or electronically using Logbook of the World.

Members of the Camb-Hams will be activating the Isle of Arran through May 8th. They will be operating as GS3PYE/P and GS6PYE/P. Operation will be on all bands from 160 through 2 meters, and on 70 cm on various ham radio satellites. WSL as directed by the operator that you contact.

IZ3ESV, I2VGW and IZ2LSC will be active stroke HB0 from Lichtenstein between June 2nd and 5th. The trio is planning a micro-light and holiday-style operation using CW, SSB and RTTY. The main focus will be on the 30, 17 and 12 meters and the upper High Frequency bands depending on the propagation. They will also try 6 meters. QSL via their home callsigns.

ON4LO will be active on 40 through 10 meter SSB as F slash ON4LO stroke P until June 4th. He plans to operate from a few lighthouses during his trip. QSL via his home callsign, direct or via the bureau.

**

THAT FINAL ITEM: SEND YOUR NAME AND CALL TO MARS

And finally this week, there may not be any ham radio station on the planet Mars, but there may soon be a lot of ham radio callsigns making their way across the surface of the red planet. Amateur Radio Newsline's Michael Grebert, KJ4ZZV, has the details:

--

NASA is collecting names to be put on a microchip that'll be onboard the Mars Science Laboratory rover heading to Mars in the fall of 2011. Some Radio Amateurs have been adding their call sign to last name field. As well as having your call sign traveling around the Martian surface you also get a electronic commemorative certificate to print out.

The rover has an unusual connection with radio. As previously reported here on Amateur Radio Newsline, this second generation robber has special indentations on its wheels that will spell out the initials JPL in Morse as it travels around Mars. And for the few of you who might not be aware. JPL stands for Jet Propulsion Laboratory located in Pasadena, California, which is the NASA branch that builds of the rovers.

You can add your name and call on the Mars microchip at tinyurl.com/marsham. From what we are hearing, a whole bunch of hams already have.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

--

Again the URL to add your name and call to the microchip headed to Mars is tinyurl.com/marsham. More on the Mars Science Laboratory project can be found at mars.jpl.nasa.gov/msl/. (NASA)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain,

the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www (dot) arnewsline (dot) org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Here's a note from Allen Pitts, W1AGP, the ARRL Media and PR Manager:

Heads up!

ARRL President Kay Craigie will be on Saturday NPR's All Things
Considered.

It's currently scheduled to run at about 5:24 pm ET, right after an
update on the tornado response in Alabama, although that could still
change.

How curious that a story about HR-607's problem would run right after
a piece on the recovery that the hams are intimately involved in –
using the very same frequencies that HR-607 would take away and sell.

Allen Pitts, W1AGP
Media & PR Manager

SARL NEWS - SUNDAY 01 MAY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEY

We regret to announce that the key of Jan, ZS6DDK went silent on 7th April. He had not been in best of health for some time. Our sincere condolences to his wife Dot, other relatives and friends.

(PAUSE)

In the news today:

RADIO TECHNOLOGY IN ACTION SYMPOSIUM FOR CAPE TOWN NEXT SATURDAY

SOUTH AFRICANS MAY NOW OPERATE IN RUSSIA

DO NOT CONFUSE THE SARL WEB WITH THE FORUM

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

RADIO TECHNOLOGY IN ACTION SYMPOSIUM FOR CAPE TOWN NEXT SATURDAY

The South African Radio League will present the first of its annual series of Radio Technology in Action Symposiums in Cape Town on Saturday 7 May 2011. The event will be held at the Cape Peninsula University of Technology.

The programme features presentations for persons interested in radio and satellite technology as well as those who are just technology curious. The symposium starts at 09:00 with a presentation highlighting Amateur Radio as a valuable resource for young people as a primer for a career in communication and electronics, it affords older people the opportunity for further education to enhance their enjoyment of the Amateur Radio, which is generally accepted as the most rewarding of all

scientific hobbies. For technicians in Industry it is a valuable resource for experiential learning. The presentation will be followed by a panel discussion on how amateur radio can benefit older persons when they retire from full time work.

The first technology presentation will focus on Field Programmable Gate Array (FPGA) devices including a simple explanation, its advantages, where it is used and how radio amateurs and electronic hobbyists can incorporate these devices in their projects.

A student presentation will focus on the development of two student satellites at CPUT including a visit to the laboratory areas where the satellites are being constructed. The project includes the building of two CubeSats, one measuring 10x10x10 cm and a three unit CubeSat.

Rapid Deployment of Amateur Radio, also called RaDAR, will focus on the deployment of amateur radio in field conditions focussing on how amateur radio can be deployed to provide communication when a disaster strikes.

There will also be an update on KletsKous and SAiSAT, two satellite projects recently launched by the South African Satellite Association (SA AMSAT).

Get the full programme on www.sarl.org.za and select RTA. Watch the promotional video clip from the same page of the home page at sarl.org.za.

SOUTH AFRICANS MAY NOW OPERATE IN RUSSIA

Russia has become the latest nation to sign onto the pan-European CEPT licensing agreement. According to the IARU Region 1 website, the Russian State Radio Frequencies Commission decided on 10 March that the Russian Federation would join both the CEPT and ECC Recommendation. This makes it possible for every CEPT license holder, which includes ZS and ZR licences, to operate on the territory of the Russian Federation.

There are a few caveats. Among them is that Russia will only permit such CEPT operation by a foreign station for a limit of three months, without any additional permission needed. Also, the call sign to be used in CEPT operations will be RA followed by the foreign amateur's personal call letters.

DO NOT CONFUSE THE SARL WEB WITH THE FORUM

The SARL web has two sections, an open section which can be viewed by anyone world-wide and carries most of the news items and articles. This part of the web has a very large national and international following. The members' only section is available to members only and carries membership benefit items such as Radio ZS. This section is in the process of being expanded.

The forums are exactly what the word means, a discussion place where people share technical information and comments about the operational

side of amateur radio. It is this section, the forum, which will from 1 July be limited to members only. Nothing else has changed or is changing.

Interesting technical and amateur radio operational articles are invited for publication in Radio ZS or on the SARL web pages. Please send articles and news items for Radio ZS to radiozs@sarl.org.za or, if more suitable for publication on the SARL web, to artoday@sarl.org.za.

COMPETITION NEWS

MARCH 2011 VHF CONTEST RESULTS

Congratulations to the following:

Divisional winners, digital. ZS1LS ZS2ACP ZS3SVD ZS5Y ZS6A

Divisional winners, analog. ZS3SVD ZS5Y ZS6A

Overall results, digital.

1) ZS5Y 143 223 points 2) ZS2ACP 138 856 points 3) ZS6A 113 758 points 4) ZS1LS 101 352 points 5) ZS3SVD 82 328 points

Overall results, analog.

1) ZS5Y 6 471 points 2) ZS6A 1 979 points 3) ZS3SVD 470 points 4) ZS6HS 248 points

Longest distance worked. 2 m ZS1LS 1 301 km 4 m ZS1ACP 1 183 km 6 m ZS1LS 1 537 km

EME during the contest. (Ps. EME is not counted towards the main contest). ZS1LS worked on 2 m raw score 788 923 points with longest distance QSO 13 976 km ZS5Y worked on 23 cm raw score 2 910 222 points with longest distance 10 428 km

The winner of the "Lucky Draw" prize is Pierre, ZS6A.

SARL QRP CONTEST HELD ON THE 16TH APRIL 2011

5 logs were received. The following statistics were derived from the logs: Number of stations who participated - 56 Number of QSOs made - 85 Number of prefixes worked - 12 Number of phone QSOs made - 74 Number of CW QSOs made - 11 Number of home stations - 3 Number of field stations - 2

A special word of thanks to Eddie, ZS6BNE, who interrupted his journey back home from the AGM, to setup a field station next to the road and managed to make a few contacts.

The results are as follows: 1st ZS6XT - Pieter Jacobs 924 points 2nd ZS6A - Pierre van Deventer 300 points 3rd ZS2EC - Theunis Potgieter 210 points 4th ZS3AOR - Pieter Bosman 160 points 5th ZS6BNE - Eddie Leighton 36 points

The winner of the Lucky Draw prize is ZS3AOR - Pieter Bosman.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. New sunspots 1 202 and 1 203 were numbered on Thursday and it looks like 1 202 has already faded away. NASA's Solar Dynamics Observatory is monitoring a hole in the sun's atmosphere -a "coronal hole." Coronal holes are places where the sun's magnetic field opens up and allows the solar wind to escape. A stream of solar wind flowing from this coronal hole is expected to reach Earth on April 30th-May 1st. NOAA forecasters estimate a 35% chance of geomagnetic activity at that time. For the people doing their own frequency predictions the expected effective sunspot number for the week is about 50.

With the increase in the solar flux the improvement of the DX conditions are also very noticeable. DX openings are now once again occurring on a daily basis and even 6 m is showing signs of life.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

1 May - ZS3 Sprint a phone and CW contest on the 40 metre band runs from 14:00 to 15:00 UTC. 7 May - RTD in Cape Town. 18 to 22 May - Follow Dayton Hamvention via W5KUB.com. 25 May - Closing date for nominations for NSN awards, visit www.amateurradio.org.za. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

437. [RAC-Bulletin] RAC Bulletin 2011-009E - Setting the record straight regarding the RAC Ontario Section bulletin for April 23, 2011.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

Recently, the content of the above bulletin was sent to me for review. The text of the bulletin clearly, in bold red print, states that the current Ontario Emcomm project, ECOA, is an " integrated partnership with the ARES Field Service."

I would like to state to all that the above statement is false, and creates the perception that the Radio Amateurs of Canada Field Service has been involved in the process. Again, this is not the case.

The Radio Amateurs of Canada Field Service is happy to support and respect all Canadian Emcomm efforts no matter what the affiliation. We encourage support of the Field Service ARES program, but fully support and respect the work of Emcomm groups like ECOA, PERCS and others.

The main focus of the RAC Field Organization since November 2010 has been two key projects. The "ARES Review Project" and following the March 24, 2011 Board meeting, the "Implementation of a full new Field Organization". Both of these projects are in full swing, with more than 30 volunteers meeting by teleconference regularly to ensure that the Radio Amateurs of Canada continues to be the "go to" national voice of Canadian Amateurs.

This work has taken many volunteer hours, and although I won't name them, I would like to say "thank you" to our National Secretariat, National Advisors, Special Advisors, Working Group Chairmen, Working Group members and everyone who continues to help see these projects succeed. Thanks guys - you know who you are.
I hope that the above clarification is helpful to the many RAC members who have e-mailed me with concerns.

439. Pete King, in true Republican fashion, seeks to destroy the very radio frequencies that amateur radio operators have used to save lives after natural disasters.

Newsgroup: rec.radio.amateur.misc

http://www.npr.org/2011/04/30/135873302/ham-radio-volunteers-worry-about-spectrum-plan

Across Alabama, emergency communications systems fell silent this week when tornadoes knocked down antennas and cell phone towers. Amateur radio operators are helping to restore emergency communication in some of the areas hardest hit by the storms. But those volunteers say their ability to provide that help is threatened by a new bill in Congress.

When Hurricane Katrina came ashore in 2005, it destroyed cell phone towers and electrical infrastructure. That left law enforcement and relief agencies without a viable way to communicate ï¿½ until amateur radio operators stepped in.

Hundreds of amateur radio operators ï¿½ or hams, as they call themselves ï¿½ poured into Louisiana and Mississippi from all over the country, bringing their own portable antennas and amplifiers to temporarily replace what the storm had wiped out.

"They set up communications for the agencies, both governmental and relief agencies that were trying to help people there," says Kay Craigie is the president of the American Radio Relay League, an advocacy group that represents hams . "And they stayed there for weeks under very, very difficult conditions."

Craigie says Hurricane Katrina is just one example of how volunteer ham operators have responded to emergencies all over the country. But she says their ability to provide that help is being inadvertently threatened ï¿½ in the name of improved emergency communication.

Peter King is a Republican congressman from New York, and the chairman of the House Homeland Security Committee. At a hearing in March, King lamented that police, firefighters and other first responders have trouble talking to each other during emergencies.

"As we approach the 10th anniversary of September 11th, public safety must be allocated sufficient spectrum so that a national, interoperable public safety wireless broadband network can finally be built," he said.

King is sponsoring a bill called the Broadband for First Responders Act of 2011. The measure would take some of the broadcast spectrum that was freed up by the transition to digital television and set it aside to build a new emergency communications system. That idea has wide support in both parties, and both houses of Congress. To pay for

it, King's bill proposes auctioning off another band of broadcast frequencies that are sometimes used by first responders. The problem is, those same frequencies are used by ham radio operators, too.

Joseph Taylor lives in Princeton, N.J. His house isn't hard to find: It's the only one on the block with a giant radio tower in the backyard.

"Ham radio operators have a long history of being very useful in emergency situations," Taylor says. "The training of amateurs has been a national resource for many decades now."

Taylor says his early radio training led him to a career in physics, and eventually, a Nobel Prize. There are other frequencies besides those targeted by the House bill that hams can use. But amateur radio advocates worry that this bill could be just the first step.

"They start taking these frequencies away now, and then down they take a few more. And pretty quick, it becomes a major problem instead of just a minor issue," says Vince Kolar, the emergency manager for Cascade County, Montana. He says hams routinely help the county with traffic control, and with its emergency response in case of wildfires and severe weather.

"Those people are all volunteers," he says. "They all volunteer their time and their equipment, mostly. If it makes it harder for them to do what they need to do, then I'm certainly opposed to it."

Across the country in Virginia, state emergency coordinator Michael Cline doesn't dispute the importance of hams. But he thinks the House bill can be changed.

"They really are an integral part of emergency management and public safety," Cline says. "But I think now that a lot of folks are realizing that there is a potential harm to the amateurs that we'll be able to make accommodations for them."

King, the author of the House bill, declined requests for an interview. In a written statement, King says he's working to address the concerns of the amateur radio community, while still moving forward with a new public safety network. And when a future disaster knocks that network offline, hams hope they'll still be in a position to help.

The material posted here may or may not be factual.

The author is following the example set by
Senator Jon Kyl (R, AZ) who was caught citing
false statistics, after which his staff stated
that his comments were "not intended to be factual."

2 Metres Counties Contest

The Easter Monday EI/GI counties contest was well supported this year, keeping the FM channels and SSB frequencies busy for the full two hours of the contest.

This is a popular contest with club stations; we heard Shannon Basin Radio Club, Mayo Radio Experimenters Network, Dundalk Amateur Radio Society and North County Radio Club during the contest. Being a VHF contest, hilltop operations were favoured by some: these included David EI7GEB who was on Mohercrom on Co. Cavan, and Joe EI7GY who was on Toin le Gaoith (Tonlagee) in Co. Wicklow: Joe reports that the mountain lived up to its name, with plenty of "gaoth" (wind) around his contest QTH.

Most EI and GI counties were on the air for the contest. There was a small "lift" during the last 20 minutes or so of the contest, which brought in some overseas stations.

Logs should be sent to contestmanager /at/ irts/ dot/ie as soon as possible.

Up-Coming IRTS Contests

1. 2m Counties Contest Monday April 25th 2011. From 2pm till 4pm. Log to be submitted by May 25th.

2. CW Field Day Sat 4th/ Sun 5th June 2011. Log to be submitted by July 5th.

Calling all active VHF and Higher operators we are trying to get the 2010 Squares table finalized on IRTS.ie. So can anyone that was active on the VHF bands last year please send your Square totals or your log and I can work it out for you to EI2GLB /at/ hotmail / dot/.com . To see the squares table go to www.irts.ie and click on vhf/uhf/shf on the right side of the home page.

Theory Examination

The next theory examination for the Harmonised Amateur Radio Examinbation Certificate (HAREC) will be held on Thursday, 7 July next at 2.00 p.m. in the ComReg offices in Dublin. The examination may also be held on that day at other centres if warranted by the number of candidates.

Full details, including entry procedure and examination fee, are available at www.irts.ie/exam

---

Introduction to Amateur Radio the practical way

The Mayo Radio Experimenters Network plan on holding a series of practical, hands on, open days throughout the summer months, commencing Sunday May 8th. The events will start at 13.00 approx (weather permitting) and will take place on the following dates: Sunday May 8th Sunday June 12th Sunday July 10th Sunday August 14th Sunday September 11th Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence.

The locations will be chosen in the Mid Mayo area in order to encourage attendance from all parts of the County or further afield. If you would like further details including full details of locations please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/ eircom/ dot/net) , email David Hatfield EI3ECB on ei3ecb/ at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

South Dublin Radio Club

The amateur radio classes are back weekly in SDR. In the very near future morse classes will be available.

The Mid Ulster Amateur Radio Club

The Mid Ulster Amateur Radio club will be holding a foundation course over one weekend towards the end of May. The course is open to anyone who wishs to take the first step on the Amatuer radio ladder. if interested you must attend the registration night on Wed 4th May from 7.30pm til 8.30pm at the place initiatuve, ardress pk, portadown, bt62 3tp. more details can be found at www.muarc.com or by contacting Martin MI0YMF on 02832852712

The Mid Ulster Amateur Radio club will be holding its monthly meeting today the 8th May 2011 at 3pm, in Brownlow Resource Centre, Brownlow Road, Craigvon, bt65 5dl. Both Members and visitors are welcome.

The annual rally will be held on Sunday 22nd May. If anyone wishes to book a table or for more information, then please contact Brian 2I0TCA (Rally Coordinator) at cqmuarc/ at/ gmail/ dot/ com or via www.muarc.com

---

International Castle Weekend

The International Castle weekend will be held on the 21st and 22nd May 2011 with Uk and Ire Castle weekend being from the 28th and 29th may 2011. If interested in activating any historical site, from castles, forts, roc bunkers etc then please complete the activation forms 10 days prior to activation, or contact your regional representative. see www.cashota.co.uk

---

Shannon Basin Radio Club

The Shannon Basin Radio Club will be taking part in the Mills on the air weekend on the 14th and 15th May. They will be operating from Elphin Windmill in Co. Roscommon and using the call EI2EWM. Averyone is welcome to turn up over both days and enjoy the tour of the beautiful restored windmill aswell as operating a special event station.

DX News

Kees PE1KL and his daughter Lisa PA2LS will be in Ghana until 6 May operating as 9G5LK. They hope to operate all bands 80 -10m and QSLs go via PA2LS and Logbook of the World.

Marcello IK8DNJ is off to the Dominican Republic and will sign HI7/IK8DNJ until 13 May. He will operate SSB and digital modeson 40 -10m. QSL info is via IZ8LKL.

Several Japanese operators will be QRV from the island of Ogasawara for varying dates up to 13 May. Calls to look out for are JD1BMT, JD1BLY and JD1BMH. As well as being quite a rare DXCC entity Ogasawara also counts for IOTA AS-031.

The well-known DXer Gerard F2JD is on his travels again and will be active as HR5/F2JD until the middle of May. Have a look at his web page

at <f2jd.free.fr> to see a list of the countries he has operated from since 1969. His QSL manager is F6AJA.

Chris ZS6RI will be operating from Zambia as 9J2RI for up to two years. He is on a work assignment there and because of that he will be '6 weeks on / 6 weeks off ' during that time. In the past Chris has been QRV with such exotic calls as ZD9IR Tristan da Cunha, 5H9IR Tanzania and EL8RI Liberia.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K2PF, AL3T, K3IRV, KK3Q, NG3K & ADXO, N4AA & QRZ DX, N4JF, W4OTN, KH6BZF, K8GG, K8YSE, NE8Z, W8GEX (60m News), W9ILY, 4J5T, 4L2M, 9M6XRO, AT International, CX1EK, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, HL1VAU, I1JQJ/ IK1ADH & 425 DX News, LZ1BJ, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal(MMMonVHF) and ARRL Web page for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 24th-April, through Sunday, 1st-May there were 233 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP1, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T31, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2V, VP5, VP6, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3W, VIETNAM. Paul, WQ2N, will try to be active as 3W2N from here between May 23rd and June 8th. He is there because of work, so operating the radio is secondary (he may not find any time to operate at all, but he will try

his best). He plans to travel to different regions of Vietnam (South, Central, and North). Activity will only be on 40/30/20/17/15 meters. Paul mentions, "If you are not sure if it's me (on the air), E-mail me to confirm a contact. I will respond ASAP." QSL via WQ2N.

4J/4K, AZERBAIJAN (News). Natig Gasimov, 4J5T, President of the Federation of Radio Sport of Azerbaijan, informs OPDX: "Please, be informed that since the present, in accordance to ITU Band Plan, all 4J/4K amateurs are permitted for usage of expanded frequencies of 40 and 80 m bands in a frame of 3500-3800 kHz and 7000-7200 ?Hz, instead of previous narrower bands."

6W, SENEGAL. Fernando, EA1BT, will be active as 6W/EA1BT from Senegal between May 4-12th. No other details were provided. QSL via EA1BT. Watch the following Web site (still under construction) for updates and more details at: http://www.senegal2011.net

8Q, MALDIVES. Vlad, RA9LR (ex-S79LR), will be active as 8Q7LR from the Maldives (AS-013) during his furlough between June 21st and July 2nd. Activity will be exclusively digital but with some SSB on 40-10 meters. QSL via UA9LP, direct or by the Bureau.

9N, NEPAL. Sam, K0YAK, is now in Kathmandu (Lalitpur) and is expected to be active as 9N7AK until early July. He is using a Kenwood TS-50 with a Cushcraft MA5V - a lightweight, 5-band vertical antenna. A blog page is up and running which will provide notes of major operational updates, summaries of contacts made, general information about amateur ("ham") radio in Nepal, and photos of any hams who stop by (the coffee is always on) at: http://9n7ak.wordpress.com
QSL via K0YAK. PLEASE NOTE: Unless incoming cards are accompanied by an International Reply Coupon (IRC), return QSL cards will be sent via the Bureau during the summer of 2011. LoTW registration is pending.

9N, NEPAL. A multi-national team, all members of Mediterraneo DX Club (MDXC), will be active as 9N0MD from Nepal during November. Operators mentioned are Dov/4Z4DX, Ziv/4Z4OQ, Marco/CE6TBN, Pasquale/IZ8IYX, Gabriele/I2VGW, Sam/F6AML, Antonello/IT9YVO, Mau/IV3ZXQ, Giuliano/IV3RLB, Fabricio/IZ2KXC, Ant/IZ8CCW, Luis/XE1L and Adhi/YB3MM. The pilot station will be Pino/IZ8BGY. Activity will be on all HF bands and modes. The team plans to give away trophies and prizes (see their Web for details). Look for more details and updates at:
http://www.mdxc.org/nepal/topic1/index.html

ALASKAN KLFF AWARD AVAILABLE. The Alaskan Flora Fauna Award (KLFF), a part of the World Flora Fauna (WFF) program, now issues new awards. For complete details on the KLFF Awards, visit: http://www.klff.us.pn

CE2, CHILE. Luis, CX1EK, informs OPDX that he has been operating as CE2/CX1EK from Marbella, V Region (50 kms north of Vi&#65533;a del Mar/Valparaiso,
on the coast) since April 12th and will be there until May 15th. Most of his activities have been on 12 meters. QSL direct (SASE or IRC) to:

Luis Matho, 2303 Nordok Place, Alexandria, VA 22306 USA.

DAYTON HAMVENTION NEWS. Joe Pater, W8GEX, reports (edited): "The SOUTHWEST OHIO DX Association (SWODXA) announces that a limited number of dinner tickets are still available for the DX Dinner®. This annual event, which is held in conjunction with the Dayton Hamvention®, will be on Friday, May 20th, at the Dayton Marriott, 1414 S. Patterson Blvd., Dayton, Ohio.
As in the past, there will be some major door prizes. And there is always great anticipation as to who will be named the 'DXpedition of the Year'.
The cash bar opens at 5:30 p.m., with dinner served at 7:00. There is ample, free parking, on street level. Tickets are 40 USDs each, payable in US funds. For program details and to order tickets, go to our websites at: http://www.swodxa.org --or-- http://www.swodxa.blogspot.com
The SWODXA will also host the DX Forum on Saturday afternoon. There is a great list of presenters:
2:45-3:15 PJ7E - Craig Thompson K9CT & Joe Pater W8GEX
3:15-3:30 NCDXF - Glenn Johnson/W0GJ & Tim Totten/N4GN
3:30-4:00 PJ6A - Bob Allphin/K4UEE
4:00-4:30 VP8ORK - Ralph Fedor/K0IR
4:30-4:55 Mount Athos - Rick Dorsch Jr. NE8Z
4:55 FT-2000 Drawing"

DAYTON HAMVENTION TOPBAND DINNER. George, K8GG, reminds Topbanders that reservations for the Dayton Topband Dinner this year are available for a few more days. Reservations have to be made and paid by May 10th. No exceptions. They are at a new venue - the Crowne Plaza - with better seating and A-V than in prior years. For more details, please visit: http://www.topbanddinner.com

IOTA NEWS.....
AF-068. (Update). Italian operators Leopoldo/I8LWL (5C2L), Alfredo/IK7JWX (5C2J), Ruggero/IK2PZC (5C2P), Simon/IZ7ATN (5C2SG), Mounaim/CN8QY and CN8QX will activate the rare Herne Island, located in the large bay of Dakhla, for one week in September. For updates, please visit the following Web page at: http://www.i8lwl.it

AS-058. Before heading to the Maldives, Vlad, RA9LR (ex-S79LR and 8Q7LR), will be active as 9M2/RA9LR from Langkawi Island, West Malaysia, between mid-May to mid-July. Activity will be on CW, PSK, RTTY and some SSB. QSL via the address on QRZ.com.

AS-060. Operators Han/DS2GOO, Son/DS3HWS, Chae/DS5BSX and possible others will be active as homecall/4 from Pigum Island (KDN H32) between May 7-9th. Activity will be on 80-10 meters using CW, SSB and RTTY. QSL via operator's home callsign. A Logsearch will be available on: http://ds2goo.karl.or.kr/2011/Pigum_Island

EU-094. Operators Didier/F1LLV, Dyd/F4ELJ, Jef/F6CNM, Pierre/F8DHM, Nicolas/F8FKD, Bob/ON4LRG, Luc/ON4LUC, Nicolas/ON4VK, Janny/ON5PO, Paul/ON6DP, Fred/ON6QR, Pierre/ON7PC and Eric/ON7RN

will be active as TM1G from Glenan Island (St. Nicolas, DIFM
AT-010, FFF-200) during the RSGB IOTA Contest (July 30-31st).
QSL via F6CNM or ON6DP. Look for operators to activate other
DIFM/DFCF after this operation.

JW, SVALBARD. Karl, LA8DW, will be active once again as JW8DW from Svalbard
(EU-026) between September 28th and October 5th. Bands and modes of
activity were not provided. QSL via to his home callsign, by the Bureau
or direct (ONLY with IRC and RETURN ENVELOPE -- NO GREENSTAMP PSE). The
JW8DW online log is available at: http://www.logsearch.de
Log will also be upload to LoTW.

KH0, MARIANA ISLANDS. Yoshi, JJ8DEN, is now active as KH0PR from the
Coconut Village Hotel on Rota Island (OC-086) until May 8th. Activity
will be on 160-6 meters using CW, RTTY and PSK. Also possible is some
Satellite operations (FO-29 and VO-52). QSL via JJ8DEN, by the Bureau
or direct (w/SASE and 2 USZDs or 1 IRC with European type envelope. If
small envelope is sent, Yoshi will return QSL card by surface mail [ship
mail]). DO NOT send QSL to Rota.

KH6BZF PROPAGATION FORECAST/REPORT (May 2-8th)....

May 04 AN-HN BN - Below Normal
May 05 HN-AN AN - Above Normal/Geomagnetic Level is QUIET
May 06 AN LN - Low Normal
May 07 AN HN - High Normal/Geomagnetic Level is UNSETTLED
May 08 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LZ2011, BULGARIA. Members of the Bulgarian Federation of Radio Amateurs
will activate special event station LZ2011KM between May 1-31st. Activity
is to celebrate national "St. Kiril and Methodius Day" (creators of the
Cyrillic alphabet). Operations will be on all bands and modes. QSL via
LZ1BJ, direct or by the Bureau.

PG6, THE NETHERLANDS (Special Event). Look for special event station
PG6N to be active during the "Dutch Lifeboat Day" May 7th. PLEASE QSL
via the Bureau. For more details see:
http://www.qrz.com/db/PG6N --or-- http://pg6n.jouwweb.nl/english

PJ2, CURACAO. Operators Rich/KE1B and YL Ann/W6NN are now active as
PJ2/homecall from the PJ2T Signal Point Station on Curacao (SA-099,
WLOTA LH-0942) until May 5th. Look for Ann to handle the SSB activity,
while Rich operates mostly on CW and RTTY. QSL both operators via their

home callsign, direct, by the Bureau, LoTW or eQSL.

PP0T, TRINDADE ISLAND (Update). No word on the expected PP0T operation. Junior, PY2ZA, was expected to arrive on the island on April 29th. Keep watching the Web page for possible updates: http://trindade2011.com

QSL INFO AND NEWS.....
QSL EO66JM via K2PF Direct or LoTW
QSL 5Z0H via his QSL Manager IZ8VRH

QSL RECEIVED VIA LoTW: 9H1SP, C6AKU, CR6A, CT3MD, D2SG, DK1MAX, DL4FBZ, ED8A, EW7KF, F4HKA, GI0RQK, GM4FDM, HB9CVQ, HI3TEJ, HK1MW, HK1NK, HK1R, HK1T, HK3O, IG9/IW9ELR, IZ5AXA, IZ0HPX, J79M, JO1COV, KH7X, MU0FAL, OE5FIN, ON5GQ, R7BN, RG4F, RN4ABD, RU3ZX, SM2EKM, US0LW, VK4ADC, YN2ER, YN2ET and ZS1EL

QSLS RECEIVED VIA THE BUREAU: 9M8DX/2

SILENT KEYS.....
4L5T - Mamuka Kordzakhia, 4L2M, President of The NARG (National Associations Radioamateurs of Georgia) would like to inform OPDX readers that on April 23rd, Vakhtang (Vakho) Sakhokia, 4L5T, became a SK at the age of 61. He was killed by a car crashing into the side of his house. He has been a licensed radio amateur with the callsign UF6DG for some 40 years ago.

WA2EWE - The ARRL Web Page reports the following (edited):
"James McLaughlin, WA2EWE/T6AF, was one of several killed in Kabul, Afghanistan, on Wednesday, April 27th. News sources say that eight American troops and a US contractor died Wednesday after an Afghan military pilot opened fire during a meeting in an operations room of the Afghan Air Corps at the Kabul airport -- the deadliest episode to date of an Afghan turning against his coalition partners, officials with the NATO-led International Security Assistance Force (ISF) in Afghanistan said. Licensed since 1972, McLaughlin was a career US military officer. Bob Magnani, K6QXY, told the ARRL that McLaughlin was just in the US a week ago, visiting his family: 'His son Adam, KD6POE, works for me. He told me that his dad had been in Afghanistan and Iraq many times over the past few years, most currently serving as a flight instructor.'
McLaughlin posted on his QRZ.com page that 'almost every day, I operate at around 1230-1430 UTC. Sometimes I am QRV until around 1500 UTC.' As of March 26, 2011, he had logged 4359 QSOs, most of them on RTTY and PSK. -- Thanks to Russ Bentson, K6KLY, CNN and Fox News for the information."

K4RRF - It was reported that Ray Forrester, K4RRF, became a Silent Key (SK) on April 27th, at the age of 74. He was a proud Navy man and a patriot to the core. His Web site showed others that he was proud of his service to our country. Ray was, without a doubt, one of the finest DXers with over 300 countries to his credit. Along with his vast knowledge of amateur radio, Ray was also an expert fisherman, winning many local and national fishing tournaments. He was also heard in the pursuit of the many light-house activations put on by the Amateur Radio Lighthouse Society. With a QSL collection numbering in the thousands one could only marvel at the organizational efforts it took to catalogue the many thousands of QSL cards and certificates he had earned. He was a Life Member of the ARLHS, of 10-10 International, and a familiar voice on "The Early Bird Net" as well as many other nets.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above Silent Keys.

SV/A, MT. ATHOS (Visit by NE8Z). The following was sent to OPDX by Rick, NE8Z, who recently visited Mt. Athos: "I have just returned from my 2 week visit to Greece and pilgrimage to Mt. Athos. From the minute that I stepped off the plane in Athens to the minute that I left Greece two weeks later I was treated with true 'ham hospitality' by SV1JG, SV2ASP/A and SV2BOH. Monk Apollo, SV2ASP/A, greeted me with open arms in Mt. Athos. He spent the entire week making sure that I was comfortable. I participated in all of their church prayer services, and I was also able to work for 2 long days with the monks cleaning crystal and silver chandeliers in preparation for Easter services. Monk Apollo gave me the keys to his Land Rover and told me to, 'go...explore...take your time'. I was able to visit many of the 20 monasteries on the peninsula.
I was able to make a donation of various pieces of radio equipment to his monastery which will allow him to operate from two or more portable hilltop locations in Mt. Athos. SEMDXA members provided him with a new MFJ Keyer, LDG antenna tuner and a Heil BM-10 headset. Budd, W3FF, and his son Chris donated a complete Buddipole Antenna system. The ARRL donated 8 log books, band plan charts and a backpack for the portable equipment transportation. Monk Apollo never asked for anything. I simply showed up with the gifts for the monastery. Asian hams will soon be able to work Mt. Athos for a new DXCC Entity. Both portable locations have clear 360 degree views to all directions unlike the Docheiariou Monastery which has a large mountain blocking signals to and from Asia..
Father Apollo is a very busy monk. His radio time is limited because of church services that last up to 8 hours per day, 7 days per week. After services he is busy working on construction projects for the monastery. He is presently active on the radio daily between 1700-2100z on 160m, 30m, 17m and 12m CW-SSB-RTTY. He is building a new ham shack which will be ready in a few months. Once he is in the new QTH he will install his new 40 foot tubular tower and a Stepp-IR 3 element yagi that was donated to him by Dominik, DL5EBE.
The most exciting part of my trip was to be able to see precious relics of Saints and the Miracle producing Icons of The Virgin Mary. Mt. Athos

is by far one of the most beautiful places on Earth. Please view the SLIDESHOW on the SEMDXA website at: http://live.semdxa.org/tiki-list_file_gallery.php?galleryId$ Thank you to everyone that made my pilgrimage to Mt. Athos a complete success..... 73 Rick NE8Z/HC1MD"
ADDED NOTE BY EDITOR. If you would like to see more on Mt. Athos, go to: http://www.cbs.com/primetime/60_minutes
The program 60 minutes with Bob Simon was able to get rare access to the monks and their ancient monasteries on this remote Greek peninsula. There are two video clips available (a total of about 30 minutes) which is very interesting. This story was aired on April 24th.

SV5, DODECANESE. Fred, PA1FJ, will be active as SV5/PA1FJ/P from Karpathos (EU-001) between May 8-14th. Activity will be on 40-6 meters using CW and SSB. He will use his Yaesu FT-817 into a Buddistick antenna and a 2x 5m dipole. QSL via the Dutch QSL Bureau.

T31, CENTRAL KIRIBATI (Update). The T31A went QRT on April 27th, at 1900z. HOWEVER, some of the operators did operate on different bands using THEIR OWN T31 callsigns. T31A made (according to their Web page) 31764 QSOs. The T31A team should be back at Apia, Samoa, by the time you read this. For updates on the T31A team, see the Web page at: http://www.T31A.com

T6, AFGHANISTAN (Reminder). Just a reminder that the Intrepid-DX Group will conduct a DXpedition from Afghanistan for ten days in May. Due to security concerns, the exact dates and location of the DXpedition will not be announced until the eve of their activation. The team is closely monitoring the security situation and events in the news coming from Afghanistan. It was announced this past week on their Web page the following: "This DXpedition is dedicated to the memory of our friend and advisor, Jim McLaughlin, WA2EWE/T6AF, who was killed in Kabul, Afghanistan, on Wednesday, April 27th, 2011. Jim was an honorary member of our team and was planning to join us to operate with us. Jim, we will really miss you!" For update on this operation, it is suggested to watch their Web page at: http://www.intrepid-dx.com/t6pse/index.php

T6, AFGHANISTAN (Update). Terence, K5TLL, continues to be active as T6TL until July. He will be using an old Icom 706 and a dipole antenna (as well as a Cushcraft R-7 vertical according to QRZ.com). Activity is on 40-10 meters using SSB and the Digital modes. Frequencies are listed on QRZ.com and he suggests to listen for him between 0300-0500z. QSL via N4FF. Watch QRZ.com for updates.

UT1FG/MM VOYAGE WRAP-UP. Captain Yuri Bodrov, UT1FG/MM, wrapped up his 6 month voyage that took him across the Atlantic Ocean 3 times and around the Cape of Good Hope in South America and through the Panama Canal on his ship, the Mottler. He operated on the HF bands, 6 meters and also activated a few hundred grids to the delight of many satellite operators in Europe, South and North America. Walt, WP4T, and his ham radio family met up with him in San Juan, Puerto Rico, his final port before flying home. Captain Bodrov gave them the red carpet tour. Pictures from their visit are now available on the K8YSE Web site at: http://www.papays.com/sat

QSL direct or to his manager UX0FY.

V8, BRUNEI. John, 9M6XRO, will once again be active as V85/9M6XRO from Darussalam, Brunei (OC-088), between May 4-9th. Activity will be mainly CW, but also possibly some RTTY or SSB. John states V85 does not have an allocation for 6m. As before, John will be running 400w to a Butternut HF6V up about 100 ft. on the hotel roof. He mentions, "BTW during my visit to Brunei in March, I made close to 2500 Q's with a high percentage on RTTY. I have been asked by some Southern Hemisphere stations to look for them on 80m CW so I will give that my best shot on this trip :-)." QSL via M0URX, direct (w/SAE plus 1 IRC/2 USDs), by the Bureau, or LoTW. Alternatively, QSLs may be requested using M0URX's OQRS form at: http://www.m0urx.com/qsl-request-form
ADDED NOTE BY 9M6XRO: John will be visiting the U.K. and I.O.M between May 19th and June 1st. He states, "I plan to spend the first part until the 28th in the Isle of Man - then the latter part in Ayrshire. I hope to put GD3OOK on the air from home base for a last time!"

VK0, MACQUARIE ISLAND. Denis, ZL4DB, will be active as VK0/ZL4DB from Macquarie Island (AN-005) beginning late April through late July. He will be on the air thanks to assistance from Kevin, VK0KEV. Activity will be limited to his free time and will be only on SSB. PLEASE NOTE: Denis is new to pile-ups, so please go easy on him. Because he only operates on SSB, Kevin might convert him to RTTY! QSL via ZL4PW, by the Bureau or direct (see QRZ.com). No online-log, eQSL or LoTW.

ZD8, ASCENSION ISLAND (Update). German operators Wolf/DK1IP, Rainer/DL7OR, Gerd/DJ4KW, Arno/DL1CW and Werner/DJ9KH will be active as ZD8D from Garden Cottage (located 700m up Green Mountain which is the oldest building on the island dating back to the 1820s), Ascension Island (AF-003), between July 24th and August 9th. Activity will be on 160-10 meters, mainly on the Digital modes with some CW and SSB later. They will be using Elecraft K3s. The team plans to participate in the RSGB IOTA Contest (July 30-31st). The team is seeking sponsors, especially for an amplifier. Their Web page is now available online at: http://www.zd8d.de/index.php?home

VK9, LORD HOWE ISLAND (Update/Change). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) are planning a major DX-pedition to Lord Howe Island (OC-004) as VK9HR for 10 days. Originally, the operation was scheduled to take place between July 8-17th, but now it will take place between July 23rd and August 2nd. This means that the VK9HR team can now participate in the 2011 RSGB IOTA Contest (July 30-31st). Also, the VK9HR QSL Manager is now David, EB7DX. For more details, visit the VK9HR Web Page at: http://www.vk9hr.com

ZF, CAYMAN ISLANDS. Operators Bob/W5UQ and Bill/W5SJ will be active as ZF2UQ and ZF2EZ, respectively, between July 11th and approx. July 18th. Look for them to operate in the CQWW VHF Contest (July 16-17th), mainly on 6 meters. Activity outside of the contest will be on the HF bands using mainly CW and some SSB. QSL via W5JAY (see QRZ.com).

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

C6 - BAHAMAS, NA-001 / ZF - CAYMAN ISLANDS, NA-016
Anja,DH2AK, and Torsten,DL1THM, will be active as ZF2AT (Anja) and
ZF2TH (Torsten) from Grand Cayman (NA-016, WLOTA LH 1042) on May 6-13.
Their next stop will be New Providence Island (NA-001) where they will
sign DH2AK/C6A and DL1THM/C6A from May 13-20. Their activities will be
"holiday style" mainly in SSB on 20m with an IC-7000 and a Bud dipole.
QSLs via bureau to their homecalls, for direct QSLs read at QRZ.com.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Yoshi,JJ8DEN, appeared on the bands as KH0PR and will stay in the
Coconut Village Hotel on Rota Island (OC-086) until May 8. He works
in CW, RTTY and PSK on 160m-6m and via the satellites FO-29 and VO-52.
QSLs via bureau or direct to JJ8DEN.

SV/A - MOUNT ATHOS
Rick,NE8Z, returned from his pilgramage to Mount Athos safely. Though
he didn't had the chance to become active himself, he gave a lot of his
equipment to Monk Apollo, SV2ASP/A, which should help to improve his
signal in the future. Apollo can be found on the bands more often
during the last time in CW, SSB and RTTY on 160m, 30m, 17m and 12m
mainly from 1700-2100 UTC. He is building a new shack and wants to
put up a 3 ele SteppIR yagi 12m high, a donation of Dominik,DL5EBE.

T6 - AFGHANISTAN
The "Intrepid-DX Group" announced its next DXpedition which will last
ten days and takes place in May. The team includes Paul Ewing,N6PSE,
David Flack,AH6HY, David Collingham,K3LP, Al Hernandez,K3VN,
Hrane Milosevic,YT1AD, Krassy Petkov,K1LZ, David Ritchie,W6DR,
Heathem Sabah,YI1UNH, Jack Ritter,W0UCE, and Alexander Pavlenko,UX0LL.
They will work as T6PSE with up to five stations on 6m-160m at the same
time: two in CW, two in SSB and another one for digital modes and 6m.
For security reasons the exact date and QTH of the DXpedition have to

be kept secret. QSLs via W3HNK, direct or LoTW.
More information can be found at: http://www.intrepid-dx.com/t6pse

V8 - BRUNEI, OC-088
John,V85/9M6XRO, will be QRV again from Brunei (OC-088) from May 4-9.
He works in RTTY, CW and SSB on 80m-10m running 400 watts into a
Butternut HF6V antenna 30m high. QSL via M0URX.
Bureau QSLs can be requested online at: http://www.m0urx.com

8P - BARBADOS, NA-021
Fred,PY2XB, is expected to show up as 8P9XB from St. Philip on Barbados
from May 8-21. Activities are planned in CW, SSB and RTTY on 80m-6m.
He wants to install a beacon on 50.099 MHz.
QSL cards should be sent to his manager PT7WA, via bureau is ok!

9J - ZAMBIA
Chris,ZS6RI, has been spotted as 9J2RI from Zambia. He is working there
for the next one or two years, not constantly but six weeks in a cycle.
Chris works in CW, SSB and digital modes on all bands.
Direct QSLs should be sent to Chris J. de Beer, PO Box 333, Bethlehem,
GA 30620, USA. Chris will upload his log to the LoTW every six weeks
and plans to answer bureau QSLs once a year.

9M2 - WEST MALAYSIA
The business trip of Mirek,VK6DXI, to Kuala Lumpur has been postponed
to May 2-7 and he hopes to become active in CW in the evening hours.
QSL via SP5UAF, via bureau ok.
Aserbaidschan, Sonderrufzeichen: Mit dem Spezi-alrufzeichen 4JV3AM feiern Radioamateure in
Aserbaidschan vom 4. bis 20. May das Ende des Zweiten Weltkrieges vor 66 Jahren.
Gleichzeitig gedenkt man an den Kriegshelden Mamish Abdullayev. QSL via RW6HS (direct
only).
9N - NEPAL
Sam,K0YAK, is in Kathmandu now intends to show up as 9N7AK soon. Sam
will stay in Nepal until the beginning of July and uses a Kenwood TS-50
with a Cushcraft MA5V, a lightweight 5-band-vertical.
QSL cards should be sent via bureau or direct to his homecall K0YAK.
For updates clicken on: http://9n7ak.wordpress.com

AZERBAIJAN, SPECIAL EVENT STATION
The radio amateurs in Azerbaijan celebrate the end of World War 2
66 years ago by activating the special callsign 4JV3AM from May 4-20.
They are also remembering the war hero Mamish Abdullayev.
QSL via RW6HS (direct only).

CANADA, SPECIAL EVENT STATION
The "Club Radio Amateur de Quebec" (CRAQ) is existing for 85 years now.
Good enough to activate the special event station VC2CQ85 throughout
the month of May. QSL via VE2CQ, ok via bureau.

ITALY, SPECIAL EVENT STATION
The ARI section Treviso issues the "Antonio Canova Award" which is
dedicated to the wellknown sculptor who was born in 1757 near Treviso.

The special callsign II3AC will be activated during the month of May.
QSL via IK3GES, direct or via bureau.
More detailed information about the award can be found on:
http://www.aritreviso.it/DiplomaCanova.html

KAZAKHSTAN, SPECIAL EVENT STATIONS
Kazakhstan is celebrating the 50th anniversary of manned space flight
with several special calls. The prefixes UN50, UO50, UP50 and UQ50
are used until May 31 and following stations were announced to be QRV:
UN50SK (homecall UN7GWC), UO50G (UN2G), UP1ASTR (UN0GL), UP50F (UN7FW),
UP50ASTR (UN6GK), UP50YG (UN7Z), UQ50G (UN6QC), UQ50L (UN7LZ) and
UQ50P (UN7PL). They have also a special award and the rules can be here
http://un-dx.ucoz.com/index/yuri_gagarin/0-36

MEXICO, SPECIAL EVENT STATION
6J5M is working from the "Cinco de Mayo" festivities until May 6 to
remember the Battle at Puebla in 1862. QSL via XE1AMF.
A special award is issued as well and the rules are at:
http://diploma.puebladx.org

MONACO, SPECIAL EVENT STATION
The Monaco Telegraphy Group (3A-CW-G) celebrates its 20th anniversary.
The special event station 3A2CWG is active during May. QSL via 3A2LF.

RUSSIA, SPECIAL EVENT STATION
Russian HAMs are celebrating the end of World War 2 by activating
R1945HS from May 1-31. QSL via RW6HS (direct only).

SILENT KEYS: James McLaughlin,WA2EWE (T6AF, ex-YI9EWE), was one of nine
US Americans who were killed in a shooting at Kabul airport on Apr 27.
He was serving in Afghanistan since the end of 2008 and was regularly
active in RTTY and PSK.

Vakhtang (Vakho) Sakhokia, 4L5T (ex-UF6DG), died after a car crashed
into his house. Vakho, aged 61, hold a license for 40 years.

Other DXers who passed away during the last days are:
Gavin Morrison (GM3MOU/G3MOU), Angus "Gus" Duncan Taylor (G8PG),
Ray Forrester (K4RRF), Ivan Kovalenko (RA6AG), Petr Taranov (RK6ACM),
Dariusz Kaminski (SP7TES) and R. Neville Copeland (ZL2AKV)

DXCC: The operations of ZD9AH (Tristan Da Cunha and Gough of 2010) and
ZD9T (2010/2011) are accepted for DXCC credit now.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The special event station PG6N is active on the "Dutch Lifeboat Day" on
May 7. Find more info about this at: http://pg6n.jouwweb.nl/english

UPCOMING CONTESTS

May 1-7: Activity week of the DTC
May 7/8: CQ-Mir International DX Contest
May 7/8: ARI International DX Contest

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AS-060, HL, Cholla-namdo Province group: DS2GOO/4, DS3HWS/4, DS5BSX/4 and
maybe also other operators are going to hit the airwaves from
Pigum Island in CW, SSB and RTTY on 80m-10m from May 7-9. An online log
will be published later at: http://ds2goo.karl.or.kr/2011/Pigum_Island
QSLs via homecalls (bureau/direct).

EU-001, SV5, Dodecanese: Fred,PA1FJ, will show up as SV5/PA1FJ/p from
Karpathos Island (GIOTA DKS-016/MIA MGD-013/WLOTA 1570) from May 8-14.
Fred works in SSB and CW on 40m-6m with QRP equipment.
QSL via homecall (bureau/direct).

EU-050, I, Puglia (Foggia) Region group: IL7A will be QRV from Tremiti
during May. QSL via IK8EJN.

EU-110, 9A, Istra Group: 9A8AMS, 9A/IK4RQJ, 9A/IZ4BBF and 9A/IK3AES will
activate Sveti Nikola Island (ACIA IC-016, IOCA CI-118, MIA MC-414,
ARLHS CRO-164, CLH-153, WLOTA 3152) in CW, SSB and digital modes on
40m-10m from May 7-15. 9A8AMS will concentrate on 160m, 80m and 6m.
QSLs via homecalls (bureau/direct), 9A8AMS via QRZ.com.

EU-169, ZA, Albania group: The planned activity from Sazan had to be
cancelled because of a missing permission from the military.

NA-046, K, MA State South group: An American team will be QRV as W1ACT from
Martha's Vineyard from May 6-8. QSLs only direct via N1JOY.
See also: http://hamcow.net

NA-067, K, NC State East group: W3CVD/4 is working from the Outer Banks
between May and August. QSL via homecall (bureau/direct).

EXTENDED FREQUENCIES IN AZERBAIJAN

The 40m and 80m bands were extended in Azerbaijan (4J, 4K). Radio amateurs
are now allowed to use the ranges 7.000-7.200 MHz and 3.500-3.800 MHz.

RAC Field Organization opening for National Secretariat - Public
Relations Specialist
2011-05-03

There exists within our National Secretariat an opening for an
individual with the following qualifications:

* Degree in administration with 5 years PR experience
* Extensive knowledge of Microsoft Office
* Good decision making and problem solving skills
* Creative - solid communication skills
* Outgoing, enthusiastic and confident
* An effective team player with an extensive drive to be the best
* Fluent in both official languages
* Knowledgeable in all social network modes

If you feel that you are the person described above, and would like to
be considered for this National volunteer position, please forward
your CV to the undersigned.

GB2RS NEWS

Sunday 1st May 2011

The news headlines:

Radio Spectrum for the London 2012 Olympic and Paralympic Games

Talk in for the RSGB AGM in Derby

Two more operations approved for DXCC

As expected, the RSGB has been approached by Ofcom to help determine sections of the 70cm amateur band that could be released for a limited period around the London 2012 Games next year. As a secondary user of the band, we as radio amateurs have no specific rights to any of those frequencies. Rather than just imposing changes, Ofcom has approached the Society in the spirit of cooperation to work together to solve the problem. The RSGB intends to work constructively on this matter to reach agreement with Ofcom on the segments that can be released on a temporary basis. Ofcom has given clear and unambiguous assurance that the segments used will be returned once the London 2012 Games are over. The RSGB is looking closely at how the spectrum is used in the designated geographical areas in and around London, Weymouth and South Essex in order to minimise the impact. We will be responding to Ofcom shortly. The RSGB's response is being coordinated within the RSGB Spectrum Forum by Murray Niman, G6JYB.

Arrangements have been made for a talk-in station for those attending the RSGB's AGM in Derby on 14 May. It will be available on 145.550MHz from about 8am through to 12 noon and the callsign will be G2DJ, Golf 2 Delta Juliet. If you are planning to attend the AGM by bus from Derby, the information on the hotel's website that was printed in RadCom seems to be a little out of date. The local services are run by Trent Barton and their website at www.trentbarton.co.uk is most helpful. Check out the V2 service, which looks to be the one that stops closest to the Menzies Mickleover Court Hotel. Tickets for the amateur radio dinner on Saturday evening are still available from the RSGB online shop.

Two operations on Tristan Da Cunha and Gough have been approved for DXCC credit. The two are the 2010 ZD9AH operation and the 2010 and 2011 ZD9T operation. If you had these operations rejected in a recent application, please send an e-mail to the ARRL DXCC Desk. Updates will be posted in Logbook of The World accounts as well as online on the daily listings.

May 2011 will be the month for chasing castles and stately homes on air. The weekend of the 21st and 22nd will be the international castles weekend from 1am on the 21st to 11pm on the 22nd. For UK stations, information can be found at www.cashota.co.uk as well as links to regional activity.

The planned operation of ARISSat-1 on 11 and 12 April from inside the International Space Station as part of the commemoration of the 50th anniversary of Yuri Gagarin's flight was, unfortunately, not successful. It appears that no terrestrial station reported hearing transmissions.

The Group for Earth Observation is holding its annual symposium at the National Space Centre, Leicester next Saturday, 7 May. Doors open for registration at 9am and both members and non-members are welcome. There is a charge of ?12 for admission, which includes a car-parking pass and a free ticket for entry to the National Space Centre exhibition areas. There will be a number of presentations on weather satellites and their reception, live imaging, demonstrations help and problem solving. Members of the renowned Dutch Satellite Workgroup will be in attendance. More details from www.geo-web.org.uk.

Early notice of a forthcoming event that may be of interest to UK intermediate students and any keen home brew enthusiast. The Torbay Amateur Radio Society will be hosting a Buildathon on Sunday 5 June in Newton Abbott, Devon. The project is a Manhatten-style 40m Sudden receiver with VFO. The Bath Buildathon Crew will be providing tools and test equipment, as well as assistingon the day. Enquiries to Pam Halliwell via the Torbay website www.tars.org.uk.

The Royal Naval Amateur Radio Society will run a Special Event station at the open day in HMS Collingwood on Saturday 4 June. The callsign to be used is GB6COD, Collingwood Open Day. The station will be operational on all amateur bands from 1.8MHz to 440MHz. The Society headquarters station will be open for viewing from 9.30am to 6pm on the day. A number of demonstrations will be taking place using amateur radio and amateur television. The open day will feature the Royal Navy Field Gun Competition. Additional attractions will include a display from the Royal Marines Band, Collingwood, a free fun fair and much more. Advanced tickets will be available from Gosport and Fareham Tourist Information Offices and Portsmouth News Offices from May 2011.

Could any members or clubs planning to take part in this year's Mills on the Air over the weekend 14 and 15 May to please register their details on the Denby Dale ARS on the website www.g4cdd.net or get in touch with Gerald, G3SDY via e-mail to g3sdy@sky.com as soon as possible.

And now for the details of rallies and events for the coming week

The Dambusters Hamfest will take place today, 1 May, at Thorpe Camp Visitor Centre, Coningsby, Lincs LN4 4PE. Entry is ?3 and under 12s are free. There is also free parking and overnight camping is available. The doors open at 10am and there will be an RSGB bookstall.

Monday 2 May sees the Dartmoor Radio Rally take place at Tavistock College, Crowndale Rd, Tavistock, Devon, PL19 8DD. Doors open at 10.30am and there will be trade stands and a bring & Buy. More details can be obtained from Peter, M1AYI on 01822 860277.

On Sunday 8 May, the Magnum Radio Rally will take place at the Magnum Leisure Centre, Harbourside, Irvine, Ayrshire, KA12 8PP. There will be trade stands, a Bring & Buy and special interest groups. Doors open at 10.30am and admission is ?4. Details from Helen, MM0HLN, on 0787 332 7597.

Advanced notice now of the 1st Leicester RS Grand Clearance and Bring & Buy that will be held at the Leicester Radio Society HQ, Groby Road, Leicester. There is approximately ?2000 of donated radio equipment for disposal as well as a Bring & Buy. Doors open 10am to 4pm. Details of equipment available and further details from Alex on 0753 120 1640.

Now for the news of special events

The Spirit of Speyside Whisky Festival will still be taking place today and tomorrow, 1 and 2 May. Moray Firth Amateur Radio Society is celebrating this event by running three Special Event stations, GB3SWF will be located at Strathisla distillery in Keith, GB2SWF will be at the Craigellachie Distillery and GB4SWF will be at Cragganmore Distillery. A commemorative QSL card will be sent to all stations that contact the club during the weekend.

Sands Contest Group is running a special event station to celebrate the Royal Wedding. Weather permitting they hope to run four stations using the callsign GB4HRH. They will be on air between 10am and 5pm today, 1 May. All QSL cards should be sent as EQSL. Details are available on QRZ.com.

On Sunday 8 May, the Whitton Amateur Radio Group will be presenting amateur radio to the public using the special event callsign GB2IKE in Bushy Park as part of an open day called Chestnut Sunday at Bushy Park, located in-between Teddington and Hampton Court Palace in Middlesex. Whitton Amateur Radio Group has the Royal Parks to thank for allowing the station to be situated in the park and it is likely that these will be the first radio transmissions from this location since the base was operational in WW2.

Ballymena ARC will be participating in the Steam Traction Rally, at Shanes Castle, Antrim on 1 and 2 May. They will be putting on displays of amateur radio for the public as well as activating the castle as part of castles and stately homes on the air Northern Ireland. The club will be using callsign GN4KPT, utilising all modes and bands.

And now the HF DX news compiled from 425 DX News and other sources

Francois, ON4LO will be active on 10 to 40m SSB as F/ON4LO/P between 22 April and 4 June. He plans to operate from a few lighthouses during his trip. QSL via his home callsign, direct or bureau.

Look for Noel, OO4O to be active as OZ/OO4O from Fyn Island, which is IOTA reference EU-172, on 1 to 6 May. He will operate mainly SSB on the HF bands. QSL via the Belgian QSL bureau to ON4APU and LoTW.

Phil, F4EGS will be active again as TT8PK from N'djamena, Chad between 15 April and 15 June. He will be QRV in his spare time. Last year he operated mainly CW on 10 to 80m. QSL via F4EGS, direct or via bureau.

Members of the Camb-Hams will be activating the Isle of Arran between 1 and 8 May. They will be operating as GS3PYE/P and GS6PYE/P. Activity will be on all bands from 70cm to 160m. For VHF, the island lies in IO75.

Now the contest news

The action this week begins on the 2nd with the SSB leg of the 80m Club Championships between 1900 and 2030UTC. The exchange, as usual, is signal report and serial number.

Then on the 3rd it's the 2m UK Activity Contest between 1900 and 2130UTC. Using all modes the exchange is signal report, serial number and locator.

On the following weekend there are three RSGB events, but with distinct overlaps. The biggie is the 432MHz-234GHz Trophy contest on 7-8th, which is the event in which the really serious UHF/microwavers get their kicks. Running for 24 hours from 1400 to 1400, the exchange is signal report, serial number and locator.

If you're not equipped for umpteen bands or don't want to spend 24 hours contesting, the 432MHz Trophy contest is a separate event that runs for the first eight hours of the 432MHz-234GHz Trophy may be of interest. Running from 1400 to 2200UTC and using all modes, the exchange is signal report, serial number and locator.

The 10GHz Trophy contest takes place on the Sunday, coinciding with the last eight hours of the 432MHz - 234GHz Trophy.

Italian events dominate the non-RSGB scene. On 7-8th, The ARI International DX Contest takes place for 24 hours. Work everyone using CW, SSB and RTTY exchanging a report and serial number. Instead of a serial number, Italian stations give a 2-letter Province code and there are 110 of them to collect as multipliers. Single-op single-mode entries are allowed, but not single band.

And now the solar factual data for the period from the 18th to the 24th of April, compiled by Neil Clarke, G0CAS on the 25th of April.

Solar activity was low everyday except for the 22nd when two M1 solar flares took place. Small sudden ionospheric disturbances took place but no coronal mass ejections; therefore their effect on propagation was minimal. Solar flux levels increased slightly from 111 units on the 18th and the 19th to 119 by the 23rd. The average was 115 units. The 90 day solar flux average on the 24th was 106, that's three units up on last week. X-ray flux levels hovered around the B4 mark for most of the week

but increased to B8.4 on the 22nd. The average was B4.6. Geomagnetic activity started at unsettled levels with the Ap index at 10 units on the 18th and 16 units on the 20th. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second to 570 by the 20th. Speeds then gradually declined. Particle densities increased to 41 particles per cubic centimetre on the 18th but then declined for the rest of the period. Bz varied between minus 12 and plus 13 nanoTeslas on the 20th which was the most disturbed day and between minus and plus 4 nanoTeslas when the field was quiet.

And now the solar forecast. This week the quieter side of the Sun is expected to be facing our way. Solar activity should be at low levels on some days. Solar flux levels are expected to around the 110 mark for most of the week. Geomagnetic activity should be at quiet levels all week but a coronal hole disturbance could commence right at the end of the forecast period and certainly at the start of the following week. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows are expected to be around 11MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of about 25MHz. The optimum working frequency with a 90 per cent success rate of around 19MHz. The best time to try this path will be between 1100 and 1600 hours. If any double hop Sporadic-E openings take place on 28 and 50MHz then the Middle East could be worked by that mode, but it could be just a bit too early in the season for that.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

The Midland Amateur Radio Society will be running a field day over the weekend of 14 and 15 May, starting at around 0800UTC finishing on the Sunday at 1200UTC. The callsign will be GB8OTH, Oscar Tango Hotel. Operating will be on 80, 40, 20, 10, 6, 4, 2m and 70cm. More information via club website www.radioclubs.net/mars/.

On Monday 2 May, Gloucester Amateur Radio & Electronic Society will be operating from Crinkley Hill. Contact Anne, 2E1GKY on 01452 548478, daytime, for more information.

On Monday 2 May, Lincoln Short Wave Club, will put GB2CWF on the air from East Kirkby. For more information contact Pam Rose, G4STO on 01427

788356.

On Monday 2 May, South Birmingham Radio Society will have no meeting due to the bank holiday. Contact Don, on 0121 458 1603.

On Monday 2 May, South Normanton Alfreton & District Amateur Radio Club have no meeting due to the bank holiday. More details on the club from A Lawrence, 2E0BQS by e-mail to adylawri@btinternet.com.

On Tuesday 3 May, Derby & District Amateur Radio Society will be holding a Junk Sale. Contact Richard Buckby, by e-mail to radio@dadars.org.uk.

On Tuesday 3 May, Friskney and East Lincolnshire Communications Club will be taking part in the club quiz part 2 organised by Ron G7ZRT. More detail from Chris M0MFP on 01507 442240.

On Tuesday 3 May, Loughborough & District Amateur Radio Club are holding an Open Forum on the types and use of meters. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 4 May, Hinckley Amateur Radio Society has a social evening. Details from John, M0JAV, on 07836 731544.

On Wednesday 4 May, Lincoln Short Wave Club, is having a natter night and putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 4 May, Midland Amateur Radio Society has the shack on the air and training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 4 May, South Birmingham Radio Society has a lecture in the main hall. Contact Don, on 0121 458 1603.

On Wednesday 4 May, South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402550.

On Wednesday 4 May, Telford & District Amateur Radio Society has a Committee & HF, VHF on the air evening. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 5 May, Hucknall Rolls Royce Amateur Radio Club is holding the second of this seasons fox hunts, starting at 7.15pm from the club car park at Hucknall. Contact Dave Wilde, G1YAI on 0844 4355593.

On Thursday 5 May the 37th Annual General Meeting of the Leicestershire Repeater Group will be held 8pm promptly in The Brant Inn, Overdale Avenue, Groby, Leicestershire, LE6 0DU.

On Thursday 5 May, Salop Amateur Radio Society is having a natter night. More information on the web at www.salop-ars.org.uk.

On Thursday 5 May, South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 6 May, Bromsgrove & District Amateur Radio Club is holding its AGM. Contact Chris, M0BQE on 01905 776 869.

On Friday 6 May, Coventry Amateur Radio Society is having a talk on the RSGB QSL Bureau by Richard Constantine, G3UGF. Contact John, G8SEQ, on 07958 777363.

On Friday 6 May, Nunsfield House Amateur Radio Group is holding a Windows 7 Forum. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 6 May, South Birmingham Radio Society is having a construction evening. Contact Don on 0121 458 1603.

On Saturday 7 May, Lincoln Short-Wave Club has a Saturday morning in the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND,

On Monday 2 May, Angel of the North Amateur Radio Club has no club due to the bank holiday. Contact Nancy Bone, G7UUR on 0191 477 0036.

On Monday 2 May, Grimsby Amateur Radio Society is taking part in the RSGB 80m Club Championship contest. Contact Cliff G4YHP on 01472 328 830.

On Monday 2 May, Hornsea Amateur Radio Club is taking part in the RSGB 80m Club Championship contest. Contact Gordon MacNaught, G3WOV on 01377 240573.

On Monday 2 May, Sheffield Amateur Radio Club is holding a social evening & taking part in the RSGB 80m Club Championship contest. More information from Peter Day, G3PHO, by e-mail to sarc@g3pho.org.uk.

On Monday 2 May, Thornton Cleveleys Amateur Radio Society has no meeting due to the bank holiday. More details on the web at www.tcars.org.uk.

On Tuesday 3 May, Chester & District Amateur Radio Society is holding daytime radio operations at Hanmer Arms Hotel, Hanmer. Details from Barbara Green on 07957 870770.

On Tuesday 3 May, Stockport RS is having a talk on PCBs with Pete Ridley, M1PTR. Contact Nigel Roscoe on 07973 312 699.

On Wednesday 4 May, Denby Dale Radio Club is having a talk on the RSGB QSL Bureau by Richard, G3UGF. Contact Richard, M0RBG on 07976 220126.

On Wednesday 4 May, Hornsea Amateur Radio Club is having a talk on Awards and DXing by G3LZQ. Contact Gordon MacNaught, G3WOV on 01377 240573.

On Thursday 5 May, Grimsby Amateur Radio Society is holding the 1st DF Hunt. Contact Cliff, G4YHP on 01472 328 830.

On Thursday 5 May, Hornsea Amateur Radio Club is visiting Bletchley Park. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 5 May, Keighley Amateur Radio Society is having a club night. Contact Shirley, M6SAK on 01535 652781.

On Thursday 5 May, Ripon & District Amateur Radio Society is having an explanation of the solar forecast. Contact Rob Hall, M0RBYon 0787 608 5631.

On Thursday 5 May, South Manchester Radio & Communications Club is having a talk entitles Audacity by Bill, G4NOL. Details from Ron, G3SVW on 0161 969 3999.

On Thursday 5 May, Wakefield & District Radio Society is having a barbecue, tickets available from John G7JTH. Contact Ken, 2E0SSQ, 07900 563117.

On Friday 6 May, East Cleveland Amateur Radio Club is having a night on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 7 May, Wakefield & District Radio Society is continuing the Foundation, Intermediate and Advanced licence courses from 1.30pm. Contact Ken, 2E0SSQ, 07900 563117.

NEWS FOR NORTHERN IRELAND

The Mid Ulster Amateur Radio Club will be holding a Foundation course over 1 weekend towards the end of May. The course is open to anyone who wishes to take the first step on the amateur radio ladder. If you are interested you must attend the registration night on Wednesday 4 May from 7.30 to 8.30pm at The Place Initiative, Ardress Park, Portadown BT62 3TP. More details can be found at www.muarc.com or by contacting Martin, MI0YMF on 02832852712.

NEWS FOR SCOTLAND

On Tuesday 3 May, Livingston & District Amateur Radio Society is having a club evening. Contact Norman, on 07740 946192.

On Wednesday 4 May, Ayr ARG, is having a visit by Dave Wilson, President of RSGB. Details from Tom Ferguson, GM1OST on 01292 532 088.

On Wednesday 4 May, Glenrothes & District Radio Club is now back at the Football Pavilion in Thornton at their normal meeting time of 7.15pm. The repairs due to burst pipes have been made good. Details from Dave Francis on 01383 823878.

On Wednesday 4 May, West of Scotland (Glasgow) Amateur Radio Society is having an evening of homebrew projects and licence training. More information from Fred Coombes, 2M0BIN on 01415 715512.

On Thursday 5 May, Aberdeen Amateur Radio Society is having a junk sale. More information from Lewis, GM4AJR on 01224 575 663.

On Friday 6 May, Cockenzie & Port Seton Amateur Radio Club is holding a normal club night. More information from Bob, GM4UYZ on 01875 811 723.

On Friday 6 May, West of Scotland (Glasgow) Amateur Radio Society is having presentations, a quiz and a raffle. More information from Fred Coombes, 2M0BIN on 01415 715512.

NEWS FOR THE SOUTH EAST AND EAST ANGLIA

On Sunday 1 May, Bedford and District Amateur Radio Club members will be going to the Old Warden Spring Show. Contact Bob Leask, G3XNG by e-mail to g4ceotalk21.com.

On Sunday 1 May, Worthing & District Amateur Radio Club is holding the Sunday morning breakfast meeting in Goring cafe. Contact Phil, G4UDU on 01903 816684.

On Monday 2 May, Braintree & District Amateur Radio Society is having an evening equipment testing and Mills weekend planning. For more information contact John, M5AJB, on 01787 460 947.

On Monday 2 May, Burnham Beeches Radio Club is taking part in the RSGB 80m Club Championship contest 7 till 9pm. Contact Dave, G4XDU, on 01628 625 720.

On Monday 2 May, Coalhouse Fort Amateur Radio Society is having an Open Day. Details from John Parker, M1DUC by e-mail to coalhouserad1o@yahoo.com.

On Monday 2 May, Felixstowe & District Amateur Radio Society has no meeting due to the bank holiday. More information from Paul, G4YQC by email to pjw@btinternet.com.

On Monday 2 May, Norfolk Amateur Radio Club is taking part in the RSGB 80m Club Championship contest. Contact Chris Danby, G0DWV on 01603 898678.

On Tuesday 3 May, Bedford and District Amateur Radio Club is holding its AGM. Contact Bob Leask, G3XNG by e-mail to g4ceotalk21.com.

On Tuesday 3 May, Chelmsford Amateur Radio Society is having a talk on Astronomy by John Greenwood. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 3 May, Verulam Amateur Radio Club is holding a committee meeting at 8pm. Contact Tony, 2EOWAP on 01727 853087.

On Wednesday 4 May, Chesham & District Amateur Radio Society is holding a general meeting and CW training session. Contact Terry, G0VFW on 01442 831 491.

On Wednesday 4 May, Havering & District Amateur Radio Club is having a talk on HMS King George V by Bart Kent. Details from John, M0UKD on 07890 222 111.

On Wednesday 4 May, Norfolk Amateur Radio Club, is having a talk on digital signal processor noise cancellation products by Graham Somerville, M3ZGS from BHI. Details from Chris Danby, G0DWV on 01603 898678.

On Wednesday 4 May, Southdown Amateur Radio Society is operating at the Hailsham shack. Details from John, G3DQY on 01424 424 319.

On Wednesday 4 May, Worthing & District Amateur Radio Club is having a DVD evening. Contact Phil, G4UDU on 01903 816684.

On Thursday 5 May, Cray Valley Radio Society is having a half & half meeting. There will be a demo and on-air operating with the club radios presented by Guy Roberts, G0UKN and an Overview of Yahoo groups by Kevin Jenkins M0KSJ. Contact Bob, M0MCV on 020 8265 7735 after 8pm.

On Thursday 5 May, Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX on 023 9247 2846.

On Thursday 5 May, Horsham Amateur Radio Club is having a talk on Software Defined Radio by Chris Smith, G4NUX. Details are on the web at www.harc.org.uk.

On Thursday 5 May, King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV by e-mail to ral-g3rsv@supanet.com.

On Thursday 5 May, Shefford & District Amateur Radio Society is closed for local elections. Details from David, G8UOD, on 01234 742 757.

On Thursday 5 May, Verulam Amateur Radio Club is having a social with GB3VH at 7.30pm in the White Horse, Sandridge. Contact Tony,2EOWAP on 01727 853087.

On Friday 6 May, Crystal Palace Radio & Electronic Club is having an Introduction to D-Star by Chris Howard, 2E0CTH. Contact Bob, G3OOU on 01737 552 170.

On Friday 6 May, Mid-Sussex Amateur Radio Society is having a radio night & table top sale. Contact Peter, G4AKG on 01444 239371.

On Friday 6 May, Wey Valley Amateur Radio Group has a talk on Bletchley Park by Ray Goff, G4FON. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 7 May, Brede Steam Amateur Radio Society is at the shack. For more information contact Steve on 01424 720815.

On Saturday and Sunday 7 and 8 May, East Kent RS is taking part in the Windmills on the Air event. Contact Karl Davies, M1DFM on 01227 710120.

On Saturday 7 May, Worthing & District Amateur Radio Club is putting Worthing Museum on the air with the callsign GB2WM. Contact Phil, G4UDU on 01903 816684.

NEWS FOR THE SOUTH WEST

On Sunday 1 May, Cornish Radio Amateur Club is holding a special event station at Perranporth airfield using the callsign GR4CRC. Details from Steve, G7VOH on 01209 844939.

On Tuesday 3 May, Blackmoor Vale Amateur Radio Society is having a VHF evening & preparing for Mills weekend. Contact Tony, G0GFL on 01258

860741.

On Tuesday 3 May, Cornish Radio Amateur Club is holding a committee meeting. Details from Steve, G7VOH on 01209 844939.

On Wednesday 4 May, Cornish Radio Amateur Club is holding the main meeting at St Agnes Coast Watch Station. Details from Steve, G7VOH, on 01209 844939.

On Wednesday 4 May, Exmouth Amateur Radio Club is having a talk and demonstration on The Self-balancing-vehicle by Alec Jefford, G8GON. Contact Muriel, G8UWE on 01395 264872.

On Wednesday 4 May, Taunton & District Amateur Radio Club is having a talk in The Thermionic Valve part 2 by Mike Coles, M0CIE. Contact William, G3WNI on 01823 666 234 for more information.

On Wednesday 4 May, Thornbury & South Gloucestershire Amateur Radio Club is having a talk on WAB by Stan, G0RYM. Contact Tony, G0WMB on 01454 417048.

On Wednesday 4 May, Trowbridge & District Amateur Radio Club is having a talk on SWLing Broadcast Stations by Nick Dewhurst. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 5 May, South Bristol Amateur Radio Club is holding a committee meeting. Contact Andrew Jenner, G7KNA on 07838 695471

On Thursday 5 May, Swindon & District Amateur Radio Club is holding a DF Contest. Contact Den, M0ACM on 07810 317750.

On Thursday 5 May, Yeovil Amateur Radio Club is having a talk on My Kite Aerials by M0WOB. Contact Steve Crask, G7AHP by email to steve@g7ahp.co.uk.

On Friday 6 May, North Bristol Amateur Radio Club has an evening called Shack Ergonomics or Fitting It All In!. More information from Dick on 01454 218362.

On Friday 6 May, Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by e-mail to g6fsp@tars.org.uk.

On Saturday 7 May, Blackmoor Vale Amateur Radio Society is taking part in the Mills weekend from Sturminster Newton Mill. Contact Tony, G0GFL on 01258 860741.

NEWS FOR WALES

On Monday 2 May, Dragon Amateur Radio Club is having a a chat night on club matters. Contact Stewart Rolfe, GW0ETF on 07833 620733.

On Monday 2 May, Llanelli Amateur Radio Society is closed due to the bank haoliday.. Contact Craig, MW0MXT on 01269 840292.

On Tuesday 3 May, Wrexham Amateur Radio Society is having a talk on What have you got under your cap by Patrick Glyn, MW0BNB. More information on the web at www.wrexham-ars.co.uk or Patrick, 2W0HUU on 07947 701 927.

On Wednesday 4 May, Conwy Valley Amateur Radio Club is having a talk on the history of radio from day one by David Roberts, GW8NZN. Contact Wynne, GW6PMC on 01745 855 068.

445. Weekly Highlights of Solar and Geomagnetic Activity, 25 April - 01 May 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-03 21:30:09 UTC

:Product: Weekly Highlights and Forecasts
:Issued: 2011 May 03 2027 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
25 April - 01 May 2011

Solar activity began the week at very low levels. An increase to low
occurred with a C2 x-ray event at 0233 UTC on 27 April from Region
1201 (N16, L=116, plage region). Activity continued at low levels
for the remainder of the week with the primary contributions from
Region 1199 (N20, L=188, class/area Dso/210 on 01 May), Region 1203
(N18, L=061, class/area Cso/160 on 01 May), and Region 1195 (S16,
L=191, class/area Ehi/400 on 25 April). The largest event of the
week was a C6/Sf from Region 1199 at 2332 UTC on 01 May.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
low to moderate levels for 25-30 April, and reached high levels on
01 May.

Geomagnetic field activity was generally quiet from 25-28 April. An
increase to unsettled to active levels (with occasional storm
periods at high latitudes) occurred late on 29 April and persisted
through 01 May in response to a favorably positioned negative
polarity coronal hole. The high speed stream followed a clear solar
sector boundary crossing at 1445 UTC on 28 April. Solar wind
velocity began to increase at 1600 UTC on 29 April and reached peak
values around 740 km/s. The north-south component of the solar wind
Bz turned negative after 1600 UTC on 29 April and persisted at
generally negative values for the remainder of the week. Typical
values were in the range between 0 and -5 nT with peak values
reaching -10 to -12 nT.

Forecast of Solar and Geomagnetic Activity
04 May - 30 May 2011

Solar activity is expected to be very low to low. There is a chance
for isolated periods of moderate levels due to the possible
emergence of new regions as well as the return of old Region 1195 on
```

15 May.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels for 04-07 May in response to the sustained high solar wind speed mentioned previously. Normal background levels should resume for 08-09 May but another increase to high levels is expected for 10-12 May in response to another high speed stream. Normal background levels should return for the remainder of the outlook interval with the exception of 19-20 May and 28-30 May due to recurrent high speed streams.

Geomagnetic field activity is expected to be quiet to unsettled for 04 May and generally quiet for 05-08 May. An increase to unsettled levels with possible active periods is expected for 9-10 May in response to a recurrent coronal hole. Quiet levels should prevail until 17 May when another recurrent high speed stream is expected to increase activity to unsettled to active levels. Quiet levels should return for 18-25 May, followed by an increase to unsettled to active levels with a chance for storm periods at high latitudes for 26-30 May in response to a recurrent coronal hole.

RAC Bulletin 2011-011E - VPFS Doug Mercer VO1DTM and National Secretariat welcome A.J.(Andrew) Bryan VE7KSN/National Amateur Radio Emergency Database (NARED) now ready for applicants
2011-05-04

This is a two part bulletin:

VPFS Doug Mercer VO1DTM and National Secretariat welcome A.J.(Andrew) Bryan VE7KSN

It is with great pleasure that I, along with the members of the Field Organization National Secretariat welcome A.J.(Andrew) Bryan VE7KSN to the Secretariat as IT Advisor.

A.J. is an advanced ham with code endorsement and resides in Staanich, British Columbia. Originally from Nova Scotia he graduated from the Royal Road Military College in Victoria and went on to serve in the military as an infantry officer for 8 years. He has experience as a Business Analyst and IT Support Specialist with the British Columbia Provincial Emergency Program, is staff representative to the Radio Advisory Committee, as is currently Emergency Management Technology Specialist with the PEP, Emergency Management British Columbia.

Welcome aboard A.J. Your knowledge and experience combined with that of our other Advisors will greatly enhance our ability to ensure the successful implementation of a new Field Organization, and our ARES review project.

==========

National Amateur Radio Emergency Database (NARED) now ready for applicants

I am pleased to advise that the National Amateur Radio Emergency Database is ready to receive applicants. If you are interested in

being considered, have a high level of Emcomm training or are willing to update, please contact the undersigned by e-mail to receive an information package, release of liability form and application. Once you have submitted your application, it will be reviewed by our National Emergency Coordinator Ken Oelke VE6AFO and Manager NARED Merv Halvorsen VA3TSA. Thank you for your interest.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-05-05
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** V/UHF Contest "Memorial CT1WW" in memory of Tiago - CT1WW **

The Portuguese radio amateur club "Tertï¿½lia Radiomadorï¿½stica Douriense"
organizes next 7 and 8 of May (from 14h00 UTC/Saturday to 14h00 UTC/
Sunday) the V/UHF Contest "Memorial CT1WW" in memory of Tiago - CT1WW.
The contest will be held in 50MHz, 144MHz, 432MHz and 1296MHz. The logs
should be received, in EDI format, before 15 May (23:59 UTC) via email
log@trd.qrmzero.com . Now that 6 meters E-Sporadic season just started,
this may be a good opportunity to do some VHF QSO's. The contest rules
can be found in the club website http://trd.qrmzero.com, directly at
http://trd.qrmzero.com/memorialct1ww/2011/Regulamento memorial CT1WW
2011 ENG.pdf . Many thanks in advance. Best regards, on behalf of
Tertï¿½lia Radioamadorï¿½stica Douriense Carlos, CT1HSN direct to MMMonVHF

** BEACON in PY during Araucaria DX Contest **

We enrolled our beacon in the contest Araucaria DX group VHF he is
24 hours in the air in three tones issuing 144,295 pilots and
identity in CW. OSJ antenna to 16 meters 25 watts, a true challenge

not? in this city of Goytacazes rj, played by a CPU 2500. Who will kill this figurine? the challenge is FM modulation Who knows a duct favors SOURCE: tnx to diney monteiro pu1pby direct to MMMonVHF

** VK2KU at Home back at home **

Hi Everyone, My sincere thanks to the many who sent me their good wishes recently, following a totally unexpected visit to Goulburn hospital, where the food was fine when I was allowed to eat it!
I am now home, but it will be at least a week or two before I am likely to visit the shack, which at 100m now seems impossibly far away from the house. SOURCE: Guy, VK2KU via MoonNet
Our best wishes again, gd healthy! Guy (red. 8EBW)

** DXCC reached at Isao, JM1WBB **

So, I have got DXCC, worked 100 entities now. 2m EMEers: thank you for your support and activities. Of course, I will call to ER and EY by full power after the Japanese long vacation, HI. I need A2's QSL asap SOURCE: Isao / JM1WBB via MoonNet - CONGRATS Isao-San (red. 8EBW)

** C56EME QSL Status **

After some delay (parcel with cards was lost in the post from the printer to us) we did receive the C56EME qsl cards. The cards will be send out the next days. If you did not send a QSL yet, you can send yours to PA3CEE (adress at qrz.com) - SOURCE: Team C56EME via MoonNet

Announcement New DXCC 144MHz moonbounce - LAST NEWS from PE1L, dated 2011-04-30: Today 30 april the PJ4X moonbounce activity was ended. We finished with 333 inits on 144 MHz in 50 dxcc countries and 10 inits on 432 MHz. About QSL: QSL cards are ordered in two designs so the lucky ones who got us on two bands will get two different cards.
All QSL wil go via PE1L and we kindly ask you to keep in mind that you include enough to cover the costs. You can see your QSL status on the log page at www.emelogger.com/bonaire and www.emelogger.com/curacao
If you do a logsearch you can see if you are in the log, if your card is received and if our card is send to you. Best 73 Rene PE1L, Johan PA3FPQ, Jurgen PE1LWT and Peter PJ4NX - PS there is a big change that

PJ4NX will pop up on the band so now and then!

XX/DL1YMK EME-DXpedition 2011
Hello fellow-EMEï¿½s, as announced earlier this year, we will set out
for our next EME Dxpedition end of May. We need 3 days for transfer
and for installing the station set-up, so we intend to start operation
provided all goes smooth, on Saturday, 28th May with 23 cm, wheather
permitting. As the country, which we want to activate, has very
limited power limits for amateur radio, the telecommunication
authority proposed to apply for a temporary commercial radio licence
in order to be allowed for enough power for EME (which we needed to
pay for, of course). So we will be active with our ï¿½normalï¿½ signal

strength, hopefully providing a new country for you over the moon!
As in the previous years we doni¿½t announce the assigned callsign in beforehand to increase the fun for all interested hams in the first days of operation. We hope to have excellent moon windows from Australia and Japan (this time we have also equipment for the Japanese frequency on 13 cm with us!!) to the States and Canada, so all, who want to work us should be able to do so. Due to problems with our available days for holiday this year, the operation is limited to 9 days ending with the participation in the 23 cm DUBUS contest on 4th and 5th June. Details at: www.mmmonvhf.de/latest.php?id=3794

** Andy, GM0KZG/MM, is QRV again **

Andy, GM0KZG/MM, is QRV again for Es and MS on 6 m, while on the Minna ("inshore ship") - I am now QRV on 6m from the ship. Running 100w using a 3 ele Eagle 3dx yagi, and the FT847. Some noise problems up to S5 at times from the shipi¿½s propulsion system. I have about 270 degrees clear view, apart from the boom of the liferaft crane directly behind my antenna. The LNA is not working just yet, so I might be a bit deaf. We may be heading out for IO56 today (April 23rd) I hope to use 50.168 i¿½ for SSB and 50.260 for JT6M, during any openings, and will be QRV evenings after 1600 utc, with possibly some times in the afternoons at the weekends. LATEST NEWS from Andy, GM0KZG/MM, dated 2011-05-01: 2 pieces of rope were removed in Stornoway by divers, and the ship has left port again. Present location is IO68 (April 30, 16z). Heading for IO78...
LATEST NEWS from DXCluster, dated 2011-05-04: Andy was qrv from IO69!

** V55EME 6m EME from Namibia **

LATEST NEWS from the V55-Team, dated 2011-05-04:
Dear Friends, Today we was able to complete 3 QSO on the worst conditions you can imagine. Moonrise don't work, we have a small hill blocking EL, but we will try to TX ALWAYS. W7GJ was -26 but with EL in 16 degrees, later W1JJ was -20dB but looks like Ground reflection gain works better on 12 degrees and less. Last QSO today was with ES6RQ with -26dB when we have only 1 degree EL. Extra ground reflexion works perfect during Moonset. We have no pre-amp and with worst conditions we was able to manage this QSOs. We will TX always in Moonrise and Moonset, conditions are improven and May 10 and up we will have DGR 1dB only (5 db better than now). The antennas installed by Hanspeter HB9PHJ are working great.I want to extend my congratulation to Martin V51W (the owner station) for the big effort done before my arrival to Namibia, They are really motivated to learn JT and for sure we will have a permanent Active station for long future. We just start, please be paincient and you will add a new DXCC country in your list. 73 de V55EME group

** EA3LA/p qrv from JN12IK during the IARU Contest **

During 7-8 mai , ea3djl,ea3bsg,ea3la will go to Pic de Salines at 1400 m. this year with 10 Ghz . Locator JN12IK. 144: 350 watts + 5 WL + prev. - 432: 250 watts + 38 ele. + prev. - 1296 : 150 watts + 55 el + prev - 10 Ghz : 1 watt + 1,20 parab.
If the weather is good, listen in 144 Mhz 73.
SOURCE: tnx to EA3LA direct to MMMonVHF

** Holiday Activity on 50 MHz from IM86 **

I will be active from 16. Aug. - 02. Sept. from IM86ar on 6m CW/SSB
Also Lighthouse number SPA-219 from my holiday QTH. Call: EA7/DH6DAO
SOURCE: tnx to DH6DAO, Reinhard, direct to MMMonVHF

** 4L1AN on 6m next month **

This is a preliminary heads-up to let you know that K5BM is heading over to Georgia on May 25 to join up with 4L1AN, who just received a temporary 6m permit for their operation. They hope to be QRV on JT65A for EME during the optimum periods in June and July. The call will be 4L1AN, but the grid locator is not yet firmed up. They hope to be able to set up on the Black Sea shoreline, looking out over the sea on their moonset. Obviously that kind of location would give them an ideal shot at Es toward EU and possibly NA too. If they can arrange that, they would be in either LN01 or LN02. I am having my 6M7JHV yagi sent to them from the T31A DXpedition, but they are still looking for a 6M amplifier to use. Since 6m is not usually authorized in 4L, there are not many 6m amps around over there, and K5BM will probably have to take one with him. If you have any suggestions, please let John or Tom know. More information coming as it develops...GL and DX!
SOURCE: Lance Collister, W7GJ, via Magic Band EME Group

** Isle of Arran (IO75) qrv again **

Camb-Hams members Bob G1SAA, Terry G3VFC, Martin G3ZAY, Colin G4ERO, Colin G8TMV, Mark M0MJH, Rob M0VFC, Steve M1ACB and Gavin M1BXF will be active on the 1-8th of May 2011 from the Isle of Arran (IOTA EU-123 IOSA CL01, SCOTIA CS14). QTH will be a rented cottage on the west of the island near Balliekine (WW Loc. IO75HO). As usual most HF bands will be activated with SSB, data and some CW. VHF wise they will be on 6m and 4m SSB/data (JT6m) and being a little more south than Harris they will again activate 2m both SSB/data (FSK441). If they have time they will also be active on 2m and 70cm satellites. This year the CRG (Cambridgeshire Repeater Group) has a new callsign G6PYE which they will use alongside the traditional G3PYE, as the activation is in Scotland the prefix becomes GS for a club station in Scotland. Listen out for both GS3PYE/p and GS6PYE/p. QSL direct or via bureau to M0VFC
Website: http://dx.camb-hams.com/
SOURCE: [rsgbiota.org] via ICPO Bulletin (29 April-06 May 2011)

** JD1 - OGASAWARA, AS-031, WW-Loc. QL17 **

Makoto,JD1BLY (JI5RPT), Harry,JD1BMH (JG7PSJ), and Masaru,JD1BMT (JE4SMQ), are staying on Chichijima (AS-031) again by the end of April and beginning of May but will stay there for

different period of times. You can expect activities from:
JD1BLY: Apr 30 until May 7 - JD1BMT: Apr 30 until May 4
JD1BMH: May 4-13 - Activities are planned in CW, SSB and digital modes
on 160m-6m and via satellite. You can visit the websites of the OPs
for news and logs: JD1BLY: http://www.ji5rpt.com/jd1 and
JD1BMH: http://sapphire.es.tohoku.ac.jp/jd1bmh
JD1BMT: http://homepage3.nifty.com/maaberu/logsjd1/logsearch.html
QSL cards should be sent via bureau or direct to their homecalls.
SOURCE: DXNL 1725 - Apr 27, 2011

** KH0, MARIANA ISLANDS, qrv HF, 6m and Satellites **

Yoshi, JJ8DEN, is now active as KH0PR from the Coconut Village Hotel
on Rota Island (OC-086) until May 8th. Activity will be on 160-6 m.
using CW, RTTY and PSK. Also possible is some Satellite operations
(FO-29 and VO-52). QSL via JJ8DEN, by the Bureau or direct (w/SASE
and 2 USZDs or 1 IRC with European type envelope. If small envelope
is sent, Yoshi will return QSL card by surface mail [ship mail]).
DO NOT send QSL to Rota. SOURCE: Ohio/Penn DX Bulletin #1009

** SV5, DODECANESE, qrv HF and 6m **

Fred, PA1FJ, will be active as SV5/PA1FJ/P from Karpathos (EU-001)
between May 8-14th. Activity will be on 40-6 meters using CW and SSB.
He will use his Yaesu FT-817 into a Buddistick antenna and a 2x 5m
dipole. QSL via the Dutch QSL Bureau. SOURCE: Ohio/Penn DX #1009

** ZF, CAYMAN ISLANDS, qrv HF and 50 MHz **

Operators Bob/W5UQ and Bill/W5SJ will be active as ZF2UQ and ZF2EZ,
respectively, between July 11th and approx. July 18th. Look for them
to operate in the CQWW VHF Contest (July 16-17th), mainly on 6 meters
Activity outside of the contest will be on the HF bands using mainly
CW and some SSB. QSL via W5JAY (see QRZ.com).
SOURCE: Ohio/Penn DX Bulletin #1009

** V8, BRUNEI, qrv with V85/9M6XRO HF and 50 MHz **

John, 9M6XRO, will once again be active as V85/9M6XRO from Darussalam
Brunei (OC-088), between May 4-9th. Activity will be mainly CW, but
also possibly some RTTY or SSB. John states V85 does not have an
allocation for 6m. As before, John will be running 400w to a Butternut
HF6V up about 100 ft. on the hotel roof. He mentions, "BTW during my
visit to Brunei in March, I made close to 2500 Q's with a high
percentage on RTTY. I have been asked by some Southern Hemisphere
stations to look for them on 80m CW so I will give that my best shot

on this trip :-)." QSL via M0URX, direct (w/SAE plus 1 IRC/2 USDs), by the Bureau, or LoTW. Alternatively, QSLs may be requested using M0URX's OQRS form at: http://www.m0urx.com/qsl-request-form ADDED NOTE BY 9M6XRO: John will be visiting the U.K. and I.O.M between May 19th and June 1st. He states, "I plan to spend the first part until the 28th in the Isle of Man - then the latter part in Ayrshire I hope to put GD3OOK on the air from home base for a last time!" SOURCE: Ohio/Penn DX Bulletin #1009

** UT1FG/MM VOYAGE WRAP-UP **

Captain Yuri Bodrov, UT1FG/MM, wrapped up his 6 month voyage that took him across the Atlantic Ocean 3 times and around the Cape of Good Hope in South America and through the Panama Canal on his ship, the Mottler He operated on the HF bands, 6 meters and also activated a few hundred grids to the delight of many satellite operators in Europe, South and North America. Walt, WP4T, and his ham radio family met up with him in San Juan, Puerto Rico, his final port before flying home. Captain Bodrov gave them the red carpet tour. Pictures from their visit are now available on the K8YSE Web site at: http://www.papays.com/sat QSL direct or to his manager UX0FY. SOURCE: Ohio/Penn DX Bulletin #1009

Text edition:

WIANEWS FOR WEEK COMMENCING May 8 2011.

WIA CLUB GRANT 2010 AWARDED TO REAST IN VK7

Soldering is easy - the comic book

WIA JOHN MOYLE CONTEST - EXCELLENT RESULT FOR SUMMERLAND CLUB IN NORTHERN VK2

Time ticking for ILLW

ALL THESE STORIES UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MAY 08 2011.

Rescue operation launched for stranded tourist.

A man believed to be travelling through the Pilbara in a campervan appears "stuck" and Karratha Emergency services have launched a search and rescue operation. The Swiss tourist activated an emergency beacon in Western Australia's remote Pilbara.

The Search and Rescue Co-ordination Centre in Canberra sent a plane from Perth to drop off a radio to the man who is believed to be stranded on the Talawana Track, 1,000 kilometres east of Karratha.

It is believed the man is travelling in a campervan from Perth to Cairns.

ON THE BUSES

The Australian Capital Territory Government has committed $4.5 million in funding to upgrade the ACTION bus radio network as part of this year's budget.

The government's overhaul of the radio system comes after years of complaints from the Transport Workers Union that the failures of the radio systems on the buses threatened to compromise driver security.

ZDNet Australia asked for detail on the proposed overhaul of the radio network, but no comment had been received at the time of writing.

Worth a follow-up read on zdnet next time you surf the web!

HISSY FIT

Snakes have a face only a mother could love, but that hasn't stopped PhD student Melissa Bruton, from the University of Queensland's School of Geography, Planning and Environmental Management from getting up close and personal.

Melissa was recently awarded a grant by the Wildlife Preservation Society of Queensland to support her research into reptiles in the southern Brigalow Belt region of Queensland and New South Wales.

Melissa has a particular interest in the elusive woma python.

To do this, She be implanting radio-transmitters into the body cavity of several larger pythons and radio-tracking them for one year each.

After finishing just one summer of trapping Ms Bruton already has 8 woma pythons to study.

The tracked womas are quite mobile but early indications are that they return to preferred burrow sites. Each woma will be tracked every second day for a minimum of 12 months so we will know a lot more about these elusive pythons in 12 months' time.

UQNEWS

LIGHTS CAMERAS ACTION

Frank Fenner documentary has filming in VK5.

Kojo Productions' documentary, that pays tribute to late scientist, Frank Fenner, is filming in iconic Adelaide locations this week with an all South Australian cast.

Spanning Frank's groundbreaking work on malaria in World War II, through charting the course of myxomatosis in Australia's feral rabbits, to his vital role in eliminating smallpox, the film is being directed by award winning Richard Jasek, best known for his work on TV's McLeod's Daughters and City Homicide.

Monday 9th May - Tuesday 10th May the filming is set to take place across multiple locations - Cummins House, Botanic Gardens, and Semaphore Beach

VK4 QNEWS

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

NO NOT ONE VK4 CLUB DID THIS WEEK!!

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

A major human characteristic is the need for certainty. We always want to know
that what we know is real and lasting. It has been said of war that it is the
victors that write the history. From that perspective there is the knowledge
that what we believe is true and unchangeable.

When it comes to looking over our history, we find that we have heroes who have
characteristics that make them superior to the rest of us. Sometimes, when we
are lucky to hear the story from people who were there we find that some of
these heroes are quirky, different and even unlike able as individuals.
It is the symbolism that these people and their actions embody that is the
enduring truth we seek.

What I believe is that we need to be honest in our activities and any attempts
at "gilding the lily" are to be carefully avoided. If some-one does excel, in
our mind, we should applaud those things that stand out and faithfully record
the facts. Some of the greatest people, in history, have been eccentric enough
that you and I wouldn't even make them Facebook friends. However their
achievements last and their names linger.

Thinking over the battles played on grass, cricket and football for instance, and the battles fought to the death, there have been people who try and make all these events heroic and mythic. Surely the facts should stand by themselves, real and unadorned.

I'm Geoff Emery and that's what I think....how about you?

Introduction to Geocaching

REAST intend to run an introduction to Geocaching for anyone interested, Today Mothers day Sunday 8 May from 2-4pm at the Queen's Domain clubrooms.

Do you have a GPS or a smart phone that has a GPS and wondered what you can do with it? Well Geocaching or world-wide treasure hunting using your GPS may interest you.

REAST will have some presentations to explain the basics then will actually go and find a few caches around the Queen's Domain.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Don't worry, it's not a terror alarm - it was just the annual test of the Danish nationwide siren warning system

Following the death of Osama bin Laden, terror threat levels have increased significantly. But those in Copenhagen that heard those loud sirens Wednesday at noon, need not have worried it was a TEST alarm warning of impending danger, ON TEST.

Emergency Management Agency and the police conducted its annual test of the nationwide siren warning system in an effort to familiarise citizens with the warning signals.

Some 1,078 electronic warning sirens have been set up on top of buildings and on masts throughout the country. With the current system, around 80 percent of the Danish population can be warned of threats with the stationary sirens.

The remaining 20 percent can be warned with mobile sirens placed on police vehicles.

The sirens are tested every night, but at a frequency that cannot be heard. Once a year - the first Wednesday of May - they are tested with the full sound on... let's hope our Princess Mary had the twins bedroom window shut!

SPY V SPY

Last Wednesday week in 'Philly' The New Mellow Edwards performed at International House, on Chestnut St.

What has this USA jazz Muso got to do with us?

Well we have all dialled around the short-wave band and no doubt have heard that female voice reciting a string of five-digit numbers (in several languages). These strange broadcasts most likely are covert messages transmitted to spies, or criminals, or ... someone, who knows the death of Geronimo may also have been sent this way!

The 'numbers' held a fascination for off-kilter trombonist/composer Curtis Hasselbring, it should come as no surprise they inspired a new suite of music.

He performed the piece, which requires the musicians to decode and work with five-digit numbers, with a stellar, expanded septet version of his New Mellow Edwards ensemble.

NEWS FROM ARNEWSLINE USA
HAM RADIO OPERATOR ONE OF NINE AMERICANS MURDERED IN KABUL

Some sad news to report. Word that James McLaughlin, WA2EWE who also held the call T6AF, was one of the nine Americans that lost their lives in a shooting at Kabul airport on Wednesday, April 27th. According to Voice of America reporter and fellow amateur Steve Herman, W7VOA/T6AD, all were killed when an Afghan military pilot opened fire in an operations room of the Afghan Air Corps.

Reporting from Seoul, Korea, where he is chief of the Voice of America bureau, Herman said McLaughlin, who was also his friend as well as being a career U.S. military officer working as a contractor training Afghan pilots.

According to Steve Herman, he first met Jim McLaughlinin August, 2009, when they were the only two radio amateurs operating from Kabul. Herman said that McLaughlin had put together a fine radio shack in his quarters. He said that it was obvious from spending time with McLaughlin that ham radio was an important morale booster and pastime. As such, T6AF usually spent a couple of hours a day on the air.

So far this April, fourteen Americans have been killed by members of the Afghan military. An Afghan officer on the compound identified the shooter of McLaughlin and the others as one Ahmad Gul.

According to Steve Herman, this attack was the worst single episode of an Afghan turning against his coalition partners.

RSGB DECIDES NOT TO LIVE STREAM ITS AGM THIS YEAR

The Radio Society of Great Britain's Annual General Meeting Saturday, May 14th will not be streamed live to the Internet this year.

For the past several years the British Amateur Television Club and the RSGB have cooperated in making this event available world-wide. But an RSGB statement published on the British Amateur Television Club's website, the organization says that while the club has once again offered to do it again this year that the RSGB has decided to decline.

While no specific reason was given for the sudden cancellation there's speculation that it has something to do with the recent resignation of the Society's former General Manager Peter Kirby who the RSGB's says left its employ after the discovery of what national society termed as financial irregularities on his part.

The statement goes on to say that RSGB has considered its position and has reluctantly reached the decision that this year it would not be prudent to go ahead with live streaming.

In its own statement, the British Amateur Television Club says that it has accepted the Society's position on this but hopes to be able to offer the Society the facility again in 2012.

More is on-line at batc.tv

WEIRD AND WONDERFUL

SHOWER POWER SOAP OPERAS

The world's first shower powered radio comes from UK based Tango Group the same group that commercialised the award-winning Wind-Up Radio.

This radio is powered entirely by your shower water.

The H20 brand, has a patented a micro turbine concept through the motion of water flowing through a little turbine.

The convenient and energy-efficient shower powered radio, means users can listen to their favourite radio stations while in the shower.

The radio, and is even more convenient since it is recharged as the shower runs, dispelling the need for disposable batteries.

The radio even allows users to carry on listening after the shower is turned off; using any excess energy stored in an integral Ni-Mh rechargeable cell.

which currently will be open for members and non members alike.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

GB0BON June 19th to celebrate the 366th anniversary of the Battle of Naseby,
the decisive battle of the English civil war June 1645 in the small hamlet
of Naseby in Leicestershire.

(Welland Valley Amateur Radio Society)

The Hellenic Amateur Radio Association of Australia Inc is organising another
major DXpedition.

This time heading out to Lord Howe Island with the call sign VK9HR.

The dates are the 24th July to 2nd August 2011

Operators, particularly CW, SSB or digital mode operators are required however
Catherine VK2FEME says " we will welcome all that are interested."

The cost is $1950.00 which includes airfares and taxes to and from Lord Howe
Island, departing from Sydney, plus 10 nights accommodation.

2 resorts have been for this DXpedition and will be operating 160 - 6 meters
between the two sites.

All equipment will be supplied with some of the latest equipment being a
Kenwood TS590S, Icom 7000 and also the latest SPE amplifiers, Step IR antennas
etc.

Please check our recently updated website www.vk9hr.com for more information.

The VK9HR DXpedition team leader is Tommy Horozakis VK2IR and co-leader John Chalkiarakis VK3YP.

Please contact team leader - Tommy Horozakis VK2IR if you have enquiries on 0413 005 511 or email president@haraoa.com, or co-leader John Chalkiarakis VK3YP on treasurer@haraoa.com

(Catherine Stokes, VK2FEME Secretary HARAOA.)

Further In DX, PD9DX, ON8AK and ON5UR will be active as OJ0UR from Market Reef between August 13th and the 20th.

Their operation will be on the HF bands using a Vertical and a 2 element beam.

QSL via M0URX, direct, via the bureau, or electronically using Logbook of the World.

Radio Netherlands Worldwide management has confirmed the purchase of three 500 kW short-wave transmitters from the recently-closed short-wave site at H�rby in Sweden. The transmitters are currently being dismantled for shipment to RNW's station in Madagascar.

Recently, RNW management announced that it intended to speed up the process of replacing short-wave with other distribution platforms, including the closure of its relay stations in Bonaire and Madagascar. The Bonaire facility is scheduled for closure at the end of October 2012, but no closure date has yet been decided for Madagascar.

However, late last year RNW decided it was time to replace the nearly 40-year-old Philips transmitters at Madagascar. Rather than invest in new transmitters, the opportunity was taken to purchase the three ABB transmitters from the Swedish station at H�rby which was closed at the end of last year.

These were installed in 1993.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

MAKING LEDS THE ALL PURPOSE ROOM LIGHT

New technology may make Light Emitting Diodes practical For everyday home and even ham shack AS Jim Damron, N8TMW, says.

Researchers at the University of California, Santa Barbara, say they've figured out the cause of a problem that's made

light-emitting diodes impractical for general lighting purposes.

Chris Van de Walle is a professor in the Materials
Department at the University of California at Santa Barbara.
He heads the research group that carried out the work. They
investigated a phenomenon referred to as the drop in
efficiency that occurs in these LEDs when they're operating
at the high powers required to illuminate a room. The cause
of this decline has been the subject of considerable debate,
but the U-C Santa Barbara researchers say they've figured
out the mechanism responsible for the effect by performing
quantum-mechanical calculations.

Van de Walle says that identifying the root cause of the
problem was an indispensable first step toward devising solutions.

REWIND

A story worth a read is in last Tuesday ,3 May's Yorkshire post.

Instead of floating in space, much of the information super highway is actually
under water.

You might be surprised to know that this global communications system surfaces
in the UK near a small village on the Yorkshire coast.

If you think the internet is largely dependent on satellites circling thousands
of miles above the earth, think again.

The global communications system relies on old submarine cable routes that date from the 1800s.

Two hundred and fifty submarine cable systems provide the backbone for most of today's communications systems.

Another 19 are due to come online this year.

Less than five per cent of our hi-tech communications network is done via satellite, with fibre accounting for most of the rest.

The 19th century version of the information super highway would have struggled to keep up. The first transatlantic cable transmission in 1858 was a 98-word message from Queen Victoria of the UK to President Buchanan of the US which took 16 hours to transmit.

Fifteen years later, the first commercial transatlantic cable message was sent. It cost the princely sum of £20 for 20 words, which is roughly the equivalent of £900 today.

By 1870, information could be transmitted at around 10 words per minute.

Fans of Tolstoy should note that it would have taken 37 days to send over one copy of War & Peace.

Today, of-course information moves at lightning pace. Messages can be sent with the click of a mouse.

it is estimated that there are between 100 and 150 cable faults around the world each year.

Nearly half of these faults are due to fishing, although earthquakes can also cause damage and disruption.

Some things haven't changed in the last 150 years.

The method of recovering faulty cables has remained the same.

They are retrieved using a grappling hook on the end of up to five miles of rope. The rope is more expensive than the cables it helps to recover.

So the next time you log on, pray that a shark with a power complex isn't nibbling away at a cable in the deep.

450. ARRL Changes Insurance Plan Administrators

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-06 05:53:55 UTC
From: ARRL Web site <memberlist@www.arrl.org>
Message-ID: <20110505221815.6C00D26F1E4@bmail.arrl.org>
Source record: 4490
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

Effective May 1st, the ARRL has changed program administrators and insurance companies for its ARRL-sponsored Equipment Insurance and Club Liability insurance plans. The League has signed an agreement with Hays Affinity Group <http://arrlinsurance.com/> to serve as the program administrator to provide equipment insurance to its members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays will be replacing Marsh Affinity Group Services as the program's administrator and will be introducing new policies for both plans, underwritten by the Hanover Insurance Company.

Members who are currently insured under the old plans are likely to receive a notice from Marsh, announcing the change. Be assured, if you currently have equipment or club liability insurance provided through Marsh Affinity Group, your coverage will continue through the end of the current policy term. But keep in mind that when your policy expires, your coverage will not automatically be switched over to Hays. In addition, beginning May 1, the ARRL will no longer be able to help you resolve any issues you may have with Marsh, the insurance company or their claims paying agent. Our contractual agreement with them has been terminated.

If you wish to enroll in the new insurance plans, you must do so with the Hays Affinity Group. You can sign up online <http://arrlinsurance.com/> and even schedule your radio equipment online, too. With Hays Affinity Group, you can have all your radio equipment covered, even the computers, hard drives and printers in your shack. There are several provisions in the new equipment insurance plan that we believe are improvements over the old plan. Coverage for towers and antennas is now up to $15,000 of replacement cost, 50% more than the old policy. In addition, any newly acquired equipment during the policy term, up to a value of $2,000, will be covered until your next policy renewal (you must notify Hays within 60 days of acquisition). The low deductibles on the policy have also been retained. There is a $50 deductible for replacements and $25 for repairs. The coverage is as comprehensive as the old plan including fire, theft, lightning, wind and flood damage to your equipment. The new premium is $1.40 for every $100 of replacement value insured. This is slightly less than in the past.

The Club Liability insurance plan now provides the same general liability insurance for most clubs for only $200 per year (add $100 per year if the club wants to include non-owned or leased auto liability coverage). The standard limit for the policy is $1,000,000 per occurrence ($2 million in the aggregate) but if your club needs a higher

limit, you can call the Hays Affinity Group for a quote.

To have your equipment covered under the new policy, you will have to enroll with Hays to continue coverage under an ARRL-sponsored plan. If you wish to switch to either of the new insurance policies now, you can either cancel your policy with Marsh and sign up with Hays, or wait until your policy with Marsh is due for renewal and then sign up with Hays for coverage. If you choose to cancel with Marsh before renewal, you will receive a pro-rated refund of any unused premium fees you have paid. For more information you can contact the Hays Affinity Group at:

Hays Affinity Group
Attn: ARRL Insurance Program
1400 Renaissance Drive, Suite 300
Park Ridge, IL 60068

Phone: (866) 819-0209

E-mail: ARRL@hayscompanies.com.

The ARRL has been providing opportunities for equipment insurance to its members for more than 25 years. We believe that the programs administered by Hays will offer ARRL members the coverage they need and excellent customer service.

73,

Barry J. Shelley, N1VXY

Chief Financial Officer

ARRL, Inc.

451. Amateur Radio Newsline(tm) Report 1760 - May 6 2011

Newsgroup: rec.radio.amateur.misc

Amateur Radio Newsline(tm) Report 1760 - May 6 2011

Amateur Radio Newsline report number 1760 with a release date of
Friday, May 6, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio respond as killer tornadoes rip
the south-east and take a big toll in Alabama; the National Association
of Broadcasters says that no broadband spectrum crisis exists, the
Anchorage V-E-C suggests rules changes that could lead to a lifetime US
ham license and human movement might be the thing that replaces
batteries in the not to distant future. Find out the details are on
Amateur Radio Newsline(tm) report number 1760 coming your way right
now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS BECOME FIRST RESPONDERS AS TORNADOES RAVAGE THE
SOUTH AND EAST

Ham radio operators became the first responders on April 27th and 28th.
This as tornadoes and other severe weather took aim at parts of the
South and East. Amateur Radio Newsline's David Black, KB4KCH, is in
Birmingham, Alabama, where he literally lived through the ordeal:

--

Days in advance, forecasters had warned about April 27th. They said it
would be a dangerous day for Alabama. What no one knew at the time was
how dangerous. That afternoon would mark the largest tornado outbreak
and third deadliest in U-S history. More than 300 confirmed tornadoes
plow through 14 states during a three day period ending April 28th.
The death toll is estimated at more than 300.

In Alabama, massive supercell storms plow through the state's warm,
unstable air, spinning a series of deadly, long track tornado es.
The state is hit hard--28 confirmed twisters, 250 dead statewide, with
damage across the northern two thirds of the state. Thousands are left
injured or homeless.

The National Weather Service says at least eleven of Alabama's
tornadoes measured EF3 or greater. A single EF4 tornado--at times up
to 1.5 miles wide with winds estimated to have approached 200 miles an
hour--plows through Tuscaloosa and Birmingham. The massive twister
stays on the ground 80 miles, tearing up homes, businesses and lives

all the way.

--

W4MD: "I saw people getting out from under pieces of plywood. The first person I saw was a person with blood all over their face (and) dripping of their chin. I started collecting the walking wounded and putting them into a thrift store."

--

David Drummond, W4MD, is Alabama's ARRL Section Manager. He was at ground zero as the killer storm began destroying Tuscaloosa, producing horrific scenes he and many others will never forget:

--

W4MD: " We were covering up the dead. The place where I stopped there was a family who lived across the street and who heard the sirens who went across from where they were living to a house with a basement and when the tornado came it picked up the house that they had left, moved it across the street; set it on the other house and killed them all. And we actually put four adults and one child in a body bag"

--

Everywhere Drummond looks is destroyed. Among the victims are five students at the University of Alabama which cancels graduation. The hams trying to help Tuscaloosa's walking wounded suddenly face major communications challenges: Three repeaters being used heavily for emergency messages all go down.

Police, fire and EMA communications are also knocked out. Drummond and fellow hams have only one option: To use simplex communications.

--

W4MD: "Everything was gone. At that point, that was it. It was deathly quiet and there was nobody. There was no other communications of any kind, period.

"There are still many dead and unaccounted for. We ran out of body bags.

"There's more in the morgues and a lot of them hadn't been identified. There's people in lakes and there's still a lot of(people) unaccounted for."

--

For five hours after the tornado hit, Drummond says hams provided critical communications:

--

W4MD: "It was slow developing for support from emergency services because it was to massive. We (ham radio operators) provided much of the communications in the beginning because there wasn't any. The Emergency Communications Center was destroyed which included the EMA which took that mechanism down. That (tornado) also destroyed the adjacent police department's communications system and part of their building which put that in disarray. It also destroyed the Red Cross building which severely interrupted their response."

--

By the time the massive storm roars across I-65 just north of downtown Birmingham, it has killed at least 65 people, and injured 1,000 more, becoming the deadliest in Alabama history. Two days after the storms hit, President Obama walks through a storm-ravaged Tuscaloosa neighborhood where dusk-to-dawn curfews were in effect, and calls it beyond anything he had ever seen.

It's also beyond anything most emergency communications-minded amateur radio operators had ever imagined possible. Greg Sarratt, W4OZK, is the ARRL's Southeastern Division Director.

--

W4OZK" "This scale is unprecedented and amateur radio is stepping up in a very big way. I'm proud of all the hams who are providing support"

--

In north Alabama, a tornado stays on the ground 132 miles, narrowly missing downtown Huntsville and leaving at least 26 dead. Power is knocked out over so much of north Alabama, that motorists entering the state from Tennessee are warned to make sure they have gas in their cars.

Division Director Sarratt says Alabama hams have mobilized in large numbers to help a variety of agencies with communications support:

--

W4OZK: "Hams have been on multiple bands from HF to 2 meters D-Star. Also a lot of 440 work providing local communications; providing regional communications; and state-wide communications for EMA, the National Weather Service. The Red Cross, the Salvation Army, Southern Baptist (Relief) and other relief type organizations."

--

Scores of outlying communities are devastated, as well. In the small northwest Alabama town of Hackleburg--which lost 29 people--hardly anything remains. A tornado rated as EF-5 roars through Hackleburg, lifting a truck and dropping it back down four miles away. In the nearby town of Phil Campbell, at least 51 die.

100 miles southeast of Birmingham, a tornado slams into Dadeville at night. The storm picks up weights including a 70 pound dumbbell, throwing it about 200 yards. Volunteer firefighter Danny Lloyd, KB4MDD, walks through the debris of a devastated neighborhood to see if anyone needs help. He's not sure, but thinks he hears people calling for him in the darkness:
--

KB4MDD: "I sort of ignored them in the beginning because I did not know that they were calling for me. Then they said something again and I called out my name and it was my cousins husband and he said that `.we have someone hurt over here..'

"I went over and spent some time with an elderly lady who would ultimately expire due to her injuries. The storm made it impossible (to get more aid). She had a broken leg but it was just impossible to get her out. I mean it was not possible. All the roads were blocked.

"They were talking to me and I could see thyem but it took me five minutes or more just to climb through the (downed) trees to where they were at and her house was just gone. It was exploded."

--

While trying to help the woman, Lloyd hears tornado sirens; another warning has been issued.

--

KB4MDD: "I thought okay, here we go again. Of coarse we had a downpour and I found a coat laying on the ground and I was able to cover here. And she talked to me for a very long time as I stayed there with her and held her hand.

"It was a very tough ordeal as volunteer firefighter and a first responder, generally when I'm on the scene I have an ambulance crew that's coming up within seconds. They load up a patient and have them to the hospital. And this lady was within a 5-minute drive of a hospital.

"If it had been normal, you would have been at the St. Martin Hospital within 5 minutes. And the heart-breaking thing is that we could not move her without fear that of injuries and that we were going to make matters worse. And the second thing is that we had no way (to transport her). We had no back-board, no gurney to even try to load up to even try to start going somewhere in the midst of all that mess.

"Its very sad. I understand that she was 70 years old."

**

BREAK 1

More with David Black, KB4KCH, in a moment. But first its time to identify. From Los Angeles, This is the Amateur Radio Newsline.

5 Sec Break

--

The gruesome scenes are visible statewide. Personal items including papers and even suitcases were discovered 50 to 100 miles away from where storms hit. Trees had their bark completely removed. The ARRL ships amateur radio equipment to the state to help with emergency communications needs. Scores of relief efforts launch, with FEMA and numerous local, state and federal agencies responding.

Despite the tragically high number of fatalities, authorities believe technology kept the toll from being even worse, since so many people were able to see the storms live and the damage they were causing. Hundreds of pictures and videos are captured by residents. Tower-mounted cameras operated by government agencies and broadcasters also capture the storms.

Two men do something credited with helping save countless lives: They transmit live video of the massive tornado moments before it slams into Tuscaloosa. One of them is retired television meteorologist and storm chaser John Oldshue, KE4LMU.

--

KE4LMU: "My desire has always been to get the video live so that it could be transmitted and people could get a sense of the urgency of what was approaching them."

--

The video Oldshue and Ben Greer send from the field is seen live by hundreds of thousands of people watching Birmingham's ABC television affiliate. Chief Meteorologist James Spann, WO4W, warns viewers to take cover while tornadoes are on the ground in different areas at the same time:

--

WO4W: "John Oldshue has a large wedge tornado that is now near Interstate 59 at the Knoxville exit and this is moving in the general direction of Tuscaloosa and Northport. So we are now calling a tornado emergency."

--

Some of amateur radio's newest technology gets a trial by fire. Alabama is home to a statewide D-Star communications network. The system had never been put through such a rigorous test--until April 27th. Section Manager David Drummond :

--

W4MD: "This is the first real emergency test of D-Star. So as this (weather) came through all we had to do was go back and straighten up a few antennas, reboot some equipment and we were good to go. It's a

great tool. A great tool for that."

--

Many Alabama hams suffered losses themselves, but Division Director Greg Sarratt says they're still helping out:

--

W4OZK: "Hams that have some damage; some of them total damage and for some not so bad. In both cases I guess they know that there is nothing that they can do to repair or fix their house at this time so they are supporting amateur radio. They are going to a Red Cross Center or a Red Cross Shelter to provide communications. Theres noything they can do at home to repair right now."

--

The storms may also mean a big change about Tornado Alley...that's the corridor associated with the central plains and long thought to be where the most deadly storms strike. Alabama had been ranked 3rd in the number of tornado deaths, but that was until April 27th; the state now has a new grim honor: number one.

For now, it's the grim sights so many hams like David Drummond have to deal with:

--

W4MD: "I had a woman come up to me screaming that the storm had blown her son away. I said to calm down and asked what did he look like? She told me that he had on cowboy boots, a pair of shorts and no shirt.

"I said, well you are in luck. He just came by here a few minutes ago to tell me that there was an elderly woman trapped in a basement in a church. He let a cigarette lighter so that she could see and went that way. Three minutes later I had to ask her to quit hugging me. She was so glad to know thyat her son was still alive.

"Another situation not quite as nice was shortly after this: I mean before bthe dust settled I had an unknown female come up to me and say that `.my parents were in a house right over there. The storm has blown them away.' And there was no house. There was no nothing. What do you tell somebody?

--

OFF AIR AUDIO: "WC4Q from KA9Q at the Tuscaloosa EOC. Go ahead.

"This is WC4Q. Please pass to Marsha or your Red Cross rep.

--

The emergency may be over, but not the need for communications help. Hams all across Alabama remain busy helping on the air, as well as with

many other needs. Weather experts say the reason so many died was due to the size and path of the tornadoes. In many cases, they acknowledge, someone trying to seek shelter would not have been able to survive. Danny Lloyd:

--

KB4MDD: "There was just not safe place to be. In some homes in that kind of tornado, theres just not a safe place and I think we saw that all across Alabama. There just was not a safe place to be in the path of some of these storms unless you were underground in a shelter."

--

For radio amateurs active in emergency communications, the April 27th tornado outbreak hits with a shocking reality. Even though many believed they had a solid emergency preparedness plan in place, what happened that violent spring day convinces them: It's time to re-write the book.

>From the Southeast Bureau in Birmingham Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

There are some in ham radio who say that amateur operators have no place in being the first to respond to a major disaster. They question why some hams put their lives on the line for their communities. Well don't ask that to the people of Tuscaloosa, Alabama, or other South Eastern cities hit by these tornadoes and storms. They know well that the hams will be first on the scene and there to save lives, when all else fails. (KB4KCH, ARNewsline(tm))

**

TORNADO DAMAGE: SEVERE WEATHER CANCELS SVHFS CONFERENCE

And the storms that hit Alabama also forced the last minute cancellation of the 2011 Southeastern VHF Society Conference that was to have been held in Huntsville, Alabama, on April 29th and 30th. According to a bulletin issued by conference planners, the mayor of Huntsville directed that all events thru the weekend be cancelled. He was also instituting a dusk to dawn curfew that was scheduled to last several days.

At the time of the press release, the Huntsville Airport was closed and the conference hotel was without power after the Tennessee Valley Authority lost towers on a 500 KV main tie line.

The conference planning committee will make a determination regarding the rescheduling of the conference to a future date. Any information regarding the rescheduling of the conference will be posted on this website at www.svhfs.org. (K4CSO)

RADIO LAW: NAB STUDY SAYS NO SPECTRUM CRUNCH EXISTS

The National Association of Broadcasters has released a study arguing that there is no spectrum crisis. According to NAB, the research shows that insufficient analysis and reliance on faulty information in the formation of the FCC's National Broadband Plan has led to the overstated assumption of a nationwide spectrum shortage for future broadband expansion. NAB says that this is not the case,

The White House, the FCC and numerous in the wireless industry have cited a spectrum crisis as a justification for policies that would reallocate TV airwaves for mobile broadband use. But broadcasters have said that there is no way that they will willingly relinquish even a single hertz of spectrum to broadband. .

The report authored by a former FCC aide was released the week of April 26th. It come on the heels of the NAB's recent statement reported here last week that the broadcast lobby group is in full battle mode to stop the reframing of broadcast spectrum to broadband providers. (RW)

**

INTRUDER WATCH: RUSSIAN VOCODER RETURNS TO 15 METERS

The Russian vocoder system known as Yakhta has appeared again on the 15 meter band. Its been heard and logged by an IARU Region 1 monitoring station on 21 dot 001 dot 5 kHz. Its running F1B in band key-synchronized at 100 baud s and 150 Hz shift. The F1B has been active daily and at times encrypted voice transmissions have also been heard.

The German Department of Post and Telecommunications has filed another complaint about the system. The first was made back in 2010 when it was active from the same location and on the same frequency. (IARUMS - Region 1)

**

RADIO LAW: ANCHORAGE VEC FILES PETITION FOR LIFETIME EXAM CREDIT

The Anchorage Volunteer Examiner Coordinator has asked the FCC to grant permanent credit to radio amateurs for examination elements they have successfully passed anytime in the past. This would, in effect, create a license exam credit that would be valid throughout an amateurs'

lifetime, never expiring. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

Currently, Amateur Radio licenses are good for 10 years. Hams may renew their license not more than 90 days before it is set to expire. If a ham fails to renew their license before it expires, but less than two years after it expires they can reapply for their license and call sign without having to retake any examination for the license. Under the current rules, hams may not apply to renew the license after the two year grace period. Instead, they must start all over and take new examinations to receive an Amateur Radio license.

In its Petition, the Anchorage VEC asks the rhetorical question if the passage of time somehow invalidates a person's knowledge? It then states that it believes this to not be the case.

The Anchorage petition then states the groups belief that any applicants who can demonstrate that they have passed certain elements at some previous date or who have held a license grant for a particular class of license on or before various applicable dates, should not have to be re-examined on those elements before a new license can be granted. The Anchorage VEC also believes that if a person can show proof of having held a license grant for a specific class of license, they have in fact demonstrated that they have earned credit for having passed the elements required for that class of license.

According to an ARRL spokesperson, the petition filed by the Anchorage VEC does not address the cases of radio amateurs who had their licenses suspended or revoked. It says that if this Petition is looked upon favorably by the FCC, a provision should be made that no examination credit should be given if the operator license was ever suspended or revoked, or if the operator license was surrendered to avoid enforcement proceedings.

For the Amateur radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--

The Anchorage's plan calls for all 14 VEC's to handle these applications. At airtime no rule making number has been assigned to this rule making request. (Anchorage VEC, ARRL)

**

RADIO RULES: COST OF VANITY CALL MAY RISE

The FCC wants to raise the cost of a vanity callsign by 90 cents. Currently the fee for a 10 year vanity call sits at $13.30. If the new rate is approved that will rise to $14.20 for that same 10 year period. In its press release, the FCC said it anticipates some 14,600 Amateur Radio vanity call sign or applications during the next fiscal year.

That would bring in over $207,000 in fees from the vanity call program. Any new fee would start at the beginning off the FCC's next fiscal year. (FCC)

**

DX

In DX, A multi-national team, all members of Mediterraneo DX Club will be active as 9N0MD from Nepal during November. Activity will be on all HF bands and modes. The team plans to give away trophies and prizes. More is on-line at www.mdxc.org/nepal.

9M6XRO is once again be active stroke V85 Brunei through May 9th. Hisa operation is mainly CW with the possibility of some RTTY or SSB. QSL via M0URX, direct, by the bureau, or via Logbook of the World.

K0YAK is now in Kathmandu and is expected to be operational as 9N7AK until early July. He is using a Kenwood TS-50 with a Cushcraft MA5V lightweight, 5-band vertical antenna. QSL via K0YAK.

Lastly, the Intrepid-DX Group will conduct a DXpedition from Afghanistan for ten days in May. Due to security concerns, the exact dates and location of the DXpedition will not be announced until the eve of their activation. For update on this operation, it is suggested to watch their Web page at www.intrepid-dx.com/t6pse

(Above from various DX news sources)

**

THAT FINAL ITEM: PUBLIC THANKS WO4W AND ABC 34/40 FOR LIFE SAVING SEVERE WEATHER COVERAGE

And finally this week, yet another albeit indirect ham radio connection to the tornadoes and severe weather that hit the South-East last week. This as Alabama's ABC 33/40 television group consisting of stations WCFT, WJSU, and WBMA used a handful of web-based tools, some ham radio volunteers and a very knowledgeable forecaster to provide the local community with ongoing coverage of the devastating storm system that tore through the state on Wednesday. Amateur Radio Newsline's Michael Grebert, KJ6ZZV, has the details:

--

At the point position of this outstanding storm coverage was Meteorologist James Spann, WO4W. He used Facebook and Twitter to update and interact with its audience as well as those outside the local viewing area. The station group also used Ustream to live stream the local weather radar online and the ABC 33/40 weather blog to share photos and videos, many of which were captured by viewers. Also contributing were a group of local ham radio operators, many of whom are also known ABC 33/40 Skywatchers.

Over the course of the coverage WO4W appeared regularly on the air for almost 18 straight hours giving live weather updates. When he was off camera, he was reportedly assembling the latest weather information along with photos that the station was receiving from viewers online.

As the severe weather system charged across Alabama and the death toll began to climb, ABC 33/40 s Facebook page became not only a place for the station to disseminate information. It was also a meeting ground for members of the community to interact with Spann and each other about power outages and storm damage while also taking time to honor the deceased.

What James Spann, WO4W and his crew at both the station and the volunteer hams in the field was likely best summed up by this viewers posting on Facebook:

"I'd like to thank James Spann and all of the meteorologists and crew at ABC 33/40 for keeping not only the people of northern Alabama informed, but the whole world informed. I know dozens of people from around the country, including myself, who were watching the UStream feed faithfully all day. Your professionalism and dedication saved countless lives today."

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, in Music City, Nashville, Tennessee.

--

In addition to his being the Chief Meteorologist for ABC 33/40, James Spann, is one of the founders of Weatherbrains.com. This is a weekly Internet based radio that unites weather geeks worldwide. He also owns the WO4W repeater atop Shades Mountain that serves the greater Birmingham area.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of

Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, Im Bill Pasternak, WA6ITF, at the editors desk saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 8th May 2011

The news headlines:

* Russia signs up to CEPT licensing

* Talk in for the RSGB AGM

* Intruder Watch lecture at Friedrichshafen

Russia has become the latest nation to sign onto the pan-European CEPT licensing agreement. According to the IARU Region 1 website, the Russian State Radio Frequencies Commission decided in March that the Russian Federation would join both the CEPT and ECC Recommendation. This makes it possible for every CEPT licence holder to operate on the territory of the Russian Federation. There are a few caveats. Among them is that Russia will only permit such CEPT operation by a foreign station for a limit of three months, without any additional permission needed. Also, the callsign to be used in CEPT operations will be RA followed by the foreign amateur's personal call letters.

Arrangements have been made for a talk-in station for those attending the RSGB's AGM in Derby on 14 May. It will be available on 145.550MHz from about 8am through to 12 noon and the callsign will be G2DJ, Golf 2 Delta Juliet. Tickets for the amateur radio dinner on Saturday evening are still available from the RSGB online shop.

At the Ham Radio exhibition in Friedrichshafen, Germany there will be lectures about the activities of IARU Region 1 and DARC Monitoring System Intruder Watch. It will take place on Saturday, 25 June at 10am in Room Schweiz, Hall A2.

Summits on the Air recently passed a significant milestone with its millionth QSO being made over the recent holiday period. SOTA started in 2002 and has now grown into a worldwide award scheme with 55 associations across the world and around 44,000 qualifying summits. For more information on the scheme, check out the internet at www.sota.org.uk.

Sad news broke late last week. James McLaughlin, WA2EWE/T6AF was one of several Americans killed in Kabul, Afghanistan on Wednesday, April 27. News sources say that eight American troops and a US contractor died Wednesday after an Afghan military pilot opened fire during a meeting in an operations room of the Afghan Air Corps at the Kabul airport. Our

thoughts are with his family and friends.

And now for the details of rallies and events for the coming week

On Sunday 8 May, the Magnum Radio Rally will take place at the Magnum Leisure Centre, Harbourside, Irvine, Ayrshire KA12 8PP. There will be trade stands, a Bring & Buy and special interest groups. Doors open at 10.30am and admission is £4. Details from Helen, MM0HLN, on 0787 332 7597.

Sunday 15 May sees the National Vintage Communications Fair taking place at the Warwickshire Exhibition Centre, The Fosse, Fosse Way, Leamington Spa CV31 1XN. Doors open at 10am and there is free car parking on site. Entry is £6 and there will be plenty of trade stands and special interest groups as well as catering services. Details by e-mail from info@nvcf.org.uk.

Advanced notice now of the 1st Leicester RS Grand Clearance and Bring & Buy that will be held on 22 May at the Leicester Radio Society HQ, Groby Road, Leicester. There is approximately £2000 of donated radio equipment for disposal as well as a Bring & Buy. Doors open 10am to 4pm. Details of equipment available and further details from Alex on 0753 120 1640.

Now for the news of special events

Today, 8 May, the Whitton Amateur Radio Group will be presenting amateur radio to the public using GB2IKE in Bushy Park as part of an open day called Chestnut Sunday at Bushy Park, located in-between Teddington and Hampton Court Palace in Middlesex. Whitton Amateur Radio Group has the Royal Parks to thank for allowing the station to be situated in the park and it is likely that these will be the first radio transmissions from this location since the base was operational in WW2.

On 14 May a group of Merseyside and North Lancashire based amateurs will activate Lindisfarne Island, which is IOTA reference EU120. A special QSL card will be available. The team of G0LZX, G0WRE and M0TNX plan to be active on the 40, 20 and 17m bands, with the possibility of 15m. Mainly using SSB, data and CW contacts will be available if required. The call for this event will be GB0HI. Charles, M0OXO, has kindly offered to be QSL manager and the QSL cards are being undertaken by Gennady at UX5UO print.

The Shannon Basin Radio Club will be taking part in the Mills on the air weekend on 14 and 15 May. They will be operating from Elphin Windmill in Co. Roscommon and using the call EI2EWM.

On Sunday 16 May, radio operators of the Radio Club of Binche with the help of the Milton Keynes Amateur Radio Society will be on the air from Bletchley Park. The callsign will be M/ON4WAR. Contacts will be made in telegraphy only on 3.566 to 3.583, 7.006 to 7.012 and 7.016 to 7.025MHz. The transceivers used for this event will be essentially

replicas of the Whaddon MK VII or Paraset constructed by the radio club. QSLs either direct or via ON7RY.

May 2011 will be the month for chasing castles and stately homes on air. The weekend of the 21st and 22nd will be the international castles weekend from 1am on the 21st to 11pm on the 22nd. For UK stations, information can be found at www.cashota.co.uk as well as links to regional activity. The website now allows interested amateurs to complete activation forms online.

The Royal Naval Amateur Radio Society will run a Special Event station at the open day in HMS Collingwood on Saturday 4 June. The callsign to be used is GB6COD, Collingwood Open Day. The station will be operational on all amateur bands from 1.8MHz to 440MHz. The Society headquarters station will be open for viewing from 9.30am to 6pm on the day. A number of demonstrations will be taking place using amateur radio and amateur television. The open day will feature the Royal Navy Field Gun Competition. Additional attractions will include a display from the Royal Marines Band, Collingwood, a free fun fair and much more. Advanced tickets will be available from Gosport and Fareham Tourist Information Offices and Portsmouth News Offices from May 2011. And now the HF DX news compiled from 425 DX News and other sources

Marcello, IK8DNJ is off to the Dominican Republic and will use the callsign HI7/IK8DNJ until 13 May. He will operate SSB and digital modes on the 10 to 40m bands. QSL via IZ8LKL.

Several Japanese operators will be on the air from the island of Ogasawara for varying dates up to 13 May. Calls to look out for are JD1BMT, JD1BLY and JD1BMH. As well as being quite a rare DXCC entity, Ogasawara also counts for IOTA AS-031.

Gerard, F2JD will be active as HR5/F2JD until the middle of May. His QSL manager is F6AJA.

Fred, PA1FJ, will be on the air as SV5/PA1FJ/P from Karpathos Island, which is IOTA reference EU-001, from 8 to 14 May. Fred works in SSB and CW on the 6 to 40m bands with QRP equipment. QSL via his homecall callsign either via the bureau or direct.

9A8AMS, 9A/IK4RQJ, 9A/IZ4BBF and 9A/IK3AES will activate Sveti Nikola Island, which is IOTA reference EU-110 until 15 May. Although generally using CW, SSB and digital modes on the 10 to 40m , 9A8AMS will concentrate on 160m, 80m and 6m. QSL via their home callsigns either via the bureau or direct. Details for 9A8AMS can be found on QRZ.com.

Now the contest news

On 10 May the 432MHZ UK Activity Contest takes place from 1900 to 2130UTC. Using all modes on the band, the exchange is signal report, serial number and locator.

The data leg of the 80m Club Championship takes place on 11 May from 1900 to 2030UTC. The exchange is the usual signal report and serial number.

On Sunday 15th, the 70MHz CW Contest could be interesting. This event was reinstated last year after a gap of four years, during which there was an explosion of activity on the band. Its timing puts it well within the Sporadic-E season, so it might be blessed with good conditions. Taking place between 0900 and 1200UTC, the exchange is signal report, serial number, locator and postcode.

The Worked All Britain LF Phone contest takes place next Sunday, 15 May, from 1000 to 1400UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website at www.worked-all-britain.co.uk or from the Contest Manager, G3XKT by email to aebbooks@ntlworld.com.

The Volta DX RTTY Contest takes place for 24 hours over the weekend of 14-15th, from 1200 to 1200UTC. In this one you can make a single-band entry. Work everyone on all bands from 3.5 to 28MHz and the multipliers are DXCC countries. Incidentally, this event doesn't have a low power section. The exchange is signal report, serial number and CQ Zone, which is 14 for the UK. And now the solar factual data for the period from the 25th of April to the 1st of May, compiled by Neil Clarke, G0CAS on the 2nd of May

First the latest monthly smoothed sunspot numbers, which continue to show a steady rise from sunspot minimum. The figures are for July, August and September are 16.7, 17.4 and 19.6 respectively.

The solar disc had up to five sunspot groups visible on some days. At least two of these groups produced C class solar flares, 14 in total. However, none took place on the 25th and the 26th when solar activity was very low. Solar flux levels gradually declined from 112 units on the 25th to 106 by the 1st. The average was 109 units. The 90 day solar flux average on the 1st was 108, that's two units up on last week. X-ray flux levels varied little day to day and averaged B2.9 units. Geomagnetic activity started at quiet levels but from the 29th a coronal hole disturbance arrived, a day earlier than forecast. The most disturbed day was the 30th with an Ap index of 24 units. The disturbance rumbled on into the next day with an Ap of 19 units. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 310 kilometres per second to 750 by the 30th. Particle densities were low every day except for a very brief increase to 15 particles per cubic centimetre on the 29th. Bz on the quiet days varied between minus and plus 3 nanoTeslas on the quiet days to minus 15 and plus 11 nanoTeslas on the 30th.

Small sporadic-E openings took place occasionally but on the 1st a larger opening occurred and included 50MHz.

And now the solar forecast. An active region is expected to be in view this week according to the latest STEREO images. Therefore, solar

activity is expected to be mostly at low levels but could increase on some days. Solar flux levels should be around the 120's for most of the week. Geomagnetic activity is expected to be disturbed today and tomorrow due to a recurring coronal hole. Levels should then decline to quiet levels, however, a weak coronal hole disturbance could take place again next weekend. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and some 3MHz lower for the north. Darkness hour lows should be about 11MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent chance of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 0800 and 1100 hours. The long path should be open with similar values around sunset time in the UK. Sporadic-E should take place with openings on 50MHz some days.

And that's all for this week from the propagation team.

Next, the Local News:

NEWS FOR THE SOUTH EAST and EAST ANGLIA The GB2RS news readers that broadcast for the South East at 9.00am on 3640kHz LSB urgently need a backup news reader to assist. This reading also serves the South West, and a suitable volunteer might be located in the Home Counties or indeed the South West, say along the M4 corridor. If several volunteers come forward, then a separate reading for the South West might also be considered. Any new arrangements will need to be co-ordinated with the RSGB HQ reading which is due to commence in the summer from Bletchley Park. If you are interested and you are an RSGB member, please contact the GB2RS News Manager Gordon Adams, G3LEQ, on 01565 652652 for more information.

On Sunday 8 May Felixtowe & District Amateur Radio Society is operating GB2WTM from Woodbridge Tide Mill for National Mills Day. More information from Paul, G4YQC, by email to pjw@btinternet.com.

URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

455. SARL NEWS - SUNDAY 08 MAY 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-07 19:00:21 UTC
From: website@sarl.org.za
Message-ID: <20110507190006.E92B433C5C@panix2.panix.com>
Source record: 4495
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 08 MAY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

MAY 2011 RAE EXAMINATION NUMBERS ON THE WEB TODAY

SA AMSAT SPACE SYMPOSIUM GOES FULL STEAM AHEAD

US STUDY SAYS NO SPECTRUM CRUNCH EXISTS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

MAY 2011 RAE EXAMINATION NUMBERS ON THE WEB TODAY

The May 2011 RA Examination numbers will be available on the SARL web page from 12:00 today (Sunday 08 May 2011). Please could all candidates check their examination venues and should there be any errors or queries, these need to be directed to Mariska at the SARL office on Monday morning. A letter will be emailed to all candidates confirming their entrance into the examination.

SA AMSAT SPACE SYMPOSIUM GOES FULL STEAM AHEAD

SA AMSAT said that its Space Symposium 2011 will go full steam ahead on Saturday 21 May. Following an agreement with Sentech the auditorium at Radiokop will be the venue with the SARL National Amateur Radio centre being used for refreshment breaks and lunch.

The new arrangement has substantially reduced the registration fee to R75 for SARL and SA AMSAT members if booked before 15 May 2011. Student and scholars will enter free if a student card or scholar ID is submitted at the time of Registration.

The conference will be opened by the CEO of the South African National Space Agency, Sandile Malinga. John Willescroft, ZS6EF, will demonstrate the development of a totally new concept which allows a solar panel to the released from SAiSAT once in Space. For full details, registration forms and programme, visit www.amsatsa.org.za

US STUDY SAYS NO SPECTRUM CRUNCH EXISTS

The National Association of Broadcasters in the United States has released a study arguing that there is no spectrum crisis. According to NAB, the research shows that insufficient analysis and reliance on faulty information in the formation of the FCC's National Broadband Plan has led to the overstated assumption of a nationwide spectrum shortage for future broadband expansion. NAB says that this is not the case.

The White House, the FCC and numerous in the wireless industry have cited a spectrum crisis as a justification for policies that would reallocate TV airwaves for mobile broadband use. But broadcasters have said that there is no way that they will willingly relinquish even a single hertz of spectrum to broadband.

The report authored by a former FCC aide was released the week of April 26th. It came on the heels of the NAB's recent statement that the broadcast lobby group is in full battle mode to stop the reframing of broadcast spectrum to broadband providers.

In South Africa a similar situation will loom as TV will turn digital and some of the current frequencies will become available for other services. At a recent workshop arranged by ICASA. ICASA said that they have other plans than simply handing it over to broadband suppliers.

ANOTHER SARL

Another organisation is using the abbreviation SARL; they are the SA Racing League. Their website is www.sarl.co.za. Ours, the South African Radio League, website remains www.sarl.org.za.

Now two items obtained from this week's WIANews:

INFORMATION SUPER HIGHWAY

A story worth a read is in last Tuesday, 3 May's Yorkshire Post.

"Instead of floating in space, much of the information super highway is actually under water.

You might be surprised to know that this global communications system surfaces in the UK near a small village on the Yorkshire coast.

If you think the internet is largely dependent on satellites circling thousands of miles above the earth, think again.

The global communications system relies on old submarine cable routes that date from the 1800s.

Two hundred and fifty submarine cable systems provide the backbone for most of today's communications systems.

Another 19 are due to come online this year.

Less than five per cent of our hi-tech communications network is done via satellite, with fibre accounting for most of the rest.

The 19th century version of the information super highway would have struggled to keep up. The first transatlantic cable transmission in 1858 was a 98-word message from Queen Victoria of the UK to President Buchanan of the US which took 16 hours to transmit.

Fifteen years later, the first commercial transatlantic cable message was sent. It cost the princely sum of £20 for 20 words, which is roughly the equivalent of £900 today.

By 1870, information could be transmitted at around 10 words per minute.

Fans of Tolstoy should note that it would have taken 37 days to send over one copy of War & Peace.

Today, of-course information moves at lightning pace. Messages can be sent with the click of a mouse.

It is estimated that there are between 100 and 150 cable faults around the world each year.

Nearly half of these faults are due to fishing, although earthquakes can also cause damage and disruption.

Some things haven't changed in the last 150 years.

The method of recovering faulty cables has remained the same.

They are retrieved using a grappling hook on the end of up to five miles of rope. The rope is more expensive than the cables it helps to recover.

So the next time you log on, pray that a shark with a power complex isn't nibbling away at a cable in the deep.

SHOWER POWER SOAP OPERAS

The world's first shower powered radio comes from UK based Tango Group the same group that commercialised the award-winning Wind-Up Radio.

This radio is powered entirely by your shower water.

The H20 brand, has a patented a micro turbine concept through the motion of water flowing through a little turbine.

The convenient and energy-efficient shower powered radio, means users can listen to their favourite radio stations while in the shower.

The radio, and is even more convenient since it is recharged as the shower runs, dispelling the need for disposable batteries.

The radio even allows users to carry on listening after the shower is turned off; using any excess energy stored in an integral Ni-Mh rechargeable cell.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. There is currently no chance for strong solar flares. Sunspots 1 203 and 1 204 are the main features on the visible solar disk. New sunspot 1 207 remains a simple sunspot group. For the people doing their own frequency predictions the expected effective sunspot number for the week is about 45.

15 m will provide the best opportunities for DX followed by 20 m.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

21 May - SA AMSAT space simposium at NARC at Radiokop. 18 to 22 May - Follow Dayton Hamvention via W5KUB.com. 25 May - Closing date for nominations for NSN awards, visit www.amateurradio.org.za. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.

Debby says...
It appears not all the annual audited financial details have been printed in the last issue of Break In. I have attached the full set of accounts inclusive of notes from the Treasurer, with this issue of HQ Info-line. These will also be available from the NZART web page.

The accounts are not included with this infoline but are available on the NZART Web at:
http://www.nzart.org.nz/assets/pdf/2011/Annual-Audited-Accounts-2010.pdf
Editor

With Conference now only four weeks away, it's timely to remind you all of your chance to vote on remits, if your branch has not already done so. There are 13 remits this year, so I urge you to attend your branch meeting where they will be discussed and voted on.

If you are unable to attend Conference and wish to place a personal apology, please let me know within the next couple of weeks. For those branches who will not have a delegate in attendance, please send me your branch voting figures and whether you require to me to arrange a proxy to put your votes

to the meeting.

Talk soon...Debby ZL2DL

FMTAG Notes For 8-May-2011 HQ Infoline-229
Please click HERE to go to the FMTAG Applications Being Processed

FMTAG at VHF Convention 2011

FMTAG was invited to attend the Forum session (Sunday 24th April) of VHF Convention at Easter 2011. Many interesting topics were discussed, under the Chairmanship of John, ZL2HD.

However, the only matter directly involving FMTAG was a request for inclusion in the VHF/UHF/SHF Bandplans of a Simplex channel for the P25 Digital mode, which was the subject of a detailed presentation by John, ZL4JY, on the previous day.

During the Forum discussion various frequencies were suggested, but subsequent investigation since VHF Convention, in accordance with PIB38, has shown that none of the suggested frequencies are suitable for universal, nation-wide, use.

At its July 2008 meeting, NZART Council approved the following addition to the bandplan:

F+0.550 Narrow digital mode simplex of up to 16 kHz bandwidth

In other words: 144.550 MHz, 432.550 MHz, 925.550 MHz, 1296.550 MHz, and so on.

This is included in the bandplan shown on page 7-16 of the current Call Book.

These frequencies are suitable for universal, nation-wide, use by D-STAR, P25 and other similar narrow band digital modes.

Proposals
1.. That D-STAR, P25 and other similar narrow band digital modes be added, as an explanatory footnote, to the existing item of the Bandplan on page 7-16 of the current Call Book: F+0.550 Narrow digital mode simplex of up to 16 kHz bandwidth (including D-STAR, P25 and other similar narrow band digital modes)
2.. Branch 63 Upper Hutt has applied to add the D-STAR DV digital mode to, and change the location of, its Mount Climie 860 repeater. The new location will be Topo50 map reference BP32 798.83 423.94. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 438.600 MHz and the receive frequency can remain on 433.600 MHz, and that there will be no interference to other stations.
3.. Branch 74 Wellington VHF has applied to increase the power of, and add the P25 digital mode to its 6625 repeater located at Hawkins Hill, Topo50

map reference BQ31 449.78 236.89. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 146.625 MHz and the receive frequency can remain on 146.025 MHz, and that there will be no interference to other stations.
4.. Branch 74 Wellington VHF has applied for a 32 cm repeater located at Colonial Knob, Topo50 map reference BP31 513.58 426.16. FMTAG has chosen a repeater transmit frequency of 927.800 MHz and a receive frequency of 921.200 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
5.. Branch 74 Wellington VHF has applied for a 6 m repeater located at Colonial Knob, Topo50 map reference BP31 513.58 426.16. FMTAG has chosen a repeater transmit frequency of 53.750 MHz and a receive frequency of 52.750 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
6.. Branch 85 Mercury Bay has applied for a National System repeater located at Opito Bay, Topo50 map reference BA35 513.81 313.73. FMTAG has chosen a repeater transmit frequency of 434.800 MHz and a receive frequency of 439.800 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
7.. Branch 85 Mercury Bay has applied for a National System UHF Linking Station (ULS) located at Opito Bay, Topo50 map reference BA35 513.81 313.73, to link to Mt Edgecumbe. The link transmit frequency will be 434.975 MHz and the receive frequency will be 439.975 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Final Recommendations to NZART Council
Published on the NZART website, and in NZART HQ Infoline for the information of, and inviting comments from, NZART members.

At its May 2011 meeting, NZART Council approved the following Final Recommendations.

1.. Branch 60 Taupo has applied for a 2 metre APRS Digipeater at Kururau Road, Topo50 map reference BH33 913938. The transmit and receive frequency will be 144.575 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
2.. Branch 74 Wellington VHF has applied to increase the power of, and add the P25 digital mode to, its Colonial Knob 7075 Voice and Data 2-metre repeater, located at Topo50 map reference BP31 513.49 426.17. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 147.075 MHz and the receive frequency can remain on 147.675 MHz, and that there will be no interference to other stations.
3.. Branch 81 Waikato VHF has applied for a 2 metre Voice Repeater at Maungakawa, Topo50 map reference BC34 119.91 565.00. The transmit frequency will be 145.575 MHz and the receive frequency will be 144.975 MHz. An

Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
4.. Branch 81 Waikato VHF has applied for a 70 cm Link at Maungakawa, Topo50 map reference BC34 119.91 565.00. The transmit and receive frequency will be 434.350 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
5.. Branch 81 Waikato VHF has applied for a 70 cm Link at Te Uku, Topo50 map reference BD32 732.64 067.29. The transmit and receive frequency will be 434.350 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Comments and Applications
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

****

Neville Copeland ZL2AKV SK 22-April-2011
Extract from NZART Official Broadcast 24-April-2011

It is with regret that I lead tonight's broadcast with the sad news that former NZART General Secretary and Honorary Life Member Neville Copeland ZL2AKV became a silent key last Friday night.

Neville's health had been slowly failing in recent years and at the time of his passing he was a resident of a Rest Home in Stokes Valley near Wellington.

Neville was our Association General Secretary based in Astral Towers Upper Hutt from June 1982 through until June in 1998. He was our General Secretary for a record 16 year term. Neville was made an Honorary life member of our Association at Conference in 1998.

Neville was born in 1925 and all his working life prior to becoming our General Secretary had been spent with the New Zealand Post Office which he joined as a message boy.

During World War II he joined the Royal NZ Air force and graduated under the British Commonwealth Air Training Plan as a wireless operator.

After the war Neville rejoined the Post Office serving in a variety of positions including a time seconded to the DSIR as Postmaster at Scott Base

Antarctica. During this period he held the call ZL5AL and provided a dx bonanza for New Zealand and overseas amateurs.

In 1975 he joined the Post Office's Radio Division from which he retired on the 24th December in 1981.

Neville was first licensed as a radio amateur in 1971 and joined NZART the same year. He attended radio classes at Upper Hutt Branch 63 and went on to play his part as the Secretary and the President of the Branch. He was made a Life member of Branch 63 in 1998.

As one who worked with Neville ZL2AKV both as chairman of the Headquarters Secretarial Committee and over my term as NZART President I will remember Neville for his dedication, his attention to detail his loyalty and friendship.

NZART extends to Neville's wife Shirley and his family our deepest sympathy.

Jim Meachen ZL2BHF

Funeral Notice
COPELAND, Reginald Neville - (ZL2AKV) - Regt No: 133372, T/Sgt, RNZAF, 1939-45.

On April 22, 2011 at Stokeswood Hospital, Stokes Valley; aged 86 years. Husband of Shirley for 59 years. Treasured father and father-in-law of Greg & Kate, Judy & Rick, Sue & Colin and adored grandfather James, Rachel, Joshua and Claudia.

Donations to the Cancer Society of NZ would be appreciated and may be left at the service or posted to 52 Riddiford Street, Newtown 6021.

Special thanks to the staff of Stokeswood Hospital for their wonderful care and support.

A service for Neville will be held in Kingswood, cnr King and Cairo Streets, Upper Hutt on Thursday April 28, 2011 at 11.00 am, followed by private cremation at Akatarawa.

All messages to the "Copeland Family", c/- PO Box 30-127, Lower Hutt 5040.

Gee & Hickton (04) 528-2331.

Jock White Memorial Field Day Report 2011
The Jock White Memorial Field Day results maybe found at:
http://www.nzart.org.nz/assets/pdf/2011/FD-2011-PDF-results.pdf

Thank you to everyone who participated in this year's field day.

We were a few field stations down this year due to the disaster in Christchurch on the Tuesday before Field Day.

Propagation on 40 was improved this year but 80 was down this year during the day.

There seems to be a definite trend toward increased activity on 40 compared to two or three years ago looking at the number of branch points available on 40.

There were few adverse comments this year with regard to operating standards and signal quality which was pleasing.

A few Brickbats
Sorry to spend a lot of space on these but this year was my hardest year for scoring Field day due to the following two points:

Poor Quality of Entries

The rules state clearly that the three summary sheets available from the NZART web site are to be used:
http://www.nzart.org.nz/activities/contest-rules/

This is not a big ask!

A number of entries did not have any form of summary at all, or improvise.

This year I will be sending back corrected paperwork to those who have not sent in correct entries to show how things should be done.

Why is this a problem? Incorrect entries make my job of scoring the contest more difficult.

Note that the majority of entries are done correctly.

Note: Next year I will return entries if they are not of a sufficient standard.

Field Stations that do not send in logs

There were about five who were guilty of this in 2011. This is a major pain in the butt. Why? All the other stations claim these stations as branch points. How am I to know if they worked the required number of stations if I have no logs?

For several stations I tediously went through submitted logs to tally up contacts made to see if they made sufficient contacts to be a branch point.

I chased two other stations via e-mail, and tracked another down via infoline, but that one was so late I had scored 90% of logs anyway. This last field station did meet the criteria but I did not count it as being a branch point, all entrants were penalised equally here.

What if you are confused / having difficulty scoring FD?
Contact me and I will gladly help. My e-mail address is at the end of the rules, or via NZART HQ.

This year I score an entry from a team that asked for help, and I will return the paperwork so they can do it themselves next year.

Confused Home stations?
Every year there seems to be a few stations that come and make a small number of contacts giving out a branch number. I seriously doubt that these are field stations. If you know any of the culprits at your local branch please tell them to give out '00 home station'.

Use of Branch Numbers
Over the last three years there has been some controversy around the use of branch numbers by a few field stations.

If you intend to use the branch number of a branch that is not in recess, make sure you clear things with that branch first.

If you intend to use the number of branch that is in recess it is a good idea to co-ordinate things through me first.

I have been able to help sort out potential clashes etc in advance, I am only too happy to do so.

The JWFD is not a place for local ham differences to be fought out.

Computer vs Hand written Logs
This subject is sometimes raised, and was again this year in a fairly rude fashion in an entry that was two weeks late (!).

This year I counted up the number of entries that were computer logged: they were outnumbered by more than two to one by hand logging.

Field day has the full spectrum from hardened experienced electronic logging operations through to a not inconsiderable number of once a year paper based teams. Electronic logging is perfectly OK, but electronic submission of logs will not work until everyone logs this way.

I suspect that if we made electronic logging compulsory for JWFD a lot of teams would not bother to enter.

Interestingly most of the top scoring teams use hand logging.

Stats
Of logs submitted there were 33 Field stations with about 180 operators.
There were the usual large teams at Manawatu and Whangarei.

Home stations were up this year, 6 from 3 last year.

Team Comments for 2011
1.. Our team cook made me gain a few pounds over the weekend.
2.. Who is the guy at ZL2QF who sends at 25 wpm and will not send slower when asked?!
3.. The February quake scattered my team far and wide this year, with me being the only one left.
4.. The weekend's activities were a welcome break from the quake, and it was good to carry on with some sort of "normality" after the recent events in Christchurch.
5.. Good propagation on 40m, with good DX Saturday night. 80m not as good during the day as last year.
6.. Much improved 40m conditions
7.. Good weather- a splendid weekend
8.. Could have done with a few more VKs
9.. A good group of operators made for a relaxing FD
10.. Standard of CW operating "chronic"
11.. Fine weather for once
12.. I think we got a new guy hooked
13.. Several new members were "blooded" and they enjoyed their participation
14.. I was absolutely amazed at how well I got around the country (QRP station)
15.. Comments made during the station "tear down" all concerned next year, so we'll be back, and on CW or bust!
16.. A good time on the radio with a noise level of zero had lots of fun!!
17.. Lightning storm between 1930 and 2030 with 800 cloud to cloud, but out in the country the flashes were most disconcerting
18.. We lost an hour or so on Saturday on 80 when our diction leader had to pack up and go to Christchurch to help with Red Cross
19.. Great fellowship and fun with club members and competitors
20.. Branch 22 had the pleasure of a Canterbury quake refugee joining their tem
Valid Branch Points (Multipliers)
There were a total of 88 available for field stations, 92 for home stations:

(Four less for field stations, as they cannot claim their own branch number)

80 Phone:(Max 35): 01 02 03 04 08 10 11 12 13 18 19 20 21 22 25 27 28 30 33 37 40 42 46 47 50 58 63 64 65 69 81 83 86 87 88

80 CW (Max 17) 01 02 03 11 12 19 20 22 25 27 28 30 40 46 65 87 88

40 Phone (Max 27) 01 02 08 10 11 12 18 20 21 22 23 25 27 28 30 33 37 46 50 58 63 64 81 83 86 87 88

40 CW (Max 13) 01 02 12 20 22 25 27 28 30 40 46 87 88

Top Scoring Home Station
Jakey, ZL2JKY took the honors here with a very respectable score.

Home submitted logs were double last year's entry.

Check Logs
Received with thanks from: ZL2RFL, ZL3BN and ZL2GV

See you all next year on the 25th and 26th February

Ukrainian Radio Amateurs Lose Many Frequencies and Bands UPDATE
Found out more info, an example why our webmaster should be careful not to promulgate snippets of news that is (maybe) not factual correct and complete, and has no authority or words mentioned from the other society.

*Important *update by Euvgen UW5ZM:
These rules only apply for new hams. We all have authorization papers in our hands where itï¿½s written what our band plan is, and the date when this authorization paper ends (red marker).

For example this is the authorization papers of UY0ZG

http://noolru.org.ua/images/raznoe/uy0zgdozvil.jpg

It means that many Ukrainian hams do have permission to work on 10100-10150kHz, 14250-14350kHz for 2013-2015.

Management of UARL has promised us that the mistake about our new band plan is only a mistake and all will be ok shortly.

Regards,
Steve, ZL1TPH

A New Way For Amateur Radio
Then we should take the same expertise developed in the analogue world and branch into the digital age, is my suggestion.

The key to kids, students these days is the development of Digital Signal Processing followed by computing ability - all radio engineers these days are expected to understand such concepts.

Take for example:http://www.fpga4fun.com/ They have tutorials, development boards available. (FPG = field programmable gate [array])

There are other sites on DSP, however the important thing is the other concepts one has to fully understand to go with it: propagation techniques, transmission line theory and practice.

http://www.dspworks.in/products.html#

http://www.sgcworld.com/dspintrotechnote.html

http://logix4u.net/DSP/Tutorials/DSP_tutorial.html

I have recently attempting to put together a series on Direction Finding and as a result, I have had to grasp once again the history behind radio, the concepts, propagation, antenna's, and getting a grasp on DSP and how important Direction Finding is even to the modern world of electronics. Except they now talk about Angle of Arrival or Time of Arrival rather than purely direction of the signal. Plus how it relates to the modern intruders and interference sources all interrelated.

There are development boards, kits and plenty of ARDF type kits for VHF and 80 metre systems.

Or perhaps we can be cheeky and just ask some of the bigger companies, I am sure they would be impressed that we asked and therefore produce a breeding ground for new RF engineers for the future?

The same concepts are required from the analogue world, there is so much more we can achieve in Amateur Radio, we only have to reach out and grasp it.

Think about it, the ability to be a 1kHz away from another transmission using digital filters, whereas often you can hear another QSO 3 kHz down the band.

One does not have to give up the analogue world, but have a better understanding of it and how it relates to modern day systems.

My thought for the day.

73

de ZL1GWE

John

A Reply to ZL1GWE E-mail
I like your concept John.

It sounds attractive and workable to me.

I wonder how it can be developed further.

Maybe an introduction to ac, dc, waves and electronic components would be necessary.

The course could then be completed with filters, antennas, feed-lines and amateur radio practices.

I would like to put it in Infoline and on the web to see if it attracts comments and interest.

Regards

Jamie ZL2NN

UH Conference Late Fee of $25 Applies From 10-MAY-2011
Hi All,
Just a reminder that the late payment penalty, of $25.00 starts from 10 May 2011, to all options for conference.

So if you are intending to use any of the payment options remember to get your payments in before 10 May 2011.

The late payment date will be strictly enforced and no excepts will be considered.

Mark ZL2UFI

Russia Signs up to CEPT Licensing
Russia has become the latest nation to sign onto the pan-European CEPT licensing agreement. According to the IARU Region 1 website, the Russian State Radio Frequencies Commission decided in March that the Russian Federation would join both the CEPT and ECC Recommendation. This makes it possible for every CEPT licence holder to operate on the territory of the Russian Federation. There are a few caveats. Among them is that Russia will only permit such CEPT operation by a foreign station for a limit of three months, without any additional permission needed. Also, the callsign to be used in CEPT operations will be RA followed by the foreign amateur's personal call letters.

US Ham Among Americans Killed in Kabul Attack
Breaking news from the CQ Newsroom

cq-amateur-radio.com

U.S. amateur James McLaughlin, WA2EWE/T6AF, was among the nine Americans killed in a shooting at Kabul airport Wednesday. Details are posted in the CQ Newsroom at: http://cqnewsroom.blogspot.com.

****

New on The Web For MAY
Google maps have arrived for beacons and repeaters.

The map on the NZART Site (1), with all stations on it, will be replaced shortly with individual maps showing beacons, UHF stations including TV and 23 cm stations, VHF stations including 6 m stations, digipeaters and data stations, and the National System. These maps have basic information about each station.

The Web site in (2) has detailed information on each beacon and repeater. The next Infoline will have more details on the maps and proposed improvements.

I would like to ask for comments on the Google Maps compared to the maps on the NZART Web and in the Call Book. Do the Google Maps replace these maps? At least the Google map will allow me to check the location of each station and do corrections. I have found some errors already.

One log was received and is therefore declared the winner!

Congratulation to Murray, ZL1HI, on Great Barrier island, for his fine solar-powered entry.

The band conditions were poor, with the ZL2 or ZL3 beacons not being detectable. The best DX on 6 metres was 80 km to ZL1AVZ, and 351 km to ZL2IP on 2 metres and 70 centimetres.

The full results can be found at: http://www.vhf.org.nz

Next Contest
The next contest is the Hibernation Contest, 50 MHz and up, on Saturday the 11th and Sunday the 12th of June 2011, the weekend after NZART Conference.

The contest after that is the Brass Monkey Contest, 50 MHz and up, on Saturday the 6th and Sunday the 7th of August 2011.

The operating times for both contests are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz with Contest Log in the subject line.

Housekeeping
1.. Break-In-Closing Date Reminder: Copy for the MAY/JUNE issue of Break-In-closes on 10-MAY-2011
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 03-MAY-2011 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use Call Book address. All other material can go to e-mail: zl3qr@nzart.org.nz or zl3ov@nzart.org.nz
5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on SUNDAY 29-MAY-2011

Next HQ-Infoline e-mailed on SUNDAY 22-MAY-2011

Headquarters-Infoline is a twice-monthly bulletin of news from NZART Headquarters. News and items of a general or technical interest are also included. These are obtained from various sources. The bulletins are e-mailed directly to Branches, the amateur radio packet Bulletin Board Service and to others that subscribe through the NZART Website at: http://www.nzart.org.nz/join/e-mail-lists/join-infoline-list/

Regards, Jamie Pye ZL2NN, Editor zl2nn@nzart.org.nz

Up-Coming IRTS Contests

1. CW Field Day Sat 4th/ Sun 5th June 2011. Log to be submitted by July 5th.

Calling all active VHF and Higher operators we are trying to get the 2010 Squares table finalized on IRTS.ie. So can anyone that was active on the VHF bands last year please send your Square totals or your log and I can work it out for you to EI2GLB /at/ hotmail / dot/.com. To see the squares table go to www.irts.ie and click on vhf/uhf/shf on the right side of the home page.

ComReg Spectrum Strategy

ComReg recently published a consultation paper entitled 'Review of the period 2008-2010 and Proposed Strategy for Managing the Radio Spectrum: 2011-2013'. The document is ComReg Document 11/28 and is available on the Publications section of the ComReg website at www.comreg.ie . The Society will be submitting a response to the document which must be with ComReg before 24 May. Anyone who wishes to have observations included in the Society's response should forward them as soon as possible to Sean EI7CD at ei7cd / at /gofree/dotindigo/dot/ie . While anyone may respond to ComReg public consultations it has been indicated to us by ComReg that a single response relating to the amateur service would be preferable.

Theory Examination

The next theory examination for the Harmonised Amateur Radio Examinbation Certificate (HAREC) will be held on Thursday, 7 July next at 2.00 p.m. in the ComReg offices in Dublin. The examination may also be held on that day at other centres if warranted by the number of candidates.

Full details, including entry procedure and examination fee, are available at www.irts.ie/exam

Introduction to Amateur Radio the practical way

The Mayo Radio Experimenters Network plan on holding a series of practical, hands on, open days throughout the summer months, commencing Sunday May 8th. The events will start at 13.00 approx (weather permitting) and will take place on the following dates: Sunday May 8th Sunday June 12th Sunday July 10th Sunday August 14th Sunday September 11th Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence.

The locations will be chosen in the Mid Mayo area in order to encourage attendance from all parts of the County or further afield. If you would like further details including full details of locations please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/ eircom/ dot/net) , email David Hatfield EI3ECB on ei3ecb/ at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

CASHOTA Ireland and UK Activity Weekend

There will be a weekend of activity for CASHOTA Uk and CASHOTA Ireland from 1 am Saturday the 28th of May until 11:59 pm Sunday the 29th of May. The event is open to anyone who wishes to activate a Castle or Stately Home. If you wish to activate a Castle or Stately Home please check out the CASHOTA Ireland site http://cashota-ireland.org/ for more details and how to get a number for your Castle. Please contact Steve EI5DD as soon as possible with details and a small paragraph of information about the castle concerned anlong with WAI square and county and this will be promoted on the CASHOTA website. This promises to be a good weekend for portable activity and if you have never tried it before here is a good opportunity. Maybe you could get your Radio Club interested in participation.

Shannon Basin Radio Club

The Shannon Basin Radio Club will be taking part in the Mills on the air weekend on the 14th and 15th May. They will be operating from Elphin Windmill in Co. Roscommon and using the call EI2EWM. Averyone is welcome to turn up over both days and enjoy the tour of the beautiful restored windmill aswell as operating a special event station.

2011 - Year of the outer space in Kazakhstan

UN - Special Event stations UN50, UO50, UP50, UQ50 will be active in Kazakhstan from April/2011 то May 31/2011 - of 50th Anniversary of the first human flight to outer space.

UN 50 SK - UN7GWC UO 50 G - UN2G UP 50 F - UN7FW UP 50 YG - UN7Z UQ 50 G - UN6QC UQ 50 L - UN7LZ UQ 50 P - UN7PL UP 50 ASTR - UN6GK UP 1 ASTR - UN0GL

Many special stations will be active in CQM Contest and UNDX Contest. To commemorate this event Kazakhstan information website "UN Amateur Radio News" together with Almaty Amateur Radio League have established a special award - "The Columbus of the Cosmos".

Russia Sign Up to CEPT Licence

Russia has become the latest nation to sign up to the pan-European CEPT licensing agreement. According to the IARU Region 1 website, the Russian State Radio Frequencies Commission decided in March that the Russian Federation would join both the CEPT and ECC Recommendation. This will make it possible for every CEPT licence holder to operate on the territory of the Russian Federation. There are a few caveats. Among them is that Russia will only permit such CEPT operation by a foreign station for a limit of three months, without any additional permission needed. Also, the call sign to be used in CEPT operations will be RA followed by the foreign amateur's personal call letters.

The Mid Ulster Amateur Radio Club

The Mid Ulster Amateur Radio club will be holding a foundation course over one weekend towards the end of May. The course is open to anyone who wishs to take the first step on the Amatuer radio ladder. if interested you must attend the registration night on Wed 4th May from 7.30pm til 8.30pm at the place initiatuve, ardress pk, portadown, bt62 3tp. more details can be found at www.muarc.com or by contacting Martin MI0YMF on 02832852712

The Mid Ulster Amateur Radio club will be holding its monthly meeting today the 8th May 2011 at 3pm, in Brownlow Resource Centre, Brownlow Road, Craigvon, bt65 5dl. Both Members and visitors are welcome.

The annual rally will be held on Sunday 22nd May. If anyone wishes to book a table or for more information, then please contact Brian 2I0TCA (Rally Coordinator) at cqmuarc/ at/ gmail/ dot/ com or via www.muarc.com

---

DX News

Special prefixes will be used in Kazakhstan until the end of May to celebrate the 50th anniversary of the first manned space flight by Yuri Gargarin in 1961. Calls to look out for are UN50SK, UO50G, UP1ASTR, UP50ASTR, UP50F, UP50YG, UQ50G, UQ50L and UQ50P.

To celebrate the 85th Anniversary of the Club Radio Amateur de Quebec a special event callsign VC2CQ85 will be aired during the month of May. QSLs go via VE2CQ.

Another special callsign will be active from now until 20 May. This will be in Azerbaijan when the call 4JV3AM will be used to celebrate the 66th anniversary of the end of World War 2 and to honour the Azerbaijani hero Mamish Abdullayev.

Fred PA1FJ will be QRV as SV5/PA1FJ/P from the Island of Karpathos in the Dodecanese Islands until 14 May. This one counts as EU-001 for the IOTA programme and QSLs go via Fred's home call.

Macquarie Island is one of the rarer DXCC entities and in recent times there has been some activity from Kevin VK0KEV. The good news now is that Kevin will be joined by Denis ZL4DB who will be active from there as VK0/ ZL4DB until late July. Denis is new to DXing and will only be able to operate during his spare time.

CQ WPX Contest

Axel, EI8JX has received recognition by winning first place in the 2010, CW , World Wide WPX Contest for the single OP lower power 20 metres. He scored a total of 55,848 points. Congratulations.

Incursions into the 28mhz Band

Illegal church broadcasts have been heard on 28.265MHz in Germany and members are requested to listen on this frequency in order to identify the location. Please contact Ger McNamara EI4GXB IARUMS Co-ordinator on 087 2532512 or ei4gxb/ at/gmail/dot/com with any reports.

Limerick Radio Club

Limerick Radio Club will meet next Thursday evening 12 May in the Limerick Institute of Technology at 7.30pm and all are welcome to attend.

Dundalk Amateur Radio Society

The Annual General meeting of Dundalk Amateur Radio Society was held on Wednesday May 4th at QTHR. The following members have been elected to officer positions. Chairman is Thos EI2JD, Secretary is Aidan EI7JC, Treasurer is Jim 2I0SBI, PRO is Anthony Murphy EI2KC, QSL Manager is Brian EI9GTB. Club website is www.ei7dar.com

---

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K2AU, NG3K & ADXO, N4AA & QRZ DX, W4VQ, KH6BZF, N6PSE, K8GI, K8IA, K8YSE, N8OFS, W8GEX (60m News), W9ILY, Algarve STAR DX Team, AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, EA4AK, EB7DX, F6AJA & Les Nouvelles DX, HA0HW, HK1X, I1JQJ/IK1ADH & 425 DX News, JA1XGI, LU7YS, OK2BOB, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, VA3RJ & ICPO, VE3ZZ and VHF-DX-Portal(MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st-May, through Sunday, 8th-May there were 226 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0T, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

8P, BARBADOS (Update). Fred, PY2XB, will be active as 8P9XB from St. Philip, Barbados (NA-021) between May 8-21st. Fred will be traveling with his family, so radio operations will be on a secondary basis. Activity will be on 80-6 meters using CW, SSB, RTTY and BPSK. Efforts

will be concentrated on 6 meters and the Digital modes. On 6m, Fred will run a beacon on 50.099 MHz while he is not operating. Please spot beacon on the DXClusters. Fred will use the traditional DX frequencies. Check QRZ.com under 8P9XB for the log and additional information during his stay. QSL via PT7WA.

9H, MALTA. Jasper, PB2JJ, will be active as 9H3JN from Malta between September 2-14th. Activity will be on 40-10 meters using CW and SSB. QSL via his home callsign.

A5, BHUTAN. Zorro, JH1AJT, will be active from here during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via JH1AJT.

C2, NAURU (Update). The Pacific-DXer's Web page is reporting that the C21A DXpedition dates have been decided, and plans are progressing. The operation will take place between November 13th and December 7th. Operations will be led by Bill, VK4FW, with liaison support by Eddie VK4AN. They expect to have 6 operators and 3 stations active on all bands 160-6 meters using CW/SSB/RTTY/PSK31. They will also participate in the CQWW DX CW Contest as a M/M or M/2 entry. QSLing will be handled by the Pacific DXers.

C4, CYPRUS. Operators Valentin/5B4AGM, Alex/5B8AD, Alex/RV6LNA, Vlad/UA6LV, Oleg/UA6LP, Kantor/RA6LFO and Oleg/UA9CDV will be active as C4N during the CQWW WPX CW Contest (May 28-29th) as a Multi-Single entry. QSL via W3HNK. Visit the contest station's Web page at: http://www.c-4-n.com

CQ55, PORTUGAL (Special Event). Members of the Algarve STAR DX Team will be active as CR55PQ from the inside of Portuguese Airborne Troops School between May 21-23rd. Activity is to celebrate 55th years of (Para-Quedistas) at this military school. Operators mentioned are Miguel/CT1EHX, Toze/CT1GFK and Mike/CT1IUA. Operations will be on 80-6 meters using CW, SSB and RTTY. QSL via CT1EHX, by the Bureau or direct. For updates and more details, see the Web page at: http://algarvedx.com

DAYTON HAMVENTION NEWS. Send us your HamVention hospitality room information for next week's issue......

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following is approved for DXCC credit:
4A4A • Revillagigedo; 2011 Operation

ADDED NOTE: OPDX was informed by Santos, EA4AK, that "the 4A4A QSL card is just amazing, '8 pages'... 'A MUST HAVE'!!" See the JPGs of the QSL here: https://picasaweb.google.com/EA4AK.Santos/4A4AQSLCARD#
The QSL Manager for 4A4A is EB7DX: http://www.eb7dx.com
http://www.revillagigedo2011.com

FJ, SAINT BARTHELEMY. Wim, ON4CIT, will be active as FJ/OS1T from Saint Barthelemy (NA-146) between May 14-22nd. Activity will be on 40-6 meters using mainly SSB and RTTY, with some CW on 10 meters. QSL via ON4CIT. For more information, visit Web site at: http://cendyshop.be/FJ-OS1T.html

HK0/M, MALPELO ISLAND. From a press release sent out by Pedro, HK1X, head of the DXARC Public Relations, indicates that the "Dxcolombia Amateur Radio Club" (DXARC) is officially announcing a DXpedition to Malpelo Island in 2012. Effort were made possible thanks to the arrangements conducted by Jorge Prieto, HK1R. With the special Colombian Ministry license, HK0NA, they plan to be active during the first semester of 2012. The team is currently working day by day strategically/logistically in making arrangements for international DXers to work Malpelo DXpedition 2012, and to make expedition history. The team will consists of 4 foreign and 8 Colombians. The current list of operators are Jorge/HK1R (Team Leader), Jahm/HK1T, Pedro/HK1X, Franz/DJ8ZB, Bolmar/HK1MW and Jaime/HK1N. Activity will be on 160-6 meters (including 30/17/12 meter bands) using CW, SSB and RTTY, with at least 3 stations on the air at the same time on different bands and modes. More details will be forthcoming. Look for periodical updates on the following Web pages at: http://www.dxarc.org
http://hk0na.wordpress.com

HS, THAILAND. Tony, E21IZC, will be active as HS7AT during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/Single-Band (20m) entry. QSL via E21IZC, direct.

IOTA NEWS.....
AS-081. Member of the GyeongNam DX Club will be active as 6M0W/5 from Kadok Island, South Korea, between June 4-7th. Operators mentioned are Choi/6K5AQY, Kim/6K5AYC, Ha/6K5BHZ, Soo/HL5BMX, Kim/HL2FDW, Sang/DS4NMJ, Kim/HL2DYS and Kei/HL2UVH. QSL via HL5BMX.

AS-084. Operators Han/DS2GOO, Yongsup/DS3GLW, Rew/DS4NYE, Rocky/HL1VAU and Jung-man/DS4CDA will be active as D9K from Chuja Island between June 4-6th. Activity will be on 160-10 meters using CW, SSB and RTTY.

EU-105. Operators Joel/F1BLQ, Michel/F5EOT, Eric/F5LOW, Laurent/F5MNK and Bertrand/F6HKA will be active as TM0Z from Batz Island between May 21-26TH. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via F5EOT, direct or by the Bureau. For more details, go to:
http://www.frag33.org/www.cdxg.org/homeuk.html

EU-140. Jari, OH1JO, will once agin be active as OH1K from Kaunissaari Island between July 27th and August 4th. Activity will be be 20 meters, but other bands will also be used too. For more details see QRZ.com. QSL via OH1JO.

NA-029. Gregg, VE3ZZ, will once again be active as VE3ZZ/VY2 on Prince Edward Island (CISA PE-001, WLOTA 0523, WW Loc: FN76vs) between July 25th and August 1st, from the VY2TT superstation. In the RSGB IOTA Contest (July 30-31st), he will operate as a Single-Op/Mix-Mode/24HRS/High-Power. QSL via his home callsign, direct or by the Bureau.

NA-091. Klaus, DK6AO, will be active as VE7/DK6AO from Quadra Island between May 30th and June 7th. QSL via his home callsign, direct or by the Bureau. For possible online logs, more details and updates, watch the following Web page at: http://www.dk6ao.de

OC-119. A group of 3-4 Philippine operators are planning DXpedition to the rare Jolo IOTA group sometime later this month. Dates to be confirmed and will be announced later. Operators are hoping to use the callsign DX8DX or DX8J, or possibly DU8/homecalls. More details are forthcoming.

OC-187. Aki, JA1NLX, is planning to operate as JA1NLX/VK4 from Lizard Island for three or four days in August (dates not finalized). Activity will be on the HF bands using CW and SSB. Lizard Island is located about 240Km north of Cairns. QSL via his home callsign, direct or by the Bureau or LoTW. For updates, see Aki Blog page at: http://ja1nlx-aki.blogspot.com

SA-045. Operators Orlando/PT2OP and Fred/PY2XB plan to activate an island in the Amapa State Group, in August, during the second fortnight (second week). The Amap State is in the extreme northern part of Brazil, and the islands in SA-045 are located in the northern hemisphere. Amap has few Hams and the state is highly requested by colleagues who wish to achieve the diploma "Worked All Brazil" (WAB). It has been a long time since an Island in IOTA SA-045 was activated. Last month (April), Orlando traveled to Macapa, capital of the Amapa state, to talk with the environmental authorities and to get information about the region because the islands are part of a biological reserves under environmental protection. He also did a survey of what should be taken as luggage since those islands are uninhabited. Other than radio equipment, they will have to take food, fuel for both the generator and obtain a boat for the operation. The second fortnight of August was chosen due to the HF propagation forecast, the climate conditions of the region and the moon season which affects the sea tide and the opportunities to reach the islands. They will soon announce more details of the expedition including its callsigns.

J48/SV8, GREECE (IOTA Op). Laci, HA0HW, will once again be active as J48HW and SV8/HA0HW from Thassos Island (IOTA: EU-174, GIOTA: NAS-037, MIA: MG-124, WLOTA: LH-4186, QRA: KN20HS) between May 26th and June 5th. He will operate mainly CW, with some SSB, RTTY and PSK31 as well, on the HF bands (mainly on 40/30/20/17 meters) and on 6 meters. He will enter the CQWW WPX CW Contest (May 28-29th) as J48HW. His rigs are a FT-840 with a MOS-FET amplifier and an IC-706 (for 6m only). Antennas are a monoband Gps and dipoles on fishing poles. QSL via his home callsign, direct or by the HA Bureau.

JX, JAN MAYEN (Update/Changes). The Jan Mayen DXpedition set between July 6-14th, 2011, (see OPDX.949 and OPDX.994) and led by Stan, SQ8X,

has announced their group's callsign has been changed instead of JX7VPA as first announced. They received the privilege to activate the island under the unique, special callsign JX5O thanks to the assistance and support of the LA5O Ringsj&#65533;en Contest Club founded by Rag LA6FJA and Svein LA5FHA. Following Norwegian regulations, the usage of the callsign has been arranged at Norwegian Post & Telecom by the Club&#65533;s committee. Currently, the team consists of: Stan/SQ8X (team leader), Pete/SQ9DIE, Vicky/SV2KBS, Leszek/NI1L, Tomek/SQ9C, Bernie/HB9ASZ, J&#65533;n/TF3ZA, Bj&#65533;rn/ SM0MDG and Tom/SQ9C. The group plans to be on the air for 8 days with 2-3 stations. Stan also states, "Due to polar summer season at Jan Mayen Island with broad daylight 24/7, the team will not operate on 160-80 meters &#65533; those bands will be totally dead at that time. The DXpedition will focus on 30-6 meters, and our main modes will be CW and RTTY/PSK, with some SSB if conditions will be good enough to operate as much as we wish to. The team will also check conditions on the 40m band, but the band may also be not usable at that time of the year. The team will have a professional TV crew on board that will prepare a broadcast documentary about the project and the island." Updated details and QSL route are available on the following Web page at: http://janmayen2011.org

KH2/NH2, GUAM. Dave, N2NL, will be active as NH2T from Guam (OC-026) during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/ High-Power entry. He is expected to be here until the summer of 2013. Dave will be active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC.

KH4, MIDWAY ISLAND. Joe, W5FJG (ex-EL2JM, JY9ZK, ST2JM, 7Z1AC) is now on Midway Island (OC-030) and is working on the island as the Chief Communications Officer for at least one year. He plans to be active as KH4/W5FJG starting the last week in May. Activity will be on 40-10 meters (possibly 80m if he can get a good vertical to the Island) using CW, SSB and the Digital modes. At the present time, Joe has only an Icom 7000 (but no power supply or antennas), but will probably have additional equipment shipped to him later. His antennas system will be modest at first, and hopes to be on the air by June 1st. Antennas have to be installed so that there is minimal impact to the island's bird population. Joe's operating times will vary during the week and weekends. He mentions that he is setting up a Web site that will contain some information about the Island and post operating schedules. Over time, Joe intends to set up a long term station on the Island so Midway will remain on the air long after he has gone. Joe is looking for any donations of multiband verticals, as well as a QSL Manager. If you&#65533;re interested in being his QSL Manager, please contact him at: joeyjeepusa@yahoo.com
More information is forthcoming soon.

KH6BZF PROPAGATION FORECAST/REPORT (May 9-15th)....
May 09 AN SOLAR REFERENCE KEYS
May 10 AN --------------------
May 11 AN BN - Below Normal
May 12 AN AN - Above Normal/Geomagnetic Level is QUIET

May 13 AN LN - Low Normal
May 14 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
May 15 AN-HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LU, ARGENTINA (Special Op). Members of the Radio Club de los Andes (LU8YE) will be active as LU8YE/Y from a special operation from the shores of Meliquina Lake, located at 45 KM from the city of San Martin de los Andes, from the hotel Amancio (www.amanciohotel.com.ar) between May 20-22nd. Activity will be on the HF bands, 80-10 meters using CW and SSB. Contacts are valid for the Neuqu&#65533;n Club Radio Program "Lakes and Ponds of Neuqu&#65533;n
"
For national contacts, QSL via LU8YE. For DX contacts, QSL via Manager EA7FTR. Visit the LU8YE Web page at: http://www.lu8ye.com.ar

NEWLY ELECTED OFFICERS FOR 2011-2012. The present officers of the Arizona Outlaws Contest Club continues for another term, through May 31st, 2012:
Bob Epstein, K8IA - President
Dick Zalewski, W7ZR - North Region VP
Mike Fulcher, KC7V - Central Region VP
Dave Gilbert, AB7E - South Region VP
Sandy Farley, N7RQ - Secretary/Treasurer

In addition, Sandy, N7RQ, continues as Webmistress for their Web site <http://www.arizonaoutlaws.net> and John Arthurs, K7WP, continues as their "Special Projects" guru.

OY, FAROE ISLANDS. Operators Hans/PA0VHA, Steef/PA2A and Wim/PA2AM will be active as OY/homecall from Skaelingur, Streymoy Island, in the Faroes (EU-018), between May 22nd and June 3rd. Activity will be on all bands using CW and RTTY. Also, look for activity on 6 and 4 meters, and PA2AM will also be on AO-51 satellite. Streymoy Island has a population of 11 and some sheep! QSL via their home callsigns. ADDED NOTE: This team also plans activity from Market Reef later this year.

PACIFIC TOUR. Operators Pista/HA5AO and George/HA5UK plan to activate the following islands between October 1st and November 15th: Fiji, Tuvalu, Western Kiribati and possibly Banaba. The following callsigns have been requested and are pending: 3D2UK, T2HA, T30HA and T33HA. Activity is planned for 160-10 meters using CW, SSB and RTTY modes. They will have two stations on the air simultaneously. A log search and more details are forthcoming at: http://ha5ao.novolab.hu
QSL via HA5AO, direct, by the Bureau or LoTW.

PP0T, TRINDADE ISLAND (Update). Junior, PY2ZA, showed up on the air as PP0T after last week's bulletin went out. Jerry, N4JF, informed OPDX that Junior is working at a military base and has to follow some very strict rules of operating time and conditions. He is using military equipment that does not have split capabilities. This is why he is always simplex. Jerry states, "He (Junior) is using two FT-990 from the Navy.. This is not a normal DXpedition. When operating split he uses one for RX and the other for TX. He frequents 28.495 MHz SSB." Keep watching the Web page for possible updates: http://trindade2011.com

QSL ROUTE CHANGE. As of April 18, 2011, Buzz, NI5DX, will no longer be assisting 9M6JC as QSL Manager. John has decided to handle the QSL duties himself. Please do NOT send any 9M6JC cards to NI5DX either direct or via the Bureau. It appears that the loss of a large parcel of QSL cards that Buzz sent to 9M6JC containing cards for both John and Tom, 9M6TMT, has caused the two to decide to handle their own

paperwork, hopefully avoiding the future loss of cards.

QSLS BEING SENT TO EA7FTR AND EB7DX. David, EB7DX, informs OPDX that QSL processing by him and his father will be slowing down due to a serious family illness (his mother is in the hospital). They hope you can understand the situation. Thanks for understanding.

LOG ONLINE. The log for the special event callsign, TM26UFT, to celebrate the 26th Annual Meeting of the French CW Society, the Union Fran&#65533;aise des
T&#65533;l&#65533;graphistes UFT is online at: http://www.uft.net

QSL RECEIVED VIA LoTW: 4A4A, 4A0IARU, 4J3M, 6V6U, 6W6/K3IPK, 9M2CNC, 9N7AN, CP6XE, DF5KE, F5SIB, FG4NO, FO8RZ, G0WRE, HK6K, JY5CC, OX3XR, P40V, P49V, P40YL, PJ4R, PZ5YV, SN3S, SV1EBV, TA3X, UA6JAJ, UT3IB, UX0FF, VE3XN, W0S, YW0DX and ZS6BCR

QSLS RECEIVED VIA MAIL: 1A0KM, 9L0W, 9M2CNC, CT3FT, D2CQ, D44TBE, DK1MAX, EA6SX, J28RO, J5NAR, JY4NE, KP4DKE, LX/SP1DPA, LX1DA, OD5NJ, OY1CT, P40V, P49V, PJ2T, PJ4A, PJ4B, TJ3AY, V44KAI, V85AVE, VK5MAV/5, VU4PB, XX9TLX, YS0IARU, Z22CW, ZD9T, ZF2LC, ZL50VK and ZL8X

QSLS RECEIVED VIA THE BUREAU: 3D2NB, 3W6C, 5K0CW, 5W0YA, 9Q/DK3MO, 9U1VO, 9X0LX, A25OOK, BD9AC, C56SMT, H40FN, JW/OZ7AM, P29VCX, PY2XB/PY0F, S79UCX, T27A, T88RP, TX1B, V63PR, VY0O and VY0V

SM, SWEDEN. A group of operators from the Czech Republic, belonging to the radio clubs OK1ONA/OL1C and OK1KCU, will be active from Sweden between May 14-21st. Team members are OK1IEC, OK1IPS, OK1FPQ, OK1UZW, OK1JAX, OK1JST and OK1HWS. They will stay in a cottage near Vaggeryd. Activity will be on 80-6 meters using CW, SSB and the Digital modes with two stations on the air. Operators will use their home callsigns according to CEPT. QSL via their home callsigns or via OK1ONA/OL1C. A special QSL card will be sent for each QSO. For more info, see: http://www.ol1c.cz

SV9, CRETE. Operators Jindrich/OK1AMM, Franta/OK1HH and Bohumil/OK2BOB will be active as SV9/homecall/p from Agia Marina (Grid. Loc. KM15XM) on the Island of Crete (EU-015) between 1200z, May 17th and 0300z, May 28th. Activity will be on all bands (mainly 17/12/10/6 meters) using CW and SSB. The group will operate some days from Gramvousa Island or Gavdos Island (IOTA EU-187). QSL via their home callsigns.

T2, TUVALU (Also 3D2). Haru, JA1XGI, will be active as T2XG from Tuvalu (OC-015) between May 17-24th. Activity will be on 40-10 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. He will also be on 6 meters. Also, look for Haru before and after his T2XG activity from Fiji (during his stop overs) signing 3D2XG. QSL via JA1XGI. For more details and updates, visit his Web page at:
http://island.geocities.jp/t2xgtuvalu

T6, AFGHANISTAN (Cancelled). Paul, N6PSE, Co-Leader of the T6PSE DXpedition, sent out the following press release (#3) on May 2nd: "The Intrepid-DX Group has been planning for many months to conduct a large multi-

national DXpedition from Kabul, Afghanistan as T6PSE.
* We had been receiving advice and assistance from Jim McLaughlin,
WA2EWE/T6AF, who was killed in Kabul earlier this week.
* The Taliban subsequently announced their 'Spring Offensive'.
* Last night, President Obama announced the killing of Osama Bin Laden.

Given these circumstances, and with careful consideration, we have
decided to cancel our plans for a DXpedition from Afghanistan. There is
just too much uncertainty in the region for us to continue to move forward
with our plans.
In the next several weeks I will refund all donor/sponsor monies that
have been given to support our plans..... Thank you, Paul S. Ewing-N6PSE"

V2, ANTIGUA. Pete, KB2DY, will be active as V25GP from May 7-17th (possibly
longer). Activity will mainly be FM on 6 meters using a Yaesu VX5-R (at 5w)
along with a Diamond SRH940 antenna on 52.525 MHz. He will be staying in
Grid Square FK97BD and FK97BC, BUT may be operating from any of the
following grids: FK97CD, FK97BD, FK97BC, FK97BB, FK97CA, FK97CB, FK97DC
and FK97DB. QSL via his home callsign.

VK9C, COCOS (KEELING) ISLANDS (Update). Wally, VK6YS, member of the South
Pacific Contest Club, will be active as VK9CI from Cocos (Keeling) Island
OC-003) for one week between June 1-7th. Activity will be limited because he
will be on holiday with his wife Gaye. Operations will be early local
mornings and through the evenings on 40-10 meters, propagation permitting.
Using his IC7000, he plans to concentrate on the Digital modes, mainly
PSK31 and with some RTTY and Olivia. QSL via VK6YS.

VP9, BERMUDA. Operators Ray/ND8L and Jamie/WW3S will once again be active
as VP9I from Ed/VP9GE's QTH for the CQWW RTTY DX Contest (September
24-25th). QSL via N1HRA. Outside of the contest, look for them to be
active as VP9/WW3S and VP9/ND8L. QSL via LoTW or SASE to their CBA.

XV, VIETNAM (IOTA Op). Igor, UY5LW, will be active as XV4LW from Phu Quoc
Island (AS-128) between May 9-18th. Activity will be on the 17/12 meter
bands and also 6 meters. He will use his FT-100D into a 3 element yagi
for 17/12m, a simple vertical for 10m and a yagi for 6m. QSL via his home
callsign.

459. [ADMIN] Facebook gateway/update page for rec.radio.info now available

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-09 16:17:11 UTC
From: rram@panix.com
Message-ID: <iq92c5$3rj$1@reader1.panix.com>
Source record: 4499
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave,rec.radio.scanner,rec.radio.info

A Facebook gateway is now available for the rec.radio.info Usenet newsgroup.

On your Facebook account, the gateway provides links on your Facebook news feed to rec.radio.info articles that are available on Google Groups. There are also links on this page to the other two radio-related newsgroups that have similar Facebook pages, ba.broadcast.moderated and rec.radio.broadcasting.

Search for the following Facebook page:

rec.radio.info (Usenet Newsgroup)

All you have to do is "Like" this page to receive updates on Facebook. You can also suggest the page to your friends through the usual Facebook methods.

It should be noted that what appears on the Facebook page is links to Google Groups. You will still have to go to Google Groups (or to your regular newsreader) to see the actual articles. This is a notification feed only. Due to occasional delays with article Message-ID index updates on Google Groups, the links to Google Groups may not be immediately available. Still, it might be a useful way to introduce the newsgroups to those not familiar to Usenet by using technology that might be more familiar to them (Facebook). Instead of doing the sometimes hard work of convincing folks to sign up for news access, or to check Google Groups, all you have to do is invite them to the Facebook page.

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com, which is the default Followup-To address for this article.

==> + PUBLIC SERVICE: NORTHERN FLORIDA HAMS RESPOND TO AFTERMATH OF
ALABAMA STORM

After the devastating storms that swept through Alabama last week
<http://www.arrl.org/news/tornadoes-and-thunderstorms-keep-radio-amateurs-bus
y-in-midwest-southeast>,
radio amateurs from the ARRLs' Northern Florida Section -- at the
invitation of ARRL Alabama Section Emergency Coordinator Greg Gross,
K4GR - are making their way to Alabama to assist with providing
```

assistance. "We contacted Greg and worked out a disaster operation assignment," ARRL Northern Florida Section Manager Paul Eakin, KJ4G, told the ARRL. "We have already sent two teams to Alabama and have five others on stand-by. This was a very damaging tornado and it will be very long time before everything is cleared up." Read more here <http://www.arrl.org/news/northern-florida-hams-respond-to-aftermath-of-alabama-storm>.

==> PUBLIC SERVICE: GEORGIA HAMS HASTEN TO HELP DURING STORMS

Hams in Paulding County -- located in Georgia's northwestern corner -- activated for the tornadoes and thunderstorms that swept through the South last week. According to Paulding County ARES® Public Information Officer Lee McDaniel WB4QOJ, the County's Emergency Management Agency invited ARES® members to gather at the county's Emergency Operations Center on the evening of April 26 to help provide communications support. Read more here <http://www.arrl.org/news/georgia-hams-hasten-to-help-during-storms>.

==> + HAMS HELPING HAMS: THE ARRL'S HAM AID PROGRAM RESPONDS TO DEVASTATED SOUTH

The ARRL's Ham Aid Fund has been tapped to aid Amateur Radio operations in Alabama, following the wake of destructive killer tornadoes that ravaged the state last week. According to ARRL Chief Development Officer Mary Hobart, K1MMH, hams in Alabama have requested radios and antennas, since cell tower sites and repeaters have been damaged and are not yet back up. "The ARRL has already shipped five cases to the state, full of 2 meter, 440 MHz and HF radios, as well as two cases of handheld transceivers with batteries," she said. "We anticipate the demand for equipment may continue from Alabama and possibly from neighboring states."

Hobart said that she knows that not every ham can be in Alabama to help out, but every ham can support the effort -- by contributing to the ARRL's Ham Aid Fund: "First created in response to Hurricane Katrina in 2005, the Ham Aid Fund has enabled ARRL to provide vital communication equipment to devastated areas along the Gulf Coast. Now the fund is purchasing equipment and funding shipping costs to meet the needs of hams in Alabama, as well as our served agencies such as the Southern Baptist Men's Kitchen and the American Red Cross."

How can you help? Hobart said that the best way is to make a contribution of $25, $10 or $5 -- or whatever you can afford. The ARRL will use your contribution to respond to the calls for assistance from Amateur Radio operators where repeaters, antennas and radios have been damaged or destroyed. "And this event may be just the beginning," she explained. "As hurricane season is on the horizon, we need to be prepared for those situations when all else fails. The easiest way to make your donation is on the ARRL website <http://www.arrl.org/donate>. Use the simple form and designate your contribution to the ARRL Ham Aid Fund. We'll put your gift to work right away in the affected area. On

behalf of the ham community in Alabama, thank you!"

==> + FCC NEWS: FCC SEEKS TO RAISE THE FEE FOR VANITY CALL SIGNS

The FCC released a Notice of Proposed Rulemaking on May 3, seeking to raise the fee for Amateur Radio vanity call signs. Currently, a vanity call sign costs $13.30 and is good for 10 years; the new fee, if the FCC plan goes through, will go up to $14.20 for 10 years, an increase of 90 cents. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. Read more here <http://www.arrl.org/news/fcc-seeks-to-raise-the-fee-for-vanity-call-signs>.

==> HAYS AFFINITY GROUP PROVIDES ARRL MEMBERS WITH EQUIPMENT PROTECTION, CLUB LIABILITY INSURANCE PLANS

Effective May 1, 2011, the ARRL began a new partnership to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. The League has signed an agreement with Hays Affinity Group to serve as the program administrator to provide equipment insurance to its members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays will be replacing Marsh Affinity Group Services as the program's administrator and has introduced new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/hays-affinity-group-to-provide-arrl-members-with-equipment-protection-club-liability-insurance-plans>.

==> + CHECK OUT THE JUNE ISSUE OF QST

The June issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a special look at ARRL Field Day, the most popular on-the-air event in Amateur Radio -- this issue of QST has something for just about everyone.

Radio amateurs who operate ARRL Field Day know that portability is key. So with this in mind, Bob Dixon, W8ERD, took some military surplus mast sections to make "A One Person, Safe, Portable and Easy to Erect Antenna Mast." Consider Dixon's approach to your Field Day antenna installation -- especially if you're short of trees. Some wattmeters give you power, while others measure SWR. QST Technical Editor Joel Hallas, W1ZR, tells you how to bring them together in his article "SWR, Reflected Power -- What Do They Mean?" In his article "A Single Element Vertical 'Beam,'" David Robbins, K7BKI makes a directional antenna out of a single monopole.

One of the highlights of a Field Day operation is the Get-on-the-air -- or GOTA -- Station. This is a great way to introduce non-hams to the fun of Amateur Radio, as well as to get those less experienced hams a

bit more comfortable on the air. Gary Pearce, KN4AQ, and Dick Orander, KD4ISC, know that the GOTA Station is the perfect spot to find new ops in search of an Elmer. Discover how you, too, can do this in their article "Get Up and Get-On-The-Air." ARRL Membership and Volunteer Programs Department Assistant Manager Norm Fusaro, W3IZ, knows that Field Day means more than just getting on the radio; it's also about the friendships that persevere through the years. In his article "Field Day: It's Not About the Fish," Fusaro tells the story of how Field Day brought two hams together after half a decade of radio friendship.

ARRL Emergency Preparedness and Response Manager Mike Corey, W5MPC, takes a look at the Alinco DX-SR8T HF transceiver in this month's Product Review. He says that this rig "is a low cost HF transceiver that includes a good selection of the basic features for the casual operator." ARRL Educational Correspondent Dewey Rykard II, KI4RGD, checks out the TYT TH-UVF1 dual band handheld transceiver. He says this compact radio "offers a good basic set at a nice price. The user interface and instructions need work, but the radio works well once you have figured out how to program and use it."

Steve London, N2IC, delivers the results of the 2010 ARRL November Phone Sweepstakes. This year, 287 stations earned the ever-elusive Clean Sweep, five more than in 2009. Gary Breed, K9AY, has the results of the 2010 ARRL 160 Meter Contest. According to Breed, the ARRL Contest Branch received a record number of logs from DX stations for this year's running.

Of course, there are the usual columns you know and expect in the June QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your June issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> + AMATEUR RADIO IN THE CLASSROOM: COLLEGE STUDENTS ATTEMPT HIGH ALTITUDE BALLOON LAUNCH

The Amateur Radio club at Rochester Institute of Technology will be presenting a display of modern technology and applications with ham radio at the university's annual ImagineRIT <http://www.rit.edu/imagine/planyourday11/exhibit.php?id=214> festival on Saturday, May 7. Members of the RIT Amateur Radio Club, K2GXT, have constructed a custom High Altitude Balloon <http://www.rit.edu/imagine/planyourday11/exhibit.php?id=214> that will be suspended below a weather balloon and launched up to 100,000 feet during the festival. The balloon will stream live data back to the exhibit, displaying information such as location, altitude and temperature. The planned launch will take place close to the beginning of the festival. The group will also be flying a 12 foot long custom radio-controlled blimp. This blimp has appeared several times at the RIT men's and women's hockey games this season.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of April -- looks at the latest with the FCC and ReconRobotics, sponsoring the Frequency Measuring Test, readying the OSCAR 1 satellite to take to the air again, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-33>.

==> + ON THE AIR: SPACE WEATHER PREDICTION CENTER TO DISCONTINUE BROADCASTS ON WWV AND WWVH

Beginning Tuesday, September 6, the Space Weather Prediction Center (SWPC <http://www.swpc.noaa.gov/index.html>) will cease broadcasting its geophysical alert message <http://www.swpc.noaa.gov/Data/index.html#reports> on WWV <http://www.nist.gov/pml/div688/grp40/wwv.cfm> and WWVH <http://tf.nist.gov/stations/wwvh.htm>. These messages inform listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Currently, the message is heard on minute 18 from WWV and minute 45 from WWVH. The information <http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt> will still be available on the SWPC website. If you care to comment on this, or if you have any questions, the SPWC -- part of the National Weather Service (NWS <http://www.nws.noaa.gov/>) -- would like to hear from you <swpc.wwv@noaa.gov>.

==> SOLAR UPDATE

Tad "And the Sun was always shining <http://www.youtube.com/watch?v=qkmvwCpcZlM>" Cook, K7RA, reports: Currently, five sunspot groups are visible, but the average daily solar flux is down more than 7 points over the past week, compared with the previous week. The average daily solar flux was off nearly five points compared to the earlier period. A solar wind stream from a coronal hole induced a high latitude geomagnetic storm at the end of April. Middle-latitude geomagnetic K indices measured at Fredericksburg, Virginia went as high as 4, and the April 30-May 2 A index was 17, 13 and 14. The planetary K index hit 5 on April 30, and the A index over the same three day period was 24, 19 and 20. High latitude areas were more sharply affected, and Alaska's college K index rose to 7; the same three day period saw the college A index at 43, 56 and 37. The latest prediction shows more geomagnetic active coming May 9-10, when the predicted planetary A index is 15. The USAF/NOAA prediction shows a planetary A index of 5 on May 5-6, 7 on May 7-8, 15 on May 9-10, 10 on May 11 and 5 on May 12-16, rising again to 15 on May 17. The sane prediction shows solar flux at 107 on May 5, 110 on May 6-8, 100 on May 9-12 and 115 on May 13-21. Look for more information -- including some observations on the beginning of the summer sporadic-E season, already underway, plus an update on the three month moving sunspot average --

on the ARRL website on Friday, May 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song They Call the Wind Mariah <http://www.youtube.com/watch?v=qkmvwCpcZlM> from the musical Paint Your Wagon <http://en.wikipedia.org/wiki/Paint_Your_Wagon_%28film%29>.

==> + ARRL RECOGNIZES: LOU BURKE, W7JI, WINS APRIL QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for April is Lou Burke, W7JI, for his article "The W7JI Low or Lower Power 40 Meter Transmitter." Congratulations Lou! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the May issue today.

==> KENWOOD DONATES HF/6 METER TRANSCEIVER TO W1AW

Thanks to the generosity of Kenwood USA, W1AW, the Hiram Percy Maxim Memorial Station, now boasts a new HF plus 6 meter transceiver -- the TS-590S. "Hams from all over the world come to operate at W1AW, the flagship station of Amateur Radio," said ARRL Business Services Manager Debra Jahnke, K1DAJ. "We are delighted that Kenwood's generosity makes it possible for visitors to W1AW to experience the latest in Kenwood's line of Amateur Radio hardware." Read more here <http://www.arrl.org/news/kenwood-donates-hf-6-meter-transceiver-to-w1aw>.

==> DXCC NEWS: DXCC DESK APPROVES 2011 REVILLAGIGEDO DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the 2011 4A4A DXpedition to Revillagigedo <http://www.revillagigedo2011.com/> has been approved for DXCC credit. If you have any questions about this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk.

==> THIS WEEK ON THE RADIO

This week:

- May 6 -- NCCC Sprint Ladder
- May 7-8 -- New England QSO Party; 7th Call Area QSO Party; Indiana QSO Party; 10-10 International Spring Contest (CW); ARI International DX Contest
- May 8 -- Araucaria VHF Contest; Microwave Spring Sprint (local time)
- May 8 -- SKCC Weekend Sprint
- May 11-12 -- CWops Mini-CWT Test

Next week:

- May 14 -- FISTS Spring Sprint; FOC QSO Party
- May 14-15 -- Nevada Mustang Roundup; EUCW Fraternizing CW QSO Party; CQ-M International DX Contest; VOLTA WW RTTY Contest; 50 MHz Spring

Sprint
- May 16 -- Run for the Bacon QRP Contest
- May 19 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 7 -- ARRL South Carolina State Convention
<http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest
>,
Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac)
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>,
Seaside, Oregon; ARRL Wyoming State Convention
<http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne,
Wyoming
- June 4 -- ARRL Atlantic Division Convention
<http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-
1>,
Rochester, New York; ARRL East Bay Section Convention
<http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley,
California; ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>,
Marietta, Georgia
- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee
- July 2 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecra
cker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-inter
national-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention
<http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

(e-mail: dl7voa@darc.de)

CO - CUBA, NA-015
CO2NO (Gustavo) and CO2WL (Lazaro) plan to join the Volta RTTY Contest
as single OP/allband on May 14/15. Both QSLs should be sent direct to:
Gabor Kutasi, PO Box 243, H-8601 Siofok, Hungary.

FJ - ST BARTHELEMY, NA-146
Wim,OS1T/ON4CIT, intends to hit the airwaves as FJ/OS1T from the island
St. Barthelemy (NA-146, DIFO FJ-001, WLOTA LH-0377) from May 14-22.
You will find him in SSB and RTTY on 40m-6m. His preferred QRGs are:
SSB: 7072, 14192, 18132, 21292, 24972, 28492, 50115 kHz
RTTY: 7042, 10142, 18102, 21082, 24922, 28082 kHz.
QSL cards should be sent via bureau or direct to his homecall.
See also: http://on4cit.webs.com/fjos1texpedition2011.htm

SV5 - DODECANESE, EU-001
Some members of the "DX Plus Hellenic Amateur Radio Team" will show up
as SX5F from Pharmakonisi Island (Rocky Islet, GIOTA DKS 057, EU-001)
from May 14-22. The OPs will be Theodoros,SV1GRM, Sotirios,SV1HER,
George,SV1RP, Spiros,SV1RC, George,SV1QN, Giannis,SV1GYG, and
Takis,SV2FWV. They will work in CW, SSB and digital modes on all bands.
QSL via RAAG bureau. See also online at: http://www.qrz.com/db/SX5F

T2 - TUVALU, OC-015
Haru,JA1XGI, will be QRV as T2XG from Tuvalu (OC-015) working in
CW, SSB and digital modes on 40m-10m from May 17-24.
QSLs via bureau or direct to JA1XGI.

T6 - AFGHANISTAN
The T6PSE DXpedition to Afghanistan has been cancelled. They had been
receiving advice and assistance from Jim McLaughlin,WA2EWE/T6AF, who
was killed in Kabul last week. The Taliban subsequently announced their
"Spring Offensive" and after the killing of Bin Laden the situation
became worse. Given these circumstances and with careful consideration

they have decided to cancel their plans. Paul,N6PSE, announced to
refund all sponsor monies within the next weeks.

The stay of Terence,T6TL (K5TLL), has been extended until July though
he should go QRT these days. Terence is using an Icom 706, a dipole and
a Cushcraft R7 vertical. He is working in SSB and digital modes on
40m-10m mostly from 0300-0500 UTC. QSL via N4FF, also LoTW and eQSL.

9M2 - WEST MALAYSIA, AS-058
Vlad,9M2/RA9LR, will stay on Langkawi (AS-058) from the mid of May
until the mid of July. Vlad plans to work in PSK, RTTY, CW and SSB.
QSL via bureau or direct to UA9LP.

FRANCE, SPECIAL EVENT STATION
The callsign TM90LH will be activated on following weekends: May 14/15,
Jun 4/5 and Jul 9/10. They are celebrating the 90th anniversary of the
"Societe Havraise de Telegraphie Sans Fil" (Le Havre Wireless Society,
F6KOH) which is one of the oldest radioclubs in France. QSL via bureau.

THE NETHERLANDS, SPECIAL EVENT STATION
Bernard,PD7BZ (http://www.pd7bz.nl), will be active as PD6MILL from the
windmill "Eendracht" in Gieterveen on May 14/15. He plans to work in
SSB and digital modes on 10m, 20m and 40m. There will be also other
windmills activated in the Netherlands and Great Britain during this
weekend.
QSLs for PD6MILL should be sent via bureau, direct or eQSL to PD7BZ.
See also: http://www.pd6mill.com

DXCC: The QSL cards of 4A4A (Revilla-Gigedo, operation of 2011) are accepted
for DXCC credit now.

SILENT KEYS: Benjamin H. Stevenson (W2BXA), the first president of the
"North Jersey DX Association", passed away on May 5 at the age of 97.
He had a DXCC count of 390 entities and was holding the first CQ WAZ
and satellite DXCC awards.

Other DXers who passed away during the last days are:
Kesang Namgyel (A51KC), Vernon Whittaker (G3UK), Sydney Sefton (G3ZBA),
Aleksej A. Starkov (UA1BX) and George Wesley Johnston (W6YWH).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The "Alaskan Flora Fauna Award" (KLFF) is a new part of the global
World Flora Fauna (WFF) program. More details can be found here:
http://www.klff.us.pn

UPCOMING CONTESTS

May 14/15: EUCW Fraternizing CW QSO-Party
May 14/15: Alessandro Volta RTTY Contest
May 14: FISTS Sprint Contest

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AF-019, I, Pelagie Islands: A few Italian HAMs will show up as IG9E from
Lampedusa from May 18-23. QSL via IZ2GMT (bureau/direct).
See also: http://www.vbdxc.altervista.org

EU-120, G, English Coastal Islands: G0LZX, G0WRE and M0TNX will be the
operators of GB0HI. They will activate Holy Island mainly in SSB on
40m, 20m, 17m and maybe also 15m/6m on May 14.
QSL via M0OXO (bureau/direct). See also: http://www.gb0hi.co.uk

IOTA News:

Though there were serious concerns last year, that there is no longer
a printed IOTA Directory due to lack of financial support, we now have
the new edition available. In addition to award rules, a full island
listing and contest results all IOTA fans also find illustrated
expedition reports in it. The 128-page directory for the price of just
under 12 pounds is currently available via the RSGB.
See also: http://www.rsgbshop.org

Lighthouse activities (WLOTA/ARLHS/ILLW)

W3P will be activated in SSB and PSK31 on 40m, 20m and 17m from the
Piney Point Lighthouse (ARLHS USA-601) in Maryland during the annual
"Waterfront Festival" on May 14 from 1400-2000 UTC.
Please QSL direct via KA3UNQ.

HAM RADIO 2011: QSL cards of 4U1ITU and 4U1UN at the booth of SDXF

Once again you can pick up your QSL cards of 4U1ITU, 4U1UN and also
D44TOI (2009 & 2010) on the HAM RADIO in Friedrichshafen this year.
The cards are handed out for QSOs with 4U1UN and 4U1ITU at the booth
of the Swiss DX Foundation (SDXF) on Friday, Jun 24, and Saturday, Jun 25.
Please bring your QSO data and watch the time schedule hanging at the booth.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DJ5AV,
DK8JB, DK8UH, DL1SBF, DL7VOA, DO3ME, F6AJA & Les Nouvelles DX, HA3JB,
HB9BOU, NG3K, OE2IKN, PD7BZ, PY2XB, W4DN and others.

The German PDF version can be found on the DARC homepage at:
http://www.darc.de/referate/dx/bulls/dxmb/2011

462. Weekly Highlights of Solar and Geomagnetic Activity, 02 - 08 May 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-10 21:30:05 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20110510213001.7E55E33C5C@panix2.panix.com>

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
02 - 08 May 2011

Solar activity began the week at low levels with a C1 x-ray event at
1352 UTC on 02 May from Region 1199 (N18, L=188, class/area Dso/210
on 01 May), after rotating around the west limb. Activity continued
at low levels with another C1 x-ray event at 1052 UTC on 03 May from
Region 1204 (N17, L=47, class/area Cao/130 on 03 May). Activity
decreased to very low levels, with only isolated B-class events
occurring throughout the remainder of the summary period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels during most of the summary period.

Geomagnetic field activity began the week ranging between unsettled
to active conditions at mid latitudes, and minor to severe
conditions at high latitudes on 02 May, due to a favorably
positioned coronal hole. The high speed stream effects began prior
to the summary period (29 April) and persisted through 02 May with
solar wind speeds in excess of 640 km/s, and intermittent periods of
negative Bz. Conditions began to subside on 03 May, settling to
predominately quiet conditions with predominately positive Bz,
before solar wind speeds decreased to background velocities near 400
km/s on 04 May. Conditions remained mostly quiet at all latitudes
for the remainder of the summary period.

Forecast of Solar and Geomagnetic Activity
11 May - 06 June 2011

Solar activity is expected to be very low to low. There is a chance
for isolated periods of moderate levels due to the possible
emergence of new regions, the return of old Region 1195 on 13 May,
as well as Regions 1199 and 1202 on 14 May.

No proton events are expected at geosynchronous orbit.
```

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels 11-19 May due to multiple coronal hole high-speed streams. Normal to moderate levels are expected to be predominate from 20-27 May, before elevated wind speeds from another recurrent coronal hole should produce high levels from 28 May until 02 June. Moderate or lower conditions should persist from 03 June until the end of the outlook period.

Geomagnetic field activity is expected to be unsettled to active 11-13 May due to coronal hole high-speed stream effects. Conditions are expected to subside for a day or so before increasing back to mostly unsettled conditions 15-17 May with another coronal hole coming into a favorable position to impact Earth. Conditions are forecasted to be predominately quiet 18-26 May, bar any transient activity, before the next recurrent coronal hole is expected on or around 26 May. Active to minor strorm conditions are possible 27-29 May due to the coronal hole, and lesser effects in the form of mostly unsettled to acive conditions should persist 30-31 May. Mostly quiet conditions are expected 01-05 Jun before the currently geo-effective coronal hole returns to produce unsettled conditions on 06 June.

463. The ARRL Contest Update for May 11, 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-11 11:07:30 UTC

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

May 11, 2011

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Tapped Out? CW Sprints and Mini-Contests
- CQ-M International DX Contest
- Spanish-Language Contest Reflector
- World War II POW Reporters
- US Air Force Museum - Virtual Walkthrough
- ARRL 160, RTTY Roundup, Rookie Roundup Results
- Noise Thrown Under the Bus
- Learn to Solder Comically
- Ham Hearing Aids

NEW HF OPERATORS - THINGS TO DO

If you've not participated in the annual Armed Forces Cross-band
Communications Test
<http://www.arrl.org/news/annual-armed-forces-day-crossband-test-scheduled-for-may-14>,
give it a try! Military stations like AIR and NAV transmit on
frequencies near the HF ham bands and listen for stations calling on
ham frequencies. Work as many as you can, including a station on the
USS Yorktown - most send QSLs, too!

BULLETINS

The next issue will be a Dayton Photo Album as your editor mines the
miles of aisles for smiles.

BUSTED QSOS

This is the link for the complete "Care And Feeding of Power Grid Tubes
<http://www.cpii.com/library.cfm/9>". (Thanks, Ed N4II) The Double L
antenna was actually the design of Don K2KQ, not K2LQ. (Thanks, George
W2VJN) Tom K1KI corrects a typo in that many NEQP certificates were
headed forth to the fourth district. The ninth? Nein!

CONTEST SUMMARY
```

Complete information for all contests follows the Conversation section

May 14-15

- CWops Monthly Mini-CWT Test (11 May)
- FOC QSO Party--CW
- EUCW Fraternizing CW QSO Party
- Alessandro Volta RTTY DX Contest
- Armed Forces Comm'ns Test
- CQ-M International DX Contest
- Nevada Mustang Roundup,
- FISTS Spring Sprint--CW
- Worked All Britain - LF Phone
- 50 MHz Spring Sprint

May 21-22

- NAQCC Monthly QRP Sprint--CW (19 May)
- Feld-Hell Hamvention Sprint
- Portuguese Navy Day
- EU PSK DX Contest
- His Majesty King of Spain Contest--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Hector XE2K/AD6D reports the creation of a new Spanish-language contest reflector - CQ TEST Radiodeportiva - by EA8AY and EA8CAC. The goal is to make it easier for Spanish-speaking hams to share information and experiences in their native language. It is hope that it will promote and increase the activity from Spanish-speaking countries all over the world. If you want to participate and share experiences but your Spanish is not perfecto, no problem, you are welcome. Please register and share what you think can be good for the contesting community. Several can help to translate if you wish. En espa&#65533;ol, "Hola Amigos - Quiero anunciar la creacion de un nuevo foro que hace una semana EA8AY y EA8CAC iniciaron que llamaron CQ TEST Radiodeportiva que es un foro en espa?ol, que esta enfocado en hacer mas facil compartir la informacion y experiencias en tu lenguaje, que tambien tiene la idea de promover e incrementar la actividad en paises de habla hispana en mas concursos explicando y apoyando a los miembros en los diferentes temas relacionados a el Radio Deporte dado esto por varios experimentadosy bien conocidos Concurseros no solo de Latin America si no de todo el mundo. Quedan invitados y espero ver mas amigos en el Foro para hacerlo mas rico en conocimiento y experiencias." Please forward this message to your Spanish-speaking ham friends!

Tim K3LR's video presentation on all of the Contesting Activities at the 2011 Dayton Hamvention <http://hamvention.com/> has been posted to the Potomac Valley Radio Club's web page <http://www.pvrc.org/> at under Recorded Webinars. During the Hamvention, two hours of Contest University USA in Dayton (on May 19th) will be available live and online via Webinars courtesy of ConTest University (CTU) and the

Potomac Valley Radio Club (PVRC). The first Webinar - the opening welcome and first session "Contesting the Right Way" by K1DG - will run from 8-9 AM Eastern Daylight time (USA EDT). The second Webinar will run from 4-5 PM EDT and presents Rob Sherwood, NC0B delivering "Contest Radio Performance" and the closing remarks for CTU. Registration information will be posted on the PVRC website shortly. Radio-sport also has a new article <http://www.radio-sport.net/dayton2011_pre.htm> on the contest goings-on at Dayton. I would ask for permission to reprint the photo of nattily-attired Paul K9PG and Gerry K8GT, but it's just too awful to print!

Central States VHF Society Vice President Kent WA5VJB <WA5VJB@FLASH.NET> has issued a call for papers for the CSVHFS Proceedings with a rapidly approaching deadline of May 20. The emphasis is on smaller papers this years such as "Hints and Kinks", roving and contest operations, radio modifications, antenna construction, etc. (from AMSAT <http://amsat.org/> bulletin ANS-121)

Dave G3YMC reports that Ukranian hams losing access to several bands is not yet certain and is apparently an administrative error. The Contest Update apologizes for promulgating uncertain information.

How time flies. It was about 25 years ago that Doug KR2Q encouraged and assisted Dick Ross K2MGA with creating the CQ Contest Hall of Fame <http://www.cqww.com/hof_history.php>. For some historic photos, take a look at these shots from Buz K2GL's 80th birthday party and Hall of Fame #1 <http://picasaweb.google.com/dougzzz/K2GL1986CQContestHOF1And80>. A summary of K2GL's accomplishments is found at the lower right. (Thanks, Doug KR2Q)

Larry N6NC was working on improving his accuracy at copying number strings - an important part of doing well in the up-coming CQ WPX CW contest - and found Morsecat2 by DK5SCI <http://www.morsecat.de/>. This code practice program can be set to blast out number group - just what you need to get WPXed into shape!

CWops will sponsor the first CW OPEN <http://www.cwops.org/cwopen.html> this summer on Aug 20-21. CW OPEN is unique in that it consists of three, 4-hour contests timed to occur under optimal low-band and high-band conditions in at least two out of three of the time periods in ITU regions 1,2 and 3. It is a single-operator contest with QRP, low-power, and high-power categories. The contests will each be separately scored and awarded. Those who participate in two or more of the three contests will have their scores aggregated and can also compete in the combined score category. This looks like fun! (Thanks, Al AD6E)

The June issue of Popular Mechanics <http://www.popularmechanics.com> ran a great article, "When the First Responder Is You" covering a number of real-world situations that have all been in the news lately. Getting on the radio is not always what needs to happen first!

W1ZM, Gerard "Jerry" Scarano, of Gales Ferry, Connecticut, has become a Silent Key at the age of 96. He was an original member of the Yankee Clipper Contest Club and before that an active Potomac Valley Contest Club member. The list of call signs that operated from his stations reads like a who's-who of contesting. Jeff K1ZM penned a nice reminiscence on the cq-contest reflector <http://lists.contesting.com/archives/html/CQ-Contest/2011-05/msg00048.html>.

AN Wireless Tower Co., LLC <http://www.anwireless.com> has relocated its operations to a 43,000 sq. ft. facility in Austintown, Ohio. It's nice to hear of a company outgrowing its manufacturing facility instead of the other way 'round. Aside from improved shipping times, this move places the company closer to their hot dip galvanizing and steel vendors. They'll have easy customer access just 2 miles from I-80 in northeast Ohio, too. (Thanks, AN Wireless founder, Dan KK3AN)

Bob K8IA reports that the Arizona Outlaws Contest Club <http://www.arizonaoutlaws.net/> has elected a new slate of officers for the coming year. Good job!

Steve GW4BLE and Andy MW0MWZ have put together a great website <http://gw4ble.dxlist.co.uk/> to play back audio of contest activity (mostly SSB) from the last eight years or so. The basic building blocks are from the Writelog contest logging program website, plus SQL log conversion, Smartphone audio, and other features. Steve notes the assistance of the CDXC members during site debugging and development, as well.

Web Site of the Week - At the recent ID State Convention the Friday night speaker, Lisa Spahr <http://www.powletters.com/>, had a very interesting presentation about a WWII-era ham public service of which I was completely unaware. A group of hams was organized to listen to SW broadcasts from Germany and other Axis powers to listen for POW reports and relay the information to their families. Lisa's grandfather was a POW in Germany for 26 months and her great-grandmother found out about his capture this way. All in all, there were quite a number of hams doing this - sending thousands of letters - and she is requesting Congressional recognition of this group, many of whom are still alive.

WORD TO THE WISE

NIB-NOS - could it be a tasty snack? Nope! These acronyms mean "New In Box" and "New Old Stock" and are used to refer to tubes and used or replacement equipment.

==> SIGHTS AND SOUNDS

A side trip to the US Air Force Museum is a must-do if you ever attend the Dayton Hamvention. If you're not heading to Dayton, you can take a virtual walk-through <http://www.nmusafvirtualtour.com/full/tour-pkg.html> of the entire museum, click by click! (Thanks, Sean N3JQ)

The LU Contest Group recently had its 11th anniversary and threw a big party. Diego LU8ADX sent a link to his online photo album of the festivities. <http://www.lu8adx.com.ar/lucg/fotos/subalbum_14.html> Some attended in costume, like "El Gaucho", Martin LU5DX!

Ace ham photographer, Bob N6TV, published his online album of photos <http://bit.ly/2011Visalia> from the Visalia International DX Convention - thanks!

Bob K0RC asks, "How much do you REALLY know about the United Kingdom? You've put many (or all) of them in your log, but just how is that Kingdom organized, anyway?" Luckily, he also provides the answer in the form of this 5-minute video <https://www.youtube.com/watch?v=rNu8XDBSn10&feature=player_embedded>!

If dark matter falls on your foot in the dark, is it true that you can't tell? This cartoon from PHDComics <http://www.phdcomics.com/comics.php?n=1430> refutes the supposition thus. (Thanks, Tree N6TR)

But can this guy balance it <http://www.youtube.com/watch?v=Aw6Aj44rL0U> up there with a Spiderbeam on it for the entire Field Day period? (Thanks, Tim K3LR)

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X relates discovering and repairing an issue with the ARRL 160 Meter contest results for the Club Competition, "Numerous members of the Frankford Radio Club were accidentally listed as members of the Yankee Clipper Contest Club. This appears to be the result of an error on my part during the data processing phase. The order of finish was unchanged in the Unlimited Club category; however, Frankford Radio Club is the correct winner of the Medium Club category. The Local Club category was unaffected by this error. The online results database <http://www.arrl.org/results-database?event_id=14722> has been corrected."

Also in the ARRL Contest library, results for the 2010 ARRL 160M Contest and the 2011 ARRL RTTY Roundup are now online <http://www.arrl.org/contest-results-articles>. Log Checking Reports for these two events are still being processed and Sean hopes to have them online in the next day or so. The April 2011 Rookie Roundup results <http://www.arrl.org/contest-results-articles> are also online - thanks to all the OT's that got on and worked the Rookies. The next Rookie Roundup will be held on Sunday, August 21 1800-2400 UTC and will use RTTY!

CQ World-Wide Contest <http://cqww.com> Director, Bob K3EST reports record 2010 log submission levels. "Contesting continues to be at the leading edge of spectrum use and technological advancements. Ken can give you exact numbers. A total of approximately 12,700 logs were received for the 2010 CQ WW contests. In spite of code not required for obtaining an amateur radio license, CW continues to grow in popularity

within contests." I'll say! The SSB haul was 6,445 electronic logs and for CW there were 6,079 electronic logs. As Ken K1EA muses, "Imagine if we had 1957-1959 conditions!"

Dave W9ZRX <zephd@indy.rr.com> needs your VHF+ contest logs for a late May or early June release of the VHF Super Partial Check and VHF Prefill databases <http://www.k3lr.com/w9zrx/>. Because of the nature of VHF propagation, he needs logs from a wide area for the databases to be useful across the country. Please email Dave Cabrillo-formatted logs from any of the 2009-2011 ARRL or CQ VHF contests.

With a little help from Paul, K8PO, the Boring Amateur Radio Club is happy to announce that the results of the 15th running of the Stew Perry <http://web.jzap.com/k7rat/2010_Stew.htm> event are now available for your viewing pleasure. Don't forget - there will be a Summer Stew <http://web.jzap.com/k7rat/stew.htm> coming up in about five weeks. (Thanks, Tree N6TR)

The recent Georgia QSO Party <http://gqp.contesting.com/Rules.htm> sponsored a special award for contacting seven of the contest's special event 1x1 call signs such that the suffixes spelled G-E-O-R-G-I-A (yes, two "G" stations). The rare vowel "E" turned out to be the difficult letter! (Thanks, Scott KB4KBS)

The claimed scores for the 2011 WPX SSB Contest <http://www.cqwpx.com/claimed.htm?mode=ph> are now available with a record 5,041 logs and paper logs still arriving in the mail. Claimed scores can be sorted by continent and category. A search function is included so you can quickly locate a particular score. The score calculation process is discussed on CQ WPX Director Randy K5ZD's blog <http://www.cqwpx.com/blog/?p=62>.

OPERATING TIP

Clean audio saves time! Tip #1 - the power meter needle should move in sync with your voice peaks, not go to maximum and stay there because you have the processor maxed out. Tip #2 - yelling makes things worse. Tip #3 - clean audio will cut your QSO time by two-thirds. Why? Because everything doesn't have to be repeated and your call sign gets through correctly more often on the first call. Higher average power does not also mean higher intelligibility - too often quite the opposite!

==> TECHNICAL TOPICS AND INFORMATION

When is a bus bar not a bus bar? "The Case of the Noisy Bus Bar <http://www.nxtbook.com/nxtbooks/ubm/designnews_201104/#/68>" - a Sherlock Ohms column the April 2011 issue of "Design News" magazine - takes an interesting turn through antenna theory.

Bill K2TT, Defense Science Board member, writes, "Contesters are heavily dependent on computers coupled to the Internet, and as a consequence, are vulnerable to the increasingly burdensome problem of cyber security. The DoD's National Security Agency (NSA) has published

a useful document for consumer-level cyber security, "Best Practices for Keeping Your Home Network Secure <http://www.nsa.gov/ia/_files/factsheets/Best_Practices_Datasheets.pdf>." This document could be useful for readers of the Contest Update."

The April issue of Scientific American <http://www.scientificamerican.com/> included an article titled, "Solving the Cocktail Party Problem" about extracting just one voice out of many and how hard that is for computers to do. Any phone contester could have told them that! In a similar vein, "Cognitive-Radio Games" in the same month's IEEE Spectrum <http://spectrum.ieee.org/> speaks to the methods by which radios will share crowded spectrum. That one's easy, too - give your full call, always!

Weather maps are all over the web, but what about maps from the past? You're in luck as NOAA has an online archive of weather maps <http://www.hpc.ncep.noaa.gov/dailywxmap/> open to the public. Now you can play back that great tropospheric opening!

An interesting conversation ensued on the Towertalk Reflector <http://lists.contesting.com/mailman/listinfo/towertalk> about digging a square hole ("Mike Mulligan and His Steam Shovel <http://www.houghtonmifflinbooks.com/features/mike_mulligan/>", anyone?) with a wide variety of related (and un-related) topics being explored. Just check the archives for the topic "Digging a Hole with a Backhoe". Where to find operators able to make a nice, square hole? Gravediggers and septic-tank installers were mentioned, the point being to hire someone who digs square or rectangular holes for a living.

Scientists at Stanford University have developed a prototype rechargeable battery <http://www.gizmag.com/rechargeable-battery-freshwater-seawater/18565/> that runs on water. Nanotechnology is used to extract electricity from the difference in salt content between fresh and salt water. Gee, we can extract electricity from on air, water, and fire...if somebody will just add an earthen battery to complete the quartet, Aristotle would be proud!

Technical Web Site of the Week - Mitch WB9IQQ <http://www.tvbgone.com/cfe_mfaire.php>, Jeff "Mightyohm" KF6PBP <http://www.mightyohm.com/>, and Andie Nordgren <http://log.andie.se/> have released a "Soldering Is Easy! <http://mightyohm.com/files/soldercomic/FullSolderComic_20110409.pdf>" comic book. It's fun, and funny, easy to read, and Mitch hopes it will make it really easy for anyone and everyone to learn to solder, even if they've never built anything before. Previously, they developed a single-page comic reference sheet, now in 6 languages, and all Open Source and free for the downloading! (Thanks, Mert AC7KY)

==> CONVERSATION

Ham Hearing Aids

I wear hearing aids in both ears and have for nearly twenty years - even during contests! Here are a few tips and thoughts on hearing aids that might be of interest to those of you who need a little help with your hearing or who aren't getting any younger and thinking about it. Bear in mind that my hearing loss is basically a high-frequency roll-off above a couple of kHz. Your specific need should be evaluated by a professional and may have stronger bearing on what type of hearing aid you need than the following topics.

Digital or Analog? There's not even a question - get digital aids. They use similar signal processing to what we have in our radios, with similar effects on the audio output. This is now the dominant technology and rapidly replacing analog instruments. Your main questions will be about the signal processing features of the signal processing, discussed below. Digital aids act as a multi-band graphic equalizer, very similar to those used in audio systems. In addition, the digital aid will have several "programs" that set up the aid's features in different ways for different environments. The hearing aid technician will explain this to you in detail. It would be a good idea to make it known that you have some technical background so the discussion can take advantage of your expertise.

Behind-the-ear or In-the-ear? I started with behind-the-ear aids because at the time, the smaller in-the-ear aids were too expensive. This has changed, with the new "open ear" style offering a lot of features without the molded housing that goes in the ear canal. I have tried the open-ear style and I do like the sound quality. I changed to in-the-ear aids, however, because placement of the microphone in behind-the-ear aids tends to skew its pattern to above, behind, and to the side of the listener. This may not help with face-to-face conversation and dead-ahead audio sources, such as TV. In-the-ear aids can take advantage of the natural focusing provided by the external ear. Behind-the-ear microphones also don't help as much with most telephone handsets - you have to learn to hold a cell phone farther back so that the speaker is closer to the aid's microphone, for example.

Behind-the-ear aids are also generally quite uncomfortable with earmuff-style headphones that many of us prefer in the radio shack - if they can be worn under earmuffs at all. If you have to take the aids out when wearing headphones, they can't help you with receiver audio. So I wear a mid-sized, in-the-ear aid that has worked out well. Many vendors will let you try open-ear-style aids as way of finding out what features and settings you like whether you buy behind-the-ear or in-the-ear aids.

Signal Processing The first component of audio processing you'll notice is compression or AGC. Compression is good in a hearing aid because it prevents overload and distortion. The price is somewhat increased background noise. In addition, if you are using the aids with a radio the two AGC systems - one in the radio and one in the aid - increase

the amount of compression and the interacting time constants of the compressors can actually hurt intelligibility of the received audio. You'll also notice that just like a ham receiver's DSP, some of the features of the hearing aid will color the audio in perceptible ways. For example, feedback cancellation is a nice feature but it will also try to get rid of single-tone signals like CW! The effects of noise reduction in the hearing aid are also similar to a receiver's DSP. You get used to them and the benefit of reducing noise generally outweighs the presence of artifacts. This is where the different programs of the digital aids become really handy.

While the advanced features are great in normal conversation, they get in the way when on the radio, so be sure to have one program in which compression is turned off along with feedback cancellation and other artifact-inducing features. Say to the technician, "I want one program that only has gain and frequency response correction." If you have enough programs, you might even want to try to set one up for CW and one for voice! It would be a good idea to take an audio player with recorded CW and voice signals to use as the aids are set up for you. The gain-and-frequency response program has also turned out to be the right one for me to use when I'm listening to music, as well.

Selecting a Vendor There are number of good hearing aid companies and the mid-range to high-end hearing aids are all very good. I initially selected independent local hearing aid companies with good prices and excellent service, but both struggled and were eventually purchased by a national manufacturer. My current set of aids is of a national brand with offices in shopping malls around the country. Because I travel frequently, I like knowing an office is probably handy and I have had to get a microphone port unplugged while on the road. Your circumstances will dictate your choice but I strongly recommend making service after the sale a primary evaluation criterion.

Do I Need Them How can you tell if you need a hearing aid? Ask your family for their honest opinion and then listen to what they tell you. "Green-bar guys" are an industry legend, referring to the volume control on the TV that they are always turning up and up and up. Meanwhile, they insist that their hearing is just fine and why does everybody mumble? If you're not hearing the phone, if you can hear someone talking but can't understand what they say, if the pileups all sound like mush - you probably need help with your hearing. One way to experiment before trying a hearing aid is a pocket graphic equalizer, such as the Koss three-band Portable Stereo Equalizers that can be found on the Internet for about $20. Wire it up to your radio or audio player and experiment with the settings. You may find that a little boost on the high frequency channel or dropping the low frequencies helps or maybe just some additional gain is what you need. The cost is low and you'll learn something without having to make an office visit.

Summary All of us are getting older and hearing often takes a hit on the way. Younger hams that have grown-up with ear-buds cranked up to 11

are discovering that those fragile hair cells of the cochlea have worn out early. Meanwhile, the perceived stigma of wearing hearing aids is largely non-existent as people are wearing headphones and earpieces everywhere you look. Good hearing matters not only on the radio but in our personal lives, too, especially to the people around you. Take advantage of what is becoming ubiquitous technology to restore your hearing.

73, Ward N0AX

==> CONTESTS

11 May - 24 May

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Monthly Mini-CWT Test--CW, from May 11, 1300Z to May 12, 0400Z and See Web site, See Web site to , See Web site. Bands (MHz): 3.5-14. Frequencies: Multiple operating periods, twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Exchange: Name, member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

FOC QSO Party--CW, from May 14, 0000Z to May 14, 2359Z. Bands (MHz): 1.8-28. Exchange: Name, FOC member number. Logs due: 7 days. Rules <http://www.g4foc.org/>

EUCW Fraternizing CW QSO Party--CW, from May 14, 1000Z to May 14, 1200Z and May 15, 1800Z to May 15, 2000Z. Bands (MHz): 3.5-28. Frequencies: Multiple operating periods. Exchange: RST, name, club, member number. Logs due: Jun 30. Rules <http://www.agcw.org/>

Alessandro Volta RTTY DX Contest--Digital, from May 14, 1200Z to May 15, 1200Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: Jun 30. Rules <http://www.contestvolta.com/>

Armed Forces Communications Test--Phone,Digital, from May 14, 1200Z to May 15, 2400Z. Bands (MHz): 1.8-28. Frequencies: See Web site for specific station schedules. Exchange: RS(T). Logs due: no logs. Rules <http://www.netcom.army.mil/mars>

CQ-M International DX Contest--Phone,CW, from May 14, 1200Z to May 15, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: 30 days. Rules <http://www.cq-m.andys.ru/>

Nevada Mustang Roundup--Phone,CW,Digital, from May 14, 1700Z to May 15, 1700Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://www.nvqsoparty.info/>

FISTS Spring Sprint--CW, from May 14, 1700Z to May 15, 2100Z. Bands (MHz): 3.5-28. Exchange: RS(T), S/P/C, name, FISTS nr or power. Logs due: 30 days. Rules <http://www.fists.org/sprints.html>

Worked All Britain - LF Phone--Phone, from May 15, 1000Z to May 15, 1400Z. Bands (MHz): 1.8-7. Exchange: RS, serial, and WAB nr or DXCC entity. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/>

NAQCC Monthly QRP Sprint--CW, from May 19, 0030Z to May 19, 0230Z. Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

Feld-Hell Hamvention Sprint--Digital, from May 20, 1500Z to May 20, 1700Z and May 20, 1800Z to May 20, 2000Z. Bands (MHz): 1.8-28. Frequencies: Multiple operating periods; Monthly on 3rd Saturday. Exchange: RST, QTH, Feld-Hell number. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

Portuguese Navy Day--CW/SSB, from May 21, 1500Z to May 22, 1500Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: 20 days. Rules <http://www.nra.pt/>

EU PSK DX Contest--Digital, from May 21, 1200Z to May 22, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and EU area code or serial. Logs due: 30 days. Rules <http://www.eu.srars.org/>

His Majesty King of Spain Contest--CW, from May 21, 1200Z to May 22, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or EA province. Logs due: Jun 10. Rules <http://www.ure.es/>

VHF+ CONTESTS

50 MHz Spring Sprint--Phone,CW,Digital, from May 15, 2300Z to May 15, 0300Z. Bands (MHz): 50. Exchange: Grid Square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

Nevada Mustang Roundup--Phone,CW,Digital, from May 14, 1700Z to May 15, 1700Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://www.nvqsoparty.info/>

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-05-12
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** MoonSked 1.6.3 released **

Another minor update made: New in 1.6.3: Improved software updater -
now downloads directly rather than using browser. New in 1.6.2: Mac &
Windows: Now loads ALL calls from call3.txt, not only "EME" calls -
(Thanks Allan ZS1LS) - Windows: Now uses "Lucida Console" font for
printing schedules which should make the columns line up better.
(Thanks Guy VK2KU) - Updates are free and available either from my
website or from "Check for Updates..." under the Help menu. 73

** K5N at EL58 in 2011--A Grid Bandits DXpedition **

LATEST K5N Activation group announcement, dated 2011-05-11:
Hi all, Getting close to launch..... We will be leaving from Venice on Thursday morning, June 2nd, heading for EL58, leaving on Monday the 6th. Hopefully by noon we will have the station on the air making thousands of contacts.. :) Our frequency will be, for the entire trip, 50.210mc. for ALL modes. 1st sequence for Meteor Scatter always. If we are very lucky, we will be able to get cellular internet, but if not, please check with Pingjockey for updates on when we have switched modes. Joey, W5TFW, should be able to hear us when we change and report. For the team, we hope to work everybody needing this grid and will run continuous for the 4 days, hoping to turn the grid color from orange to green on everyone's need list maps... I forgot to mention our team, sorry guys... Marshall-K5QE, Bill-N5YA, Bob-WN2E, Daniel-KE5KDM, Danny-N5OMG and welcoming our new member, Russ-KB8U... :) At home and our support team: Joey-W5TFW, and Bill-K5YG who will be in contact with us thoughout the trip, and JD-N0IRS with the web support... Our info can be viewed at:
http://kcvhfgridbandits.com/kc_vhf_grid_bandits_044.htm thanks JD.
or email at: k5n"at"bellsouth.net 73 for now...

** DM86 (and maybe DM85) activation briefly on Friday morning, 5/13 **

I'm planning to be in DM86 Thursday (tomorrow, 5/12) night and early Friday (5/13) morning, and am hoping to briefly put DM86 and maybe DM85 on the air. Thursday evening will be SSB, if 6m band is open. Friday morning will be FSK441, roughly 5:30am to 9:30 or 10am CDT. Although I've done a bit of VHF/6m rovering before, I've never done it with FSK441 -- so it is possible something may not work right (especially considering it will be Friday the 13th)! So if it fails for some reason -- my apologies in advance.
Details: Callsign will be NT5HS Thursday evening, 5/12, traveling to

DM86, will be on SSB if band open. Friday morning, 5/13, hope to be on GRID LINE of DM86 + DM85, FSK441, for perhaps 4 hours. Will have 100w + 3 element beam @ 25. Will start on 50.260: CQ 252 NT5HS [maybe include DM86], me 1st, ST on, report, and I'll either skip the 73 or only send it once; after a QSO on 50.252, I'll CQ & listen on 252 for a few minutes, then to back to 260 and CQ as described above (note I will NOT be listening on 50.260) -- will try to point antenna in different directions, more easterly earlier, and tending toward the west later in the 4-hour period. Will try to update PJ an hour in advance, but won't have internet at the location. Will also try to be in same location or possibly DM87 or DM96 7 to 9 days later on return trip. Long details, for those curious:

** special Event CR55PQ qrv HF and 6m **

Algarve STAR DX Team members Miguel CT1EHX, Toze CT1GFK and Mike CT1IUA will be active inside of Portuguese Airborne Troops School celebrating 55th years of this military school on 21-23 May 2011. Callsign will be CR55PQ (CR 55th years Para-Quedistas). QRV on 80-6 metres, using CW, SSB and RTTY. QSL card via CT1EHX, bureau or direct
Website: http://algarvedx.com/
SOURCE: [Algarve STAR DX Team] via via ICPO Bulletin (06-13 May 2011)

** Howard WB4WXE return to St. Lucia / FK93 **

Howard WB4WXE is planning a return to St. Lucia again 25 June- 15 July 2011. Callsign this year will be J68HS. This is a 50 Mhz expedition. However, when 6 meters is quiet, attention will be given to 12m, 17m, 40m, and 160m. Operation site will be at 2,000 foot elevation over looking Soufriere, St. Lucia. Grid square is FK 93. Antennas this year include a 6 element Yagi for 6m, 2 element Yagi for 17m, and full size 1/2 wave vertical for 160m, 40m and 12. Equipment will be an Icom IC-706 with Tokyo Hy-Power HL-550fx 550 watt 1.8-50 mhz amplifier. QSL via QRZ.com for J68HS. An additional 200 watt 50 mhz amplifier will be travelling to J69MV for year round resident activity on 6m. Tot has the 6m Yagi up now so expect to hear bo th callsigns this summer. 73, Howard - SOURCE: Howard WB4WXE via UKSMetre Group Announce

** 6M FM QRP as V25GP in FK97 **

Hello all... Going to be traveling to Antigua. I will be there for the next 10 days. Starting 5/7 to 5/17, mabey longer. I will be V25GP operating a Yaesu VX5-R (at 5w) along with a Diamond SRH940 antenna on 52.525FM. Will be staying in Grid Square FK97BD and BC BUT may be

operating from any of the following FK97CD, BD, BC, BB, CA, CB, DC, DB. 73! Pete KB2DY SOURCE: tnx to Andy, N8OFS, direct to MMMonVHF

** Angola, C9, by Andre C91UA/ZS5UA on SIX Meter **

I have recently started working in Mozambique - grid KG64fb - and am slowly getting a 6m station together - every piece of equipment has to be smuggled in over many trips :) . In the coming week starting 1/5/2011 I will be transmitting low power PSK31 during the evenings and during weekends when not at work. 50w into dipole. At this stage there is no allocation for 50Mhz in Mozambique so will keep the QRO (1kw into 2 6M5 yagi) for when the band opens up and hope no one complains. So if people periodically listens in my direction I would appreciate any feedback. Kind Regards, Andre C91UA/ZS5UA SOURCE: Andre C91UA/ZS5UA via (Sixitalia)

** C2, NAURU, qrv on HF and 50 MHz **

The Pacific-DXer's Web page is reporting that the C21A DXpedition dates have been decided, and plans are progressing. The operation will take place between November 13th and December 7th. Operations will be led by Bill, VK4FW, with liaison support by Eddie VK4AN. They expect to have 6 operators and 3 stations active on all bands 160-6 meters using CW/SSB/RTTY/PSK31. They will also participate in the CQWW DX CW Contest as a M/M or M/2 entry. QSLing will be handled by the Pacific DXers. SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1010

** TM0Z from IOTA EU-105 / IN88AR qrv on HF and 50 MHz **

Operators Joel/F1BLQ, Michel/F5EOT, Eric/F5LOW, Laurent/F5MNK and Bertrand/F6HKA will be active as TM0Z from Batz Island between May 21-26TH. Activity will be on 160-6 meters using CW, SSB and the Digital modes. QSL via F5EOT, direct or by the Bureau. For more details, go to: http://www.frag33.org/www.cdxg.org/homeuk.html SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1010

** Czech OPs qrv from SM, SWEDEN **

A group of operators from the Czech Republic, belonging to the radio clubs OK1ONA/OL1C and OK1KCU, will be active from Sweden between May 14-21st. Team members are OK1IEC, OK1IPS, OK1FPQ, OK1UZW, OK1JAX, OK1JST and OK1HWS. They will stay in a cottage near Vaggeryd. Activity will be on 80-6 meters using CW, SSB and the Digital modes with two stations on the air. Operators will use their home callsigns according to CEPT. QSL via their home callsigns or via OK1ONA/OL1C. A special QSL card will be sent for each QSO. For more info, see:

http://www.ol1c.cz SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1010

** SV9, CRETE in the air on HF and 6m **

Operators Jindrich/OK1AMM, Franta/OK1HH and Bohumil/OK2BOB will be
active as SV9/homecall/p from Agia Marina (Grid. Loc. KM15XM) on the
Island of Crete (EU-015) between 1200z, May 17th and 0300z, May 28th
Activity will be on all bands (mainly 17/12/10/6 meters) using CW
and SSB. The group will operate some days from Gramvousa Island or
Gavdos Island (IOTA EU-187). QSL via their home callsigns.
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1010

** GB0HI from Holy on the air on HF and 6m **

Ricky G0LZX, Paul G0WRE and Kev M0TNX will be active as GB0HI from
Holy/Lindisfarne Island (EU-120) from about 5 UTC on 14 May until
about 5 UTC on the 15th. Plans are to operate SSB with some digital
modes and CW, on 40, 30, 20, 17 and 15, plus 6m if conditions allow.
QSL via M0OXO (see www.m0oxo.com for instructions).
SOURCE: [TNX M0TNX] via 425 DX News #1044

** Lampedusa Island (AF-019) on the air on HF and 6m **

Ezio IK2AHB, Diego IW2MZX, Andrea IZ2AJE, Enzo IZ2GLU and Fabio
IZ2GMT will be active on the HF bands and possibly 6m as IG9E from
Lampedusa Island (AF-019) on 18-23 May. They will operate CW, SSB
and digital modes (PSK31 and RTTY) with three stations. QSL via
IK2AHB, direct or bureau. Log search at www.vbdxc.altervista.org

>From Allen Pitts, W1AGP, Media & PR Manager, ARRL:

This Week In Technology

Announces the launch of

“HAM Nation”

A weekly HD video webcast about Ham Radio featuring interesting guests.
Hosted by Bob Heil, K9EID, they will cover many fascinating aspects of
Amateur Radio each week.

Set your browser to TWIT.TV live on Leo Laporte’s TWIT network

Tuesday Evenings at 8:00 pm CDT (Central)

Join us for the initial episode with special guests

Joe Walsh, WB6ACU And Dave Jennings WJ6W

ARRL Nebraska Section
Section Manager: Arthur I Zygielbaum, K0AIZ

==> + PUBLIC SERVICE: AS WEATHER CLEARS IN SOUTHEAST, HAMS CONTINUE TO
PROVIDE SUPPORT

Even though the storms that raged through the Southeast have long gone,
the damage and heartache they left in their wake are still present. In
Alabama, the state that felt the biggest brunt of the storms, hams made
their way to fire stations, emergency operations centers and shelters
-- anywhere they were told that they were needed.
```

Calling it his first experience with an EF-5 tornado, ARRL Southeastern Division Director Greg Sarratt, W4OZK, said that the devastation is "mind-boggling! ARES® successfully provided a massive amount of critical communications, got repeaters back on the air, with no utility power. It took five days before significant utility power was restored; my power was restored on the evening of Day Six. ARES® has gone above and beyond in supporting multiple government and not-government organizations and conducting many other tasks, all at once. ARES® works!" Read more here <http://www.arrl.org/news/as-weather-clears-in-southeast-hams-continue-to-provide-support>.

==> FCC COMMISSIONER MEREDITH ATTWELL BAKER TO LEAVE FCC IN JUNE

On May 12, FCC Commissioner Meredith Attwell Baker announced that she would be leaving her post on June 3 -- just 27 days before her term expires -- creating a Republican vacancy on the Commission. Chairman Julius Genachowski, along with Commissioners Michael Copps and Mignon Clyburn, are Democrats, while Commissioner Robert McDowell is a Republican. Only three sitting Commissioners may be of the same political party.

Baker was nominated by President Barack Obama on June 25, 2009 and sworn in just five weeks later. She filled the unexpired term of fellow Republican and former Chairman Kevin J. Martin, who resigned in January 2009; her term is set to expire June 30, 2011.

Baker will join Comcast as its Senior Vice President of Government Affairs, NBCUniversal. "I've been privileged to serve in government for the past seven years under President Obama at the FCC and President [George W.] Bush at NTIA," she said in a statement released by Comcast. "I'm excited to embark on a new phase of my career with Comcast and NBCUniversal." Read more here <http://www.arrl.org/news/fcc-commissioner-meredith-attwell-baker-to-leave-fcc-in-june>.

==> + ARRL EXPO AT THE DAYTON HAMVENTION®: WHERE THE DX COMES TO YOU!

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, reports that plans for a plethora of DX activities at the ARRL EXPO -- part of the 2011 Dayton Hamvention® -- are wrapping up. "We are excited about the activities that will be taking place," he said. "Visitors to the EXPO will see a lot of activities relating to DX, including DXCC card checking, a chance to drop off QSL cards for the ARRL Outgoing QSL Bureau and even an expanded International Amateur Radio Union area." The Dayton Hamvention will take place May 20-22 at Hara Arena, located near Dayton, Ohio. Read more here <http://www.arrl.org/news/arrl-expo-at-the-dayton-hamvention-where-the-dx-comes-to-you>.

==> + AMATEUR RADIO IN SPACE: CELEBRATING 50 YEARS OF OSCAR I AND AMATEUR RADIO SATELLITES

By ARRL News Editor S. Khrystyne Keane, K1SFA

1961. It was the middle of the Cold War. John F. Kennedy is inaugurated as the 35th President of the United States. The Bay of Pigs invasion fails in Cuba. The Beatles perform for the first time at the Cavern Club in Liverpool. Freedom Riders are arrested in Jackson, Mississippi for "disturbing the peace" after disembarking from their bus. Construction of the Berlin Wall begins. Roger Maris of the New York Yankees hits his 61st home run in the last game of the season, beating the 34 year old record held by Babe Ruth. Barbie gets a boyfriend when Mattel introduces the Ken doll.

Just four years earlier, the Soviet Union had launched Sputnik I, the first human-made object to orbit the Earth, ushering in the Space Age. For the next 30 years, the Cold War rivalry between the US and the former Soviet Union focused on attaining firsts in space exploration. These were seen as necessary for national security and symbolic of technological and ideological superiority. The "space race" involved pioneering efforts to launch artificial satellites, sub-orbital and orbital human spaceflight around the Earth, as well as piloted voyages to the Moon.

1961. Mercury-Redstone 2 launches into space carrying Ham the Chimp. Soviet cosmonaut Yuri Gagarin becomes the first human in space. Alan Shepard becomes the first American in space aboard Mercury-Redstone 3. Gus Grissom, piloting the Mercury-Redstone 4 capsule Liberty Bell 7, becomes the second American to go into space. OSCAR I -- Orbiting Satellite Carrying Amateur Radio -- the very first Amateur Radio satellite, is launched into space.

Barely four months after the successful launch of Sputnik I, the United States launches the unmanned Explorer I on January 31, 1958. At about that same time, a group of hams on the West Coast -- Lance Ginner, K6GSJ; Chuck Smallhouse, W6MGZ; Ed Beck, K6ZX; Al Diem; Chuck Townes, K6LFH (SK), and Nick Marshall, W6OLO (SK) -- begin toying with the idea of launching an Amateur Radio satellite into orbit and organized themselves into Project OSCAR. After a series of high level exchanges among Project OSCAR members, the ARRL and the US Air Force, a launch opportunity on a Thor DM-21 Agena-B rocket from Vandenberg Air Force Base in California was secured for the very first Amateur Radio satellite: OSCAR I. It was successfully launched into a low Earth orbit on the morning of December 12, 1961 -- four years after the launch of Sputnik I. The satellite was also the world's first non-government bird.

Fifty years -- 1961 to 2011 -- is a long time -- and an important milestone, thought ARRL Lab Test Engineer Bob Allison, WB1GCM. And then he had a lightbulb moment: Why not take the back-up OSCAR I on display at ARRL Headquarters and make it work again? So W1AW Station Manager Joe Carcia, NJ1Q and Allison began tinkering with the satellite, one of three made by Project OSCAR. One of the satellites went up into space in 1961, one is on display at the Smithsonian Air and Space Museum in Washington, DC and the other was until recently sitting in a display

case on the first floor of the HQ building in Newington.

After much trial and error, Carcia finally got OSCAR I to transmit a signal on 145 MHz, just as the original satellite did. "Since specific technical literature on the satellite was unavailable, information taken from 1962 QST and CQ articles assisted in the reconstruction of the transmitter in the ARRL unit," Carcia explained. "Much care was given to salvage the original components, although time had taken its toll on most of the circuitry. As such, although the transmitter functions, the actual keying of the transmitter is performed using a PIC beacon keyer. Power is supplied using a standard wall-cube providing 12 V dc."

In honor of OSCAR I's 50th anniversary, the rebuilt satellite will be on display at the ARRL EXPO area at the Dayton Hamvention, May 20-22 at Hara Arena in Trotwood, Ohio. "We have hooked OSCAR I up to a dummy load running very low power, and as you walk by, you will hear it transmit "HI HI," just as it did 50 years ago," Allison said. Since the transmission does not identify, you won't be able to pick it up on your handheld transceiver while at Hara. Read more here <http://www.arrl.org/news/oscar-i-and-amateur-radio-satellites-celebrating-50-years>.

==> + HONORING AMATEUR RADIO: MAINE HONORS HAMS ON WORLD AMATEUR RADIO DAY

In a joint resolution released on April 14, the Maine House and Senate recognized the nearly 5000 licensed ham radio operators in Maine and their service to the state. The resolution proclaimed April 18 Amateur Radio Day in the state. April 18 was also World Amateur Radio Day, marking the 86th anniversary of the founding of International Amateur Radio Union. Read more here <http://www.arrl.org/news/maine-honors-hams-on-world-amateur-radio-day>.

==> + ON THE AIR: ANNUAL ARMED FORCES DAY CROSSBAND TEST SCHEDULED FOR MAY 14

The Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test in celebration of the 61st anniversary of Armed Forces Day (AFD). Although the actual Armed Forces Day is celebrated on the third Saturday in May -- May 21 in 2011 -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 14 to prevent conflict with the Dayton Hamvention®, scheduled for May 20-22. Read more here <http://www.arrl.org/news/annual-armed-forces-day-crossband-test-scheduled-for-may-14>.

==> AMATEUR RADIO IN THE CLASSROOM: HIGH SCHOOL RADIO CLUB TO OFFER FREE FOXHUNTING TRANSMITTER KITS

Miguel Enriquez, KD7RPP, is an Instructor with the ARRL's Teachers Institute on Wireless Technology, as well as a math and electronics teacher at Pueblo High School in Tucson, Arizona. One of his responsibilities at Pueblo is advising the school's Amateur Radio club. "Our radio club has discovered how much fun ham radio can be as a way to improve the math, science, technology and communications skills of the students," he told the ARRL. "We are also fortunate that the ARRL has been generous in providing us with equipment, materials, supplies and curricula. Without their support, we would not currently be involved in building QRP transceivers, ATV downconverters for our Amateur Television station (W7ATN), underwater robots for mapping lakes recently discovered in caves in the Southwest -- and fox hunt transmitters." Read more here <http://www.arrl.org/news/high-school-radio-club-to-offer-free-foxhunting-transmitter-kits>.

==> AMATEUR RADIO IN THE CLASSROOM: RIT STUDENTS SUCCESSFULLY LAUNCH HIGH ALTITUDE BALLOON

The Rochester Institute of Technology Amateur Radio Club, K2GXT, had a successful launch of RITCHIE-1 -- a custom high altitude balloon designed by members of K2GXT -- at the Imagine RIT Festival on May 7. According to RITARC Vice President Bryce Salmi, KB1LQC, the goal of the launch was not to reach high altitudes to take images, but to engineer a reliable, modular and reusable payload with good engineering practice. "Saturday's launch went perfect," Salmi told the ARRL. "The launch was streamed live to the Internet and a local television station even produced a segment for their newscast on it." The club won the Academic Award for the balloon at the festival. Read more here <http://www.arrl.org/news/rit-students-successfully-launch-high-altitude-balloon>.

==> 2011 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE CALL FOR PAPERS

Technical papers are solicited for presentation at the 30th Annual ARRL/TAPR Digital Communications Conference, to be held September 16-18 in Baltimore, Maryland. Papers will also be published in the Conference Proceedings. Authors do not need to attend the conference to have their papers included in the Proceedings. The submission deadline is July 31, 2011. Read more here <http://www.arrl.org/news/2011-arrl-tapr-digital-communications-conference-call-for-papers>.

==> SOLAR UPDATE

Tad " The Sun ain't gonna shine anymore <http://www.youtube.com/watch?v=2eAxCVTMJ-I>" Cook, K7RA, reports: Currently, we can see six sunspot groups. A new one appeared May 5, then two more on May 8, another two on May 9 and another new one on May 11. The average sunspot number for this week rose nearly 7 points to 74.6 and geomagnetic conditions were quiet all week. But the latest forecast shows unsettled geomagnetic conditions on Thursday (today) with a planetary A index of 15, then 10, 5, 8, 8 and 10 on May 13-17,

then 5 on May 18-25. Solar flux values of 95 are predicted for May 12-17, 100 and 105 on May 18-19 and 110 on May 20-30. NASA had an updated prediction for the peak of Solar Cycle 24 on May 9, and it is 7 points higher -- and one month earlier -- than the April 4 prediction. On April 4, NASA predicted the smallest cycle in 200 years, with a peak smoothed sunspot number of 62 in July 2013. This month, that estimate has been raised to 69, and the peak moved forward one month to June 2013. NASA now says this will likely be the smallest cycle in 100 years, instead of 200. Look for more information on the ARRL website on Friday, May 13. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the Walker Brothers' The Sun Ain't Gonna Shine Anymore <http://en.wikipedia.org/wiki/The_Sun_Ain%27t_Gonna_Shine_%28Anymore%29>.

==> + SILENT KEY: NOTED DXER BEN STEVENSON, W2BXA (SK)

Ben Stevenson, W2BXA, of Colonia, New Jersey, passed away on May 5, 2011. He was 97. An ARRL member since 1934, Stevenson was also a charter member of the North Jersey DX Association (NJDXA) since 1957, serving as its first president. Stevenson held Satellite DXCC #1, Mixed DXCC #6 (390 countries confirmed) and Phone DXCC #6 (388 countries confirmed). Read more here <http://www.arrl.org/news/noted-dxer-ben-stevenson-w2bxa-sk>.

==> THIS WEEK ON THE RADIO

This week:

- May 14 -- FISTS Spring Sprint; FOC QSO Party
- May 14-15 -- Nevada Mustang Roundup; EUCW Fraternizing CW QSO Party; CQ-M International DX Contest; VOLTA WW RTTY Contest; 50 MHz Spring Sprint
- May 16 -- Run for the Bacon QRP Contest
- May 19 -- NAQCC Straight Key/Bug Sprint

Next week:

- May 20 -- Feld Hell Sprint
- May 21-22 -- UN DX Contest; Aegean RTTY Contest; His Majesty King of Spain Contest (CW); EU PSK DX Contest; Baltic Contest
- May 25 -- SKCC Sprint
- May 25-26 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

WIANEWS WEEK COMMENCING May 15 2011.

Your news crew this week, Bob VK6POP, John VK6FB, Onno VK6FLAB and Dennis
VK6KAD.

WIa Director Phil Adams reports on the National Field Day.

The School Of The Air celebrates 60 years on air.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAY 15.

SCHOOL DAYS

This week Australia's School of the Air celebrated 60 years since its first
lesson from Alice Springs Royal Flying Doctor Base was transmitted.

June is officially the anniversary but students have travelled to the Alice
to take part in special events throughout the week.

Before the School of the Air, students from outback areas had to attend
boarding schools or do their school work by mail.

Organiser Belinda Pearson says the anniversary is a time to reflect on the
changes technology has made to School of the Air operations.

"We've got families in our schools where the mums and dads started off in the radio days," she said. "Kids are now sitting in front of computers, speaking with their teachers and their classmates via video-conferencing."

Digital radio bid

Tasmania's two major cities could have digital radio within a year if an application by Commercial Radio Australia is successful.

The organisation is applying to Regional Development Australia to fund digital broadcasting services in Hobart and Launceston.

Hobart was the only capital city to be excluded when digital radio was rolled out to mainland capital cities in 2009.

So many new things and benefits as a result of digital radio, in the same way that digital television has offered opportunities for Tasmanian viewers.

If successful, the application would see Launceston become the first non-capital city to receive digital radio in Australia.

(Darwin via Grant Broadcasters is currently under trial with DAB+)

WIA

FROM ANDERSSON HOUSE THE WEEKLY WIA DIRECTORS SPOT.

WIA National Field Day - Future Directions

Many radio clubs and individuals have now contributed to the success of the WIA National Field Day under the banner of Tune-In To The World - Amateur Radio Gets People Talking.

You should be proud of the publicity generated by your efforts.

The WIA National Field Day has now promoted amateur radio to the general public twice in the last 6 months. Many people are now more aware of our activities and some have even started to study or enrolled in your Amateur Radio courses.

I would firstly like to thank the WIA National Field Day committee consisting of Paul VK5PH, Gerard VK5ZQV and Fred VK3DAC, for the effort in guiding the first two National Field Days.

Regretfully, Paul has tendered his resignation from the committee to further pursue his family, scouting and other ar interests. I wish him good luck for the future. My thanks is also extended to Jim VK3PC, Graham VK4BB and Robert VK3DN for their work in publicising the event.

Some people have asked about the participation certificates and I am pleased to report that both the inaugural 2010 and certificates for the 2011 events are now being prepared. I apologise for the delay in the production of these certificates.

The date for submitting the Logs, Reports and Photos of the 2011 event was last Friday the 13th of May and the work of reviewing your recent efforts has already commenced.

The results and some of the photos will be published in both AR and via wia.org.au

Looking forward, I invite clubs and individuals to consider the ongoing development of the WIA National Field Day including the event name and catch phrase or slogan. Some comments have been received with the reports submitted.

I now invite interested individuals and clubs to submit your ideas that may assist to determine the future direction of this important amateur radio publicity event. Your input is requested by the 30th of June. I would also be pleased to hear your ideas in Darwin at the WIA Annual Conference.

Thank -you Philip Adams - VK3JNI

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

In progressing the emergency communications training program, the Wireless Institute has suggested a name for the program.

http://www.wia.org.au/newsevents/news/2011/20110510-1/index.php

In keeping with the name of a previous Army wireless network, the acronym of RAVEN is suggested. Already reaction has been experienced as the last letter stands for network. Some of the adherents of the existing WICEN groups are worried that this might suggest the Institute is preparing to displace WICEN.

Here, it seems to me, that the Institute has always been extremely clear that the intention has been provide the community with suitably trained amateurs to help in emergency and to support those volunteers with training, accreditation and insurance. The Institute has specifically stated it does not intend to replace WICEN.

What we need to do is make sure of our facts, otherwise we end up with just a crow and not a RAVEN. Our radio spectrum is vast and precious commodity and to restate on old axiom, it's up to the amateurs to "use it or lose it."

I'm Geoff Emery and that's what I think....how about you?

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'Day again from Far North Queensland, where the wet season is finally drawing to a close and the cooler days are starting, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

At the April TREC meeting Ron Goodhew VK4EMF gave an update on the historical radio station XQA which will be on permanent display at the Mareeba Heritage Museum on the Atherton Tablelands.

Ron has been instrumental in acquiring and setting up this fascinating display of the first licensed Queensland Amateur Radio station (a spark gap station) that was operated by Marcus Brims in Mareeba in 1914. It is believed that the station is basically still in an operational condition.

Last weekend TREC members provided communications and check point manning for the Far North Endurance Riders in the Wondecla region of the Atherton Tablelands. A great day out in the bush was had by all.

The 2011 get together of North Queensland and Far North Queensland amateurs, FNNQARG, that was to be held over the Queen's birthday weekend has been cancelled due to damage caused by Cyclone Yasi to Kurrimine Beach in February.

Well that's your lot for this week.

Visit the revamped TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to QNEWS. Travel Well!

TRG activate Mount Fox

Members and friends of the Tablelands Radio Group will be spending some time on the wallaby to Mount Fox around this weekend of 14th and 15th of May, involved with some serious loafing, inspecting and helping out at Rob/VK4ARQ QTH, tromping around the Volcanic Crater, cooking up some mouth watering meals and - doing a bit of HF, VHF and UHF DX using lots of modes of operation.

Keep a listen out for the group this weekend and during the week to come.

(tarc)

NQ Amateur Radio Convention Date

Arguably the "stellar event" in the Radio Amateur calendar.

The 20th Bi-ennial North Queensland Amateur Radio Convention will be happening in Townsville from Fri afternoon 16th to Sunday afternoon 18th September.

The next Convention Planning Session will be happening on Tuesday 17th May from 7-30pm at the TARC Club Rooms. All welcome to attend.

VK5

Good morning this is Charles VK5HD for the South East Radio Group.

This year our annual radio convention will be held on Sunday the 12th of June.

Yes one day only.

The scout hall on Margaret Street will open at 10am and close at 2pm.
The scout hall is located behind the Mount Gambier Police Station.
Entry fee is $5.

The Australian Fox Hunting Championships are also being held in Mount Gambier on the same weekend. The Fox Hunting action starts on the Saturday and goes for two days. Check out the SERG website for more details.

I hope to see you there

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

At age 8, Deltona girl is among youngest ham-radio operators

When many kids her age are learning texting abbreviations such as R O F L or G R 8 T, 8-year-old Mikaila Williams is focused on K K 4 B F K.

"KK4BFK, CQ?" she spoke into the microphone at her Deltona home in the USA, a little timidly but with a big, hopeful smile.

Mikaila is thought to be the youngest ham-radio operator in Central Florida, and she ranks among the youngest in the country holding the general license for amateur radio.

Although ham radios may seem outdated in an era of smartphones and Twitter, hobbyists remain devoted to their frequencies, enjoying the chance for random chatter while standing by to use the airwaves in an emergency.

NIAGARA GAZETTE

Reading a column in this paper the other day, Bob Confer writes a great expose on the joys of Ham Radio.

The Internet has made the world a smaller place. We can log on to our email and Facebook accounts and share messages with friends and family around the globe. We can use Skype to see and talk to them from the comfort of our homes. It's like the futuristic technology that was once a part of sci-fi movies is here now.

Even so, Bob writes, "there's still a place for the old-fashioned ways of doing things. There's little that's more exciting from a communications hobby standpoint than talking around the world with a two-way radio."

He recently got his radio license KC2ZZW after years of letting lapse a hobby he started and was licensed for back in junior high.

Worth a read, and a copy is on the net right now!

http://niagara-gazette.com/opinion/x264245690/CONFER-The-original-instant-messaging

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Automatic meter reading on 169 MHz

What is claimed to be the world's first long range 169 MHz Automatic Meter Reading module has been released, operating in the new harmonized frequency band for meter reading in the British Isles and Europe.

The typical range is claimed to be 1.5 km in urban areas and 20 to 40 km in open terrain with quarter-wave antennas. The module supports two-way communication at 2.4 and 4.8 kbps in 6 narrowband channels, and 38.4 kbps in a 50 kHz channel.

Wireless solutions such as this are a far better approach to reading meters than using the polluting PLT technology.

HAM AID

The ARRL's Ham Aid Fund has been tapped to aid Amateur Radio operations in Alabama, following the wake of destructive killer tornadoes that ravaged the US state a week or so back.

According to ARRL Chief Development Officer Mary Hobart, K1MMH, hams in Alabama have requested radios and antennas since cell tower sites and repeaters have been damaged and are not yet back up. "The ARRL has already shipped five cases to the state, full of 2 meter, 440 MHz and HF radios, as well as two cases of handheld transceivers with batteries," K1MMH said. "We anticipate the demand for equipment may continue from Alabama and possibly from neighbouring states."

Mary Hobart said that she knows that not every ham can be in Alabama to help out, but every ham can support the effort -- by contributing to the ARRL's Ham Aid Fund: "First created in response to Hurricane Katrina in 2005, the Ham Aid Fund has enabled ARRL to provide vital communication equipment to devastated areas along the Gulf Coast.

Commercial radio in the USA is stepping up to promote amateur radio in times of disaster.

These recent devastating tornadoes in the South are yet another reminder of how vulnerable our communities &#65533; and their communications systems &#65533; are. But when all else fails, amateur radio works.

The American Radio Relay League has produced an advert to help recruit new amateur radio operators who can assist first responders and victims in times of crisis .

The spot was produced and is voiced by WABC Radio's legendary Johnny Donovan, himself an amateur radio operator

RUSSIAN VOCODER RETURNS TO 15 METERS

The Russian vocoder system known as Yakhta has appeared again on the 15 meter band. Its been heard and logged by an IARU Region 1 monitoring station on 21.001.5 kHz. Its running F1B in band key-synchronized at 100 baud s and 150 Hz shift. The F1B has been active daily and at times encrypted voice transmissions have also been heard.

The German Department of Post and Telecommunications has filed another complaint about the system. The first was made back in 2010 when it was active from the same location and on the same frequency.

(Measure twice - Cut once!)

The Software Defined Radio Club

A new website dedicated to Software Defined Radio is due to launch soon.

The website, called The SDR Club, is the brainchild of Adrian 2E0SDR, who says the idea is to create a global community dedicated to the technology of Software Defined Radio. Membership is FREE... (and why wouldn't it be)?

The site is being run as a dedicated Portal with all members being able to add content to the site. Kit suppliers and manufacturers of SDR products are welcome to advertise their products on the site.

Also hosting to any group or project that wishes to work out of the site, in return for content.

The site officially launches on 1st June, but people are free to register and add content before then if they wish too.

Amateur Radio Newsline(tm) Report 1761 - May 13 2011

The following is a closed circuit advisory. With a word concerning Newsline's current finances, here's our Producer Bill Pasternak, WA6ITF.

--

It's been almost 6 months since I was here to ask for financial support for Amateur Radio Newsline. Thanks to donations made through late last year we have been able to keep from bothering you for a while. And in all honesty, I prefer not to make these requests unless it's absolutely necessary as it takes time that could be better spent reporting the news.

But now its spring and all the bills from last winter have been mounting up. And, as usual, we are at the time of year when there is really not very much left in the treasury to pay them. Eventually they have got to get paid or these news reports will cease. Unfortunately, that time is now.

So how can you help? Simply take a few moments to send a donation to the Amateur Radio Newsline support fund so that we can keep these newscasts coming your way. Making a contribution is only a mouse click away if you have Pay Pal. Just go to www.arnewsline.org, scroll to the bottom of the page and click on the button marked "Make Donation." Or you can send in a contribution by mail to the Amateur Radio Newsline Support Fund, 28197 Robin Avenue, Saugus California, 91350.

Whichever way you choose, the all volunteer crew at the Amateur Radio Newsline will be eternally grateful and these newscasts will be here for you, week after week.

Once again that's the Amateur Radio Newsline Support Fund, Amateur Radio Newsline Support Fund, 28197 Robin Avenue, Saugus California, 91350. Or by Pay Pal at www.arnewsline.org

For the Support Fund, I'm Bill Pasternak, WA6ITF. Jeff.

--

Than you Bill. Now, Amateur Radio Newsline report number 1761 with a release date of Friday, May 13, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC rolls out its new Personal Localized Alerting Network and says that New York City will have it first; an experimental 4 meter beacon takes to the airwaves here in the United

States, Hamvention opens its doors on Friday May 20th, Bob Heil, K9EID to have his own weekly Internet television show about ham radio and those scary Pythons are on the radio. Its not Monty Python we are talking about but you can find out the details are on Amateur Radio Newsline(tm) report number 1761 coming your way right now.

**

RESCUE RADIO: FCC SAYS ALERT WILL BE IN OPERATION 6 MONTHS EARLY IN NYC

Smartphone and other GPS enabled mobile device users in the New York City will be the first in the United States to receive emergency alerts on their handsets. This with word that the new FCC inspired Personal Localized Alerting Network or PLAN system will be inaugurated in the Big Apple by the end of the year.

Once in operation, it will deliver geographically targeted text messages to GPS-enabled cellular telephones. The new system will be used for just three types of alerts. These are ones issued by the president, alters of a life-threatening and AMBER Alerts in search of kidnapped or missing children. Participating carriers can opt out of all but the Presidential alerts.

Back in 2006 Congress directed the Federal Communications Commission to set a deadline for implementing a mobile emergency warning system. The FCC established set an April 2012 end date for participating carriers to launch the service. It will be up and running six months prior to that in New York City.

The mobile alert system was created to complement the Emergency Alert System that issues alerts using the long established broadcast TV, radio and cable delivery infrastructure. That system is in the process of being updated to handle a Common Alerting Protocol from notifying agencies.

Already, AT&T, Sprint, T-Mobile and Verizon are on board in New York, where a late-2011 launch was announced on Tuesday, May 10th. (FCC)

**

EMERGING TECHNOLOGY: EXPERIMENTAL US 70 MHZ BEACON ON THE AIR

A new 70 Mhz beacon is on the air from the United States East coast operating under a non-amateur experimental license and signing the call WE9XUP. Its operating frequency is 70.005 MHz with its location atop Apple Orchard Mountain in Bedford, Virginia at some 4200 feet above sea level. That's Grid Square FMO7fm for those of you who chase grid squares.

WE9XUP is currently scheduled to run 24 hours a day until September 1st transmitting in Morse. Its primary purpose is that of propagation

study including trans-Atlantic E-skip. Reception reports go to Brian Justin via e-mail at WA1ZMS (at) arrl (dot) net.

WORLDBEAT: WORLD RADIO DAY FEATURED ON GERMAN TV

World Amateur Radio Day took place on April 18th and was featured on German regional news reports by broadcasters WDR, NDR and HR. All three covered the day in news packages where viewers saw 3 minute reports about radio amateurs in the cities of Bonn, Flensburg, Kassel and about one in a mountain hut near Wetzlar. As a result of the TV coverage over half a million people throughout Germany got a rather positive insight into the hobby. The theme for World Amateur Radio Day this year was "Amateur Radio: The first technology-based social network."

(Southgate)

**

WORLDBEAT: UK DIGITAL RADIO BROADCASTING TO BE DELAYED

The London Daily Mail newspaper reports that the United Kingdom has abandoned the 2015 target date to phase out analog F-M radio broadcasting in favor of all digital transmissions. The newspaper cites a leaked government memo that reportedly suggests that a 2017 start is more likely, and that loss of analog services probably would have to be phased in by region over several more years.

According to the newspaper, the new digital radio technology has failed to grip the public's imagination as the shift to digital TV did. It notes that there is opposition from FM loyalists who cannot see the point of moving the major stations off the analog service. It also estimates that 130 million analog radios would be made instantly obsolete by the locked in 2015 changeover date.

But there appear to be other reasons as well. The UK uses DAB digital radio technology that requires different spectrum than analog FM. Regulators also want stations using the DAB technology share digital transmission facilities. But says the leaked memo, the UK radio industry probably can't afford the transmitter infrastructure costs associated with a digital switchover before 2017. Part of the problem seems to be the need to build out local digital radio to match the coverage area of the analog FM stations. (RW, Daily Mail)

THE SOCIAL SCENE: THE DAYTON HAMVENTION SET TO OPEN MAY 20

The Dayton Hamvention is set to open on Friday, May 20th and this year the planers have added something new. Use of social media to build excitement for the event. Josh Long, KD8BVB, is this years Assistant General Chairman who recently spoke to Hap Holly, KC9RP, of the Rain Report:

--

KD8BVB: "We are advertising of coarse in all of the amateur radio magazines but this year we also started out into social media. You can find Hamvention now on Facebook, Twitter and YouTube where we are literally engaging thousands of attendees and volunteers on there. Wr have give-aways and we solicit volunteers."

--

The 2011 Dayton Hamvention runs the weekend of May 20th to the 22nd at the HARA Arena in suburban Dayton, Ohio. Amateur Radio Newsline will be hosting the annual Ham Radio Town Meeting on Saturday the 21st from 11:45 a.m. to 2 p.m. in Meeting Room 2. Our topic this year is titled How to Make a Ham Radio Video in the 21st Century.

We will have some top names in movie making to show you how to use video to let the world know more about our service and hobby. If you have your own home made ham radio video, please bring it along on DVD and we will be happy to show it and then to critique it for you as time allows.

Again, that's the Ham Radio Town Meeting on Saturday the 21st from 11:45 a.m. to 2 p.m. in Hara Arena Meeting Room 2. We hope to see you there. (ARNewsline(tm), Audio courtesy of The RainReport)

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION FOR ALLEGED SALE OF CELLPHONE AND GPS BLOCKERS

The FCC has issued an Official Citation to Internet retailer GadgetTown.com. This for allegedly marketing in the United States unauthorized radio frequency cell phone signal blockers and GPS signal jammers in violation of section 302(b) of the Communications Act, and section 2.803 of the Commission's rules. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Cellular telephone and GPS jamming devices are illegal in the USA. And according to the Citation, its this law that lead its Enforcement Bureau initiated an investigation of GadgetTown and its marketing of several unauthorized radio frequency devices in the United States.

These are identified as the Cigarette Case Cell Phone Signal Blocker, the Portable Cell Phone Signal Blocker, the 60 M Range Mountable Cell Phone Signal Blocker and the Portable Anti-Tracker GPS Signal Jammer Blocker.

The staff of the Bureau's Spectrum Enforcement Division observed that GadgetTown offered for sale the four signal jamming devices over company's web site. On July 23, 2010, the Division issued a letter of inquiry to GadgetTown regarding those products.

The company responded to the letter on August 31, 2010 at which time it stated that it marketed the aforementioned signal jamming devices between July 1, 2010 and July 22, 2010, selling a total of 15 signal jamming devices to U.S. consumers during that period.8 In addition, GadgetTown identified the supplier and quantity of each device sold and explained that it did not manufacture any of the devices, but shipped the products directly from Shenzhen, China. Finally, GadgetTown stated that it was not aware of regulations prohibiting the import and sale of the signal jamming devices, and that since receiving notification from the Commission, it has taken steps to ensure that there will be no further prohibited items imported into the United States.

But that was not good enough for the FCC. In the citation, the regulatory agency ordered that GadgetTown should take immediate steps to avoid any recurrence of this type of incident. It noted that jamming devices such as these pose significant risks to public safety and other radio communications services. It also warned GadgetTown that if after receipt of the Citation, the company violates the Communications Act or the agency's Rules by engaging in future sales of these devices that the Commission may impose monetary forfeitures.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

GadgetTown was given thirty calendar days after the May 4th release date of the Citation to file a response. (FCC)

ENFORCEMENT: FCC AFFIRMS $10000 FINE TO OKLAHOMA LPFM

A $10,000 fine issued to the Enid Public Radio Association, licensee of a low-power FM radio station in Enid, Oklahoma, has progressed to a Forfeiture Order.

The penalty, originally issued in July 2010, was for airing commercials rather than underwriting announcements and for operating at an antenna height greater than authorized. KEIF-LP was fined $5,000 for selling advertisements and $5,000 for broadcasting from an antenna that was almost double the legal height.

The commission announced the affirmation of the Forfeiture Order in late April. This after noting that nobody representing KEIF had not disputed the findings nor tried to get the fine reduced or cancelled. Therefore there was no basis on which to change the proposed penalty and the FCC must impose the total fine of $10,000.

The station was given the customary 30 days from the confirmation of the Forfeiture Order to pay or to file an appeal. Another broadcaster, Chisholm Trail Broadcasting Co., had complained to the commission about the violations. (FCC)

**

RADIO LAW: PROPOSED REVISIONS TO CALIFORNIA ANTI-CELLPHONE WHILE DRIVING LAW COULD COST VIOLATORS BIG BUCKS

If you get caught talking or texting on a cellular telephone phone behind the wheel in California, some lawmakers say it should cost you even more money along with a penalty attached to your driving record. And they have introduced legislation to make it happen. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

A proposed hike in the penalties imposed on driving while using anything other than a hands-free device could end up totaling hundreds of dollars for drivers caught violating the states ceellphone and texting while driving ban.

If the bill becomes law, the current $20 cell phone ticket will increase to $50. But when you add in court costs and other administrative fees, a violation may ultimately total up to $300 or more. A second offense would push this fine up to $500 or more.

But that's not all. In addition to the fine the proposal would also add on one point penalty to a drivers file with the Department of Motor Vehicles each time a conviction occurrs. This in turn could lead to significantly higher insurance rates since many if not all automotive insurers quote prices based on a persons driving record.

Also targeted by the revised law would be those who ride bicycles or other non-motorized vehicles. The new law would penalize them with the same fines for pedaling and talking or texting on their phones while in motion.

It should be noted that the current California hands-free rule has no provision to exclude radio amateurs, C-B operators or others who use two way radios in their vehicles, but to date that aspect of the rule has not been widely enforced.

Im Jim Davis, W2JKD.

--

If enacted as proposed it would become one of the nations toughest anti-cellphone while driving law. (Published news reports)

**

HAM MILESTONES: SOTA PASSES MILLIONTH QSO

Some big news for hams who like to operate portable off of tall rocks called mountains. Here's Jeramy Boot, G4NJH with the details:

--

Summits on the Air recently passed a significant milestone with its millionth QSO being made over the recent holiday period.

SOTA started in 2002 and has now grown into a worldwide award scheme with 55 associations across the world and around 44,000 qualifying summits.

I'm Jeramy Boot and you are tuned to the Amateur Radio Newsline.

--

For more information on the scheme, check out the internet at www.sota.org.uk. (GB2RS)

**

RADIO CHANGES: W8BBA FALLS SILENT AFTER 50 YEARS SERVICE TO VETERANS

Amateur station W8BAA located at the Veterans Administration Hospital in Brecksville Ohio fell silent on April 29th after at least 50 years of service to veterans.

The Brecksville VA hospital operations are being moved to the main Cleveland VA hospital and he Brecksville radio club equipment is being transferred to the radio room at that facility. The club call at the main hospital is WA8VA. (W8KBF)

NAMES IN THE NEWS: HAM NATION WITH K9EID PREMIERES MAY 24

Amateur Radio's Mr. Audio, Bob Heil, K9EID, will be hosting a new weekly HD video webcast about our hobby titled Ham Nation. According to Bob, each weeks Ham Nation will feature interesting guests as they discuss the many fascinating aspects of the hobby.

The shows premiere on May 24th will have famed rock guitarist Joe Walsh, WB6ACU, and broadcast facility designer Dave Jennings, WJ6W, as Bob's special guests. Jennings is one of the hosts of the Amplitude Modulation International net that meets every Wednesday on 3870 kHz.

Ham Nation will air Tuesday evenings at 9 p.m. Eastern, 8 p.m. Central and 6 p.m. Pacific time on Leo Laporte's TWIT TV Internet network. To tune in, please take your web browser to live.twit.tv and join the fun. (K9EID)

WORLDBEAT: RADIO NETHERLANDS UPGRADES MADAGASCAR RELAY STATION

One of the worlds best known shortwave broadcasters is upgrading its relay site in Madagascar. Felix Scerri, VK4FUQ, of the WIA News is there with the details:

--

Radio Netherlands Worldwide management has confirmed the purchase of three 500 kW short-wave transmitters from the recently-closed short-wave site at Horby in Sweden. The transmitters are currently being dismantled for shipment to RNW's station in Madagascar.

Recently, RNW management announced that it intended to speed up the process of replacing short-wave with other distribution platforms, including the closure of its relay stations in Bonaire and Madagascar. The Bonaire facility is scheduled for closure at the end of October 2012, but no closure date has yet been decided for Madagascar.

However, late last year RNW decided it was time to replace the nearly 40-year-old Philips transmitters at Madagascar. Rather than invest in new transmitters, the opportunity was taken to purchase the three ABB transmitters from the Swedish station at H"rby which was closed at the end of last year. These were installed in 1993.

For the WIA News, I'm Felix, VK4FUQ.

--

No date has been announced as to when the new transmitters will take to the air from the Radio Netherlands Madagascar relay site. (WIA News)

**

ON THE AIR: GB6COD TO CELEBRATE COLLINGWOOD OPEN DAY

On the air, the United Kingdom's Royal Naval Amateur Radio Society will run a special event station on the H.M.S. Collingwood on Saturday June 4th. The callsign to be used is GB6COD which stands for Collingwood Open Day. The station will be operational on all amateur bands from 1.8MHz through 440 MHz. The Society headquarters station will also be open for viewing from 9.30am to 6pm the same day. The open day will also feature the Royal Navy Field Gun Competition. (GB2RS)

**

ON THE AIR: COMMEMORATING THE TURKISH WAR OF INDEPENDENCE

Two special event stations will be active in May to commemorate the start of the Turkish War of Independence and the 130th anniversary of the birth of Mustafa Kemal Atat&#65533;rk. Between May 16th and May 22nd listen out for TC130ATA. On the 18th, 19th and 20th TC1919ATA is the call to look for. QSL each as directed on the air. (Southgate)

**

HAM CELEBRATIONS: 50 YEARS OF IOTA

2014 marks the 50th anniversary of the launch of the Islands On The Air Program by British SWL Geoff Watts. As a build-up to celebrations on this occasion, the RSGB Islands On The Air Manager and Committee have announced an exciting activity period in which all licensed amateurs world-wide are invited to participate.

For a two-year period during 2012 and 2013, Islands On The Air chasers are encouraged to contact as many different IOTA groups as possible. Also, for hams so inclined to play their part by operating from as many groups as possible, with special emphasis on the less-frequently activated ones.

The complete rules of the Islands On The Air 50th Anniversary Marathon will appear in the forthcoming RSGB IOTA Directory to be released at the Dayton Hamvention. They can also be on-line at www.g3kma.dsl.pipex.com (G3KMA)

**

DX

In DX, the he Jan Mayen DXpedition led by SQ8X scheduled for July 6th to the 14th has announced that their callsigbn while on the island will be their group's callsign will be JX5O instead of JX7VPA as first announced. The DXpedition will focus on 30 through 6 meters operating CW, RTTY, PSK, with some SSB if conditions permit. Accompanying the operators will be a television production crew is coming to produce a broadcast documentary about the ham radio project and the island. Updated details and QSL route are available janmayen2011 dot org

Members of the Algarve Star DX Team will be active as CR55PQ from the inside of Portuguese Airborne Troops School between May 21st and the 23rd. This, to celebrate 55 years of operation at this military school. Operations will be on 80 through 6 meters using CW, SSB and RTTY. QSL to CT1EHX, either via the bureau or direct.

The Radio Club de los Andes reports that its station LU8YE will be on the air on May 20th to the 22nd from Meliquina Lake which is located at 45 Kilometers from the city of San Martin de los Andes. Operation will be on 80 through 10 meters using SSB and CW. QSL's for in country contacts go to LU8YE. DX contacts are via EA7FTR

W5FJG reports that he has been assigned to work on Midway Island as the Chief Communications Officer. He was scheduled to arrive last week with an Icom IC-7000 but no antenna or power supply. He says he is working to get this modest station on the air stroke KH4 and hopes to be on the air no later then June 1st. His assignment is open ended, and he will be on Midway for at least one year. Operation should be from 6 through 40 meters on SSB, CW, RTTY and other digital modes. He says that he will provide a QSL route and operating times at a later date.

Lastly, N5OMG says that the K5N Activation Group will be leaving from Venice on Thursday morning, June 2nd, heading for Grid Square EL58. This, to activate 6 meters in an all out effort to make this rare grid available to as many operators as they can make contact with. They are hoping to be on the air by noon local time operating all modes up the band a bit on 50.210 Mhz. First up will be a Meteor Scatter attempt followed by all other modes. This operation is slated to last four days. No QSL information is available as we go to air.

(Above from various DX news sources)

**

THAT FINAL ITEM: SNAKES ON THE RADIO

And finally this week, the story of a research program that's putting snakes on the radio. Well, kind of. Here's Graham Kemp, VK4BB, of the WIA News with the slithering details:

--

Snakes have a face only a mother could love, but that hasn't stopped PhD student Melissa Bruton, from the University of Queensland's School of Geography, Planning and Environmental Management from getting up close and personal.

Melissa was recently awarded a grant by the Wildlife Preservation Society of Queensland to support her research into reptiles in the southern Brigalow Belt region of Queensland and New South Wales.

Melissa has a particular interest in the elusive Woma Python. To do this, she be implanting radio-transmitters into the body cavity of several larger pythons and radio-tracking them for one year each.

After finishing just one summer of trapping Ms Bruton already has eight Woma Pythons to study.

The tracked womas are quite mobile but early indications are that they return to preferred burrow sites. Each Woma will be tracked every second day for a minimum of 12 months so we will know a lot more about these elusive pythons in 12 months' time.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News reporting from Brisbane Australia.

--

Many have seen the movie Snakes on a Plane but snakes on the radio makes a lot more sense. At least in his particular case. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline(at)arnewsline(dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, Jeff Clark, K8JAC, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 15th May 2011

The news headlines:

* New Amateur Radio Observation Service appointment

* SDR club launched

* New US 4m band beacon

At the last Board meeting, Brian Reay, G8OSN was appointed to lead the Amateur Radio Observation Service. The Board would like to thank his predecessor Tony Selmes, G4KLF, who has retired from the post after many years managing the service. AROS is an advisory and reporting service of the RSGB that is intended to assist radio amateurs and others who may be affected by problems that occur within the amateur bands or that develop on other frequencies as a result of amateur transmissions. The service investigates reports of licence infringements, or instances of poor operating practice that might bring the amateur service into disrepute. Reports, complaints and associated supplementary information are accepted from any source and the content of each communication is regarded as confidential material. Brian has e-mailed all Observers for whom he has a current e-mail address. If you are an Observer and have not received an e- mail from Brian regarding his appointment, please e-mail him on aros@rsgb.org.uk. Those interested in becoming an Observer should contact Brian on using this e-mail address.

A new online Software Defined Radio Club has been launched by Adrian, 2E0SDR and can be found at www.softwaredefinedradio.co.uk. The idea is to create a global community dedicated to the technology of software defined radio and membership is free. The site is being run as a dedicated portal with all members being able to add content to the site.

70MHz is not an amateur band in the USA, but European stations may try to listen for a new 4 metre band Radio Science E-skip Trans-Atlantic propagation beacon from the East Coast of the US. Its operating frequency is 70.005MHz. WE9XUP is located at FM07fm and transmits CW. Any amateur or SWL reports are welcome via e-mail to WA1ZMS@ARRL.NET. The beacon is scheduled to run 24 hours a day until 1 September.

Bletchley Park Trust has opened a new exhibition commemorating the 70th anniversary of the capture of an Enigma machine and codebooks from

German U-boat 110 that took place 70 years ago. The exhibition contains photographs of the capture and it is the first time all known photos have been exhibited together at the same time. The exhibition tells the full story including many of the details that appeared in the best selling book on the capture of the Enigma code. For visitor information, contact 01908 640404, or go to www.bletchleypark.org.uk.

Illegal church broadcasts have been heard on 28.265MHz in Germany and amateurs are requested to listen on this frequency in order to identify the location. Please send any reports to Ger McNamara, EI4GXB, IARU Monitoring System Co-ordinator by e-mail to ei4gxb@gmail.com. AMSAT-UK is now active on Twitter. AMSAT-UK is a voluntary organisation that supports the design and building of equipment for amateur radio satellites. You can find AMSAT-UK on Twitter as @AMSAT_UK.

And now for the details of rallies and events for the coming week

Today, Sunday 15 May, sees the National Vintage Communications Fair taking place at the Warwickshire Exhibition Centre, The Fosse, Fosse Way, Leamington Spa CV31 1XN. Doors open at 10am and there is free car parking on site. Entry is £6 and there will be plenty of trade stands and special interest groups as well as catering services. Details by e-mail from info@nvcf.org.uk.

The 1st Leicester RS Grand Clearance and Bring & Buy will be held on 22 May at the Leicester Radio Society HQ, Groby Road, Leicester. There is approximately £2000 of donated radio equipment for disposal as well as a Bring & Buy. Doors open 10am to 4pm. Details of equipment available and further details from Alex on 0753 120 1640.

Also on 22 May, the Dunstable Downs Radio Club National Amateur Radio Car Boot Sale will be held at Stockwood Park, Luton LU1 5NR. Talk in will be on S22 and there is plenty of car parking. Doors open at 9am and entry is £2.

Sunday 22 May sees the Mid Ulster Amateur Radio Club Rally and Boot Sale take place at Drumgor Youth Centre, Drumgor Heights, Craigavon, BT65 4AP. Doors open at 11am and there is plenty of car prking on site. There will be a Bring & Buy.

John, 2E0XER and Jem, 2E0JEM are holding a Vintage Military Amateur Radio Society event on Saturday 21 May in a field at the village of Libbery, about eight miles East of Worcester on the A422 Stratford Road. Visitors are welcome to join them. Any experimental equipment is welcomed and all those old antennas that have been in the loft or shed for the last 30 years will have an opportunity of getting the dust blown off them! Visitors should make their own food provision, although there is expected to be a military field kitchen on site for the weekend. The event coincides with the Saturday morning VMARS AM net with the opportunity to operate and make contacts. For further information please contact Jem on 07711 162322 or e-mail info@wraa.co.uk.

Now for the news of special events

In commemoration of the 617 Squadron Dambusters raid, on Monday 16 May, the Lincoln Short Wave Club will be operating on the 80m band as near to 3.617MHz as conditions allow. The transmissions will commence at precisely 2139; this is the time the first wave of nine Lancaster bombers took off. Transmissions will cease at 0139, the time the Mohne Dam was breached. There will be a limited edition QSL card sent to all contacts.

May 2011 will be the month for chasing castles and stately homes on air. The weekend of the 21st and 22nd will be the international castles weekend from 1am on the 21st to 11pm on the 22nd. For UK stations, information can be found at www.cashota.co.uk as well as links to regional activity. The website now allows interested amateurs to complete activation forms online. The Royal Naval Amateur Radio Society will run a special event station at the open day of HMS Collingwood on Saturday 4 June. The callsign to be used is GB6COD, Collingwood Open Day. The station will be operational on all amateur bands from 1.8MHz to 440MHz. The Society headquarters station will be open for viewing from 9.30am to 6pm on the day. A number of demonstrations will be taking place using amateur radio and amateur television. The open day will feature the Royal Navy Field Gun Competition. Additional attractions will include a display from the Royal Marines Band, Collingwood, a free fun fair and much more. Advanced tickets will be available from Gosport and Fareham Tourist Information Offices and Portsmouth News Offices from May 2011.

And now the HF DX news compiled from 425 DX News and other sources

Glasgow and Clyde RAYNET Group will be active on the Island of Jura, which is IOTA reference EU008, from 26 May to 2 June. The group is providing Emergency Safety comms for the Annual Fell Race on Saturday 28 May but will also be activating the island on all HF bands using GS0RAY/P throughout the week. Reports are most welcome. For further details please contact Paul Lucas on 07768 271736 or e-mail mm3ddq@yahoo.co.uk.

Over the weekend 20 to 22 May, Kev, M0TNX will activate Hilbre Island, IOTA reference EU120. Wirral Council has given Kev the opportunity to stay overnight on this uninhabited Island. The callsign for this event will be GB2HI and operation will be on SSB but CW is available on request. The bands in use will be 40, 20 and 17m only and a commemorative QSL card will be available. Charles, M0OXO, has kindly offered to be QSL manager and the QSL cards are being undertaken by Gennady at UX5UO print.

Macquarie Island is one of the rarer DXCC entities and in recent times there has been some activity from Kevin, VK0KEV. The good news now is that Kevin will be joined by Denis, ZL4DB who will be active from there as VK0/ ZL4DB until late July. Denis is new to DXing and will only be able to operate during his spare time.

Phil, F4EGS will be active as TT8PK from Chad until 15 June. He will be on the air in his spare time. QSL via F4EGS either direct or via the bureau.

Joe, W5FJG is now on Midway Island, which is IOTA reference OC-030. He is working on the island as the Chief Communications Officer for at least a year. He plans to be active as KH4/W5FJG, starting the last week in May. Activity will be on 10 to 40m bands using CW, SSB and digital modes.

A few Italian amateurs will be operating from Lampedusa in the Pelagie Islands using the callsign IG9E from 18 to 23 May. QSL via IZ2GMT either direct or via the bureau.

Now the contest news

The Worked All Britain LF Phone contest takes place today, Sunday 15 May, from 1000 to 1400UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website at www.worked-all-britain.co.uk or from the Contest Manager, G3XKT by e- mail to aebbooks@ntlworld.com. On 17 May the 1.3GHz UK Activity Contest will take place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

The CW leg of the 80m Club Championships will take place from 1900 to 2030UTC on 19 may. The exchange is signal report and serial number.

The May 144MHz Activity Contest takes place on 21 and 22 May from 1400 to 1400UTC. The timing coincides with first three hours of the four-hour First 144MHz Backpackers Contest, which is the contest where the low power enthusiasts head for the hills. The exchange for both events is signal report, serial number and locator, with the UK Activity Contest also exchanging postcode information.

And now the solar factual data for the period from the 2nd to the 8th of May, compiled by Neil Clarke, G0CAS on the 9th of May

Several sunspot groups were visible every day. In fact, there as only been one spotless day so far this year and that was on the 27th of January. Solar activity started at low levels when a C1 class solar flare took place on the 2nd and the 3rd. Activity declined to very low levels for the remained of the period. Solar flux levels declined from 110 units on the 2nd to 102 by the 6th. The average was 105 units. The 90 day solar flux average on the 8th was 110, that's two units up on last week. X-ray flux levels showed little variation and averaged B2 units. Geomagnetic activity started at active levels due to a recurring coronal hole that lasted longer than forecast. The most disturbed day was the 2nd with an Ap index of 20 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 730 kilometres per second to 280 by the 8th. Particle densities were very low throughout. Densities were no more than 3 particles per cubic centimetre. Bz varied between minus 6 and plus 4 nanoTeslas on some days but with smaller variations on the quieter days.

And now the solar forecast. This week the slightly more active side of the Sun is expected to be looking our way. Solar activity is expected to be low for most of the week but there is a slight chance that activity could increase to moderate levels if any M class solar flares take place. Solar flux levels should be between 110 and 120 units. Geomagnetic activity should be quiet everyday but could be unsettled today and tomorrow due to a coronal hole. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 12MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 22MHz. Even though the band will be open earlier and later than the times quoted these though are the best time to try this path and will be between 1400 and 2000 hours. Sporadic-E should take place on some days with openings including 50MHz also.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

NEWS FOR THE MIDLANDS On Sunday 15 May Lincoln Short-Wave Club is operating GB2CWF at Ellis Mill for Mills on the Air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Sunday 15 May Midland Amateur Radio Society is attending the National Vintage Communications Fair. Details from Norman, G8BHE, on 01214 229 787.

On Monday 16 May Gloucester Amateur Radio & Electronics Society is holding a mini DF hunt with a difference. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 16 May Lincoln Short-Wave Club is putting G5FZ on the air to commemorate Guy Gibson and 617 Squadron RAF taking off from RAF Scampton. For more information contact Pam Rose, G4STO, on 01427 788356.

On Monday 16 May South Birmingham Radio Society is on the air and planning for Field Day. Contact Don, on 0121 458 1603.

On Monday 16 May South Normanton Alfreton & District Amateur Radio Club is holding a junk sale. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 16 May Welland Valley Amateur Radio Society is visiting the Kettering club. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 17 May Derby & District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 17 May Loughborough & District Amateur Radio Club is having a 2m DF hunt. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 18 May Hinckley Amateur Radio Society is having mini talks by member. Details from John, M0JAV, on 07836 731544.

On Wednesday 18 May Lincoln Short-Wave Club is having a formal meeting and barbecue. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 18 May Midland Amateur Radio Society is holding training classes and having a planning meeting for its 80th year celebrations in June. Details from Norman, G8BHE, on 01214 229 787. On Wednesday 18 May South Kesteven Amateur Radio Society is having a talk on back garden aerials. Contact Nigel, M0CVO, on 01476 402550.

On Wednesday 18 May Telford & District Amateur Radio Society is having a surplus equipment sale, with G8UGL officiating. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 19 May Cheltenham Amateur Radio Association is having a talk on outside broadcasting. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 19 May Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Thursday 19 May South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 20 May Bromsgrove & District Amateur Radio Club is holding a committee meeting. Contact Chris, M0BQE on 01905 776 869.

On Friday 20 May Coventry Amateur Radio Society is holding a wine & cheese evening. Contact John, G8SEQ, on 07958 777363.

On Friday 20 May Hucknall Rolls Royce Amateur Radio Club is having a talk on satellite working and moonbounce by Roger Sale. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Friday 20 May Nunsfield House Amateur Radio Group invites members to bring their cameras. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 20 May South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 21 May Lincoln Short-Wave Club is commences its weekend event taking part in the 144MHz Post Codes Contest at the portable site. On Saturday only they will also be trying WAB in the shack. For

more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Sunday 15 May Sheffield Amateur Radio Club is taking part in Castles on the Air day. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 16 May Angel of the North Amateur Radio Club Come is having a wireless version of Gardeners Question Time, inviting members and non-members to ask knotty questions of their gnarled experts. All are welcome. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 16 May Sheffield Amateur Radio Club is running its annual Home Construction Competition. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 16 May Thornton Cleveleys Amateur Radio Society is having a talk on test meters by Phil Rigby, G8LMF. Details on the web at www.tcars.org.uk. On Tuesday 17 May Chester & District Amateur Radio Society is holding its annual dinner. Details from Barbara Green on 07957 870770.

On Tuesday 17 May Halifax & District Amateur Radio Society is conducting a Foundation exam plus erecting an HF aerial and getting on the air. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 18 May Denby Dale Radio Club is having a visit by RSGB Region 4 Manager Harold Scrivens, G0UGE. Details from Richard, M0RBG, on 07976 220126.

On Wednesday 18 May Hornsea Amateur Radio Club is having a quiz night against Scarborough Amateur Radio Society. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 19 May Grimsby Amateur Radio Society is having a natter night. Contact Cliff, G4YHP, on 01472 328 830.

On Thursday 19 May Grimsby Amateur Radio Society is taking part in the RSGB 80m Club Contest, CW. Contact Cliff, G4YHP, on 01472 328 830.

On Thursday 19 May Hornsea Amateur Radio Club is taking part in the RSGB 80m Club Contest, CW. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 19 May Keighley Amateur Radio Society is having a club night. Details from Shirley, M6SAK, on 01535 652781.

On Thursday 19 May South Manchester Radio and Computer Club is having a 2m DF report by Peter, G0BHP and Bill, G4SVR. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 19 May Wakefield & District Radio Society is on the air and holding a committee meeting. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 20 May East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 21 May Wakefield & District Radio Society continues its Foundation, Intermediate and Advanced courses. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 17 May Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 18 May Ayr Amateur Radio Group is having a video night. Details from Tom Ferguson, GM1OST, on 01292 532 088. On Wednesday 18 May Glenrothes & District Radio Club is having familiarisation with SD, a general hands- on using three laptops. Details from Dave Francis, on 01383 823878.

On Wednesday 18 May West of Scotland Amateur Radio Society has Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 19 May Aberdeen Amateur Radio Society is on the air and working on construction. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 20 May West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 15 May Bedford and District Amateur Radio Club participating in the Mills on the air as GX3WTP/p from Bromham Mill, map reference TL010508, from 1pm until 4.30. Details from Bob Leask, G3XNG.

On Sunday 15 May Chesham & District Amateur Radio Society is operating a special event station at Lacey Green Windmill Open Day. More details from Terry, G0VFW, on 01442 831 491.

On Monday 16 May Braintree & District Amateur Radio Society is holding its AGM. For more information contact John, M5AJB, on 01787 460 947.

On Monday 16 May Burnham Beeches Radio Club is having a talk on colour by G1LIG. Contact Dave, G4XDU, on 01628 625 720.

On Monday 16 May Felixtowe & District Amateur Radio Society is planning for East Sussex Wireless Revival, the Ipswich Rally. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Tuesday 17 May Bedford and District Amateur Radio Club is preparing for going portable at Dunstable Downs. Details from Bob Leask, G3XNG.

On Tuesday 17 May Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 17 May Bromley & District Amateur Radio Society is having a talk on the work of the Examination Committee. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 17 May Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 17 May Verulam Amateur Radio Club is planning its celebrations for its 50th year, inviting members to bring & show home brew plus having a surplus kit swap. Details from Tony, 2EOWAP, on 01727 853087.

On Wednesday 18 May Chesham & District Amateur Radio Society is having a talk by Roger, G3ME on practical aerials, or how to get the best out of your rig. More details from Terry, G0VFW, on 01442 831 491. On Wednesday 18 May Havering & District Amateur Radio Club is having part 2 of the talk on Rx building blocks by Ollie Tillett, G3TPJ. More information from John, M0UKD, on 07890 222111.

On Wednesday 18 May Loughton & Epping Forest Amateur Radio Society is having a guided tour of the Secret Nuclear Bunker. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Wednesday 18 May Norfolk Amateur Radio Club is having a talk by Ken Cheetham, G4RWD on the Baldock Operations Room find out what they do there! Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 18 May Worthing & District Amateur Radio Club is having a talk on 50 years of the Bluebell Railway by Chris, G4ZCS. Contact Phil, G4UDU, on 01903 816684.

On Thursday 19 May Colchester Radio Amateurs has a practical introduction to the 80m Club Championship. More information from Kevan, 2E0WMG, on 07766 543784.

On Thursday 19 May Cray Valley Radio Society is having a normal meeting. Details from Bob, M0MCV, on 020 8265 7735 after 8pm.

On Thursday 19 May Horndean & District Amateur Radio Club is having a talk on the Meon Valley Railway by Dennis Tilman. Contact Stuart, G0FYX, on 023 9247 2846.

On Thursday 19 May King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 19 May Norfolk Amateur Radio Club is taking part in the RSGB CC CW contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Thursday 19 May Shefford & District Amateur Radio Society is holding a 2m mobile DF hunt. Details from David, G8UOD, on 01234 742 757.

On Thursday 19 May Sutton & Cheam Radio Society is holding its AGM. More information from John, G0BWV, on 020 8644 9945.

On Friday 20 May Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 20 May Wey Valley Amateur Radio Group is holding the Hernia Cup inter-club quiz. Details on the web at www.weyvalleyarg.org.uk.

On Sunday 22 May Bedford and District Amateur Radio Club is putting on its mobile operation at the Dunstable Downs Radio Club boot sale. Details from Bob Leask, G3XNG.

On Sunday 22 May Loughton & Epping Forest Amateur Radio Society is attending the Dunstable Downs boot sale. Contact Marc Litchman, G0TOC, on 020 8502 1645.

NEWS FOR THE SOUTH WEST First, advance notice that from Thursday 2 June the Cornish Amateur Radio Club will be meeting at their new venue, Gweal-An-Top School, School Lane, Redruth, TR15 2ER. Further information from Steven, G7VOH, on. 01209 844939.

On Monday 16 May Appledore & District Amateur Radio Club is having a demo and simulation of a wideband Rx loop by Terry, G4CHD. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Tuesday 17 May Blackmoor Vale Amateur Radio Society is having an HF evening. Contact Tony, G0GFL, on 01258 860741.

On Wednesday 18 May Taunton & District Amateur Radio Club is holding a committee meeting. Contact William, G3WNI, on 01823 666 234 for more information.

On Wednesday 18 May Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 18 May Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday 19 May South Bristol Amateur Radio Club is training for VHF NFD. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 19 May Swindon & District Amateur Radio Club is having an activity night and preparing for the 144MHz contest. Contact Den, M0ACM, on 07810 317750.

On Thursday 19 May Yeovil Amateur Radio Club is having a talk on SSTV and RTTY by 2E0ZFF. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 20 May North Bristol Amateur Radio Club is holding a committee meeting. More information from Dick on 01454 218362.

On Friday 20 May Torbay Amateur Radio Society is having a natter night. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 16 May Dragon Amateur Radio Club is having a talk on humour in communications by Clive Collins, GW3WEQ. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Monday 16 May Llanelli Amateur Radio Society is on the air. Contact Craig, MW0MXT, on 01269 840292.

On Tuesday 17 May Wrexham Amateur Radio Society is having a talk on a homebrew exciter, driver and amplifier by Clive Collins, GW3WEQ. More information from Patrick, 2W0HUU, on 07947 701 927.

SARL NEWS - SUNDAY 15 MAY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

158 CANDIDATES TO WRITE RAE THIS WEEK

NEW 40 m BEACON TO TEST NAVIS CONDITIONS

ARRISAT TO BE LAUNCHED LATE JULY

JOIN US AT THE RTA IN PORT ELIZABETH ON SATURDAY 4 JUNE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

158 CANDIDATES TO WRITE RAE THIS WEEK

158 Candidates will write the Radio Amateur Examination on Thursday this week at 16 venues across the country. The SARL wishes all candidates the best of luck for the examination and would like to thank all of the clubs that have been involved with the teaching and guiding the candidates.

The examination starts at 19:00 and continues until 22:00. Candidates are urged to arrive at the examination venue before the starting time and present their ID documentation and exam number. The exam number can be found on www.sarl.org.za. Candidates without an ID will not be allowed to write the exam.

The examiner and moderator's advice to candidates is "read the question several times before answering. There is plenty of time to complete all the questions."

NEW 40 m BEACON TO TEST NAVIS CONDITIONS

On 7 May 2011 a new beacon was switched on in Bloemfontein to test NAVIS conditions from the central Freestate. The beacon operates on 7 027 kHz running 50 mW into a dipole antenna 6 metre above the ground.

The purpose of the new beacon is to test propagation conditions from central South Africa. The antenna in use is set up for NVIS conditions. NAVIS is the acronym for Near Vertical Incidence Skywave. It is a radio-wave propagation method that provides usable signals in the range between ground wave and sky wave distances, usually between 50 to 650 km. The radio waves travel upwards into the ionosphere, where they are refracted back down and can be received within a circular region up to 650 km from the transmitter. If the frequency is too high, refraction fails to occur and if it is too low absorption reduces the signal strength. The usable frequencies for NVIS communications are between 1,8 and 15 MHz.

The beacon sends the following message in an endless loop in CW at 5 words per minute: "VVV DE ZS4BOT/B KG30BV." The beacon's position is KG30BV. The beacon and software was designed and built by Jan, ZS4JAN. Reports can be sent to wirelesscomms@vodamail.co.za.

ARRISAT TO BE LAUNCHED LATE JULY

The cosmonauts on the International Space Station reported that they activated the satellite and confirmed that they heard the signal on the amateur radio equipment on board the ISS. Since the battery was nearly depleted of its original charge, they switched the satellite off after six hours of operation in order to prevent over-discharging the battery. The battery was then removed from the satellite and stored separately as per their normal battery handling procedures.

RSC-Energia reported that their plan is to recharge the battery about three weeks prior to the EVA deployment. This will give the cosmonauts time to reinstall the battery and test the satellite to make sure it is working properly. The EVA deployment is planned for late July of this year.

Find out more about ARRISAT and how you can enrich the lives of young people at the SA AMSAT Space Symposium next Saturday 21 May. Get details and the registration form on www.amsatsa.org.za.

JOIN US AT THE RTA IN PORT ELIZABETH ON SATURDAY 4 JUNE

The next SARL Radio Technology in Action Symposium will be held in Port Elizabeth hosted at the Nelson Mandela Metropolitan University in cooperation with PEARS. The cost is R50 for SARL members and R70 for non-members. The fee includes refreshments and a light lunch as well as entry into the lucky draws that take place at various times during the symposium.

You can pre-book online or pay at the door. Visit www.sarl.org.za and select RTA from the left hand menu for pre booking and the full programme.

NOMINATIONS FOR NSN RADIO AMATEUR OF THE YEAR AWARDS CLOSE SOON

You have a few more days to nominate someone for the Nokia Siemens Networks Radio Amateur of the Year Awards. There are three categories:

GARTH MILNE TECHNICAL INNOVATION AWARD

The award is made for the support, development and application of Technological Innovation in Amateur Radio in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or tertiary education institutions.

NSN RADIO AMATEUR OF THE YEAR AWARD

The award is made for the support and development of the Amateur Radio Service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a person who has given of his or her expertise and time to the promotion of Amateur Radio in South Africa.

NSN AMATEUR RADIO COMMUNITY SERVICE AWARD

Annually the South African Amateur Radio Development Trust is recognising a radio amateur or a group of radio amateurs for service to the community.

Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

Details are available on www.amateurradio.org.za or request a brochure from saardt@intekom.co.za.

DONATION TOWARDS IARU 2011 CONFERENCE IN AUGUST

The Vaal Triangle and the Sasolburg radio clubs have, as a result of various fundraisers, put together R5 000 as donation to be used by the SARL in the coming International Amateur Radio Union Conference for 2011 at Sun City.

They, the organising committee of the 2011 AGM and National Conference in the Vaal, would also like to use this opportunity to once again thank everybody who came to support the event.

NEW 4 m METEOR SCATTER RECORD

At 04:18 UTC on 23 April ZS1AGF and ZS6NK completed a meteor scatter QSO on 70,200 MHz over a distance of 1 527 km improving on the existing record of 1 348 by 179 km.

ZS1AGF used an Icom 746 driving a Spectrum transverter and a 5 element YAGI and ZS6NK used a Yaesu FT847 and 9 element LFA YAGI for the contact. Congratulations to you!

CONTEST NEWS

The ZS4 Sprint will be run on Sunday 22 May from 14:00 to 15:00 UTC. It is a phone and CW contest on the 40 metre band. This is a fun activity to promote contacts between radio amateurs in the Free State and radio amateurs in Southern African countries.

On Wednesday 25 May, the third SARL 80 m Club contest will be run and it is a CW contest. The contest starts at 17:30 UTC and ends at 18:30 UTC.

Read more on page 20 and 53 in the 2011 SARL Contest Manual.

ZS4SRK TAKES FIRST LEG OF 80 METRE QSO PARTY

The three hour contest was held on 7 April with the aim to create an interest in and activity on the 80 m band. It is a phone only contest.

The Sasolburg Amateur Radio Club won the contest with 550 points. Their club station, ZS4SRK, was operated by ZS4MP. Second place was shared by ZS6XT and ZS1WC who both scored 510 points. 57 radio amateurs took part but only 13 submitted logs. The second leg will be held on 6 October 2011.

The preliminary results (Logs that are posted excluded) for the ZS3 Sprint are the following:

1st: ZS3SVD, Sian van Deventer with 115 points 2nd: ZS6APT, Pam Momberg with 60 points 3rd: ZS1SKR manned by ZS2CX with 59 points.

105 stations participated in the sprint on 40 m phone and CW, however only 11 logs and two check logs were received.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. There is currently no chance for strong solar flares. Currently sunspots 1 208 and 1 210 are the only real visible sunspots on the earth facing side of the sun. A small sunspot is trying to form towards the southwest portion of the visible solar disk. For the people doing their own frequency predictions the expected effective sunspot number for the week is about 35.

15 m will provide the best opportunities for DX followed by 20 m.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

21 May - SA AMSAT space simposium at SARL NRC at Radiokop 18 to 22 May - Follow Dayton Hamvention via W5KUB.com. 22 May -ZS4 Sprint from 14:00 till 15:00 UTC. 25 May - Closing date for nominations for NSN awards, visit www.amateurradio.org.za. 25 May -3rd SARL 80 m Club contest 17:30 to 18:30 UTC. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.

er, uh, like, wake-up sunshine.
if'n that was my 'call sign'
the SHE behind the wheel of QYWQO
would be ME. oh, lord

Ohio/Penn DX Bulletin No. 1011

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1011
BID: $OPDX.1011
May 16, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1DG, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, N4JF, K6VVA, KH6BZF, N6PSE, K8BL, K8GI, K8YSE, W8GEX (60m News), 9M6DXX, AT International,
DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F6AJA & Les Nouvelles DX, G0WRE, I1JQJ/IK1ADH & 425 DX News, IT9TQH, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, SV1HER, SV1JG, TA1HZ, VA3RJ & ICPO, VK4FW, VHF-DX-Portal(MMMonVHF) and YV5ANF for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): There will not be an OPDX Bulletin next week. I will be attending the Dayton HamVention. "IF" I receive a major announcement, I may send something out late Sunday or Monday. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW
P.S. Hope to see you at the HamVention Dayton at the NODXA Hospitality Suite at the Crown Plaza (See below)! I will also be at the ARRL Area on Sunday at the League's Legislation Booth.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-May, through Sunday, 15th-May there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0T, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2E, VP2V, VP6, VP8, VP8/o, VP9, VR, VU, XE, XU, XW,

XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf "Ash", 3V4-002 (KF5EYY), will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW. Read about Ashraf on the following Web page at: http://www.qsl.net/3v4-002

4W6, TIMOR-LESTE. Steve, 9M6DXX, sent out the following press release #3 on May 11th, for the upcoming September 16-26th, -- 2011 4W6A DXpedition:
"Everything is on schedule for the 4W6A DXpedition. All the team members have now booked and paid for their air tickets from the UK, Malaysia and Australia to Dili, East Timor. A boat has been chartered to take the team and their equipment from Dili to Atauro Island, the site of the DXpedition, and back again. The accommodation on the island has been booked and the team members are now also booking their overnight transit stops in Bali, Darwin and Dili.
The DXpedition will be operating from generators which will be hired and picked up in Dili the day before the start of the operation. The generators have been booked and arrangements have been put in place for sufficient fuel to be transported to the island for our use whenever necessary.
It is hoped to be able to use an Internet connection on the island and, if this proves to be reliable, logs will be uploaded to 'Club Log' <http://www.clublog.org> and 'Logbook of The World' on a daily basis.
The team is very grateful to the LA DX Group, CDXC (Chiltern DX Club) - The UK DX Foundation, the Oceania Amateur Radio DX Group, and the Northern Ohio DX Association, who are the first four DX associations to have offered sponsorship to the 4W6A DXpedition. Thanks too go to Tony Burt, VK3TZ, of Rippletech Electronics <http://www.rippletech.com.au>, who is kindly loaning three monoband vertical antennas for use on the DXpedition. We are also very grateful to a growing number of individuals who have also made donations towards the cost of shipping equipment to East Timor, the boat charter, the hire of the generators and the cost of fuel. All sponsors are listed, with thanks, on the 4W6A website at: http://www.4w6a.com/sponsors.html
If you or your DX club also wish to help, there is a 'Donations' page on the 4W6A website. Payments may be made by credit or debit card and you do not need to have a PayPal account yourself in order to make a donation.
4W6A will be QRV from Atauro Island (IOTA OC-232), Timor-Leste (East Timor), from 16 to 26 September 2011. Activity will be on all bands 10 to 160 metres, using CW, SSB and RTTY. The QSL manager is M0URX, direct (SAE plus 1 IRC / 2 USDs), via the Bureau, or LoTW. The entire log will be uploaded to LoTW as soon as possible after the end of the operation or, if possible, even during the DXpedition. QSLs may also be requested

using the QSL request form on the website."

5H, TANZANIA. Dave, W0FBI, will be active as 5H2DCL for the next two months. He is there as a medical doctor. Activity will be mostly on 20 meters CW, usually after 1300z. QSL via W0WOI.

8R, GUYANA. Alex, W1CDC, is now active as 8R1A from Guyana until May 24th. Activity will be holiday style on 80-10 meters using CW and SSB. He was heard this past weekend very active on 17 meters CW/SSB. QSL via his home callsign, direct or by the Bureau.

B7, CHINA (Update). A Chinese team of operators, along with some operators from Hong Kong, will activate B7P from Foshan City (WW. Grid OL63NA), nearby Guangzhou City, during the CQWW WPX CW Contest (May 28-29th) as a Multi-? entry. Operators mentioned are Terry/BA7NQ (leader), JinQuan/ BA7JC, Chow/BA7JK, Yang/BD7IXG, Paul/BA7JS and Wong/VR2KW. All QSLs will be sent via Bureau. For direct cards, please QSL via their manager BD7IXG.

C2, NAURU (Update/Callsign/Ops Needed/Web page). The Pacific-DXer's Web page is reporting that plans are progressing for the upcoming C21AA DXpedition to take place between November 13th and December 5th. Operations will be led by Bill, VK4FW, with liaison support by Eddie VK4AN. Operators mentioned at this time are Eddie/VK4AN, Bill/VK4FW, Art/NJ7N, Julian/ W5SL and Tim/NL8F. They expect to have at least 3 stations active on all bands 160-6 meters using CW/SSB/RTTY/PSK31. They will also participate in the CQWW DX CW Contest as a M/M or M/2 entry. A dedicated station will be set up on 6 meters running in the beacon mode. QSL Managers are the Pacific DXers, or by the Bureau via VK4FW. More operators are needed. If interested, contact VK4AN or VK4FW for more information. For more details and updates, watch the C21AA Web page at: http://pacific-dxers.com/C21AA.html

CR3, MADEIRA ISLAND (AF-014). Operators Ivan/OE1DIA, Jozef/OM3GI, Tibor/ OM3RM and Julius/OM7JG will be active as CR3A during the CQWW WPX CW Contest (May 28-29th) as a Multi-Single entry. Listen for the QSL route. The callsign CR3A belongs to the CT3 Madeira Contest Team, and usually QSL is via LoTW or CQ9K.

DAYTON HAMVENTION DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th Club Floor of the Crowne Plaza Hotel on Thursday, Friday and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be available. Come and meet the members and friends of NODXA.

FP, ST. PIERRE & MIQUELON. Eric, KV1J, will once again be operating from the Island of Miquelon ((NA-032, DIFO FP-002 WLOTA 1417, Grid GN17) as FP/KV1J between October 24th and November 1st. Activity will be on 160-10 meters using CW, SSB, RTTY and PSK31 (but primarily SSB and RTTY). He will generally be on the highest frequency band that is open, and he

may try 6 meters if there is an indications of openings. He has no permission for 60m. Also, look for him on the AO-51 satellite (and other FM birds), weather permitting and if in the 2M/70cm mode. Eric will also be in the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via KV1J, direct or by the Bureau and also LoTW. For more details and update, check out his Web page at:
http://www.kv1j.com/fp/october11.html

IOTA DXPEDITION (Update). The MS0INT Team (Col/MM0NDX [team leader], Christian/EA3NT, Ramon/EA3OR, Raul/EA5KA, Stan/EI6DX, Vincent/F4BKV and Simon/IZ7ATN] will activate IOTAs EU-010, EU-059 and EU-111 in about four weeks. The proposed timetable of their planned activities have now been announced. They will attempt to follow this schedule as closely as possible, but since the weather and seas dictate this expedition, their plans may change suddenly. During transmissions they will regularly update their operating locations should they differ from their intentions. The tentative schedule is as follows:
June 14th - Look for MM/F4BKV and MM0NDX/p from South Uist (afternoon) and Berneray (evening) -- both EU-010.
June 15th - Look for MM/F4BKV and MM0NDX/p from Benbecula; awaiting full team to arrive (morning) EU-010.
June 15th - The group will split into three teams of two to activate Grimsay, North Uist and Baleshare, EU-010 simultaneously on CW and SSB during the afternoon.
Team 1: MM/F4BKV and MM/EI6DX activate Grimsay
Team 2: MM/EA5KA and MM/EA3OR activate North Uist
Team 3: MM/EA3NT and MM0NDX/p activate Baleshare
June 15th - MM/IZ7ATN and others on air from Berneray during the evening.
June 16th - Depart Grimsay for Monach Isles, EU-111. Spend approx. 24 hours on Monachs. Callsign: MS0INT/p
June 17-20th - St Kilda Archipelago, EU-059 activity until latest 0800z on June 20th. Callsign: MS0INT. Three HF stations CW/SSB + 50Mhz (50MHz Trophy Contest included).

All QSL requests for MS0INT and MS0INT/p go via M0URX. All QSL requests for MM/<homecall> are via RX3RC. ADDEDE NOTE: Vincent, F4BKV, plans to be active from Shetland (EU-012), Orkney (EU-009) and Great Cumbrae (EU-123) between June 11-13th, prior to joining the MS0INT team. For updates and more details, watch: http://ms0int.com

IOTA NEWS.....
EU-001. (Update) Members of the "DX Plus" Hellenic Amateur Radio Team will be active as SX5F from Farmakonisi Island (GIOTA DKS 057, MIA MGD-009) and Lighthouse (WLOTA: L-3147, ARLHS: DOD-054) between May 14-22nd. Operators mentioned are Sotirios/SV1HER, George/SV1RP, Vasilis/SV1DPJ, John/SV1GE and Giannis/SV1GYG. Activity will be on all HF bands using CW, SSB and the Digital modes. QSL via the RAAG Bureau. For more details, frequencies, and online log info, see Web site at: http://www.qrz.com/db/SX5F

EU-043. Operators Sten/SM6MIS, Rick/SM6U, Bengt/SM6UQL, Tomas/SM6XMY, Pierre/SB6A and possibly others will be active as 7S6W from Vinga Island (WLOTA 1517) between May 19-22nd. Activity will begin during the afternoon of May 19th, through their departure at 1200z on Sunday, May 22nd. They plan to have 4 stations, each with 1 kW amplifiers, using CW, SSB and some RTTY. They will also try to be active in the Baltic Contest on Saturday night. For information and updates, visit: http://sm6.se/gbgdx

EU-051. Members of the Radioamatori Siciliani nel Mondo (RAMS) will be active using the special callsign IE9Z from Ustica Island (I.I.A. PA 001), in front of the coast of Palermo (Sicily Island), between May 20-23rd. Operators mentioned are Maurizio/ IT9TQH (mainly CW operator), Antonio/IT9YMM, Carmelo/IT9TXF, Fabio/IT9AHI, Vincenzo/IT9ZIV, Sergio/IW9FSG and Roberto/IT9DVZ. Activity will be on all HF bands using CW, SSB and RTTY, including the 30/17/12 meter bands with one TX for each band. Also, activity on 6 and 2 meters. QSL via the Bureau or direct to IT9TFX (w/2 USDs). For more details, see QRZ.com.

EU-067. Cliff, SV1JG, R.A.A.G Vice-President, will be active as SX8V during the CQWW WPX CW Contest from the Island of Milos. Also, look for activity before and after the contest. He will be signing SV8/SV1JG. QSL via SV1JG, direct or by the Bureau.

EU-120. After activating Lindisfarne (Holy)Island (also EU-120) this past weekend, operators Kev/M0TNX and Paul/G0WRE will activate a rarer island this coming weekend (May 20-22nd). Look for them to again be in the EU-120 IOTA Group, but from Hilbre Island which has not been activated for 10 years. The callsign for Hilbre will be GB2HI (Hilbre Island). Activity will be 40/30/20/ 17/15 meters, conditions allowing, and maybe 6 and 2 meters. Modes will be mainly on CW and SSB, with some on the Digital mode. This is a unique opprtunity, as Kev and Paul have been granted a special access/permission from Wirral Council, as they wish to publicize the beauty and nature surrounding Hilbre Island. For Lighthouse chasers, this activation will be valid for the WLOTA award. Again, the superb QSL services are by Charles, M0OXO, direct or by the Bureau or by his OQRS service at: http://m0oxo.com

EU-171. Mic, DG5LAC, will once again be active as OZ/DG5LAC from Vendsyssel-Thy (DIA NJ-001, WW Loc. JO47GA) between now and May 19th. Activity will be holiday style on 80-10 meters using SSB only, and his FT-450AT, an Ameritron AL-811H amp and a DX-Wire Windom 42m antenna. QSL via his home callsign, the Bureau is preferred. Logs will be uploaded to LoTW and eQSL.

NA-066. Operators Rick/K6VVA and Garry/NI6T will be active as K6VVA/6 from Santa Catalina Island, California, between 2100z, May 24th and 0500z, May 26th. Activity will be on 40-15 meters, mostly CW with some SSB. QSL ONLY via N6AWD. PLEASE NOTE: There

will be two stations on the air May 25th (Eagle and Shark
stations). For more details about the special plans for the
ASIA/JA (EAGLE/SHARK) stations, see the Web page at:
http://www.k6vva.com/iota/na066
For questions about the operation, E-mail at: na66x@k6vva.com

NA-091. Operators Rick/K6VVA and Oliver/W6NV will be active as K6VVA/VE7
from Quadra Island, Canada, between 0500z, June 2nd and 0000z,
June 5th. Activity will be on 40-15 meters, mostly CW with
some SSB. QSL ONLY via N6AWD. Rick states, "Excellent location
over salt water to EUROPE!!!" For more details and update,
see: http://www.k6vva.com/iota/na091
For questions about the operation, E-mail at: na91x@k6vva.com

NA-232. (New IOTA!) Look for Yuri, N3QQ, and other Russian Robinson
Club members to be active as KL7RRC from St. Matthew Island,
Alaska, between July 29th and August 5th. They are currently
awaiting final permission by USFWS. For more details and
updates, visit: http://www.na-234.com

OC-119. (Update) Operators Dindo/DV1UD, Ed/4F1OZ, Gil/4F2KWT and
possibly one more operator, will activate the rare Jolo IOTA
group sometime later this month. Dates are to be confirmed
and will be announced later. Operators are hoping to use the
callsign DX8DX or DX8J, or possibly DU8/homecalls. More
details are forthcoming.

OC-142. Operators Paul/VK4FPDW, Derek/VK4MIA, Mike/VK4QS and possibly
one more operator will be active as VK4WIP from the Sandy Cape
Lighthouse (AU0043) on Fraser Island during the International
Lighthouse-Lightship Weekend (August 20-21st). QSL via VK4WIP,
direct (see QRZ.com), by the Bureau or eQSL.

J7, DOMINICA. Members of the Florida Contest Group (FCG) will be active
as J7A, J79WI, J71W and J79FCG from Sea Cliff Cottages between May 21-31st.
Operators mentioned are George/K5KG, Dan/K1TO, Jim/WI9WI and Chris/NX4N.
Activity will be on 80-6 meters, no 60m and 160m (no antenna is planned).
The FCG team will be in the CQ WPX CW Contest as J7A. Outside of the
contest, operators will use the J79FCG (suffix - Florida Contest Group)
callsign primarily (and perhaps exclusively), but some operators do have
their own callsign. QSLs for J79FCG go only to K1TO with a SASE. Non SASE
direct cards will be answered by the Bureau. Bureau cards will be answered.
The log will be uploaded to both LoTW and eQSL. QSL J7A and J71W via NX4N.
QSL J79WI via WI9WI.

KH6BZF PROPAGATION FORECAST/REPORT (May 16-22nd)....
May 16 HN-AN SOLAR REFERENCE KEYS
May 17 AN --------------------
May 18 AN BN - Below Normal
May 19 AN AN - Above Normal/Geomagnetic Level is QUIET
May 20 AN LN - Low Normal
May 21 AN HN - High Normal/Geomagnetic Level is UNSETTLED

May 22 AN DIS - Disturbed
VDIS - Very Disturbed

*** SPECIAL NOTES FROM EDITOR: So, you do not have a HF radio handy, and
you need to set your clock or want the WWV numbers? Well, try these
phone numbers:
303-499-7111 -- Time Tick audio as you usually hear over WWV
broadcasts. It may sound dead during the tick-
tick duration, so wait.
303-497-3235 -- Solar Data report (continuously repeats) what
you usually hear over WWV about every hour.

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MJ0, JERSEY. Mat, MJ0ASP (aka-F5SHQ), will be active during the CQWW WPX
CW Contest (May 28-29th) as a Single-Op/All-Band entry. QSL via MJ0ASP
or LoTW.

OG0, ALAND ISLAND. Timo, OH6EI, will be active as OG0Z during the
CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/High-
Power entry. QSL via W0MM.

OJ0, MARKET REEF. Pasi, OH3WS/OG3A, will be active as OJ0W from Market
Reef between May 14-21st. Activity will be limited to his spare time on
the HF bands using CW and SSB. Also, dates will depend on WX conditions.
QSL via home callsign OH3WS.

9Q50ON LOTW UPDATE. The 9Q50ON crew reports that 31966 QSOs have been uploaded to LoTW. They state, "These are indeed more QSOs than originally made. This is because the QSOs made by Patrick back in July are also uploaded in LoTW + some callsign corrections that were made. From these 31966 Q's more than 40% have been confirmed. This indicates that more and more good DXers are using LoTW! Still +100 envelops are received every month. The next wave will be the conformation of the bureau QSLs."

QSL STATUS OF CE9/VE3LYC AND CE9/PA3EXX. Luciano, PT7WA, reports that QSL cards have arrived from the printer. Unfortunately, Cezar is on a business trip which will lead to an additional delay in the mailing out the direct QSLs. The operators state, "While we are very grateful to all the IOTA chasers for their understanding, we apologize for this delay."

LOGS AVAILABLE. The T6JC log are now available online at:
http://www.clublog.org/logsearch.php

SILENT KEY. Oscar, YV5ANF, informs OPDX of the sad news that Mrs. Maria del Pilar Lia&#65533;ez, wife and mother of QSL Managers Francisco/EA7FTR and David/EB7DX, passed away last Saturday nighte in Huelva, Spain. She was in hospital after a long illness. OPDX and its readers send out our deepest sympathy to the family and friends.

VP8ORK QSL STATUS. Don, N1DG, informs OPDX that the VP8ORK QSL cards arrived a few days ago and the labels are now being printed. Expect to see the VP8ORK QSL card in your mailbox by end of the month for those who submitted via the OQRS. Also, Don has mentioned that he will be bringing QSL cards to the Dayton HamVention for those who did use the OQRS and E-mailed him requesting it.

QSL RECEIVED VIA LoTW: 3XY6A, 3XY8A, 4A4A, 5X1NH, A65CA, AH0/AB2RF, EA1DLU, EA5GPC, ER3ZZ, F8BBL, FG5DH, G0WRE, HB0YWR, HD2M, HK1X, JH7XGN, JT5DX, L21D, LU9ESD, P40V, PE2MC, PJ4R, PP5XX, S58MU, SM2EKM, T33C, TA3AX, UA2FR, UK8FF, UX1UA, VP8ORK and XE1GRR

QSLS RECEIVED VIA MAIL: 4S7NE, 5N41NHD, 5N42NHD, 6W1SJ, 7P8KDJ, A92GR, CW5R, E21EJC, EU3AR, FG5FR, G3WPH, H40AA, HS0ZCW, K8LEE/CY0, N0TG/CY0, N1SNB/CY0, PJ2/K2TQC, PJ7DX, PY2XB/1, T30AQ, T30RH, UK8OM, V44KAI, V85/9M6XRO, VK4LDS/P, VK9C/G6AY and VU4PB

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

T6, AFGHANISTAN (Cancelled/Update on DXpedition Donation Funds). Paul, N6PSE, Co-Leader of the T6PSE DXpedition, sent out the following press release (#4) on May 12th (edited): Dear T6PSE DXpedition supporters:
Please accept our sincere regrets for having to cancel the DXpedition. This was a very difficult decision for us to make, particularly after we shipped all of our equipment to Afghanistan. We cancelled just hours before our flights to Kabul were to begin.
The tragic death of Jim McLaughlin, WA2EWE, and the fear of reprisals for the killing of Osama Bin Laden made our security situation in Kabul very uncertain.
Due to our significant shipping costs, we do not have all of the donation money available to refund. The DXpedition team members have increased their contributions and at this time we are refunding 90% of all donation money that was received.
If this is not agreeable to you, please let me know. Please accept our gratitude for donating to this DXpedition.
Sincerely,
Paul S. Ewing, N6PSE, Co-Leader T6PSE DXpedition <paul@n6pse.com>
The Intrepid-DX Group, 3052 Wetmore Dr, San Jose, CA 95148 USA

TC130/TC1919, TURKEY (Special Event). On May 19th, the Turkish people will celebrate this date and anniversary of 1919 when Mustafa Kemal Ataturk, the founder of the modern Republic of Turkey, landed in Samsun city which was the starting point of the Turkish Nationalist movement. After the Independence War, this date is now celebrated as the "Youth and Sports Day". This year there will be two special callsigns on the air (on all HF bands and modes) for the special celebration:
TC1919ATA - Ham operators from Samsun will be on the air between May 18-20th. Operators mentioned are Ali/TA6P, Hihat/TA6U, Kadir/TA2IK, Mustafa/TA6RM and Ismail/TA7AO. QSL Managers are TA6P and TA6U.

TC130ATA - Members of the Turkish group called TCSWAT (Special Wireless Activity Team) will be on the air between May 16-22nd, to celebrate the 130th birthday/anniversary of Mustafa Kemal Ataturk. The team will consist of Ali/TA7EB, Huseyin/TA7BC, Ammet/TA3AX, Bekir/TA2RX, Onur/TB2MYE and Tevfik/TA1HZ.
Their activity will be from Canakkale-Istanbul and Giresun.
QSL via TA1HZ.

TJ, CAMEROON. Henri, TJ3AY, has been using the special callsign TJ3IC since May 10th. He will continue to use the callsign until May 30th, to commemorate the 51st anniversary of the independence of Cameroon. A special QSL card is available via F5LGE.

V3, BELIZE. Mike, VE2XB, will be active as V31XB from Caye Caulker Island (NA-073) starting May 19th, for several weeks. Activity will be on all HF bands, except 6m, using CW and SSB. Mike states that he will be looking especially for JA stations to work this IOTA (as well as everyone else). QSL via VE2XB (see QRZ.com). ADDED NOTE: Mike will be heading to J79-land in July for several weeks.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 15th May 2011

Echo Ireland

The June edition of Echo Ireland is now being prepared and members are invited to submit news items and articles for inclusion. As we are coming in to the busy season for club activities, we hope to get reports from Club PROs on happenings both past and planned. Pictures as jpegs are particularly welcome. Please keep text and pictures separate. All input to ei4bz at eircom dot net

---

Up-Coming IRTS Contests

1. CW Field Day Sat 4th/ Sun 5th June 2011. Log to be submitted by July 5th.

Calling all active VHF and Higher operators we are trying to get the 2010 Squares table finalized on IRTS.ie. So can anyone that was active on the VHF bands last year please send your Square totals or your log and I can work it out for you to EI2GLB /at/ hotmail / dot/.com. To see the squares table go to www.irts.ie and click on vhf/uhf/shf on the right side of the home page.

ComReg Spectrum Strategy

ComReg recently published a consultation paper entitled 'Review of the period 2008-2010 and Proposed Strategy for Managing the Radio Spectrum: 2011-2013'. The document is ComReg Document 11/28 and is available on the Publications section of the ComReg website at www.comreg.ie . The Society will be submitting a response to the document which must be with ComReg before 24 May. Anyone who wishes to have observations included in the Society's response should forward them as soon as possible to Sean EI7CD at ei7cd / at /gofree/dotindigo/dot/ie . While anyone may respond to ComReg public consultations it has been indicated to us by ComReg that a single response relating to the amateur service would be preferable.

CASHOTA Ireland and UK Activity Weekend

There will be a weekend of activity for CASHOTA Uk and CASHOTA Ireland from 1 am Saturday the 28th of May until 11:59 pm Sunday the 29th of May. The event is open to anyone who wishes to activate a Castle or Stately Home. If you wish to activate a Castle or Stately Home please check out the CASHOTA Ireland site http://cashota-ireland.org/ for more details and how to get a number for your Castle. Please contact Steve EI5DD as soon as possible with details and a small paragraph of information about the castle concerned anlong with WAI square and county and this will be promoted on the CASHOTA website. This promises to be a good weekend for portable activity and if you have never tried it before here is a good opportunity. Maybe you could get your Radio Club interested in participation.

New US Four Metre Beacon

70MHz is not an amateur band in the USA, but European stations may try to listen for a new 4-Meter Band propagation beacon from the East Coast of the US. Its operating frequency is 70.005 MHz, QTH is FM07fm, CW emissions.

The callsign of the beacon is WE9XUP.

Any and all QSL/SWL reports are welcome via email to: WA1ZMS<at>ARRL.NET.

The beacon is scheduled to run 24 hours a day until 1 Sept, 2011.

Cork Radio Club

The May meeting of Cork Radio Club will be held in the Community Centre in Carrigtwohill on Monday the 30th and will feature a presentation and live demonstration of D-Star by Don Kelly EI8DJ. The meeting will also review the successful trip to Brow Head for International Marconi Day and will finalise arrangements for the CW Field Day on the following weekend. Visitors are very welcome and further information can be had from Jeremy EI5GM on 083-3317710.

Mills on the air weekend

The Amateur Portable Group will be activating Delaney's Mill in Rathfeigh today (Sunday) for the Mills on the Air weekend, the call sign will be EI0Z Activity will be on HF.

Ben EI4IN

The many friends of Ben, EI4IN will be pleased to hear that he is doing well after his kidney transplant in Beaumont Hospital on Monday last.

We send our good and best wishes to Ben and his family.

DX News

Sam K0YAK is at present based at the US Embassy in Kathmandu, Nepal and is active as 9N7AK during his spare time. It is expected that he will be there till early July. He is using SSB and PSK31 on 20 to 10m and QSLs go via his home call.

Wim OS1T is now on the island of St. Barthelemy using the callsign FJ/OS1T until 22 May. He operates SSB and RTTY on 40 to 10m and will be checking 6m when conditions allow.

Fred PY2XB has been QRV as 8P9XB from Barbados for the past week and is still available till 21 May. He is operating all bands 80-6m on CW, SSB and RTTY.

For the IOTA chasers make a note to look for TM0Z from the French island of Batz between 21 - 26 May. A group of 5 French amateurs will be operational on all bands 160-6m. The IOTA reference is EU-105.

Three Czech Republic operators (OK1AMM, OK1HH and OK2BOB) will be on the Island of Crete from 17 to 28 May and will sign SV9/homecall/P from the main island which is IOTA EU- 015 with a few side trips to offshore islands which will count as IOTA EU-187.

Haru JA1XGI will be active from the Pacific island of Tuvalu from 17 - 24 May. He will sign T2XG on all bands 40 - 10m with emphasis on the WARC bands.

Incursions into the 28mhz Band

Illegal church broadcasts have been heard on 28.265MHz in Germany and members are requested to listen on this frequency in order to identify the location. Please contact Ger McNamara EI4GXB IARUMS Co-ordinator on 087 2532512 or ei4gxb/ at/gmail/dot/com with any reports.

Solar Flux Index drops below 100 again On Tuesday May 10, 2011 the daily solar flux index (SFI) fell below 100 (97.5) for the first time since March 22, 2011. During this month the daily sunspot count has been as high as 90 but the sunspot groups have for the most part been small, weak and magnetically simple. Radiowave propagation continues good on 15 and 12 meters but has become a bit more sporadic on 10 meters. 6 meters is seeing more and more sporadic E (Es) openings as we enter the traditional northern hemisphere warm season pattern. For now the sun has returned to it's quiet state as we experienced in early 2011 on back. Even as solar cycle 24 continues it's rise to a smoothed sunspot number (SSN) maximum of ~95 in December 2013, we will continue to see periods of abnormal sunspot production with groups small, weak and magnetically simple. We acknowledge Thomas F. Giella, NZ4O, as the

source of this sunspot prediction.

New Sample Foundation Exam Paper

An updated sample question paper for the UK Amateur Radio Foundation exam is now available on the RSGB website. www.rsgb.org.

Dambusters Raid Memorial on 80m On Monday 16th May 2011, the Lincoln Short Wave Club will be operating G5FZ on the 80m band as near to 3.617 as conditions allow. The transmissions will commence at precisely 21.39 - the time the first wave of nine Lancaster bombers of RAF 617 Squadron, led by Wing Commander Guy Gibson, took off on the night of 16/17 May 1943, to attack the Mohne, Sorpe and Eder Dams in Germany using Barnes Wallace's famous 'bouncing bomb'. Transmissions will cease at 01.39 - this is the time the Mohne Dam was breached by the fifth Lancaster flown by Flt Lt D J H Maltby, the rest of the bombers went on to attack the Sorpe and Eder dams. This will probably go down in history as the most daring attack ever undertaken by Bomber Command, immortalised by the famous film The Dam Busters. All nineteen aircraft took off in three waves from RAF Scampton, this is less than a mile from our club shack. There will be a limited edition QSL card sent to all contacts.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

508. [DXNL] DXNL 1728 (May 18, 2011)

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-16 22:47:44 UTC
From: Robert Busch - DL7VOA <dl7voa@gmx.de>
Message-ID: <10119294359.20110517000506@dxhf.darc.de>
Source record: 4598

DXNL 1728 - May 18, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

J7 - DOMINICA, NA-101
George,K5KG, Dan,K1TO, Jim,WI9WI, and Chris,NX4N, will be active in
CW and SSB on all HF bands and 6m signing J79FCG, J79WI and J71W from
May 21-31. They will sign J7A in the upcoming CQ WPX CW Contest.
QSL routes: J79FCG via K1TO, J7A and J71W via NX4N, J79WI via WI9WI.

JW - SVALBARD, EU-026
Jon,LA8HGA, will be QRV as JW9HGA from the Longyearbyen radio club on
Spitsbergen (EU-026) from May 19-23. Jon works CW only on the HF bands.
QSL via bureau or direct to LA8HGA.

KH4 - MIDWAY, OC-030
Joe, W5FJG (ex-EL2JM,-JY9ZK, ST2JM-,-7Z1AC), is now staying on the
Midway atoll (OC-030). He works as a communications officer for at
least one year. Starting in the last week of May he plans to show up
as KH4/W5FJG. Joe uses an Icom IC-7000 and only simple antennas in the
beginning. Activity is expected in CW, SSB and digital modes on 40m-10m
(maybe 80m). He is looking for someone to donate him a multi-band
vertical antenna and also for a QSL manager. If you can help please
sind him an e-mail to joeyjeepusa@yahoo.com. More info to be announced.

OJ0 - MARKET REEF, EU-053
Pasi,OH3WS, will activate Market Reef (EU-053) as OJ0W in CW/SSB on
the HF bands from May 14-21. QSL via OH3WS, also via bureau.

OY - FAROE ISLANDS, EU-018
Hans,OY/PA0VHA, Steef,OY/PA2A, and Wim,OY/PA2AM, are going to hit the
airwaves from Skaelingur on Streymoy Island (EU-018) between May 22
and Jun 3. They will work in CW and RTTY on all bands (also 6m and 4m)
and OY/PA2AM also via the satellite AO-51. QSLs via their homecalls.

SV9 - CRETE ISLAND, EU-015
Jindrich,SV9/OK1AMM, Franta,SV9/OK1HH, and Bohumil,SV9/OK2BOB, are QRV

from Agia Marina (EU-015) from May 17-28. They will operate in CW/SSB on all bands but mainly on 17m/12m/10m/6m. They also plan a side trip to Gramvousa Island or Gavdos (EU-187). QSLs via their homecalls.

TA - TURKEY
May 19 is an important date for the Turkish people. On May 19, 1919, Mustafa Kemal Ataturk, the founder of the Republic of Turkey, went to the province of Samsun. This day is considered the beginning of the liberation movement of the Turks against the occupation of France, United Kingdom, Italy and Greece. This makes May 19 one of the most important national holidays of Turkey. Each May 19 they are celebrating the end of the War of Independence with a youth and sports festival. In parallel various amateur radio activities are held. Thus, several amateurs from Samsun (TA6P, TA6U, TA2IK, TA6RM, TA7AO) will use the special call TC1919ATA from May 18-20. QSLs via TA6P or TA6U.

The "TCSWAT" team members TA7EB, TA7BC, TA3AX, TA2RX, TB2MYE and TA1HZ celebrate the 130th birthday of Ataturk by activating the special call-sign TC130ATA from May 16-22. QSLs via bureau or direct to TA1HZ.

V3 - BELIZE, NA-073
Starting on May 19 Mike,VE2XB, will stay on Caye Caulker (NA-073) until July. Mike plans to work on all bands (except 6m). QSLs via homecall. After that Mike will travel to Dominica (J79) and wants to stay there for a few weeks as well.

XV - VIETNAM
Paul,WQ2N, wants to become QRV again as 3W2N between May 23 and Jun 8. Paul has a job in Vietnam, so amateur radio will not be his first priority. He wants to travel through several regions and focuses on 40/30/20/17/15m. QSL via WQ2N, preferably direct or LoTW, also bureau.

8R - GUYANA
Alex,W1CDC, wants to work "holiday style" in CW and SSB on 80m-10m signing 8R1A from May 13-24. QSL via bureau or direct to his homecall.

CAMEROON, SPECIAL EVENT STATION
Henry,TJ3AY, is using the special callsign TJ3IC until May 30. "IC" stands for "Independence Cameroon" namely the 51th anniversary of the independence of Cameroon. QSL via bureau or direct to F5LGE.

PORTUGAL, SPECIAL EVENT STATION
Some members of the "Algarve STAR DX Team" will be active as CR55PQ from May 21-23 celebrating the 55 anniversary of the Para-Quedistas military school. This is also the QTH of the station. Miguel,CT1EHX, Toze,CT1GFK and Mike,CT1IUA, will be QRV in CW, SSB and RTTY on 80m-6m. QSL via bureau or direct to CT1EHX. See also: http://algarvedx.com
---
CS2HD will be QRV from the international Harley Davidson meeting in Tavira from May 23-29. QSL via CT2FPE.

SILENT KEYS: The wellknown DXpeditioner Frank R. Smith (AH0W) passed away at
the age of 61 on Apr 30. He was a member of several large DXpeditions
like 4J1FM/4J1FW (Malyj Vysotskij 1992), XF4M (Revillagigedo 1994),
AH4/AH0W (Midway 1996), K7K (Kure 1997), K4M (Midway 1997),
XW30/XW30A (Laos 1998), 3B9R (Rodrigues 1999) and many more.
Other DXers who passed away during the last days are:
Earl H. "Sonny" Marsh (KE4LDJ), Earl M. Ringle (N7ER),
Gerard "Jerry" Scarano (W1ZM) and Marwin H. Gonsior (W6FR).

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

May 21/22: King of Spain Contest
May 21/22: Baltic Contest
May 21/22: Aegean RTTY Contest
May 28/29: CQ WPX Contest, CW

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-042, DL, Schleswig Holstein state NW group: DK1DN and DL1ECU will be QRV
from Pellworm (DID N-24) for ten days starting on May 21.

EU-043, SM, Goteborg Och Bohus, Halland county group: A Swedish team will
shop up from Vinga working with four high power stations in CW, SSB
and RTTY on all bands from May 19-22. See also: http://sm6.se/gbgdx
QSL for 7S6W via bureau.

EU-051, I, Ustica Island: A Sicilian group activates Ustica as IE9Z from
May 20-23. They plan to work in CW/SSB/RTTY on all HF bands, 6m and 2m.
QSL via IT9TFX (bureau/direct).

EU-105, F, Bretagne (Finistere north) region group: Five French HAMs will be
active from Batz Island signing TM0Z from May 21-26. QSL via F5EOT.
See: http://www.frag33.org/frag and http://www.cdxg.org/homeuk.html

EU-120, G/M, English coastal islands: M0TNX has the opportunity to activate
the uninhabited island Hilbre with a special permission from May 20-22.
GB2HI will be QRV mainly in SSB 40m, 20m and 17m. CW QSOs will be made
upon request. QSL via M0OXO (bureau/direct). Find more information at:
http://www.gb2hi.co.uk
http://en.wikipedia.org/wiki/Hilbre_Island
http://cobs.pol.ac.uk/cobs/webcam

EU-128, DL, Schleswig Holstein state East group: DL/HB9SVT will stay on
Fehmarn (DID O-01) from May 22 until Jun 12. He works in CW, SSB, RTTY
and BPSK31 on al HF bands. He might be able to activate also some
lighthouses. His website is: http://www.hb9svt.ch/dl-hb9svt
QSL via homecall (bureau/direct/LoTW/eQSL).

EU-172, OZ, Jylland east & Fyn group: OZ/DG9SEH will be QRV from Langeland
(DIA FY-019) from May 22 until Jun 2. QSL via homecall (bureau/direct).

NA-066, K, California state south (Orange & San Diego) group: K6VVA and NI6T
will be QRV as K6VVA/6 from Santa Catalina Island. They plan to work
mainly in CW on 40m-15m from May 24-26. QSL via N6AWD (bureau/direct).
Siehe auch: http://www.k6vva.com/iota/na066

OC-119, DU, Jolo group: We have heard of plans for an IOTA DXpedition to
the very rare Jolo group during the second half of May. They might
show up as DX8DX or DX8J, another possibility would be DU8/homecalls
(OPs: DV1UD, 4F1OZ, 4F2KWT). See also http://en.wikipedia.org/wiki/Jolo

IOTA News

The RSGB announced that the IOTA program has their full support.
There are no problems concerning the financing or publishing of the
IOTA Directory which is the most important part of the very successful
Island on the Air program.

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
09 - 15 May 2011

Solar activity was at very low to low levels with isolated B and
C-class flares observed. Two CMEs on the earthward side of the sun
were observed during the period. The first CME was associated with a
C5 x-ray event at 09/2059 UTC from a region rounding the NE limb. It
appeared to be the return of old Region 1193 (N17, L=266). This
event produced a partial-halo CME with an estimated plane-of-sky
velocity of 1225 km/s, based on SOHO/LASCO imagery. The second CME
was associated with a B8 x-ray event at 11/0243 UTC, likely
associated with a filament eruption between Region 1205 (N14, L=036,
class/area Bxo/010 on 03 May) and Region 1207 (N24, L=007,
class/area Bxo/020 on 05 May). Associated with the second CME was a
Type II radio sweep (632 km/s). Based on SOHO/LASCO imagery, the
estimated plane-of-sky velocity was 420 km/s. The rest of the disk
was populated with numerous small, magnetically simple spot groups.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels on 09 May and at moderate levels 10 - 15 May.

Geomagnetic activity ranged from quiet to active levels during the
period. Activity was at quiet levels on 09 May. Levels increased to
quiet to unsettled, with isolated active periods on 10 - 11 May.
This increase in activity was associated with the onset of a CH HSS.
Activity decreased to quiet levels from 12 - 13 May before
increasing to unsettled to active conditions midday on 14 May with
the onset of another CH HSS. Conditions were mostly quiet to
unsettled on 15 May as weak HSS effects continued.

Forecast of Solar and Geomagnetic Activity
18 May - 13 June 2011

Solar activity is expected to be at very low to low levels through
the forecast period. There is a slight chance for isolated periods
```

of moderate levels due to the possible emergence of new regions as well as the return of old regions.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate to high flux levels during 18 - 20 May, normal to moderate flux levels on 21 - 26 May and back to moderate to high flux levels 27 - 29 May. This forecast is based on anticipated recurrent CH HSS influences.

Geomagnetic activity is expected to be at predominately quiet to unsettled levels on 17 May due to continued recurrent CH HSS effects. Activity is expected to decrease to mostly quiet levels during 18 - 25 May. The field is expected to be under the influence of a recurrent negative polarity CH HSS during 26 - 30 May. During this period, quiet to unsettled levels are expected, with isolated active periods on 27 May. Mostly quiet conditions are forecasted to return 31 May - 5 June, before another CH HSS is expected to return. Mostly quiet to unsettled conditions are expected 6 - 7 June from this small feature, before returning to quiet conditions 8 - 10 June. Mostly unsettled to active conditions are expected to return 11 - 13 June as HSS effects from the CH we are currently under the influence of should return.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING MAY 22 2011.

AGM - TEXT EDTION ONLY

The 2011 WIA Annual Conference, Annual General Meeting and Open Forum will be
held in Darwin NT, next weekend. Yes it's here already.

Those attending will be looking forward to enjoying the hospitality offered by
the host club, the Darwin Amateur Radio Club, led by Spud Murphy VK8ZWM.

There's a nice balanced programme of social and technical activities that will
keep participants informed and entertained, and along the way they will

experience some of the relaxing tropical life that is Darwin.

Among the more mundane, yet essential elements of the weekend, is the Annual General Meeting of the Institute where reports from all aspects of the society's work will be tabled, and the open forum that follows provides an opportunity for questions and answers.

The WIA Board will meet on the Monday morning, and one part of the normal business of the Board is to appoint the army of volunteers who manage so many of the WIA's functions, and by my reckoning there are close to 40 such positions Add to these the people recruited to help them, and we have an army of volunteers across the nation working for you, the Amateurs of Australia.

Of course it's not just the WIA that relies on volunteers - every Amateur Radio group is operated by volunteers - it is the work done by those willing people that keeps clubs running, provides education and assessments for Amateur Radio licenses, build and maintain repeaters etc right through to the making of the tea, coffee and nibbles for club meetings.

So if you've not thanked the volunteers supporting your club, how about doing it real soon.

I'm Bob, VK6POP, Director of the Wireless Institute of Australia

NBN

The Federal Government on Wednesday morning claimed it had "made history" after it officially launched live services on its flagship National Broadband Network project on the mainland, in a ceremony attended by Prime Minister Julia Gillard and Communications Minister Stephen Conroy.

The northern NSW city of Armidale has had a number of residents connected to the NBN already for about a month, with a number of locals reporting in mid-April that their connections had gone live, with early entrant service providers such as Primus and iiNet connecting customers up.

However the NBN's mainland launch had not until Wednesday received its formal send-off.

Armidale is one of five first release sites where the NBN is rolling out on mainland Australia. The other sites of Kiama Downs and Minnamurra (NSW), Townsville (QLD), Willunga (SA) and Brunswick (Vic) which will begin offering services progressively over the coming months.

Read the full story on the web, google "Delimiter".

SKA

ABC Radio News in Tasmania have reported on a University of Tasmania team which has won out over dozens of other international proposals to access the new Australian Square Kilometre Array Pathfinder radio telescope currently under construction in Western Australia.

Professor John Dickey, Head of the School of Mathematics and Physics leads a team which will map the "interstellar medium" and analyse the structure of the

Milky Way and the lifecycle of stars.

IT'S RADIO AS YOU KNOW IT PLUS!

Joan Warner CEO, Commercial Radio Australia will speak on digital radio at this week's RadComms Conference in Sydney 26 & 27 May alongside other featured speakers such as, Senator the Hon. Stephen Conroy Minister for Broadband, Communications and the Digital Economy.

The conference presents a unique opportunity to hear about the latest developments in spectrum, and offers open forums to exchange ideas with radiocommunications professionals across industry and government.

HAMS ACROSS AUSTRALIA.

VK1

25th MAY General Meeting Presentation Topic:

"WSPR (Whisper) 101" - An introduction to Weak Signal Propagation Reporter.

Ian Stevenson VK1HOW has agreed to give a presentation on wspr with a demonstration of hardware and software applications to enable users to participate in WSPR digital technology

EDUCATION

14/15 May CRARC ran a Foundation Licence course in Canberra with 3 candidates for the course and one for an upgrade to advanced level.

Congratulations to Bruce Stewart, Jonathon Tary and Dennis Stanton for successfully completing the course and well done to Ian Stevenson for upgrading to advanced level.

CRARC run regular Foundation Licence courses and upgrade assessments every two months at Mt Mugga Scout Hall, their next Foundation course will be the weekend of the 16th and 17th July and Upgrade Assessments on the Sunday.

News from the Queensland Digital Group and ATV Group.

Alan VK4NA informs us that the QDG is still growing and now has 53 members spread over five countries.

The club's Web site and monthly newsletter 'Digipeat' continue to interest both Amateur and non Amateurs alike.

Brisbane area members meet on the third Friday of the month for a chat and occasional lecture, Google 'Queensland Digital Group' for details

Amateur Television alive and well in Brisbane

South East Queensland ATV members meet in Brisbane on the first Friday of the month, join them for good company and good food, Google 'South East Queensland ATV group' for details.

At the April TREC meeting Ron Goodhew VK4EMF gave an update on the historical radio station XQA which will be on permanent display at the Mareeba Heritage Museum on the Atherton Tablelands.

Ron has been instrumental in acquiring and setting up this fascinating display of the first licensed Queensland Amateur Radio station (a spark gap station) that was operated by Marcus Brims in Mareeba in 1914. It is believed that the station is basically still in an operational condition.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Technology has the effect of changing the interactions between people. The difference between walking, animal power and then machines such as trains saw a new mobility and knowledge of one's surrounds. The creation of written language, writing and the printing press changed the way information was spread. Electronics enhanced the telegraph, telephone and we now have pocket computers called smart phones.

News and information, trivia and comment are available at a finger touch on a screen and the current generation of technology users take this for granted. Long gone is the pedal radio and the operator connected phone call.

It is becoming more apparent that the benefits of this new communications technology are less "Star Trek" and more adapting social standards to available technology. The growing use of instant comms demands exponential growth of infrastructure.

However, in the hobby domain we have a limited range of technologies with poor geographic distribution to serve the amateur population. Similarly the cost of hand held devices which will meld internet and telephone function is comparable with the brand name major smart phone.

For me, the question becomes will the potential radio hobbyist be able to forsake the sophistication of the commercial system with multiple apps,

good available computing power and easy connectivity for the currently old and limited amateur radio service?

I'm Geoff Emery and that's what I think....how about you?

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

NYC ALERT.

Smartphone and other GPS enabled mobile device users in the New York City will be the first in the United States to receive emergency alerts on their handsets. This with word that the new FCC inspired Personal Localized Alerting Network or PLAN system will be inaugurated in the Big Apple by the end of the year.

Once in operation, it will deliver geographically targeted text messages to GPS-enabled cellular telephones. The new system will be used for just three types of alerts.

These are ones issued by the president, alters of a life-threatening incident and AMBER Alerts in search of kidnapped or missing children.

Participating carriers can opt out of all but the Presidential alerts.

STILL IN USA AS WEATHER CLEARS IN SOUTHEAST, HAMS CONTINUE SUPPORT

Even though the storms that raged through Southeast USA have long gone, the damage and heartache they left in their wake are still present.

In Alabama, the state that felt the biggest brunt of the storms, hams made their way to fire stations, emergency operations centres and shelters -- anywhere they were told that they were needed.

Calling it his first experience with an EF-5 tornado, ARRL Southeastern Division Director W4OZK, said that the devastation is "mind-boggling!

ARES successfully provided a massive amount of critical communications, got repeaters back on the air, with no utility power.

It took five days before significant utility power was restored.

KOSHER

Telecommunications companies in Israel have tapped into a growing cell phone market with the creation of 'Kosher' mobile phones.

Kosher phones block access to services which are not approved by Ultra Orthodox rabbis such as erotic phone services and text messaging between members of the opposite sex.

These devices do not have SMS, they don't have data, they don't have internet, they don't have a camera, they don't have a radio. These devices are for speech only. And there is a market in the world which is interested in a speech-only device.

Bletchley Park Enigma exhibition

If you are visiting the UK, listen up! Bletchley Park Trust has opened a new exhibition commemorating the 70th anniversary of the capture of an Enigma machine and codebooks from German U-boat 110 that took place 70 years ago.

The exhibition contains photographs of the capture and it is the first time all known photos have been exhibited together at the same time. The exhibition tells the full story including many of the details that appeared in the best selling book on the capture of the Enigma code.

www.bletchleypark.org.uk.

SOTA PASSES MILLIONTH QSO

Some big news for hams who like to operate portable off of tall rocks called mountains. Here's Jeremy Boot, G4NJH with the details:

Summits on the Air recently passed a significant milestone with its millionth QSO being made over the recent holiday period.

SOTA started in 2002 and has now grown into a worldwide award scheme with 55 associations across the world and around 44,000 qualifying summits.

I'm Jeremy Boot and you are tuned to the Amateur Radio Newsline.

For more information on the scheme, check out the internet at www.sota.org.uk

W8BBA FALLS SILENT AFTER 50 YEARS SERVICE TO VETERANS

Amateur station W8BAA located at the Veterans Administration Hospital in Brecksville Ohio fell silent on April 29th after at least 50 years of service to veterans.

The Brecksville VA hospital operations are being moved to the main Cleveland VA hospital and the Brecksville radio club equipment is being transferred to the radio room at that facility. The club call at the main hospital is WA8VA.

HAM NATION WITH K9EID PREMIERES MAY 24

Amateur Radio's Mr. Audio, Bob Heil, K9EID, will be hosting a new weekly HD video webcast about our hobby titled Ham Nation. According to Bob, each weeks Ham Nation will feature interesting guests as they discuss the many fascinating aspects of the hobby.

The shows premiere on May 24th will have famed rock guitarist Joe Walsh, WB6ACU, and broadcast facility designer Dave Jennings, WJ6W, as Bob's special guests.

Jennings is one of the hosts of the Amplitude Modulation International net that meets every Wednesday on 3870 kHz.

Ham Nation will air Tuesday evenings at 9 p.m. Eastern, 8 p.m. Central and 6 p.m. Pacific time on Leo Laporte's TWIT TV Internet network.

To tune in, please take your web browser to live.twit.tv and join the fun.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

2011

Aug 20-21 WW I.L.L.W.

A milestone for the International Lighthouse & Lightship Weekend

The 200th entry has been received from Jason Schlencker VK4FJGS, who will be at the Sea Hill Point Lighthouse on the tip of Curtis Island off Central Queensland.

Also adding excitement is a new country, Azerbaijan which will see the Absheron Lighthouse take to the air under the callsign 4J0LH.

Usually there are about 50 countries and last year we had a record 447 entries.

The basic objective is to promote awareness of lighthouses and lightships, their need for preservation, promotion of amateur radio and International goodwill.

Germany has 34 registrations so far this year, just ahead of the USA and Australia on 28 each, followed by England, Netherlands and Sweden.

There are many more accessible and yet to be activated lighthouses around the world.

The 48-hour fun event is always held on the 3rd weekend in August, which this year means August the 20th and 21st. Check out the details on the website ILLW.NET

(Jim Linton VK3PC)

Steve VK3TDX has been told by CQ magazine he was the Oceania winner SOAB HP for the 2010 RTTY DX contest with 1326 QSO's, he says "This is my first significant contest win and I get the plaque for Oceania HP but due to a misunderstanding of who was going to sponsor the Oceania plaque my name didn't get printed in the winners on page 16 of the current CQ issue but the contest director confirms that I did win."

(73 Steve VK3TDX via vk6pop)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The Adelaide Hills Amateur Radio Society was approached by a group named "1912 the Event" This group is commemorating the 100th anniversary of the sinking of the Titanic in April 1912.

They wanted a morse code operator for their displays, the first on May 31st from 6.30 to 9.30 pm at Adelaide Arcade, this is 100 years from the launch of the Titanic.

One of our members, Doc, VK5BUG, took up the challenge. Doc is an excellent CW operator, but will measure his speed to match his contact's ability.

The Club have obtained the call VK5MGY from the ACMA. MGY was the call of the Titanic. The call will be in use for the next 12 months and we will produce a QSL card for contacts.

Keep your ear out for VK5MGY on the bands for the next 12 months.

Check out the event web site 1912theevent.com

This has been David VK5KC, President of the Adelaide Hills Amateur Radio Society

MONACO, 3A.

Monaco Telegraphy Group active as 3A2CWG during the month of May in celebration of its 20th anniversary.
QSL via 3A2LF.

COLLINGWOOD OPEN DAY JUNE 4

On the air, the United Kingdom's Royal Naval Amateur Radio Society will run a special event station on the H.M.S. Collingwood on Saturday June 4th. The callsign to be used is GB6COD which stands for Collingwood Open Day. The station will be operational on all amateur bands from 1.8MHz through 440 MHz. The Society headquarters station will also be open for viewing from 9.30am to 6pm the same day. The open day will also feature the Royal Navy Field Gun Competition.

JULY 24

Hellenic Amateur Radio Association of Australia out to Lord Howe Island VK9HR. 24th July to 2nd August 2011.

get this - get the cupie doll!

On 7 May 2011 a new beacon was switched on in Bloemfontein to test NAVIS conditions from the central Freestate. The beacon operates on 7 027 kHz running 50 mW into a dipole antenna 6 metre above the ground.

The purpose of the new beacon is to test propagation conditions from central South Africa. The antenna in use is set up for NVIS conditions. NAVIS is the acronym for Near Vertical Incidence Skywave. It is a radio-wave propagation method that provides usable signals in the range between ground wave and sky wave distances, usually between 50 to 650 km. The radio waves travel upwards into the ionosphere, where they are refracted back down and can be received within a circular region up to 650 km from the transmitter. If the frequency is too high, refraction fails to occur and if it is too low absorption reduces the signal strength. The usable frequencies for NVIS communications are between 1,8 and 15 MHz.

The beacon sends the following message in an endless loop in CW at 5 words per minute: "VVV DE ZS4BOT/B KG30BV." The beacon's position is KG30BV.

The beacon and software was designed and built by Jan, ZS4JAN.

Reports can be sent to wirelesscomms@vodamail.co.za.

WIRELESS WEATHER

Beginning Tuesday, September 6, the Space Weather Prediction Centre will cease broadcasting its geophysical alert message on WWV and WWVH.

These messages have informed listeners of the solar flux, the mid-latitude A and K indices and space weather storms, both current and predicted. Currently, the message is heard on minute 18 from WWV and minute 45 from WWVH.

The information will still be available on the SWPC website.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.
2nd Sunday each month.
April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

Space shuttle Commander Mark Kelly and his five crewmates, 3 of whom are licenced radio amateurs, are on the International Space Station after launching from NASA's Kennedy Space Center Monday.

The STS-134 mission is the penultimate orbiter flight and the final one for shuttle Endeavour

Kelly's crewmates are Pilot Greg H. Johnson and Mission Specialists Mike Fincke KE5AIT, Drew Feustel, Greg Chamitoff KD5PKZ and Roberto Vittori IZ6ERU, of the European Space Agency.

IZ6ERU will be the last international astronaut to fly aboard a shuttle.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

50 YEARS OF IOTA

2014 marks the 50th anniversary of the launch of the Islands On The Air Program by British SWL Geoff Watts. As a build-up to celebrations on this occasion, the RSGB Islands On The Air Manager and Committee have announced an exciting activity period in which all licensed amateurs world-wide are invited to participate.

For a two-year period during 2012 and 2013, Islands On The Air chasers are encouraged to contact as many different IOTA groups as possible. Also, for hams so inclined to play their part by operating from as many groups as possible, with special emphasis on the less-frequently activated ones.

The complete rules of the Islands On The Air 50th Anniversary Marathon will appear in the forthcoming RSGB IOTA Directory to be released at the Dayton Hamvention.

They can also be on-line at www.g3kma.dsl.pipex.com

REWIND

Who was &#xFFFD;douard Branly?

�douard Branly (1844-1940) was one of the earliest pioneers of radio, but is largely unknown outside his native France. Branly's experiments in 1889/90 with the "coherer" receiver, arguably the earliest practical radio receiver, was credited by the later, British receiver pioneer, Oliver Lodge, and was further developed by Guglielmo Marconi, then replaced about 1907 by crystal detectors. Indeed, Marconi's first wireless transmission across the English Channel, in 1899, sent a greeting and credit to Branly.
(Original in French; translated: "Mr. Marconi sends to Mr. Branly his regards over the Channel through the wireless telegraph, this nice achievement being partly the result of Mr. Branly's remarkable work.")

The coherer was a 'digital' device, relying on the welding of minute particles of iron where the electromagnetic radiation broke through the oxide and thus caused a sudden reduction in the conductivity of the coherer. In this respect, it was a 'digital' receiver, in the same way that the Morse Code is a digital mode. Branly realised the necessity to strike or vibrate the coherer to break apart the particles; Lodge perfected the technique; Marconi employed it.

Branly was trained as a physicist at the Sorbonne University in Paris, earning a doctorate for studies into electrostatic phenomena in batteries. He later trained as a physician, earning a doctorate for studying haemoglobin concentration in blood, before returning to practical physics as a professor at the new Catholic University (Institute Catholic) of Paris.

Branly participated in the early radio experiments from the Eifell Tower in the late 1890s. He did not file any patent and freely distributed coherers (Branly tubes) to all requesting them, concentrating on the improvement of its sensitivity and stability; nevertheless, this technology was overtaken by crystals and then valves and transistors. Branly was twice proposed for a Nobel Prize in Physics, in 1904 and 1915, but radio was acknowledged in 1909 for Marconi and Braun. In 1911, amidst open controversy, Branly was elected to the French Academy of Sciences in a contest against Marie Curie. The next year, he refused Marconi's offer to be a technical advisor to a Marconi company. During World War 1, Branly served as a military engineer, including developing an infrared telegraph for secret communications.

Even after formal retirement from the Catholic University, Branly was an active experimenter into his early 90s, using a laboratory built for him at the Institute Catholic by a benefactor, and honoured variously including a visit in 1934 by the mother of US President Roosevelt. He published his last paper in 1935, at age 91, describing a medical thermometer using Nickel in the bulb. He died in 1940, his funeral at Notre Dame cathedral in Paris attended by the French President.

�douard Branly (1844-1940), radio pioneer.

511. MMMonVHF Newsletter 2011-05-19

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-19 14:43:43 UTC
From: MMMonVHF News Mailer <noreply@mmmonvhf.de>
Message-ID: <201105190938.p4J9cnnC032309@server13.web4a.de>
Source record: 4501
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.info

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-05-19
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** SPORADIC E saison, inputs to MMMonVHF and Observation 2011 **

The first 144 MHz ES-Opening 2011 occured past sunday, may 15th!
In case of an ES opening on 144 MHz please remember to send all your
QSO in a short Log to MMMonVHF - HOW? Please go to the MMMonVHF forum
www.mmmonvhf.de/minibb/index.php?action=vthread&forum=11&topic=80
and read about our "call for reports". The text will be available
in several languages. or use direct the input at:

http://www.mmmonvhf.de/es.php >>> click on "Send your Report"

Remember please that we are going to publish ONLY 144 MHz Logs - if
we get input for 6m, 4m or 3m reports we do use it for the headline.
As you all know, the most necessary at a SPORADIC E Opening will be
to be at the right time at the right place. As well every of us will
have some "warning" systems for the time between May to August.

** Howard WB4WXE return to St. Lucia / FK93 **

Howard WB4WXE is planning a return to St. Lucia again 25 June- 15 July 2011. Callsign this year will be J68HS. This is a 50 Mhz expedition. However, when 6 meters is quiet, attention will be given to 12m, 17m, 40m, and 160m. Operation site will be at 2,000 foot elevation over looking Soufriere, St. Lucia. Grid square is FK 93. Antennas this year include a 6 element Yagi for 6m, 2 element Yagi for 17m, and full size 1/2 wave vertical for 160m, 40m and 12. Equipment will be an Icom IC-706 with Tokyo Hy-Power HL-550fx 550 watt 1.8-50 mhz amplifier. QSL via QRZ.com for J68HS. An additional 200 watt 50 mhz amplifier will be travelling to J69MV for year round resident activity on 6m. Tot has the 6m Yagi up now so expect to hear bo th callsigns this summer. 73 SOURCE: Howard WB4WXE via UKSMetre Group Announce

ACTIVATING EL58 in 2011

LATEST K5N Activation group announcement, dated 2011-05-18: As you may know, the Mississippi River is currently undergoing "The Great Flood of 2011". River heights are at record levels. The peak of the flood will fall during the time that we had planned to be at EL58--or very close. The team does not believe that traveling the river will be safe In addition, the island where we must setup may quite possibly be under water. Burwood Island was only about 2 ft above the Gulf of Mexico when we were there in 2009. Current river heights are running 3 ft above normal and rising. None of us are prepared for a Scarborough Reef type expedition. Hence, we are moving our DXpedition dates. Here is the latest plan: June 29th Team arrives in Venice, LA - June 30th Load the boats and leave for EL58. We should be operational by 1PM or so - July 1-3 Operate from EL58 - July 4th Operate until 9AM. Then the team will pack out and leave the island. For all the details, please check out our new EL58 web page which may be accessed from the Grid Bandits home page (http://www.kcvhfgridbandits.com/) by clicking the DXpeditions button at the lower right. Or, just go to http://kcvhfgridbandits.com/kc_vhf_grid_bandits_044.htm
Also, please note the addition of Russ-KB8U of CM79 fame. All email concerning this event should be addressed to k5n@bellsouth.net, NOT to our personal email addresses. Team K5N wishes to apologize for having to change our plans again, but we believe that fighting the Mississippi River is probably a seriously losing proposition. We believe that the water will be down to manageable levels by June 30th We hope to work everyone possible, so listen up for us. Thank you. 73 SOURCE: N5OMG, KE5KDM, WN2E, N5YA, K5QE, KB8U, K5YG, W5TFW and N0IRS A Grid Bandits DXpedition, via Marshall, K5QE, to MMMonVHF

** J7 Dominica Operation **

DOMINICA, J7.George, K5KG, Dan, K1TO, Jim, WI9WI, and Chris, NX4N
will be QRV as J79FCG, J79WI, and J71W, May 21 through May 31.
Activity will be on all HF bands and 6m using CW and SSB.They plan
to be active as J7A in the CQ WPX CW contest.QSL J79FCG via K1TO.
QSL J7A and J71W via NX4N. QSL J79WI via WI9WI.
SOURCE: George Wagner, K5KG via NG3K-DX-News

** CM93 Preliminary Announcement **

Hello All, this is a preliminary announcement for the grid trip
Dennis K7BV and I will be making to CM93. Dates are June 8th to
June 15th and possibly longer weather permitting. This trip will
be focusing on 6 meters and possibly some 2 meters if there is room
on the vessel. We will be on the vessel for the whole operation.
More details will be coming shortly with frequencies etc. Regards
SOURCE: Barry KS7DX via WSJT group reflector

** Alaska, KL7, Activity **

Yuri, N3QQ and other Russian Robinson Club members are planning to
operate as KL7RRC from the Alaskan island St. Matthew between July 29
to August 5, 2011. They wil have an IC7600 and 3 IC7000; no PA for
6m and only 1/4 lambda as 6m antenna :-(
Web site: http://www.na-234.com/index.html
SOURCE: (Sixitalia Weekly) via CQ Six - 50 MHz DX News #20110516

** FP, ST. PIERRE & MIQUELON **

Eric, KV1J, will once again be operating from the Island of Miquelon
((NA-032, DIFO FP-002 WLOTA 1417, Grid GN17) as FP/KV1J between
October 24th and November 1st. Activity will be on 160-10 meters using
CW, SSB, RTTY and PSK31 (but primarily SSB and RTTY). He will
generally be on the highest frequency band that is open, and he may
try 6 meters if there is an indications of openings. He has no
permission for 60m. Also, look for him on the AO-51 satellite (and
other FM birds), weather permitting and if in the 2M/70cm mode. Eric
will also be in the CQWW DX SSB Contest (October 29-30th) as a
Single-Op/All-Band entry. QSL via KV1J, direct or by the Bureau and
also LoTW. For more details and update, check out his Web page at:
http://www.kv1j.com/fp/october11.html
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1011

** IOTA DXPEDITION MS0INT **

The MS0INT Team (Col/MM0NDX [team leader], Christian/EA3NT, Ramon/EA3OR Raul/EA5KA, Stan/EI6DX, Vincent/F4BKV and Simon/IZ7ATN] will activate IOTAs EU-010, EU-059 and EU-111 in about four weeks. The proposed time table of their planned activities have now been announced. They will attempt to follow this schedule as closely as possible, but since the weather and seas dictate this expedition, their plans may change suddenly. During transmissions they will regularly update their operating locations should they differ from their intentions. The tentative schedule is as follows:
June 14th - Look for MM/F4BKV and MM0NDX/p from South Uist (afternoon) and Berneray (evening) -- both EU-010.
June 15th - Look for MM/F4BKV and MM0NDX/p from Benbecula; awaiting full team to arrive (morning) EU-010.
June 15th - The group will split into three teams of two to activate Grimsay, North Uist and Baleshare, EU-010 simultaneously on CW and SSB during the afternoon.
Team 1: MM/F4BKV and MM/EI6DX activate Grimsay
Team 2: MM/EA5KA and MM/EA3OR activate North Uist
Team 3: MM/EA3NT and MM0NDX/p activate Baleshare
June 15th - MM/IZ7ATN and others on air from Berneray during the evening.
June 16th - Depart Grimsay for Monach Isles, EU-111. Spend approx. 24 hours on Monachs. Callsign: MS0INT/p
June 17-20th - St Kilda Archipelago, EU-059 activity until latest 0800z on June 20th. Callsign: MS0INT. Three HF stations CW/SSB + 50Mhz (50MHz Trophy Contest included). All QSL requests for MS0INT and MS0INT/p go via M0URX. All QSL requests for MM/<homecall> are via RX3RC. ADDEDE NOTE: Vincent, F4BKV, plans to be active from Shetland (EU-012), Orkney (EU-009) and Great Cumbrae (EU-123) between June 11-13th, prior to joining the MS0INT team. For updates and more details, watch: http://ms0int.com
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1011

** EO40 6m Activation May 28 to June 3 WB8BZK/VE3 **

VUCC grid hunters who need Canadian grid EO40 may want to listen for WB8BZK / VE3 who will activate EO40ud from Seseganaga Lake in Ontario between May 28 and June 3. Band: 50 MHz SSB & CW Frequencies: 50.135 MHz (starting on the calling freq, 50.125 MHz and moving up to 50.135 during an opening) Equipment: FT100D with 100W into a 3 element yagi up 30 feet, Battery powered - Activity times: I will check for activity each morning at 1230Z and then again between 2230Z and 2300 each evening. I will also give it a try if the WX is too nasty to go out fishing. Looking forward to a few band openings or maybe some aurora action. I am willing to make a few 1230Z SSB Meteor Scatter Sequence skeds. I will QSL to all who need the grid. Send SASE to WB8BZK address on QRZ.com 73 Mike WB8BZK/VE3
SOURCE: tnx to Andy, N8OFS direct to MMMonVHF

** V3, BELIZE, qrv HF and 50 MHz **

Mike, VE2XB, will be active as V31XB from Caye Caulker Island (NA-073) starting May 19th, for several weeks. Activity will be on all HF bands except 6m, using CW and SSB. Mike states that he will be looking especially for JA stations to work this IOTA (as well as everyone else). QSL via VE2XB (see QRZ.com). ADDED NOTE: Mike will be heading to J79-land in July for several weeks.
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1011

** IOTA Trip - IE9Z from Ustica Island, JM68 **

IT9AHI, IT9DVZ, IT9TFX, IT9TQH, IT9YMM, IT9ZIV and IW9FSG will be active as IE9Z from Ustica Island (EU-051) on 20-23 May. They will operate SSB, CW and RTTY on the HF bands, plus 6 and 2 metres. QSL via IT9TFX, direct or bureau.
SOURCE: [TNX IT9YMM] via [425ENG] 425 DX News #1045

** SPECIAL EVENT GB6COD qrv **

The Royal Naval Amateur Radio Society will run a Special Event station at the open day in HMS Collingwood on Saturday, 4 June 2011. The call sign to be used is GB6COD, Collingwood Open Day. The station will be operational on all amateur bands from 1.8MHz to 440MHz. The Society headquarters station will be open for viewing from 9.30am to 6pm on the day. A number of demonstrations will be taking place using amateur radio and amateur television. QSL via the RSGB bureau.

==> + FRIENDS USE HAM RADIO TO SUMMON HELP WHEN ALASKA AMATEUR IS MAULED BY BEAR

Wes Perkins, KL0FM, of Nome, Alaska, was seriously mauled by a grizzly bear during a hunting trip on Sunday, May 14. According to the Alaska State Troopers, Perkins and two friends had been tracking the bear east of Nome -- located on the Seward Peninsula -- when the big grizzly charged the group. Perkins' companions shot and killed the animal during the attack. Perkins was badly hurt, including severe injuries to his face. The hunters called for help using an Amateur Radio handheld transceiver. Read more here <http://www.arrl.org/news/alaska-amateur-mauled-by-bear-friends-use-ham-radio-to-summon-help>.

==> + FCC NEWS: FCC UPHOLDS $4000 FINE TO PENNSYLVANIA AMATEUR

The FCC announced that on May 16, it issued a Forfeiture Order of $4000 to Jose Torres, N3TX, of Philadelphia, Pennsylvania, "for willfully and repeatedly operating his amateur station on an unauthorized frequency at his residence, in violation of Section 1.903(a) of the Commission's Rules." This action follows a 2009 Notice of Apparent Liability for Forfeiture (NAL) against Torres. In 2009, the FCC issued the NAL against Torres, after receiving a complaint of interference in 2008. Agents in the Enforcement Bureau's Philadelphia Office used mobile direction finding equipment in April and June of that year to determine the source of interference. Both times, they found that the source coming from Torres' residence and that the interference consisted of unauthorized radio transmissions on 26.71 MHz. Read more here <http://www.arrl.org/news/fcc-upholds-4000-fine-to-pennsylvania-amateur>.

==> + HONORING AMATEUR RADIO: PUERTO RICAN AMATEURS RECOGNIZED ON D&#65533;A DEL RADIOAFICIONADO DE PUERTO RICO

Radio amateurs in Puerto Rico celebrated Puerto Rico Amateur Radio Operator Day (D&#65533;a del Radioaficionado de Puerto Rico) on May 10, as provided by Law No. 50 of June 7, 1996. The law establishes the second Tuesday of May for this recognition.

That same day -- at a ceremony recognizing a number of voluntary organizations in the headquarters of the Puerto Rico Emergency Management Agency (AEMEAD <http://www.gobierno.pr/AEMEAD/Inicio>) -- AEMEAD Executive Director Heriberto Saur&#65533; presented the proclamation celebrating Puerto Rico Amateur Radio Operator Day, signed by the Governor of Puerto Rico Luis G. Fortu&#65533;o. Carlos Rosado, KP4CAR, accepted the proclamation on behalf of all radio amateurs in Puerto Rico, and especially on behalf of the Amateur Radio Volunteer Corps of Puerto Rico (CVRPR <http://www.cvrpr.com/>), who work closely with the agency in both drills and emergency situations.

"With this proclamation, we have the opportunity to promote and publicize Amateur Radio as a tool of vital importance when maintaining active communications in the event of a breakdown in traditional communications systems due to an emergency and to maintain the flow of information, whether internal or external, as well if necessary," Saur&#65533; said at the ceremony. Click here <http://www.arrl.org/images/view/News/proclamadiadelradioafic.jpg> to read the proclamation.

==> ON THE AIR: LIVE WEBCAM FROM THE DAYTON CROWNE PLAZA CONTINUES THROUGH SATURDAY NIGHT

Thanks to the hard work of Ben Townsend, AK2X, and support from ICOM America, the North Coast Contesters are proud to host the Dayton Contest Cam -- live from the Crowne Plaza Hotel in Downtown Dayton.

"Live camming began Wednesday evening and will continue through Saturday night," said Contest University Chairman Tim Duffy, K3LR. "The cam has an interactive text chat, so you can text the folks that you see on the cam and they can 'talk' back to you via the audio feature on the Dayton end."

Duffy said that while the cam is running, attendees will come up to it and tell viewers what is going on at Contest University on Thursday, the TopBand Dinner on Friday night and even the Super Suite each night through Saturday. "We'll also try and cover the Contest Dinner on Saturday night," he said. "With noted contester and DXer Scott Redd, K0DQ, giving the keynote speech, this is something that you don't want to miss. We're going to try and move the cam around to give viewers a feel of what is going on here. This is our first time trying this out and it might be a little clunky, so please bear with us."

You can reach the cam by going to anyone of the four contesting website front pages -- www.contestsupersuite.com <http://www.contestsupersuite.com/>, www.contestuniversity.com <http://www.contestuniversity.com/>, www.contestdinner.com <http://www.contestdinner.com/> and www.topbanddinner.com <http://www.topbanddinner.com/> -- and clicking on the "Click to Watch Live Dayton Contest Cam" link.

"We hope this new cam helps bring some of the Dayton Contest experience to all of those that cannot be here this weekend," Duffy said.

==> + ON THE AIR: BOB HEIL, K9EID, TO HEADLINE NEW INTERNET SHOW

On Tuesday, May 24, Bob Heil, K9EID -- owner of Heil Sound -- will premier a new netcast show on Leo Laporte's TwiT.tv website. Called HamNation, the show will focus on equipment, applications, tips and general information for the Amateur Radio operator. Heil's first guest will be rock star, friend and fellow radio amateur Joe Walsh, WB6ACU. Walsh also wrote the theme music for the show. The show will be broadcast each week over the Internet at TWiT.tv at no cost. Read more here

<http://www.arrl.org/news/bob-heil-k9eid-to-headline-new-internet-show>.

==> + ON THE AIR: WRTC 2014 ANNOUNCES ADVISORY COUNCIL MEMBERS

Three radio amateurs have been selected to be on the Advisory Council for the 2014 World Radiosport Team Championships (WRTC): Tim Duffy, K3LR, of Edmond, Oklahoma, Craig Thompson, K9CT, of Trivoli, Illinois, and George DeMontrond III, NR5M, of Houston Texas. The WRTC Advisory Council consists of individuals who have not only have experience in the execution of major events, but can provide significant financial resources to the project. Read more here <http://www.arrl.org/news/wrtc-2014-announces-advisory-council-members>.

==> + 2011 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE CALL FOR PAPERS

Technical papers are solicited for presentation at the 30th Annual ARRL/TAPR Digital Communications Conference, to be held September 16-18 in Baltimore, Maryland. Papers will also be published in the Conference Proceedings. Authors do not need to attend the conference to have their papers included in the Proceedings. The submission deadline is July 31, 2011. Read more here <http://www.arrl.org/news/2011-arrl-tapr-digital-communications-conference-call-for-papers>.

==> SOLAR UPDATE

Tad "If I look hard enough into the setting Sun <http://www.youtube.com/watch?v=BQ0q7uJVSPI>" Cook, K7RA, reports: We saw a decline in sunspot activity this week with a 23 point drop in the average daily sunspot numbers and a nearly 9 point decline in the average daily solar flux. These compare, of course, to the numbers for the previous reporting week, which always runs from Thursday through Wednesday. But with this decline in activity, there were three new sunspot groups on May 14 and then one new sunspot group each day following, through May 18. Enhanced geomagnetic activity occurred from May 15-17, with the planetary A index in the low double-digits. The latest prediction from NOAA/USAF is for solar flux readings of 95 on May 19, then 92 on May 20-26 and jumping to 110 on May 27-30. The predicted planetary A index is 5 on May 19-26, then 22, 18, 15, 15 and 8 on May 27-31. Look for more information on the ARRL website on Friday, May 20. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the Rolling Stones' Paint It Black <http://en.wikipedia.org/wiki/Paint_It,_Black>.

==> VOTING NOW OPEN FOR JUNE QST COVER PLAQUE AWARD

Now that you've thumbed through and read the June 2011 issue of QST cover-to-cover, we're sure that an article sticks in your mind. So go ahead and cast your vote for your favorite article in the issue. The article with the most votes will receive the QST Cover Plaque Award.

- A One Person, Safe, Portable and Easy to Erect Antenna Mast, by Bob Dixon, W8ERD
- Is There an Optimum Height for an HF Antenna? by Kazimierz "Kai" Siwiak, KE4PT
- Direct Digital Synthesis for Those Classic Rigs, by Joe Lunsford, N4YG
- A Single Element Vertical "Beam," by David Robbins, K7BKI
- Two Small Helical Antennas for 2 Meters, by John E. Portune, W6NBC
- Get Up and Get-on-the-Air, by Gary Pearce, KN4AQ, and Dick Orander, KD4ISC
- DXpedition to Ponza Island, by Ruth L. Vano, KB0USC

The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST <http://www.arrl.org/cover-plaque-poll> Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Only non-Headquarters staff authors are eligible to receive votes.

==> + DXCC NEWS: DXCC DESK APPROVES 2011 ANDAMAN AND NICOBAR ISLAND DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the 2011 VU4PB DXpedition to the Andaman and Nicobar Islands <http://www.arsi.info/dxpeditions/vu4pb-mar-2011> has been approved for DXCC credit. If you have any questions about this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk.

==> THIS WEEK ON THE RADIO

This week:

- May 20 -- Feld Hell Sprint
- May 21-22 -- UN DX Contest; Aegean RTTY Contest; His Majesty King of Spain Contest (CW); EU PSK DX Contest; Baltic Contest
- May 25 -- SKCC Sprint
- May 25-26 -- CWops Mini-CWT Test

Next week:

- May 27 -- NCCC Sprint Ladder
- May 28-29 -- CQ WW WPX Contest (CW)
- May 29 -- ARCI Hootowl Sprint (local time)
- May 29-30 -- Michigan QRP Memorial Day CW Sprint
- June 2 -- QRP Minimal Art Session

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more informatin. RAC Bulletin 2011-012: Election RAC Ontario South Director
2011-05-14

Congratulations are extended to Mr. Jeffrey Stewart, VA3WXM who was recently elected as the RAC Director for Ontario South for the remainder of a two year term which ends December 31, 2011. Mr. Jeffrey Stewart emerged with the majority vote over Mr. Nelson Jenking, VA3NDJ in a mail ballot closing May 13th for the Ontario South Director's position.

Mr. Stewart has been a certified amateur operator since March 1999 and involved in many aspects of the hobby including a recent term as President of the Mississauga Amateur Radio Club.

Paul Burggraaf VO1PRB
RAC Corporate Secretary

Amateur Radio Newsline(tm) Report 1762 - May 20 2011

The following is a closed circuit and not necessarily for air. With a word from the Support Fund heres our producer, Bill Pasternak, WA6ITF.

--

If you look back, you will notice that the last time you heard me soliciting donations was way back in the fall of 2010. Thanks to your generosity last year the need for me to make these announcements was minimal.

We know you prefer to hear the news rather than having to listen to these announcements and we agree. But over the past few months almost all donations have ceased so here we our with our annual spring pitch.

We do our very best to keep operating expenses to a minimum. Everyone involved in the Amateur Radio Newsline is a volunteer. There is no paid staff. More important, all of the monies you donate go only toward operating expenses and in supporting the Young Ham of the Year Award. And for you, your donation is tax deductible.

We even make it very easy to donate. If you have web access all you need to do is take your web browser to www dot arnewsline dot org. Then click on the words "Make A donation" and use your Pay-Pal account or credit card to transfer into ours.

Or you can use the good old method of writing a check and sending it to Amateur Radio Newsline Support Fund, 28197 Robin Avenue, Saugus California 91350.

Either way, we thank you for your kindness. For your support and for your trust.

OK. Time for me to get back to my desk and write the newscast. For the support fund, I'm Bill Pasternak, WA6ITF.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1762 with a release date of Friday, May 20, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio is on alert as the mighty Mississippi reaches flood state; the National Telecommunications and Information Administration says its not sure what spectrum is really in use by those it oversees; church services are being heard on 10 meters in Europe and the doors swing open at the Hara Arena for Hamvention

2011. Find out the details are on Amateur Radio Newsline(tm) report number 1762 coming your way right now.

(Billboard Cart Here)

RADIO LAW: NTIA ADMITS ITS SPECTRUM AVAILABILITY RESEARCH MAY BE FAULTY

The National Telecommunications and Information Administration better known as the N-T-I-A cannot guarantee that spectrum it oversees is being used efficiently by federal agencies. That was one of the conclusions of a just-released Government Accountability Office study of NTIA's spectrum management. Amateur Radio Newsline's Norm Seeley, KI7UP, has more.

--

According to the Broadcasting and Cable electronic newsletter, identifying that spectrum has become increasingly important. This, as the FCC and the National Telecommunications and Information Administration try to figure out where and from whom to free up band space for wireless broadband.

The report looked at the NTIA's most recent project which was part of that combined FCC and NTIA search for spectrum that might be available for reallocation to broadband carriers. It founds that agencies whose bandwidth was being evaluated encountered difficulties in providing NTIA with the necessary data and analyses. This is likely because the NTIA's data management system is antiquated and lacks internal controls to ensure the accuracy of agency-reported data. This in turn makes it unclear as to weather decisions regarding actual of federal government spectrum usage is based on reliable data.

As a result, the government's General Accounting Office has recommended that NTIA update its strategic plan and establish better controls to ensure accuracy. The NTIA has agreed to review that strategic plan, and that it will work on the issues of accuracy and completeness of studies to the degree it could afford to. But it added that for budget reasons, it would need to continue to rely on self-reporting by government agencies.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

The National Telecommunications and Information Administration (NTIA) is an agency of the United States Department of Commerce that serves as the President's principal adviser on telecommunications policies pertaining to the United States' economic and technological advancement and to regulation of the telecommunications industry. According to Commerce Secretary Gary Locke, as a historical matter the N-T-I-A does

not police Federal agency spectrum use or Federal agency reporting due to budgetary and resource limitations. (B&C)

**

INTRUDER WATCH: CHURCH AUDIO HEARD ON 10 METERS

Illegal broadcasts from at least one church have been heard on 28 dot 265 Mhz by hams in Germany. As a result, amateurs world-wide are being requested to listen on this frequency in order to identify the station and its location. If you hear it, please send your report to Ger McNamara, EIU4GXB. Ger is the IARU Monitoring System Coordinator by e-mail to ei4gxb at gmail dot com.

(GB2RS)

**

ENFORCEMENT: FCC ISSUES SIX NAL'S FOR UNLICENSED OPERATION

Meantime, back in the USA, the FCC issued no less than six notices involving individuals operating overpowered broadcast stations in the FM band without a license. Five of the Notices of Violation or NAL's were issued in Florida, but it was a unlicensed operation in San Jose California that was hit the hardest. Amateur Radio Newsline's Jeff Clark, K8JAC, is here with the details:

--

We start off in Fort Myers Florida. That's where Patrick Michael Ford, also known as Disc Jockey "Joker" was hit with a notice of apparent liability for $10000 for his alleged operation on 95.7 MHz.

Also in Fort Myers, Alex Alcime, also known as Disc Jockey "Short Dawg" was handed a notice of apparent liability for $10000. This after he was also allegedly found operating on 95.7 MHz.

And in Lauderdale Lakes, Florida, Mikhail Rhodd, also known as "Blakk Babi" got his $10,000 N-A-L for operating on 89.5 MHz. The station was calling itself "Stuntastic Radio."

Further south in Miami, Antonio Robinson hit with a $10000 N-A-L for operating a station calling itself Hittbreaker Radio. It was operating on 105.5 MHz.

On Florida's west coast, in St. Petersburg, Thomas L. Morey was also hit with a $10000 Notice of Apparent Liability. The FCC says that he was broadcasting as Thomas on 88.3 MHz,

Finally, some 3000 miles to the West in San Jose CA: Gabriel A. Garcia was hit with a $25,000 N-A-L for operating on numerous frequencies, from numerous San Jose locations, while using the call letters KNRG. The FCC says that when its agents traced a signal on 93.7 MHz to its origin point, a request to inspect the station was denied. According to the FCC on another inspection attempt Garcia not only refused, but

allegedly stated to the agents, "Do you want to get shot?" For all of these reasons the FCC found his violation to be egregious and upped the fine to $25,000.

I'm Jeff Clark, K8JAC.

--

All six of the alleged violators were given the usual 30 days to pay the fines or to file appeals. (FCC)

**

NAMES IN THE NEWS: FCC COMMISSIONER MEREDITH ATTWELL BAKER TO LEAVE FCC JUNE 3RD

Still with FCC news, word that Republican FCC Commissioner Meredith Attwell Baker has announced that she will be leaving her post on June 3rd. Thats 27 days before her term actually was to expire on June 30th.

Baker was nominated by President Obama in June 2009 and sworn in just five weeks later. She filled the unexpired term of fellow Republican and former Chairman Kevin Martin, who resigned in January 2009.

Baker made her announcement on May 12th. At the same time she said that she has accepted a new position with cable giant Comcast as its Senior Vice President of Government Affairs for NBCUniversal division.

Baker's departure creates a Republican vacancy on the Commission. By law, only three sitting Commissioners may be of the same political party. Chairman Julius Genachowski, along with Commissioners Michael Copps and Mignon Clyburn, are Democrats. With Baker's departure Commissioner Robert McDowell will temporarily be the only Republican. (FCC, other published reports)

HAM HAPPENINGS: HAMVENTION 2011 SET TO OPEN MAY 20

As we go to air, the doors are opening at the Harra Arena ushering in the 2011 Dayton Hamvention. And while its to early to tell how thick the crowds will be, Assistant General Chairman Josh Long, KD8BVB, says that the events planners are ready for just about an number of attendees or any eventuality that might come their way:

--

KD8BVB: "We try our hardest not to affect attendees with security measures, but we do hace the City of Trotwood Police and Fire Departments on-premises the entire show. They actually have their ambulances thre and do a bike patrol of the area.

"We use local security - a merchants security to check the doors and secure the lots in the evenings.

"There is a lot of planning behind the scenes with an event this size. You have to coordinate with local authorities and have meeting places off-site in case of an event that might happen.

"We have been fortunate to not vave to put any of those protocols into place. But they are there and available to keep our attendees and our volunteers safe."

--

According to Long, this is the 48th consecutive year that the Hamvention has been held at the Hara Arena in the Dayton suburb of Trotwood. He says that it's the only place in the area that can be a home to an event of this size:

--

KD8BVB: "The Dayton Hamvention takes up all six large halls of the complex which is about 124,000 square feet for forums and exhibit spaces. We also use over 350,000 square feet of outdoor lots for our large flea market spaces. So, its truly a unique building for a unique event."

--

Long says that in addition to the inside vendors, the flea market and the forums, three very popular sidelights are either returning or expanding this year:

--

KD8BVB: "We have some returning crowd-favorites this year including a weather balloon launch that will take place on Saturday. We are also going to have a larger area designated to showcase our emergency communications vehicles in the area and then, of course, we will have our Hamvention T-shirts and swetshirts for sale out in the flea market."

--

Long and all the Hamvention planners say that they hope to meet many of you at the Hara Arena from May 20th to the 22nd as they do all they can to make your Hamvention experience one that you will never forget. More on Hamvention 2011 in next weeks Amateur Radio Newsline report.

RESCUE RADIO: WALTON COUNTY GA. FIREHOUSES GET HAM RADIO

Georgia's Walton County Fire Rescue has teamed up with Walton County Emergency Radio Club and the Amateur Radio Emergency Service to further protect the residents of the area during disasters. This, by installing amateur radio gear in every county firehouse.

Walton County Fire Rescue Chief Mike Moore said he thinks this is a good step for the protection of the citizens by assuring a broad range of emergency response in times of need. He says that this partnership with the local ham community means that radio amateurs can be used to facilitate communication between emergency personnel if the county's radios lose service in the event of natural disaster or tower failure.

Rick Mayson, W1CRM is the Assistant Emergency Coordinator for the Walton County Emergency Radio Club. According to news reports, he has worked closely with fire personnel to have the radios programmed as well as training and licensing for firefighters, law enforcement, and hospital personnel. The club provides training classes twice a month for anyone interested in obtaining an amateur radio license. It also sponsors exam sessions for prospective licensees.

Mayson says that they are also in talks with the Cities of Monroe, Loganville and as Social Circle to have ham gear placed in their fire stations as well. (Loganville-Grayson Patch)

**

RESCUE RADIO: NEWS REPORTS SAY JET BLUE TERMINAL AT JFK NYC IS RADIO DEAD ZONE

According to recent news reports, the $743 million Jet Blue Airlines terminal at JFK Airport in New York is a police radio dead zone. One that puts Port Authority police officers in a Ground Zero like communications blackout zone that has already led to a number of police injuries.

Newspaper reports say that the problem was discovered by Port Authority personnel about six months before the terminal opened to the public way back in October 2008. This when officials ran down a checklist of safety issues and realized the radio communications deficiency existed.

A permanent fix will cost an estimated $3 million and is many months away from completion. In the meantime Port Authority police officers assigned to the terminal are reportedly given preprogrammed cellphones at the start of their shifts to call the JFK police command if an emergency crops up.

Port Authority spokesman John Kelly acknowledged cops assigned there were now using backup communication, but maintaines that a temporary system implemented in April of 2010 provides partial coverage for officers to be able to use their police radios. (Published news reports)

THE DIGITAL DIVIDE: TV OWNERSHIP DECLINES

In what experts are attributing to both the current economic slide and the rise of alternative digital devices, ownership of television sets in the U.S. has dropped for the first time in 20 years.

According to the A.C. Nielsen ratings service, 96.7 percent of American households currently own TVs, down from 98.9 percent. That's a drop of 2.2% in the past two decades.

According to news articles quoting Nielsen, there appear to be two reasons for the decline. The first is purely economic. Simply said, some low-income households no longer own TV sets, most likely because they cannot afford new digital receivers and outdoor antennas. Likely, when their older non-digital sets using converter boxes fail and can no longer be repaired they simply walk away from any form of in-home visual entertainment.

The other is technological know-how among the current generation of younger viewers. There are the pre-teens, teens and young adults who are growing up with laptop computers rather than the traditional television remote control of their parents era. As they reach adulthood they are simply opting not to buy TV sets. Instead, they are watching their television shows and other forms of entertainment streamed live over the Internet. (HD News)

RADIO EDUCATION: ICOM PRESENTS THE ADVENTURES OF ZACK AND MAX COMIC BOOKS

ICOM America has produced a series of comic books based on amateur radio for youngsters. Titled The Adventures of Zack and Max, the downloadable magazines follow the adventures of the two teen hams with stories designed to provide the reader with some basic information about ham radio, giving a glimpse into its history, its applications, and its relevance in the world today. So far there are six issues of The Adventures of Zack and Max along with matching coloring books for the younger set. Icom also has a Zack and Max art calendar to match the series. All can be downloaded in ready to print pdf file format from the Icom America website at tinyurl.com/hamcomics (WIA News, ArnewslineT)

HAM RADIO VIDEO: THE LAST BIG FIELD DAY FROM KN4AQ

The Last Big Field Day is a new 41 minute video from Amateur Radio Video News that tells the story of world class Field Day station W3AO that since 1999 has topped the ARRL's Field Day Top 10 list, beating 2nd place by a wide margin. In 2004, the operation listed itself as 50A. That's 50 transmitters, 10 towers a myriad of antennas and something that intrigued film maker Gary Pearce, KN4AQ. So armed with

his video production gear, Gary traveled to the W3AO site to capture the moment and tell the tale to the world.

As Gary tells the story, it took a few years to find the time to get The Last Big Field Day into post production and duplicated. Now, just in time for release at the 2011 Dayton Hamvention the DVD is ready for the world to see. A preview of The Last Big Field Day can be seen on-line at www.youtube.com/kn4aq. More information including an on-line order form are found at www.ARVideoNews.com (KN4AQ)

HAM HAPPENINGS: PAPERS SOLICITED FOR 2011 ARRL/TAPR DCC

Technical papers are solicited for presentation at the 30th Annual ARRL and Tuscon Amateur Packet Radio Digital Communications Conference to be held September 16th to the 18th in Baltimore, Maryland. Papers will also be published in the Conference Proceedings.

The submission deadline is July 31st. Papers will be published exactly as submitted, and authors will retain all rights. Also, authors do not need to attend the conference to have their papers included in the Proceedings.

Submit papers to via e-mail to maty@arrl.org or via snail mail to Maty Weinberg, KB1EIB, ARRL Headquarters, 225 Main St, Newington, Connecticut, 06111. The ARRL says that it will provide additional information on the 2011 Digital Communications Conference as it becomes available. (ARRL, TAPR)

HAM HAPPENINGS: 2011 AMSAT-UK SPACE COLLOQUIUM PUTS OUT 2ND CALL FOR SPEAKERS

The 2011 AMSAT-UK Space Colloquium has put out a second call for speakers. This years event will be held Saturday, July 30th and Sunday the 31st at the Holiday Inn, Guildford, in the U-K. Offers by speakers who wish to give talks at this colloquium should be sent to G4DPZ by e-mail yo david.johnson (at) blackpepper (dit) co (dot) uk. (AMSAT)

HAM HAPPENINGS: ARMAD CELEBRATES THE MILITARY ON MAY 28

Amateur Radio Military Appreciation Day better known as ARMAD will be held this year on May 28th. Thee purpose of the event is to once again honor those that serve in the armed forces, Veterans, military retired and 1st responders.

This years celebration will include a rally in Fort Wayne, Indiana as well as live on the air operations by several amateur radio clubs, and other organizations around the nation. The primary frequencies that

will be used for ARMAD 2011 are 7.260, 14.260, 21.290 and 28.450 MHz. Operations will also be taking place on Echolink node number 106819

Amateur Radio Military Appreciation Day was was founded in 2003 by Emery McClendon, KB9IBW. His interest in organizing military special events came from his four years of service in the US Air Force and two years in the Indiana Air National Guard. In 2008 he was given the Dayton Hamvention Special Achievement Award in recognition of his work in creating and fostering ARMAD.

While primarily a United States event, hams world-wide are invited to take part in Amateur Radio Military Appreciation Day as a way of saluting the brave men and women of the military with messages of thanks and appreciation. More is on-line at www.armad.net. (ARMAD, Southgate)

RADIO RESEARCH: NEW 40 METER NAVIS BEACON ON THE AIR FROM SOUTH AFRICA

A new 40 meter beacon designed to test NAVIS or Near Vertical Incidence Skywave conditions from South Africa's central Freestate came on the air on Saturday, May 7th. 7 The beacon operates on 7 point 027 MHz running 50 milliwatts to a wire dipole sitting onlt 6 meters above the ground.

The beacon send operates in Morse at 5 words per minute sending the messagev "VVV DE ZS4BOT/B KG30BV." The KG30BV suffix is the Maidenhead Grid locator of the beacons exact position.

For those not familiar with Near Vertical Incidence Skywave, itis a radio wave propagation method that provides usable signals in the range between ground wave and sky wave distances. In most cases that's usually between 50 to 650 kilometers. The radio waves travel upwards into the ionosphere, where they are refracted back down and can be received within a circular region up to 650 km from the transmitter. The best frequencies for NAVISS communications lie between 1 point 8 to 15 MHz.

The ZS4BOT beacon and software was designed and built by Jan Botha, ZS4JAN. Reception reports go by e-mail to wirelesscomms (at) vodamail (dot) co (dot) za (Southgate)

HAM RADIO ON LINE: NEW CYBERSPACE SDR RADIO CLUB LAUNCHED

A new online Software Defined Radio Club has been launched by U-K amateur Adrian Lane, 2E0SDR. Lane's idea is to create a global community dedicated to the technology of software defined radio. Membership is free with site is being run as a dedicated portal with all members being able to add content. You can find it in cyberspace at www.softwaredefinedradio.co.uk. (GB2RS)

EMERGING TECHNOLOGY: MAKING GREEN LED'S MORE EFFICIENT

Researchers at Rensselaer Polytechnic Institute has lead to the development of a new method for manufacturing green-colored Light Emitting Diodes with greatly enhanced output.

The research team, led by Physics Professor Christian Wetzel began by etching a nano-scale pattern at the interface between the LED's sapphire base and the layer of Gallium Nitride. The latter is what gives the LED its green color. This new technique results in green LED's with significant enhancements in light extraction, internal efficiency, and light output. This discovery brings Wetzel and his team one step closer to the goal of developing a high performance, low-cost green Light Emitting Diodes.

Results of the study were published recently in the journal Applied Physics Letters, and are featured in the April 25th issue of the Virtual Journal of Nanoscale Science & Technology. The latter is published by the American Institute of Physics and the American Physical Society. (Science OnLine)

**

EMERGING TECHNOLOGY: HUMAN MOVEMENT COULD REPLACE BATTERIES

Powering your hand held radio or other electronic device that converts movement into power could be on the horizon. This as a team of researchers in New Zealand say that they are trying to develop what they call wearable energy harvesters" capable of converting movement from humans or found in nature into battery power.

According to Science Daily, the new technology is based on a class of variable capacitor generators known as dielectric elastomer generators ot D-E-G's. The scientific investigations currently underway say that these devices shows great potential for wearable energy harvesting. In fact, researchers at the Auckland Bioengineering Institute's Biomimetics Lab believe D-E-G's may enable the creation of light weight, form-fitting, and silent energy harvesters with excellent mechanical properties that match human muscle.

The findings are described in the American Institute of Physics' journal Applied Physics Letters. More on this emerging new technology

is on-line at tinyurl.com/3vfsyry. (Science Daily)

HAM RADIO IN SPACE: DARA CREATES MATCHING FUND FOR AMSAT

The Dayton Amateur Radio Association has announced a fundraising challenge for AMSAT whereby they will match on a 1 to 3 basis, up to $5,000 for donations made in 2011. That is, for every $3.00 that AMSAT raises, DARA will provide $1.00 up to the $5000 maximum.

In a statement made at the time of the announcement, AMSAT says that it appreciates the Dayton Amateur Radio Association's support. It also sees this as an opportunity for donors to increase the impact of their donations by taking advantage of this matching program. (AMSAT, DARA)

**

DX

In DX, the Intrepid-DX Group and the DX Friends plan to activate the Southern Sudan as new country on or after July 9th. At airtime members of the two groups report that they are in consultation with representatives of the new Southern Sudan Government, the International Telecommunications Union and the International Amateur Radio Union working omn making arrangements. More on this proposed operation will be posted on-line at www dot dxfriends dot com stroke SouthernSudan2011

F4EGS will be active as TT8PK from Chad until June 15th. He will be on the air only as time permits. QSL via F4EGS either direct or via the bureau.

The DXColombia Amateur Radio Club has announced that it plans to conduct a DXpedition to Malpelo Island next year. Using the special call HK0NA, issued by the Colombian Ministry the group hopes to activate Malpelo during the first quarter of 2012. Operation will be on 160 through 6 meters including the 30, 17 and 12 bands using CW, SSB and RTTY. Plans call for at least 3 stations to be on the air at the same time on different bands and using different modes. More details will be announced as they are made available.

The Pacific-DXers' web page is reporting that the C21A DXpedition to Nauru will take place between November 13th and December 7th. Operations will be led by VK4FW with liaison support by VK4AN. They expect to have 6 operators and 3 stations active on all bands 160 through 6 meters using CW, SSB, RTTY and PSK31. QSLing will be handled direct by the Pacific DXers. More is on-line at pacific-dxers dot com.

(Above from various DX news sources)

THAT FINAL ITEM: WSM TRANSMITTER SITE ADDED TO NATIONAL REGISTER OF HISTORIC PLACES

And finally this week, while many communities are trying to do away with any form of radio towers, one is now an official part of American history. This with word that the legendary 30-acre WSM transmitter site and 808-foot diamond shaped Blau-Knox tower in Nashville, Tennessee has been added to the National Register of Historic Places on April 14th. Michael Grebert, KJ4ZZV, is here with the details:

--

According to an article in Artist Direct, the WSM transmitter site was recognized by the National Park Service for its association with events that have made a significant contribution to the broad patterns of our history. It was also recognized for its distinctive characteristics of a type, period or method of construction.

Erected in 1932 by the Blaw-Knox Steel Co., the distinctive, diamond-shaped tower enabled the 50,000-watt station to reach out to 38 states and Canada as a federally-designated clear channel station. This immense coverage area was one of the key factors for the success of its flagship program known the world over as the Grand Ole Opry.

Today, WSM's tower remains the tallest and oldest of the unique Blaw-Knox structures. Originally the tower was 878 feet tall, but by 1939, it was discovered that it was electrically too long, due to the velocity factor effect. This resulted in a high angle of radiation, and with that, both groundwave and skywave cancellation of the stations signal some 120 miles away. The tower was then shortened to its current height.

Other surviving Blaw-Knox towers in the United States are those used by WCAU in Philadelphia; WLW in Cincinnati; WFEA in Manchester New Hampshire; WBT near Charlotte, North Carolina and New York City's WADO.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from the home of the WSM Blau-Knox tower here in Music City, Nashville, Tennessee.

--

Several Blau-Knox towers were also erected in Europe before company abandoned of the radio tower business way back in 1958. And from an aesthetic point of view, they have to be the prettiest looking radio transmission structures ever built. (Wheatstone Blog via KB4KCH)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)

arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www dot arnewsline dot org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 22nd May 2011

The news headlines:

* RSGB AGM information
* National Club of the Year winners
* Latest 6 and 10 report available

More than 100 RSGB Members and interested parties were at the RSGB AGM in Derby last weekend. As well as the formal business of the AGM, visitors took part in a full day of discussions about the RSGB and amateur radio. The Board has determined that fundamental changes are needed in the way the Society operates and received a number of practical comments on the proposed way ahead. A full report of the AGM appears in the June RadCom, which should arrive with Members before the end of the month.

Also at the RSGB AGM, the winners of the National Club of the Year were announced. The annual competition is sponsored by Waters and Stanton plc. In third place, Bolton Wireless Club received a certificate and £250 prize money; second place went to Lough Erne Amateur Radio Club who also received a certificate plus a cheque for £500. First place went to Reading & District Amateur Radio Club, who received the trophy, a certificate and a cheque for £1000. Prizes were presented by RSGB President, Dave Wilson, M0OBW. The 2011 competition will be open for nominations later this year.

The Six and Ten Reporting Club is an informal group of radio amateurs. They are mostly from the UK and interested in propagation studies at frequencies around the HF to VHF boundary, mainly the 6 and 10 metre amateur bands. The club produces the Six and Ten Report, a monthly newsletter, that includes analysis of 28MHz propagation based on beacon monitoring and analysis of 50MHz activity reports as well as results of on-going experiments. The latest report from Martin Harrison, G3USF and the 6 and 10 reporting club has been published and it is available at http://g7kse.co.uk/6and10.

The International Amateur Radio Union Region 1 Conference takes place in Sun City, South Africa in August. The papers to be discussed at the conference are now available online from the IARU Region 1 website. They can be downloaded from www.iaru-r1.org.

The 21st annual Waters and Stanton Open Day will take place on Sunday, 29 May. Yaesu, Icom and Kenwood will be in attendance as will bhi.

There will also be an RSGB bookstall. Essex CW Club, who won the Region 12 Club of the Year award will collect their trophy from Waters & Stanton who sponsor both the Region 12 trophy and the national trophy scheme. A prize raffle in aid of Marie Cure Cancer Care, supported by W&S and their suppliers, will take place on the day.

Glasgow and Clyde RAYNET Group will be active on the Island of Jura, which is IOTA reference EU008, from 26 May to 2 June. The group is providing emergency safety communications for the annual Fell Race on the 28th. They will also be activating the island on all HF bands using group callsign GS0RAY/P throughout the week. Reports are most welcome. For further details please contact group controller, Paul Lucas, on 07768 271736 or by email to mm3ddq@yahoo.co.uk.

The Deutsche Amateur Radio Club is sponsoring an award to celebrate the 2011 Women's Football World Cup. Both licensed amateur radio operators and short wave listeners can apply for this award. Between 1 June and 31 July, the special station DL0YLWM and YL district stations will be on the air. You need to log the appropriate number of German YL stations to apply for any one of four awards. Full details at www.darc.ce, search on the website for DL0YLWM.

The 2011 International Museums Weekend special event will take place on 18 and 19 June as well as 25 and 26 June. Anyone planning to take part should register their museum via e-mail to harry.m1byt@tiscali.co.uk. Full details of the event can be found on the International Museums Weekend website at www.ukradioamateur.co.uk/imw.

And now for the details of rallies and events for the coming week

The 1st Leicester RS Grand Clearance and Bring & Buy will be held today, 22 May, at the Leicester Radio Society HQ in Groby Road, Leicester. There is approximately £2000 of donated radio equipment for disposal as well as a Bring & Buy. Doors open 10am to 4pm. Details of equipment available and further details from Alex on 0753 120 1640.

Also today, 22 May, the Dunstable Downs Radio Club National Amateur Radio Car Boot Sale will be held at Stockwood Park, Luton LU1 5NR. Talk in will be on S22 and there is plenty of car parking. Doors open at 9am and entry is £2.

Due to unforeseen circumstances, the Mid Ulster Amateur Radio Club Rally and Boot Sale due to take place today, 22 May, has been cancelled. The organisers would like to thanks everyone for their support and hope to see everyone at next year's event.

D-Star Northants and UKIT are organising a D-Star Meet and Greet Day on Sunday 29 May. This will be held in Northampton at Tetra Communications, Bunting Road, Northampton NN2 6EE. The event will include help and advice from D-Star Northants and UK IT. Visitors to the event will also have the opportunity to visit Tetra Communications warehouse that will be open for the duration of the event. Now for the

news of special events

Castles and stately homes on air will take place on the 21st and 22nd of the month. Information can be found at www.cashota.co.uk.

GB1LC will be active on the evening of the 24th for the 1st Laindon Cubs who will be gaining their communicator badge. Activity will be on 2m and HF. Special QSL cards designed by the cubs will be available for all contacts. For further info please contact G1KOT.

The Royal Naval Amateur Radio Society will run a GB6COD at the open day in HMS Collingwood on 4 June. The station will be operational on all amateur bands from 1.8MHz to 440MHz. The Society headquarters station will be open for viewing from 9.30am to 6pm on the day. Advanced tickets will be available from Gosport and Fareham Tourist Information Offices and Portsmouth News Offices from May 2011.

GB0VUL will be on the air promoting and celebrating the continued flying of XH558, the world's only airworthy Vulcan bomber. The station will be on the air over the bank holiday weekend of 28 and 29 May, from the Air Training Corps Hall in Newbury. This is the 3rd consecutive year this call has been run by members of Newbury and District Amateur Radio Society. More information can be found at www.vulcantothesky.org.

The Geoparks Communication Weekend will take place over the weekend 28 and 29 May. GB6GEO will be on again this year from Occombe Farm in Torbay. There will be several other Geopark stations operating around the world. There is an award available for contacting Geopark stations. More information on qrz.com.

As part of the Imagineering stand at the Bath and West Show, Weymouth College are putting on a special event station to demonstrate amateur radio to visitors. The idea is to particularly allow young people to send greetings via the HF special event station GB0BAW. If there are any local amateurs who are planning on visiting the show and would like to help operate the station that will be on the air for the duration of the agricultural show between 1 and 4 June, please contact Rob, G0ECX whose details are on QRZ.com, or telephone on 01305 787120.

And now the HF DX news compiled from 425 DX News and other sources

>From 22 to 28 May, Japanese operators JA7HMZ, JA7AGO and JA7ZP are heading to Pohnpei, Micronesia, which is IOTA reference OC-010, for activity as V63DX, V63GO and V63ZP respectively. They will be on all bands and modes. QSL via their home callsigns.

TM0Z will be active from Batz Island, which is IOTA reference EU-105, until 26 May. They will operate SSB, CW, RTTY and PSK on 6 to 80m with at least four stations. QSL via F5EOT either direct or via the bureau.

Laci, HA0HW will be active again as SV8/HA0HW from Thassos Island, which is IOTA reference EU-174 from 26 May to 5 June. He will operate on the HF bands and 6 metres. QSL via his home callsign preferably

through the bureau. Henry, TJ3AY has been issued special callsign TJ3IC to be used until 30 May to commemorate the 51st anniversary of the independence of Cameroon. QSL via F5LGE.

Sam, K0YAK is based at the US Embassy in Kathmandu, Nepal and is active as 9N7AK during his spare time. It is expected that he will be there until early July. He is using SSB and PSK31 on 10 to 20m and QSLs should go via his home callsign.

Three Czech Republic operators will be on the Island of Crete until 28 May and will sign SV9/homecall/P from the main island, which is IOTA EU- 015. They also plan a few side trips to offshore islands, which will count as IOTA EU-187.

K6VVA and NI6T will be on the air as K6VVA/6 from Santa Catalina Island. They plan to work mainly in CW on 15 to 40m from 24 to 26 May. QSL via N6AWD either via the bureau or direct.

Now the contest news

Tuesday 24 May sees the 50MHz UK Activity Contest taking place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

On the same evening, the SHF UK Activity Contest also takes place between 1900 and 2130UTC. Using the 1.3 to 10GHz bands, all modes, the exchange is signal report, serial number and locator.

The CQWW WPX CW Contest takes place for the whole 48 hours of the weekend of 28 and 29 May. This is a follow-on event from the SSB leg held at the end of March. Expect the CW segments of the bands to be packed and some pretty big serial numbers to be handed out by the end, especially if propagation on the upper HF bands is favourable. Using the 1.8 to 28MHz bands, the exchange is signal report and serial number

On 29 May from 1000 to 1200UTC the 3rd 70MHz Cumulative contest takes place. Using all modes the exchange is signal report, serial number and locator.

Finally for this week, on 31 May, the 70MHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator. And now the solar factual data for the period from the 9th to the 15th of May, compiled by Neil Clarke, G0CAS on the 16th of May.

Sunspots groups were visible every day; all were small and most were quiet and stable. Solar activity was mostly very low, however, activity increased to low on the 9th, 12th and the 15th when small C class solar flares took place. These had little effect on propagation. Solar flux levels declined from 104 units on the 9th to 91 by the 14th. This is the lowest daily figure since the middle of March. The average was 95 units. The lower flux levels slowed the rate of increase on the 90 day solar flux average, which remained at the same level as last week at

110 units. X-ray flux levels declined slightly from B2.9 units on the 9th to B1.1 by the 14th. The average was B1.6 units. Geomagnetic activity was quiet every day, but only just on some days, for example the Ap index was at 8 units on the 10th and 11 on the 15th. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 410 kilometres per second on the 10th to 290 by the 14th. Speeds then increased to 590 kilometres per second on the 15th. Particle densities were low every day except for the 19th which increased briefly to 25 particles per cubic centimetre. Bz on the quiet days varied between minus 2 and plus 4 nanoTeslas and between minus 9 and plus 11 nanoTeslas during the 14th.

F-layer propagation was up to predicted values. Also strong Sporadic-E openings within Europe were reported on a daily basis on 28 and 50MHz. Some areas also had 6 metre propagation to West Africa. Brief openings were reported on 70MHz.

And now the solar forecast. This week solar activity is expected to be at very low levels. The recent spell of increased levels of activity that started back in February seems to have come to an end. Of course, the emergence of a new active region could take place and with it activity could increase but for now that seems unlikely but not totally ruled out. Solar flux levels are expected to be around the 100 mark. Geomagnetic activity should start at quiet levels but by midweek activity is expected to increase due to a recurring coronal hole and last until the weekend. On its last rotation the disturbance lasted 5 days. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows are expected to be about 11MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 1000 and 1600 hours. Sporadic-E should take place on some days with opening up to 50MHz and maybe higher on the more intense openings.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS We start with advance news of a weekend Foundation course by M0OCT ARS. The event will be near Chesterfield on 11 and 12 June. There are plenty of places available at the moment but

booking is essential. For more information contact M0OCT ARS on 01246 275889 or online at www.m0oct.com.

Chorley and District Radio Society has announced that it has a new website up and running. It is at www.radioclubs.net/chorleyamateurradiosociety and the club thanks the RSGB for providing the web hosting facility.

On Sunday 22 May Lincoln Short-Wave Club is taking part in the 144MHz Post Codes Contest at the portable site. For more information contact Pam Rose, G4STO, on 01427 788356.

On Monday 23 May Gloucester Amateur Radio & Electronics Society is having a VHF operating and workshop evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 23 May South Birmingham Radio Society is planning for the VHF field day site and aerials. Contact Don, on 0121 458 1603.

On Monday 23 May South Normanton Alfreton & District Amateur Radio Club is at Crich. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 23 May Stratford Upon Avon District Radio Society is holding its AGM & surplus sale. Contact G0CHO, on 01608 664488.

On Tuesday 24 May Derby & District Amateur Radio Society is having a talk on the Cromford canal by Patrick Morriss. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 24 May Loughborough & District Amateur Radio Club is having a talk on software defined radio by John, M0JAV. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 24 May Worcester Radio Amateurs Association is having a shack clean out and tidy up. For more information email Rich Moles, 2E0MOL, via secretary@m0zoo.co.uk.

On Wednesday 25 May Hinckley Amateur Radio Society is preparing for Field Day. Details from John, M0JAV, on 07836 731544. On Wednesday 25 May Lincoln Short-Wave Club is having a talk on the workings of the QSL Bureau by Richard Constantine. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 25 May Midland Amateur Radio Society is holding training classes and examining laptop computers. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 25 May Telford & District Amateur Radio Society is having a 2m DF hunt. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 26 May Salop Amateur Radio Society is holding a fox hunt. Details on the club website at www.salop-ars.org.uk.

On Thursday 26 May South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Thursday 26 May Burnley & District Amateur Radio Club is hosting a visit by RSGB President Dave Wilson and North West Regional Manager Kath Wilson. All local radio amateurs are welcome. The Club meets from 7.30pm at Higham Village Hall, Higham Hall Road, Higham BB12 9EU. More information from Vincent Greatwood, 2E0HRD, on 01729 840312.

On Friday 27 May Bromsgrove & District Amateur Radio Club is having an HF night. Contact Chris, M0BQE on 01905 776 869.

On Friday 27 May Coventry Amateur Radio Society has a radio workshop evening. Contact John, G8SEQ, on 07958 777363.

On Friday 27 May Nunsfield House Amateur Radio Group is planning its forthcoming programme. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 27 May South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 28 May Lincoln Short-Wave Club is in the Shack and running GB2CWF at Ellis Mill for Mills OTA. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 23 May Angel of the North Amateur Radio is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 23 May Bolton Wireless Club is holding a 2m DF event starting from the Britannia Hotel. For details, send an email to boltonwireless@gmail.com.

On Monday 23 May Sheffield Amateur Radio Club is having a pre-course Foundation taster evening plus a talk on the Windom and Inverted L antennas by Peter, G3PHO. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk. On Monday 23 May South Manchester Radio and Computer Club is holding a technical forum. Details from Ron, G3SVW, on 0161 969 3999.

On Monday 23 May Thornton Cleveleys Amateur Radio Society is having a talk on spy radio by John, G8RDP. Details on the web at www.tcars.org.uk.

On Tuesday 24 May Chester & District Amateur Radio Society is conducting radio operations at Waverton Institute. Details from Barbara Green on 07957 870770.

On Tuesday 24 May Halifax & District Amateur Radio Society is having a /P evening. Member and guests should check www.hadars.org.uk for venue details before travelling. Contact Martin, M0GQB, on 01422 341317 for more information.

On Wednesday 25 May Hambleton Amateur Radio Society is having an operating night. More information from Tony Wilson, G3MAE, on 01609 881530.

On Wednesday 25 May Hornsea Amateur Radio Club is having a talk on Clansman radio by G8YQN. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 26 May Grimsby Amateur Radio Society is holding a junk sale. Contact Cliff, G4YHP, on 01472 328 830.

On Thursday 26 May Keighley Amateur Radio Society is conducting RAYNET Training. More information from Shirley, M6SAK, on 01535 65278.

On Thursday 26 May South Manchester Radio and Computer Club is holding its AGM. Details from Ron, G3SVW, on 0161 969 3999.

On Thursday 26 May Wakefield & District Radio Society is having a talk by Geoff, G0PFH. Contact Ken, 2E0SSQ, on 07900 563117.

On Friday 27 May East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 28 May Wakefield & District Radio Society continues its Foundation, Intermediate and Advanced courses. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR NORTHERN IRELAND On Monday 23 May Greenisland Electronics Amateur Radio Society is having a talk on HF propagation and solar cycle 24. Details from Peter Lowrie, MI5JYK, by email to mi5jyk@rsgb.org.uk.

NEWS FOR SCOTLAND On Tuesday 24 May Livingston & District Amateur Radio Society is holding Morse code practice. Details from Norman, on 07740 946192.

On Wednesday 25 May Glenrothes & DRC is having a talk by Dave Francis, MM0DYX, on transformers from the junk box and how to test them safely. Details from Dave Francis, on 01383 823878.

On Wednesday 25 May Lothians Radio Society is having a DF Hunt with Peter Dick, GM4DTH. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Wednesday 25 May West of Scotland Amateur Radio Society has Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 26 May Aberdeen Amateur Radio Society is having a talk. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 27 May West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 22 May Bedford and District Amateur Radio Club will be putting on its mobile operation at the Dunstable Downs Radio Club boot sale. Details from Bob Leask, G3XNG, by email to g4ceotalk21.com.

On Sunday 22 May Loughton & Epping Forest Amateur Radio Society is at the Dunstable Downs boot sale. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Monday 23 May East Kent Radio Society is having an introduction to frequency selective surfaces by Paul, G0ILO. Details from Karl Davies, M1DFM, on 01227 710120.

On Monday 23 May Surrey Radio Contact Club is having a fix-it, advice, chin wag and move-it-on evening. Contact John, G3MCX, on 020 8688 3322.

On Tuesday 24 May Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 24 May Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 24 May Dorking & District Radio Society is having a personal challenge evening with David Smith ,M0SXD. Contact Garth, G3NPC, on 01737 359472.

On Tuesday 24 May Harwell Amateur Radio Society is having a shack activity night. Contact Malcolm, G8NRP, on 01235 524844. On Wednesday 25 May Chesham & District Amateur Radio Society is looking at getting started on the air, with particular emphasis on computer interfacing & CW practice. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 25 May Hastings Electronics and Radio Club is having a construction evening. Details from Gordon, on 01424 431 909.

On Wednesday 25 May Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222111.

On Wednesday 25 May Norfolk Amateur Radio Club Norfolk Repeater Group is holding the AGM for GB3NB and GB7NB. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 25 May Worthing & District Amateur Radio Club Dayton is having a report on Hamvention 2011 by Phil, G4UDU. Contact Phil, G4UDU, on 01903 816684.

On Thursday 26 May Bittern DX Group is meeting at Pinewood Park. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 26 May Echelford Amateur Radio Society is having a bring & buy, CW practice, a natter night and details of the forthcoming field day activities by Olof, G0CKV. Contact John, G4GSC, on 01784 451898.

On Thursday 26 May Edgware & District Radio Society is holding its Constructors Cup competition. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 26 May King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 26 May Reading & District Amateur Radio Club is having a son et lumi&#65533;re by Dr Graeme Creasey. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 26 May Shefford & District Amateur Radio Society is having a talk on Clansman military radio by Don, G4LOO. Details from David, G8UOD, on 01234 742 757.

On Friday 27 May Cambridge & District Amateur Radio Club is having a talk on kite and pole photography by Clive, M5CHH. Contact Ron, G3KBR, on 01223 501712.

On Friday 27 May Mid-Sussex Amateur Radio Society is having a talk on trams by Ian Gledhill. Contact Peter, G4AKG, on 01444 239371.

On Friday 27 May Wimbledon & District Amateur Radio Society is having a talk on developments at the Valve Museum and demonstration of Audio Amplifiers by Allan Wyatt. Contact Andrew Maish, G4ADM, on 020 8335 3434.

On Sunday 29 May Coalhouse Fort Amateur Radio Society is holding an open day. Contact John Parker, M1DUC, by email to coalhouserad1o@yahoo.com.

NEWS FOR THE SOUTH WEST On Monday 23 May Exeter Amateur Radio Society is having a club night and CW practice. More information from Nick, on 01363 775756.

On Tuesday 24 May Blackmoor Vale Amateur Radio Society is having a natter night. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 24 May West Devon RC General is having a natter night and open evening with tea and biccies. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Wednesday 25 May Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 26 May South Bristol Amateur Radio Club is on the air. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 26 May Swindon & District Amateur Radio Club is holding its AGM. Contact Den, M0ACM, on 07810 317750.

On Thursday 26 May Yeovil Amateur Radio Club is on the air. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 27 May North Bristol Amateur Radio Club is inspecting and repairing its antennas. More information from Dick on 01454 218362.

On Friday 27 May Torbay Amateur Radio Society is having a 90/10 auction night. For more information contact Dave, G6FSP, by email to

g6fsp@tars.org.uk.

On Saturday 28 May Torbay Amateur Radio Society commences its weekend event running Geo Parks special event station GB6GEO from caves in Torbay. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 23 May Llanelli Amateur Radio Society is holding a junk sale & club raffle. Contact Craig, MW0MXT, on 01269 840292.

SARL NEWS - SUNDAY 22 MAY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'ARMI' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail. Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SOUTH AFRICA TO SUPPORT ALLOCATION AROUND 500 kHz

At the National Preparatory Working Group Meeting for the World Radio Conference 2012 held in Pretoria this week Hans van de Groenendaal, ZS6AKV, presented the SARL and IARU recommendation that method A, to satisfy Agenda item 1.23, be accepted as South Africa's position. Resolution 1.23 calls for the consideration of an allocation of 15 kHz in parts of the band 415 - 526,5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services.

Method A proposes a secondary allocation of up to 15 kHz to the amateur radio service on a world-wide basis between 472 and 487 kHz. A representative from the CAA pointed out that many non-directional beacons are operating in this band although according to ICASA only some are licensed and not in the proposed amateur allocation. He said that should the allocation be agreed to at the WRC12, these beacons could move to different frequencies.

It was agreed to take the recommendation to the SADC WRC12 meeting to be held in Botswana next week and, if accepted, will be tabled at the ATU meeting next month where it hopefully will receive their support for it to become an African block position.

The SARL is involved in the WRC12 National Preparatory Working Group to keep a watch over other agenda items that may have an impact on Amateur Radio and keeping the group informed about the IARU position on Agenda

items.

For a copy of the SARL recommendation visit www.sarl.org.za and select the members' only pages.

BOB HEIL, K9EID, TO HEADLINE NEW INTERNET SHOW

On Tuesday, May 24, Bob Heil, K9EID - well known for his design of microphones - will premier a new net cast show on Leo Laporte's TwiT.tv website. Called HamNation, the show will focus on equipment, applications, tips and general information for Radio Amateurs. Heil's first guest will be rock star friend and fellow radio amateur Joe Walsh, WB6ACU. Walsh also wrote the theme music for the show. The show will be broadcast each week over the Internet at TWiT.tv at no cost. TWiT.tv is also available in iTunes. "I have been a fan of Leo's for a long time and recently appeared on his Triangulation 8 show," Heil explained. "We had a blast, and much to my delight, he asked me to develop a show for and about ham radio. Since the early 1900s, much of the ham radio operators' focus has been on building and experimenting with their equipment. Many of today's radios are computer controlled, thus attracting new users to the hobby. Even in this day of instant Internet communications, ham radio is still the premier communication link, whether it's for storm spotters or talking to your friends around the globe. This new TWiT.tv show will bring the existing and new users together." More about the show in next week's SARLNEWS.

RADIO TECHNOLOGY IN ACTION HEADS FOR PE ON JUNE 4

The SARL Radio Technology in Action Symposium heads for Port Elizabeth on 4 June. It will be held on the NMMU south campus and is presented in co-operation with PEARS, the Port Elizabeth Amateur Radio Society. In the hi-tech slot of the programme John Willescroft, ZS6EF, will talk about Field Programmable Gate Arrays (to include an audio clip in your bulletin download it from www.amateurradio.org.za/FGPA.mp3). The full programme is available on www.sarl.org.za select RTA from the left hand menu.

1912 THE EVENT - COMMEMORATIVE STATION VK5MGY

The following from WIANEWS:

The Adelaide Hills Amateur Radio Society was approached by a group named "1912 the Event" to provide a CW operator for a commemorative station. This group is commemorating the 100th anniversary of the sinking of the Titanic in April 1912.

The Club have obtained the call VK5MGY from the ACMA. MGY was the call of the Titanic. The call will be in use for the next 12 months and we will produce a QSL card for contacts.

Keep your ear out for VK5MGY on the bands for the next 12 months.

Check out the event web site 1912theevent.com.

>From the SARL news editor: Interesting, the detector of the receiver on the Carpathia, by which the emergency call from the Titanic was received, was in the Telkom museum when the museum was still in Pretoria. We trust that it is still well looked after.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. Sunspot 1 208 turned away from Earth on the 18th, carried over the western edge of the solar disk by the sun's 27-day rotation. En route to the far side, the active region delivered a parting shot. The May 18th eruption was followed by another on May 19th; both hurled CMEs into space. The clouds will sail wide of Earth, continuing the recent spell of relatively quiet space weather around our planet. There is currently no chance for strong solar flares around any of the currently visible sunspot regions. For the people doing their own frequency predictions the expected effective sunspot number for the week is about 30.

15 m will provide the best opportunities for DX followed by 20 and 30 m and the WARC bands in-between, of course.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 to 22 May - Follow Dayton Hamvention via W5KUB.com. 22 May -ZS4 Sprint from 14:00 till 15:00 UTC. 25 May - Closing date for nominations for NSN awards, visit www.amateurradio.org.za. 25 May - 3rd SARL 80 m Club contest 17:30 to 18:30 UTC. 4 June - RTA in Port Elizabeth at NMMU south campus. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.

****

>From The Business Manager ZL2DL
Debby says...
Sorry folks, not sure what or how it happened but the full annual QSL Bureau report was omitted in Break In. The complete report is shown below.

I have also received notification that SMART along with other Ministry of Economic Development web sites were unavailable on Thursday 19th May. If you were searching for a call sign you will not have been able to access any information. Rumour has it, that it had something to do with the Government's announcement of the budget! Hmmm, scary.

2011 annual conference to be held in Upper Hutt, is now only two weeks away. If you would like your apologies noted at the AGM please let me know ASAP. Also if your branch does not have a delegate attending and you wish your branch votes to be counted, send me results and I will arrange for a proxy. I do need to know how many were actually in attendance at your branch when voting and how many for/against the remits. There are thirteen in total so quite a few to consider, and more importantly your opportunity to have a say.

Talk soon...Debby ZL2DL

****

NZART QSL Bureau: Annual Report for 2010
Incoming Mail
DX: Packages/envelopes - 176, Cards - 33,218

ZL: Packages/envelopes - 436, Cards - 23,956

Outgoing Mail
DX: Envelopes 431 (Cards - 23,382)

ZL1 Bureau: Forty kilogrammes of QSL Cards.

ZL2 Bureau: Thirty Six kilogrammes of QSL Cards.

ZL3 Bureau: Thirteen kilogrammes of QSL Cards.

ZL4 Bureau: Twelve kilogrammes of QSL Cards.

ZL7T: Four & a Half Kilogrammes of QSL Cards (Privately funded postage)

The NZART QSL Bureau's gross expenditure for this past financial year was $1,539.97, an increase of $215.69 on the year ending 2009. The nett cost to the Association was $1105.98 as against $900.98 for the previous year. Donations ($424.95) and Non-Member Fees ($10.00) made up the balance of the running costs of the Bureau for the year under review.

The Association's sincere thanks go to those of its members who, from time to time, saw fit to enclose a donation with their QSL cards. Their generosity has helped to keep down the Associations day to day running expenses.

Year 2010 saw an increase of four per cent in numbers of cards sent out by ZL operators whilst there was a two per cent decrease in the number of incoming cards from overseas amateurs,

During the past year, the NZ Post Office increased its postal charges partly due to the Government's decision to ramp up GST by 2 1/2%. This provided a windfall to the PO as it needed to round up its prices for stamps but despite this, the postage for large envelopes used for mailing QSL Cards to the ZL3/ZL4 Sub-bureaux suffered an increase of 20%! Over-all, there was a minimal inflationary effect on the Bureau expenses.

During the year Ross, ZL1BGB, assumed the position of ZL]-Prefix Sub-bureau Manager following the untimely passing of Ian ZL1BFB. The mailing details for the ZL1~Prefix Sub~bureau remain unchanged.

My thanks go to our four Sub-Bureaux managers, namely Dave ZL4OZ, Charlie ZL3CED and Ken ZL4HU, Tony ZL2AGY and Ross ZL1BGB, who attended to the stuffing of envelopes for all of the deserving during 2010.

B. E. Stewart ZL2RR, Manager

FMTAG Notes For HQ Infoline-230
Please click HERE to go to the FMTAG Applications Being Processed

Additional simplex channels have been requested for D-STAR, P25, and similar modes (Narrowband data calling channels, 16 kHz bandwidth or less).

The following frequencies appear to be satisfactory:

146.600 MHz 147.400 MHz 147.450 MHz 147.550 MHz

The following comments are invited from members:
(a) which frequencies are suitable?
(b) which frequencies are unsuitable, and the reason why they are unsuitable?

Proposals
1.. That 146.600 MHz, 147.400 MHz, 147.450 MHz and 147.550 MHz be added to the Bandplan on page 7-16 of the current Call Book, with the following label: Narrow digital mode simplex of up to 16 kHz bandwidth (including D-STAR, P25 and other similar narrow band digital modes)
Final Recommendations to NZART Council
1.. Branch 63 Upper Hutt has applied to add the D-STAR DV digital mode to, and change the location of, its Mount Climie 860 repeater. The new location will be Topo50 map reference BP32 798.83 423.94. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 438.600 MHz and the receive frequency can remain on 433.600 MHz, and that there will be no interference to other stations.
2.. Branch 74 Wellington VHF has applied to increase the power of, and add the P25 digital mode to its 6625 repeater located at Hawkins Hill, Topo50 map reference BQ31 449.78 236.89. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 146.625 MHz and the receive frequency can remain on 146.025 MHz, and that there will be no interference to other stations.
3.. Branch 74 Wellington VHF has applied for a 32 cm repeater located at Colonial Knob, Topo50 map reference BP31 513.58 426.16. FMTAG has chosen a repeater transmit frequency of 927.800 MHz and a receive frequency of 921.200 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
4.. Branch 74 Wellington VHF has applied for a 6 m repeater located at Colonial Knob, Topo50 map reference BP31 513.58 426.16. FMTAG has chosen a repeater transmit frequency of 53.750 MHz and a receive frequency of 52.750 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
5.. Branch 85 Mercury Bay has applied for a National System repeater located at Opito Bay, Topo50 map reference BA35 513.81 313.73. FMTAG has chosen a repeater transmit frequency of 434.800 MHz and a receive frequency of 439.800 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
6.. Branch 85 Mercury Bay has applied for a National System UHF Linking Station (ULS) located at Opito Bay, Topo50 map reference BA35 513.81 313.73, to link to Mt Edgecumbe. The link transmit frequency will be 434.975 MHz and the receive frequency will be 439.975 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Comments and Applications

Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

****

Google Maps View of Locations For Beacons & Repeaters
The text below was extracted from an e-mail from ZL1TAT to ZL2NN

Greetings Jamie

Congratulations on your good work arranging the NZ amateur beacon and repeater locations in Google Maps.

This is very useful, as it allows the viewer to see a beacon/repeater location plotted over a map or terrain profile background, plus particularly when zoomed right in on satellite view, to see an aerial view of the site. Simplified line diagrams like those published in the Call Book are also essential. (These line maps are to be continued - ZL2NN)

I've listed each station below with an outline of where the antennas are mounted, along with a link to the Branch website listing where one exists.

1.. (091) Kakatarahae 7075: Antenna is on a wooden pole (beside a well camouflaged hut) at the N/E end of it's shadow. The helicopter landing clearing can be identified 20m north of this pole.
2.. (019) Tairua 6975: Antennas are on the lattice tower (visible immediately east of the building). Additional info at http://www.zl1is.info/tairua.html
3.. Mercury Bay Nat Sys 480: When this new (Branch 85) National System repeater is commissioned later this year, it will be on the end of the Opito Bay peninsula.
4.. (141) Maungakawa 5575: Antennas are east of the building's north end on a wooden mast (at the N/E end of its shadow). This repeater is planned to be commissioned later in 2011).
5.. (050) Te Weraiti 695: Replaces Te Aroha from beginning of June 2011. Antennas are on a wooden mast. Additional info at http://www.zl1is.info/te_weraiti.html
6.. (017) Takaurunga 12cm beacon, Kaimai NS repeater and 540 data repeater: Antennas are on our tower immediately east of the fenceline (beside our hut which is visible) 30m south of the (Telecom building and tower). Additional info at http://www.zl1is.info/kaimai.html
7.. (013) Raglan 5675: Antennas are on the wooden mast (west of the building's south end). Additional info at http://www.zl1is.info/raglan.html
8.. (023) Hamilton 465 digi: Antennas are on the tower (at the north end

of the red-roofed club rooms in Seddon Road). Additional info at http://zl1ux.tripod.com/bbs.html
9.. (140) Raglan Branch 9425 and 5350 at Ward Street (Hamilton): Antennas for these Br83 repeaters are on the rooftop platform. This is the dark grey-roof building (No.40) north of the Ward Street intersection with Worley Place.
10.. (104) Waikato 2m, 23cm and 70cm beacons: Antennas are on the south/east corner of the penthouse parapet (on Telecom's building at the south/east intersection of Anglesea Street and Caro Street). Additional info at: http://www.zl1is.info/hamilton.html
11.. (139) REG 7125 and 8875 repeaters: These are located at their clubrooms within the building (No.211) on the north side of Peacocks Road.
12.. (103) Nat Syst Hamilton 9975 repeater: Antenna is on the monopole tower at the north end of the smaller building (off the east end of Transpower's larger building on the north side of Hall Road, No.25). Additional info at: http://www.zl1is.info/rukuhia.html
13.. (033) Hairini 7225 repeater: Branch 55's repeater is located on Puahue Road.
14.. (030) Waitomo 465 digi (Br81), plus Br55 Nat Sys 9925, 7375 and 870 repeaters are all located on the Rangitoto Range. Additional info at: http://www.zl1is.info/rangitoto.html
Your work will be appreciated by all who view locations for these assets.

Online NZ Repeater Maps
In the last Infoline the new online repeater maps were introduced. The ones hosted on the Wellington VHF Group website at http://www.vhf.org.nz/maps are generated from information from two sources as follows:

1. The technical data is sourced from the RSM's SMART system, if this is incorrect please notify the owner of the licence and ask them to submit a form 10 to get it corrected (Note: if the licencee is NZART please contact the branch not NZART itself). The actual data from SMART is as follows:
a. Frequency (the input frequency for repeaters is calculated)
b. Type
c. Site Name
d. Map Reference
e. Coordinates
f. Licence Number
g. Licencee

2. Other data is sourced from the NZART call book and any corrections received. For corrections to this data please email zl2wal@nzart.org.nz. The actual data fields are as follows:
a. Callsign
b. CTCSS
c. Branch

d. Trustees
e. Notes

The tool used to generate the maps is open source and therefore is under active development. The map generator can be downloaded from http://projects.wallace.gen.nz/projects/nzrepeaters/files both as a source archive for any platform and an installer for Windows.

It is currently capable of generating output in the following formats:
1. KML - for display in Google earth and Google maps
2. KMZ - for display in Google earth and Google maps (this is a compressed version of the above file format so it is smaller to download)
3. CSV - spreadsheet that can be used in many tools including Libre Office/Open Office or MS Excel

At present the following enhancements to software and hense to the maps themselves are planned (for further information and to look at the progress see the development roadmap at http://projects.wallace.gen.nz/projects/nzrepeaters/roadmap):
1. Adding links in as lines between the repeaters
2. Splitting the repeaters etc. by band when viewed in the larger map or using the KMZ or KML file
3. Adding links to the pop-up bubbles to access information in SMART if possible:
a. Licencee to the licencee in SMART
b. Licence number to the licence in SMART
c. Site Name to the site in SMART
4. Adding links to branch information on the NZART website
5. Automation of the downloading of updated data files from within the software rather than having to download a new release
6. Displaying links between repeaters
7. Filtering by name eg: to make a map just showing the national system

Housekeeping
1.. Break-In-Closing Date Reminder: Copy for the JULY/AUGUST issue of Break-In-closes on 10-JULY-2011
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 03-JULY-2011 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use Call Book address. All other material can go to e-mail: zl3qr@nzart.org.nz or zl3ov@nzart.org.nz

5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on SUNDAY 29-MAY-2011

Next HQ-Infoline e-mailed on SUNDAY 05-JUNE-2011

Headquarters-Infoline is a twice-monthly bulletin of news from NZART Headquarters. News and items of a general or technical interest are also included. These are obtained from various sources. The bulletins are e-mailed directly to Branches, the amateur radio packet Bulletin Board Service and to others that subscribe through the NZART Website at: http://www.nzart.org.nz/join/e-mail-lists/join-infoline-list/

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 22nd May 2011

Echo Ireland

The June edition of Echo Ireland is now being prepared and members are invited to submit news items and articles for inclusion. As we are coming in to the busy season for club activities, we hope to get reports from Club PROs on happenings both past and planned.

Pictures as jpegs are particularly welcome. Please keep text and pictures separate. All input to ei4bz at eircom dot net Echo Ireland

---

IRTS Contests

The CW Field Day is being held over the weekend of 4-5 June 2011. Log's to be submitted by July 5th.

Mills on the air weekend

Last weekend was the annual Mills on the air weekend. There ware plenty of activity in EI for Mill chasers. Among those heard / worked ware the Shannon Basin Radio Club activating the Elphin windmill with call EI2EWM, North County Radio Club who ware at the Skerries Windmill using the EI2NCR call and The Amateur Portable Group who ware activating Delaney's Mill in Rathfeigh with the call EI0Z/p

---

INTERNATIONAL GEOPARK WEEKEND 28 & 29 MAY

The South Eastern Amateur Radio Group and Lough Erne Amateur Radio Club will be operating special stations next weekend 28 and 28 May.

The Lough Erne station GB2MAC will be at Marble Arch International Geopark. It will work mostly HF and be in H13 a rare Worked All Ireland square.

The South Eastern Amateur Radio Group's station, EI2GEO will be at the Copper Coast Geopark, and working most modes and bands, including ATV.

These two are the only Geoparks in Ireland, one north, one south, and are among almost 50 across Europe.

CASHOTA Ireland and UK Weekend 28th and 29th of May2011

Next weekend there will be a weekend of activity for CASHOTA Ireland and UK held from Saturday the 28th of May until Sunday the 29th of May. This event is open to anyone who wishes to activate a Castle of Stately home.

This is also an excellent opportunity to work Castles towards the CASHOTA Ireland and UK awards. This promises to be a good weekend for portable activity and if you have never considered such an operation before this would be an opportunity to test out your equipment.

To date we have commitments from EI1EM/P, Clonboo Castle, EI1NC/P, Mallow Castle, EI2NRC/P Ardgillan Castle, EI4ALE/P Ballindooley Castle, EI4LRC/P Bunratty Castle, and EI8DRB/P from Creganna Castle with a few more to come.

This promises to be a very good weekend of activity and if you can not activate a castle, do give one of the many castles, in the UK and Ireland, a call over the weekend. If you wish to activate a Castle of Stately Home contact Steve, EI5DD, to obtain a number. Check www.cashota-ireland.org for further information.

Lough Erne Amateur Radio Club

The Club came second in the UK final among thirteen Regional Club of the Year Award winners announced at last weekend's RSGB AGM in Derby.

The President, Dave Wilson M0OBW presented the runner-up certificate and £500 to Michael Clarke Mi5MTC and Alan Gault Gi6PYP from the Lough Erne Club.

The winner was Reading and District Amateur Radio Club and the third was Bolton Wireless Club.

Lough Erne Amateur Radio Club congratulates its members whose activities and achievements made 2010 the club's best year ever. Moreover, the Club thanks the SHARE Centre whose generous support and excellent facilities made all this possible.

North Cork Radio Group

The North Cork Radio Group would like to welcome their newest member, Baby Cáthal Jeremiah Sexton. Born on 11/05/11 /at/ 4.31am. Weighing 6 pounds 12.5 ounces. Well done and congratulations to Mum & Dad, Lavinia and Liam EI7GTB from all at the group.

Lisa EI9GSB using EI1NC/P will be active over CASHOTA weekend Saturday the 28th and 29th of May from Mallow Castle with assigned designator EI015/C, the Castle locator is IO52QD and Worked all Ireland is W59.

The group will also be holding their own CASHOTA weekend over June 4th 5th and 6th from Blarney Castle Co Cork, EI010/C for further details visit the information pages of http://cashota-ireland.org.

Planned open day events at Blarney for the 11th of June, for those aware, have unfortunately been cancelled by the organisers although a future date is expected. updates will be via ei1nc.com and IRTS news service. North Cork Radio group would also like to remind listeners that future events and co-community activity ideas are always welcome and can be forwarded to the secretary Lisa EI9GSB via email, Lisa at ei1nc dot com.

Tipperary Amateur Radio Group

The next meeting of the Tipperary Amateur Radio Group will take place on Thursday next the 26th of May in Raheen House Hotel, Raheen Road, Clonmel. at 8.30pm All are welcome

---

Cork Radio Club

The May meeting of Cork Radio Club will be held in the Community Centre in Carrigtwohill on Monday the 30th and will feature a presentation and live demonstration of D-Star by Don Kelly EI8DJ.

The meeting will also review the successful trip to Brow Head for International Marconi Day and will finalise arrangements for the CW Field Day on the following weekend.

Visitors are very welcome and further information can be had from Jeremy EI5GM on 083-3317710.

West Tyrone ARC

Members of the West Tyrone Amateur Radio Club, produce a short radio programme

http://wtarc.co.uk/news.aspx

Helen Sharman GB1MIR became the United Kingdom's first astronaut when she blasted off from Baikonur in Kazakhstan at 1250 GMT on May 18, 1991 on her way to the MIR space station from where she operated GB1MIR. A video of her space flight can be seen//www.southgatearc.org/news/your_news_1.htm

---

This bulletin has been produced by Charlie EI8JB who is standing in for the News Editor Aidan EI7JC who is away on Vacation.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to

both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXNL 1729 - May 25, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CT3 - MADEIRA, AF-014
Diethelm,DJ2YE, Dieter,DJ8DS, Ulrich,DJ9IE, Detlef,DK3QZ, Hans,DL1XW,
Kai,DL3HAH, and Rein,PA0R, will be QRV as CR3L in a multi OP category
of the upcoming CQWW WPX CW Contest. Their QTH will be Santana on
Madeira (AF-014) from where they will be active as CT9/homecalls before
and after the contest from May 24-30. The QSL manager for CR3L is DJ6QT
all other QSLs should be sent via their homecalls.
Detailed information can be found at: http://www.cr3l.de

PJ4 - BONAIRE, SA-006
John,PJ4/K4BAI, and Dick,PJ4/K4IQJ, will show up from Bonaire (SA-006)
from May 24-31, mostly in CW but also in SSB/RTTY. They plan to take
part in the WPX CW Contest as PJ4A (QSL via K4BAI). QSLs via homecalls.

V2 - ANTIGUA AND BARBUDA, NA-100
Darrell,AB2E, is staying on Antigua (NA-100) from May 24-31. He will be
QRV as V26E working as single OP in the WPX CW Contest and also on the
lowbands and WARC bands before and after the contest.
The QSL cards for this and also for all previous operations since 1993
should be sent only direct via AB2E. LoTW QSLs may be possible also.

V6 - FEDERATED STATES OF MICRONESIA, OC-010
Sho,JA7MHZ/V63DX, Taka,JA7AGO/V63GO, and Aki,JA7ZP/V62ZP, are working
from Pohnpei (OC-010) in all modes on all bands until May 28.
QSLs via homecalls.

YN - NICARAGUA
Bob,YN2ET (N5ET), Keith,YN2MG (NM5G), and Eddy,YN2ER (K5WQG), will be
QRV as multi/single signing YN2ET in the WPX CW Contest. They are using
their personal callsign outside of the contest.
The QSL manager for all calls is N5ET.
The QSO data will be uploaded to the LoTW as well.

5R - MADAGASCAR, AF-057
Giorgio,IZ4AKS, will stay on Nosy Be Island (AF-057) between May 31 and
Jun 6. He plans to work in "holiday style" using 5R8KS in CW, SSB and
RTTY on 40m-10m. His preferred frequencies are:
CW: 7025, 10105, 14025, 18075, 21025, 24895, 28025 kHz
SSB: 7085, 14270, 18155, 21295, 24945, 28495 kHz
RTTY: 7040, 10145, 14080, 18105, 21085, 24920, 28080 kHz
QSL via IZ8IYX, via bureau or direct.
For more information visit: http://www.dxcoffee.com/5r8ks

FRANCE, SPECIAL EVENT STATION
Like every year there will be a special event station active from the
site of the car race "24 Hours of Le Mans". TM24H will be QRV between
May 29 and Jun 12. QSL via F6KFI, via bureau or direct.
Check also: http://asso.proxiland.fr/aras72

GEOPARK WEEKEND 2011: The weekend of May 28/29 has been declared the Geopark
Weekend. A group from England is going to activate GB6GEO from the
"English Riviera Geopark". QSLs via bureau or direct to G3VOF.
More information about the Geopark Weekend can be found at QRZ.com on
the website of GB6GEO.

DXCC: The QSL cards of VU4PB (Andaman & Nikobar Islands, operation of 2011)
are accepted for DXCC credit now.

SILENT KEY: George Ripley (GD3AHV), aged 90, sadly passed away on May 11.
He was one of the first OMs who obtained a licence for 6m and was very
active on this band since February 1982.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

Upcoming WFF activities in DL:

May 14-31 DLFF-054 DL0DFF
May 27-29 DLFF-111 DG6PY/p
May 28/29 DLFF-046 DL7UXG/p
Jun 2-5 DLFF-135 DF0WFF (OP: DJ5NN, special DOK: WFFDL)
Jun 4 DLFF-009 DK2AI/p
All QSL cards should be sent via the QSL bureau to the OP.
You can find more information online at: http://www.wff-dl.de

UPCOMING CONTESTS

May 28/29: CQ WW WPX Contest, CW

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Val,RD3A, will be QRV as EF8M from Las Palmas
on Gran Canaria (DIE S-005) on May 28/29. QSL via UA3DX.

EU-044, LA, Finnmark County West Group: DL2RNS and DL2VFR are leaving
towards the North Cape on May 24. They want to activate Mageroya Island
from the northernmost camping site of the world from May 28-31.
They will work mostly in CW and only some SSB with high power.
Their website is: http://www.iota-expedition.com
QSLs for LA/DL2RNS and LA/DL2VFR via homecalls (bureau/direct).

EU-059, GM/MM, St. Kilda: Peter,M0NED, Steve,M6ZIX, and Paul,2E0GDD, plan
to show up as GB1KLD from Hirta Island (IOSA OL02, SCOTIA DI23) between
May 31 and Jun 3. The dates may vary depending on the sea and weather
conditions. Another info from the same source says the call is GB0TBA.
QSL via RSGB bureau.

EU-087, SM, Vasternorrland County Group: On their way to the North Cape
DL2RNS and DL2VFR are planning a sidetrip to on of the islands Alnoen
or Hemsoen. They will show up as SD7V/3 and SM3/DL2RNS in CW/SSB for a
few hours. QSLs for SM3/DL2RNS via homecall and for SD7V/3 via DL2VFR.

EU-172, OZ, Jylland East and Fyn Group: OZ/DL4VM is working from the island
Fuenen (DIA FY-001) mainly in CW on 40 and 15m from May 22 till Jun 17.
QSL via homecall (bureau/direct).

A group from Germany will be QRV from Fuenen as well from May 26-30.
OZ/DF7MR, OZ/DL1HRG, OZ/DL9FR, OZ/DM2TO, OZ/DM3KF, OZ/DM3VA and
OZ/DM7DX will be active in CW, SSB, RTTY and BPSK31 on all bands.

EU-174, SV, Makedonia/Thraki Region Group: OM Laci will be QRV from Thassos
signing J48HW or SV8/HA0HW from May 26 until Jun 5. He is working with
power amplifier and monoband antennas on all bands plus 6m and also
in the CW part of the CQ WPX Contest. QSL via HA0HW (bureau/direct).

NA-091, VE, BC Province South Group: VE7/DK6AO will stay on Quadra between
May 30 and Jun 7. The confirmation rate of this island is only 22 %.
QSL via homecall (bureau/direct). More information and maybe also an
onlinelog can be found on his website: http://www.dk6ao.de

OC-019, KH6/KH7, Hawaiian Islands: Jim/N6TJ will be QRV as NH7A from Keaau
on Hawaii (USI HI025S) on May 28/29. QSL via F5VHJ (see QRZ.com).

Lighthouse activities (Admiralty Digital List of Lights)

EF8M D 2816 Gran Canaria May 28/29

CEPT Recommendation T/R 61-01 and ECC/REC/(05)06 implemented in Russia
---
On Wednesday, May 18, the European Communications Office (ECO) in Copenhagen
announced the implementation of the CEPT licence in the Russian Federation.
This applies to the full CEPT licence and also to the CEPT Novice Licence.
It is now possible to conduct amateur radio operation in Russia within the
CEPT recommendation.

CQWW WPX Contest, CW - Further announcements:

The CQWW WPX Contest in CW will take place on May 28/29.
Following stations announced to be active (and were not mentioned before):

```
:Product: Weekly Highlights and Forecasts
:Issued: 2011 May 24 1842 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
16 - 22 May 2011

Solar activity was at very low to low levels, with predominantly
B-class flares. A C1 flare occurred at 18/1259 UTC from Region 1218
(N16, L=168, class/area Bxo/010 on 19 May), and a long duration C2
flare occurred at 18/1830 UTC from Region 1208 (N12, L=318,
class/area Dso/100 on 09 May). A long duration B3 flare occurred at
19/0436 UTC which was associated with a filament eruption centered
near N20W25.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels.

Geomagnetic field activity was at quiet to active levels, with an
isolated minor storm levels at high latitudes during 16-17 May.
During this time, wind speeds ranged from 428-610 km/s, while Bt
ranged from 11 to 2 nT, and Bz ranged from -6 to 7 nT. The increase
in activity was due to a favorably positioned coronal hole
high-speed stream. Activity decreased to quiet levels for the rest
of the period.

Forecast of Solar and Geomagnetic Activity
25 May - 20 June 2011

Solar activity is expected to be very low, with a slight chance for
low levels between 25-30 May. Activity is expected to increase to
very low to low levels during the rest of the period, when old
Region 1208 returns during the rest of the period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at normal to moderate levels. High levels are
expected during 29 May - 06 June.
```

Geomagnetic field activity is expected to be at quiet levels on 25 May. Activity is expected to increase to quiet to active levels, with isolated minor storm levels at high latitudes during 26-30 May, due to a recurrent coronal hole high-speed stream. Activity is expected to decrease to predominantly quiet levels during 31 May - 10 June. Activity is expected to increase to during 11 - 12 June due to a recurrent coronal hole high-speed stream. Quiet levels are expected for the rest of the period.

524. [RAC-Bulletin] Message from Bill Unger, VE3XT - Distracted Diving legislation (Bill 118)

Newsgroup: rec.radio.amateur.misc
Date: 2011-05-25 03:28:49 UTC
From: rac-bulletins@eton.ca
Message-ID: <4DDC76CC.1070204@rac.ca>
Source record: 4514
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

This is a message from Bill Unger, VE3XT - RAC Director Ontario North/East who is co-ordinating the drive to exempt Amateurs in Ontario against the Distracted Driving legislation (Bill 118) .

Hello:

Just back from Dayton and we got a great response from a lot of Canadian hams who came by the booth and already planning for next year.

Why I am sending you this email is just a gentle reminder that I really need letters of support from 3rd party groups and organizations. If you help with communications for any group or are part of an emergency response procedure for your community we need a letter from them.

I am not looking for a letter asking or telling any one that we need to continue to be able to operate mobile but rather a strong statement that Amateurs are important to the operation of their event or emergency preparedness plan. We need to show the bureaucrats and technocrats that Amateurs are a vital group and provide many community services that so far has gone unnoticed. Stated simply, we need to ???get on their radar???. The letters can be addressed to either Kathleen Wynn or your individual group.

Once the legislators understand that Ontario Amateurs provide a service that fills the needs of many diverse groups and organizations across the province I believe we can change their minds. This logic has worked in other provinces and it will work here as well.

Thanks and please try to get those letters to me soon.

73

Bill Unger VE3XT <wunger@confederationc.on.ca>
North/East Ontario Regional Director
Radio Amateurs of Canad

The ARES E-Letter

Published by the American Radio Relay League
****

May 25, 2011

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> JUST IN: JOPLIN, MISSOURI TORNADO DISASTER

Here is a brief report from Missouri SEC W0KRB, just forwarded by Dale Temple, W5RXU, Arkansas Section Manager, at press time: "Thanks to all who volunteered to help provide radio support for the Joplin tornado. Last night, Amateur Radio was used to provide communications between Freeman hospital (in Joplin) to the hospitals in Springfield to help provide information about resources needed in Joplin. We also had a link-up for Red Cross between the main office in Springfield and the satellite office in Joplin.

"John Howard, K0VET, activated the Missouri Emergency Services Net (MESN) and it was up until 2300 hours last night. It ended up steering a lot of people to the proper Web site for health and welfare messages. The hospital requirements for radio communications were terminated at 0900 this morning and at 5:00 PM tonight we are on a standby status for Red Cross between the two locations.

"We still have a couple of the Jasper County ARES® and Newton County ARES® members providing communications between the Red Cross Shelter and the HQ for Red Cross that was set up away from the normal chapter office as this is now a national-level Red Cross response. It is anticipated that this need will be fulfilled by noon tomorrow.

"Again, thanks to all of you for asking if you could help and especially for not self-deploying, which ends up adding to the problem. Our professionalism again came shining through. -- Kenneth Baremore, W0KRB, Section Emergency Coordinator ARES®, Missouri Section

The Associated Press called the event the worst single tornado disaster since 1950.

==> TORNADO DEVASTATION, RESPONSES IN THE SOUTHEAST

On April 27, 2011, two waves of tornadoes hit the region, causing massive damage and communication failures involving land-line phones,

the Internet, and cell services that were severely impaired across Alabama. More than 600,000 residences and businesses in north Alabama were without power for over a week.

The Amateur Radio Emergency Service (ARES®) successfully provided critical communications for multiple organizations. The time spent practicing and training on nets and exercises, building relationships and hard work paid off for ARES® when this disaster struck. ARES® worked.

The National Weather Service documented 53 separate destructive tornadoes in Alabama resulting in damage to many counties, and forever changing the lives of so many who call Alabama home. There were 28 tracks in north Alabama, with 6 EF-3, EF-4 and EF-5 tornadoes. 22 smaller but damaging EF-0, EF-1 and EF-2s. Numbers at a glance:

238 deaths; thousands of injuries; thousands of demolished homes and businesses; an EF-5 tornado traveled 132.5 miles; six EF-4 tornadoes traveled 6, 33, 47, 28, 20.5 and 28 miles in length; eight EF-3s; four EF-2

tornadoes traveled 20, 6.6, 2, and 26 miles in length; 130 high tension high-voltage line support structures/towers were demolished; 11 high-voltage transmission lines were out of service.

The President declared a Major Disaster for Alabama: the Federal declaration encompassed 42 counties. The NWS in Huntsville issued 92 tornado warnings, 31 severe thunderstorm warnings, and seven flash flood warnings.

ARES® operations began at 4 AM on Wednesday, April 27 as severe weather tracked into Alabama and continued to operate for the next 12 days. ARES® supported the State Emergency Management, local county Emergency Management, National Weather Service, American Red Cross, Southern Baptist Disaster Relief, The Salvation Army, and Volunteer Organizations Active in Disaster.

Amateur Radio had to face and contend with a major disaster scenario. A major city, Tuscaloosa, was severely hit, with multiple communications towers down, multiple counties and disaster areas involved, commercial and Amateur Radio repeaters gone or not operational, main utility power out, long lines at gas stations and grocery stores, many accepting cash only. Some hams were victims of this disaster but still provided Amateur Radio support.

I am proud of all the Amateur Radio operators that provided assistance during this long duration disaster. -- Greg Sarratt, W4OZK, Director, ARRL Southeastern Division

Here are links to ARRL coverage of the ARES tornado disaster responses:

5/11/2011 -- As Weather Clears in Southeast, Hams Continue to Provide Support

5/2/2011 -- The ARRL Ham Aid Fund Needs Your Help to Support Radio Communications in Alabama
<http://www.arrl.org/news/the-arrl-ham-aid-fund-needs-your-help-to-support-radio-communications-in-alabama>

5/2/2011 -- Georgia Hams Hasten to Help During Storms
<http://www.arrl.org/news/georgia-hams-hasten-to-help-during-storms>

4/28/2011 -- Tornadoes and Thunderstorms Keep Radio Amateurs Busy in Midwest, Southeast
<http://www.arrl.org/news/tornadoes-and-thunderstorms-keep-radio-amateurs-busy-in-midwest-southeast>

A good example of an after-action report comes from ARES® AEC Alan Sieg, WB5RMG, of Huntsville-Madison County, Alabama and is included in this issue. He adds: "That report came from deep inside, and I've had several personal responses from people within the EMA, acknowledging

that depth. Many of these issues are still very close to the surface with us, and we expect them to be for some time. This is normal, we process it. Writing and sharing is part of my process. It's hard sometimes, but it helps. This sharing is some slight good to come from such a tragedy. In that light, I have also just updated our Huntsville-Madision County EMA/EOC/ARES® blog <http://w4hmc.wordpress.com/2011/05/18/alabama-tornado-outbreak/> with the sitreps that our group posted to our SEC."

2011 Atlantic Hurricane Season Forecast: "Above Average"

Forecasters with the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) are calling for an "above-average" Atlantic hurricane season for 2011. In its initial outlook for the 2011 Atlantic hurricane season -- which runs from June 1-November 30 -- the National Weather Service's Climate Prediction Center (CPC <http://www.cpc.ncep.noaa.gov/>) is calling for a 65 percent probability of an above-normal season, a 25 percent probability of a near-normal season and a 10 percent probability of a below-normal season. -- ARRL

Get ready now: Here <http://www.arrl.org/news/forecasters-calling-for-above-average-hurricane-season>is a good article on hurricane planning and preparedness for all radio amateurs. Also, the following notice was just received from National Hurricane Center assistant station coordinator WD4R:

WX4NHC Hurricane Season 2011 On-The-Air Station Test

When: Saturday, June 4, 2011, 9AM - 5 PM eastern time. The purpose of this event is to test the National Hurricane Center <http://www.nhc.noaa.gov/> Amateur Radio station equipment in preparation for this year's hurricane season. Station operators will be making informal contacts on many frequencies and modes. They would appreciate signal reports and basic weather data exchange ("Sunny," or "Rain," etc.) from stations in any location.

WX4NHC will be on-the-air on HF, VHF, UHF and 2 and 30 meter APRS. They plan to test on the following voice frequencies +/- QRM: 3.950 MHz, 7.268 MHz, 14.325 MHz, 21.325 MHz, and 28.425 MHz. The operators will try to stay on 14.325 MHz most of the time and announce when they QSY.

Readers may be able to find the operation on HF by using one of the DX spotting networks, such as the DX Summit Web Site <http://www.dxsummit.fi/Search.aspx>. They will also be on the VoIP Hurricane Net <http://www.voipwx.net/> 1 PM - 3 PM (IRLP node 9219/EchoLink WX-TALK Conference node 7203). Southern Florida area VHF and UHF repeaters will also be contacted. QSL cards will be available via WD4R. Please send your card with a SASE. Please do NOT send QSLs directly to the Hurricane Center address. For more information about WX4NHC, please click here <http://www.wx4nhc.org/>. Thank you. -- Julio Ripoll, WD4R, WX4NHC Amateur Radio Assistant Coordinator

---

Here is a link <http://www.nytimes.com/2011/05/23/opinion/23mon1.html?_r=1&hp>to a current New York Times editorial on the need for an emergency communications system that is compatible across jurisdictions. Interesting reading.

The 2011 Dayton Hamvention® is in the history books. I asked Greg Sarratt, W4OZK, who attended the event, about emcomm and ARES forums there. He reported "I spent most of the weekend in the ARRL Emcomm booth meeting ARES® members, EC's, DEC's, served agencies' personnel and many emcomm interested amateurs. I enjoyed talking with many hams from all across the nation about emergency communications. The FCC emcomm and ARRL ARES® forums were informative, must-attend events for ARES® leadership and membership. They were packed.

"The FCC's Curt Bartholomew, N3GQ and William Cross, W3TN, gave the Commission's annual emergency communications information update. Discussion items included the ARRL Amateur Radio course for emergency managers, an upcoming emcomm survey, and a review of FEMA head Craig Fugate's speech that included praise for the viability of Amateur Radio emergency communications.

"ARRL ARES® forum speaker Mike Corey, W5MPC, the ARRL's Emergency Preparedness Manager, talked about the recent success of ARES in the southeastern tornado disaster and discussed the importance of ARES

member image, training and exercises.Corey showed how ARES works and
debunked some myths." Thanks, Greg. -- K1CE

==> 2011 NATIONAL HURRICANE CONFERENCE A WRAP

Hosting ARRL Southeastern Division Director Greg Sarratt, W4OZK, summed
it up: "Amateur Radio at the 2011
<http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fwww.hurricanemeeting.com%252
F>National
Hurricane Conference was a success! The Conference leadership recognize
the valuable contribution of Amateur Radio operators and again invited
us to participate with two sessions at this year's conference held in
Atlanta, Georgia last month. What a great opportunity for Amateur
Radio."

The National Hurricane Conference <http://www.hurricanemeeting.com/>
(NHC), billed as the nation's forum for education and professional
training in hurricane and disaster preparedness, was held in Atlanta
during the week of April 18-22. Anyone interested in hurricane
preparedness, response, recovery and mitigation could hear about and
share experiences as they went about planning for the 2011 hurricane
season. The conference held at the Hyatt Regency conference center in
downtown Atlanta was attended by about 1400 people from federal, state
and local governments, the private sector, businesses, VOADs and the
ARRL. Amateur Radio was well represented: Representatives from the
ARRL, WX4NHC <http://www.wx4nhc.org/>, the Amateur Radio Station at the
National Hurricane Center <http://www.nhc.noaa.gov/>, the Hurricane
Watch Net <http://www.hwn.org/> (HWN) and VoIP Hurricane Net
<http://www.voipwx.net/> (VoIPWXNet) completed several presentations at
the conference as well as a presentation at Georgia Tech for area ham
radio clubs.

Nearly 40 people attended the Amateur Radio Disaster Communications
Workshop titled "Disaster Communications, Before, During and After
Hurricanes," on the afternoon of April 18. WX4NHC Amateur Radio
Coordinator John McHugh, K4AG, and Assistant Coordinator Julio Ripoll,

WD4R, explained the 30 year history of their work at the National Hurricane Center and the importance of measured surface data and damage reports. The pair told how this knowledge helps hurricane specialists to make better forecasts. They also told some stories and showed videos from several of the most critical activations over the past few years including emergency communications and interoperability involved in the deployment of operators in the aftermath of the earthquake in Haiti.

ARRL Southeastern Division Director Greg Sarratt, W4OZK, and Ken Bailey, K1FUG, Emergency Preparedness Assistant from ARRL HQ surprised Ripoll with an award from the ARRL for his dedication and service during the Haiti earthquake of 2010. On Wednesday, he also received the conference Distinguished Service Award for his tireless efforts over thirty years as Amateur Radio coordinator at WX4NHC. The award reads "exceptional service in providing emergency communication during hurricane events over three decades while leading [the] WX4NHC Amateur Radio station at the National Hurricane Center." For a more in-depth story of Ripoll and the Amateur Radio station he co-founded, click here <http://www.arrl.org/news/wx4nhc-assistant-coordinator-honored-at-national-hurricane-conference>.

Director of Operations of the VoIP Hurricane Net Rob Macedo, KD1CY, gave a presentation on the net and the role it plays in gathering data for WX4NHC. He explained how it also can be used to connect various National Weather Service forecast offices, as well as local and regional Emergency Operation Centers during hurricanes. As Macedo explained "The VoIP Hurricane Net relays info to WX4NHC using any and all means of reliable information from all sources to give WX4NHC the most information possible from the surface during a hurricane."

Greg Sarratt, W4OZK, a member of the League's Board of Directors (Southeasten Division) and veteran ARES and emcomm leader, gave a presentation on the Amateur Radio Emergency Service (ARES), how it works in the field and interaction with ARRL HQ.

That evening, area hams who could not attend the conference were invited to the campus of Georgia Tech to hear the same presenters give similar presentations. A big thank you to Andrea Hartlage, KG4IUM, ARRL Southeastern Division Vice Director and newly elected president of the Georgia Tech Amateur Radio Club, for arranging the use of the Molecular Science and Engineering buildings lecture hall for the talks.

On Tuesday morning, Dennis Dura, K2DCD, and Rob Macedo, KD1CY, were among several speakers who hosted a workshop for about 20 emergency management officials and representatives of government agencies. The workshop focused on situational awareness and disaster intelligence, stressing its importance to Emergency Management and how it creates more opportunities to utilize Amateur Radio. The presentation was followed by a question-and-answer session relating to Amateur Radio emcomm. "Collecting and gathering data and sharing information and reporting during disasters is another way Amateur Radio can assist beyond the typical message handling," Dura said. This rap session

concept was started several years ago when Dennis Dura, K2DCD and Greg Sarratt found the forum worthwhile in explaining the ARRL's role in emergency communications to Emergency Management and other served agencies. This interaction continues to prove very valuable to emergency management and Amateur Radio.

All sessions were videotaped through the efforts of professional videographer and ARRL Eastern Massachusetts ARES® Assistant Section Emergency Coordinator Jim Palmer, KB1KQW. The videos should be available later this year on the North Shore Radio Association (NSRA) Web site <http://www.nsradio.org/video>. Meanwhile, be sure to watch videos of pasts NHC conference's and Southern New England SKYWARN related videos. Of special interest to all SKYWARN volunteers was Rob Macedo, KD1CY discussing the Southern New England SKYWARN Program on the Weather Channel <http://www.nsradio.org/video/features/mediaclips/WeatherChannel/>.

This year's conference is now history and while we hope for a quiet hurricane season, we left with the confidence that the knowledge received would increase our effectiveness should the worst happen. Next year the National Hurricane Conference is scheduled to be held in Orlando, Florida, March 26 - 30, 2012. Hope to see you there. - Ken Bailey, K1FUG <http://www.qrz.com/db/k1fug>, Emergency Preparedness Assistant, ARRL HQ

==> ARES® DIGEST

Goochland County, Virginia ARES® Activates for Outage

April 26 seemed to just be another day and, as usual, I had already begun the Central Virginia Six Meter Net early to list check-ins. There were two stations from North Carolina near Raleigh already waiting their turns for comments.

The phone rang, and the voice on the other end I knew well: it was Bill Mackay, County Fire and Rescue Chief. ARES® was needed as the agency was suffering communications problems. "The dispatch frequency is not working to our fire/rescue stations and we need emergency backup communications at all fire rescue stations and the EOC." My response was simply "OK, Bill."

My heart began to race as I began to make several calls. The first was to Ray Clemons, WB4IKL, and within a few minutes he was in route to station Co#6. The next two calls were to Mat Long, N4MI, and Ned Creasy, AE4ID. Just as quickly, they were headed to cover Co#2 and Co #5. I called Rick Cook, AB4U, EC for Hanover County. He only asked "Where do you need me?" He was soon headed to cover Co#3.

As I headed to the EOC, Dennis Pinner, N4DEN, came up on the Goochland call-up repeater. After explaining the situation, he responded to Co#1. Within an hour we had five stations and the EOC up and running. I called and advised Chief Mackay that we had coverage in place for all

stations except, Co#4. I asked if he wanted the coverage for any stations shifted. He said that the coverage was fine and that he would advise if any changes were needed. We later had "Medic 50" sign up with Beau Bouharoun, N4SIR, an Advanced Cardiac Life Supporter.

All stations were able to respond to the EOC when connected as we had all sites already pre-equipped with radios, power supplies, antennas, and manuals with several log and message handling forms. Chief Mackay came into the EOC and asked me to pass along his thanks to all of the radio amateurs. He also expressed his surprise that we were able to respond to the request as quickly as we did.

In accordance with protocols, I called to advise the District Six EC of the situation: Anthony Harbour, KG4YXP, is a very good person to have close by in any given situation. He is a great radio operator and computer guru as well as an Advanced Cardiac Life Supporter and Registered Nurse. This call resulted in several other amateur operators ready as stand-bys.

Thankfully, business was slow. We handled communication from a call to co#3. There had been an accident and this info was relayed to the EOC. Shortly after noon, with all equipment back in service, a stand down was declared. The call-up had lasted from 0800 to 1230. We were again thanked by Chief Bill Mackay for our support and the confidence he gained in our abilities and willingness to respond.

I thank all of the operators involved for their support and participation. Many had changed plans or had to take time off from work to provide this coverage. This demonstrates their devotion to the service of our community. I am sure that this sentiment is shared by many other ARES® groups as well. -- Ralph Fetty, Sr., W4FEG, Emergency Coordinator, Goochland County, Virginia

York County, PA Tornado Activation

Saturday night, April 16, 8:00 PM -- The York County, Pennsylvania ARES®/RACES/SKYWARN group (YARS) assembled on the air due to an Extreme Weather Alert. Members reported high winds and heavy rain. There was a report of a possible tornado near Hanover, Pennsylvania. Within minutes I heard that familiar sound of a freight train rushing past my house, accompanied by loud cracking noises and a power outage. After it had passed, my wife and I made a visual inspection. Four sections of our fence and a mature spruce tree were down and a huge flowering pear tree was down on the roof of our neighbors' house.

It wasn't until Monday afternoon that the NWS declared it to have been a tornado after determining evidence of rotational wind damage. -- Chris Palm, WY6Z, York, Pennsylvania

==> REFLECTIONS ON ALABAMA TORNADO DISASTER: ON DOING MORE

I would like to think that the years of training and decades of Field Day practice allowed me to provide my community, the Huntsville/Madison

County area, with the level of support that was needed after the tornadoes of April 27. Surely with all my experience helping with Red Cross sheltering after blizzards and hurricanes, all the planning sessions and tabletops and so on and so forth, I had what it takes.

What I feel has made the most difference this time is the fact that our EMA is well known and well respected in this community. Add to that the fact that our radio group is also well known and respected by this EMA. These two factors added up to our group's ability to step into action immediately without any need to organize further, or be in-processed as raw recruits might. We were already on the inside.

Yes, our training helped. We performed just as we have practiced time and time again, and we adapted successfully to a changing environment. However, I feel that my tasking was greatly empowered by one simple fact: that I held an official credential - a standardized ID card issued by the EMA, and it was easily recognized within the ICS infrastructure on the scene. No one ever challenged my presence or my inquiries. My job could have been more challenging and much less effective.

My job on the surface was to pass messages, primarily in support of a VOAD member, the Northern Alabama Medical Reserve Corps. Their task was to establish a field clinic at the Sparkman School, just south of the Anderson Hills area that was so heavily hit. When I realized that this location was also the support base for dozens of visiting law enforcement troops, and was becoming a major supply and staging area, I recognized that I could do more to help than just talk on the radio.

I wanted to become a hub of information management: who, what, when, and where. I identified and introduced myself to anyone who would listen: school administration, county commissioners, lunch-ladies and janitors, Sheriff deputies and officers from Madison County, SWAT teams from Montgomery and Mobile, the captains and lieutenants from the National Guard who knew who I was, and even the guy that changed 90 flats on the patrol cars that first night.

I spoke with neighborhood residents and volunteers, doctors and patients. My message was simple: "You have questions - I can get you answers." They all knew that they could come to me with their questions. And I knew where to go and who to ask about what, when, and anything in between.

Communication is an essential piece of managing the information. Talking on the radio was simple, because I've had practice - it's second nature. Listening and building these relationships was also simple - because I cared. My message to you now? Don't be afraid to care, and do more than pass messages. I have never been more proud than to be a part of such an effective group. We made a huge difference. This community knows what we can do, and we know we will gladly do it again whenever we need to. -- Alan Sieg, WB5RMG <wb5rmg@arrl.net>, Assistant Emergency Coordinator, Huntsville-Madison County ARES&#65533;/RACES

<http://hmcraces.org/BB/>, Alabama

==> N5FDL'S SEVEN TIPS: HOW TO BE A VOLUNTEER THAT LEADERS LOVE

Having spent two months talking about how to build and kill EMCOMM groups, this month I'll touch on what it takes to be the volunteer every leader wants on his or her team. Here are seven tips:

Sign-up and show-up - This is really simple, but can't be overstated. Leaders need dependable volunteers and need them to commit early. We need to be able to plan based on the number of volunteers we can expect. So sign-up early, let your leader know if your plans are "tentative," and cancel as soon as you know you cannot attend. That makes the planning job much, much easier. Ten people who become available the "day of" aren't very helpful, unless I have ten unexpected no-shows.
People respect our group because they know if we commit to something, we will deliver. This group reliability depends on volunteers who are equally reliable.

Dress like an emergency communications professional -- I feel stupid saying this, but what we wear impacts the image of all Amateurs. Now that we wear orange or green safety vests much of the time, individual fashion expression is not so apparent to served agencies or the public. However, as unpaid professionals we need to look like the paid professionals we work alongside.

In general, dress in office work/casual office attire when on an assignment, unless you have a special reason (cleared with your leaders) for dressing differently. If you don't wear an official government-issued patch, I am not wild about uniforms. I have a Sheriff's SAR uniform - silver badge and all - and I try very hard not to wear it. Polo shirts (with your group's logo) are almost always the best thing to wear. Try not to have too many logos or call signs (even your own) visible at the same time.

Smile, Darn Ya, Smile! - We all have better and worse days, but great volunteers develop a "game face" and "game attitude" they bring to public events. Whiners are not allowed. Egos get checked at the door. No, it really isn't about you, it's just what net control said or did, probably without thinking, and usually in the heat of the moment.

Seek Feedback (And Offer It) - We all need to talk about what we do well as well as where we could improve. Volunteers need to understand that the people who provide feedback (volunteer bosses) are sometimes insensitive louts. Please forgive us. We didn't mean to hurt your feelings and it really isn't personal. Nor is it personal when you tell leaders how we might improve. We are here to serve the public and our communities and we win or lose as a team.

The key to this is being a decent human being and treating others the way you'd want to be treated yourself. Sound familiar?

Build Your Skills - Newcomer mistakes must be forgiven. And some people - like me - make the same silly mistakes over and over. But, we need to constantly "sharpen the saw," as the book 7 Habits of Highly Successful People calls it. Great volunteers sharpen the saw on a regular basis. The reason we provide support for all these bike rides, community fairs, rodeos and other non-emergency events is two-fold. Sometimes these events become real emergencies. Mostly, though, we're training for when "the big one" (whatever that is where you live) happens. Use these events to train yourself while having fun. Then read, take classes, do free online training, anything to improve your skills. Reading this newsletter is a good use of your time.

Help solve problems - I was really pleased at a recent event when our volunteers at a remote site solved problems that occurred at their location without help from anyone. It was an issue related to signals and geography and these were new hams - all KJ6 call signs - who took initiative and made things better on the spot. And some people say HamCram hams are know-nothings! In the process, they improved our ability to serve the organization we were working for. Great volunteers give great customer service.

Observe Lines of Authority - Not long ago, I came unglued (it had been a bad day) when a fairly inexperienced volunteer tried to do something that went against the goals of the organization. It was not ill-intended, just inexperience. But, it was the second or third problem. This was a hugely promising volunteer, who just needed to understand why certain things are done the way they are. Even insensitive louts sometimes have good reasons behind their logic.

Good volunteers have ideas and want something to do. They want to contribute but can be overly enthusiastic and cause problems without meaning to. Long story short, the volunteer and I decided to give each other the benefit of the doubt, and at his first event he performed marvelously. He wants to become a leader and at the rate he is going, he will. But, he will need to work within the rules of the organization and ask questions before just "doing."

This is another way of saying, "Respect your elders." But if you feel your local leaders are killing the group don't just sit and watch it happen. That is a topic for another column, based on some of the letters I've been getting from E-Letter readers.

"What did you do at the bike race, dear?" That is what my wife, K6SWE, asked Saturday after I got home from working all day at a bicycle race. As leader of the group, I delegated much of the organizing to Matt, KI6ZTY, who served as net control. I purposely arrived late so Matt and his assistant NCS, Conrad, KJ6CNV, would get started without me. They did just fine, though I was ready to jump in if needed (I can delegate tasks but not responsibility).

What did I do from 0730 until 1530? Mostly drive around to make sure things were going OK. I occasionally cut in on the radio to ask a question, offer a clarification, and help handle emergencies -four

riders were injured during the day.

The most critical thing I did was help get our operators moved around and instructed as to how to assist Highway Patrol, fire and race organizers when a racer had to be airlifted from the scene after a crash. I also took the injured woman's friends and their bikes back to the start line and later hauled in another rider with a minor injury and her bike. I also filled in at various locations when operators needed a break, etc.

What was the most important thing I did? I made sure our operators all got the lunches and t-shirts the race organizers provided for them. I made deliveries when necessary and made sure everyone was taken care of. My operators, hopefully, felt supported, fed, happy, and got a nice souvenir for their efforts.

Making the troops as happy as possible is key for any manager's success--especially when the workers are not getting paid. Leaders exist to support their volunteers, not vice versa. - ARES® E-Letter Contributing Editor David Coursey, N5FDL <http://www.qrz.com/db/n5fdl>, is an emcomm leader in San Joaquin County, California and author of the N5FDL.com blog.

==> LETTERS

On "HamCrams," April Issue

I am responding to the "HamCram" article and comments in the last issue. I have been licensed since 1959. I have been an active member of Nassau County, New York ARES® for nearly 30 years. I have worked with kids in school radio clubs at least since 1977 when I started work at Brooklyn Technical High School (W2CXN). My home club is the Long Island Mobile Amateur Radio Club (LIMARC) where I presently hold the title of Education Committee Chair. I am a retired public school chemistry teacher.

In my experience trying to teach classes to high school students and adults, traditional multi-session courses have not been very effective. The attrition rate has been very frustrating. Many who start never get to the exam. In the past year I have led a team of volunteer instructors in four 1-day cram/review sessions. The ground rules were that everyone who signed up was required to study in advance. We suggested, but did not prescribe which books, media, on-line resources, etc. they needed to use. These sessions that started at 8 AM and went through the question pool by 3:30 PM were followed immediately by VE sessions administered by a separate team of VEs.

The results were most encouraging. The Technician session results were 15 of 15, 13 of 13 and 4 of 7. The three who did not pass at the last session told us that they had not studied in advance. On April 10, the same team conducted a General class upgrade session resulting in 9 of 11 passing. One missed by one question and one had not studied. The

bottom line is that these cram/review sessions only work when a person is committed enough to have done some individual studying.

We maintain a Yahoo group as a forum for support. Our experience has been that passing grades were typically 30 correct or more, including several 35s.

Our view is that getting the license is similar to what I used to hear about driving. Get the license and then learn to be a driver, or in this case an Amateur Radio operator. LIMARC and our county ARES® and CERT/RACES groups are all working to provide the hands-on experience in drills and public service events that are needed to make them effective.

We are exploring the idea of more traditional classes aimed at filling in the gaps that were glossed over during the pre-exam review sessions. The model that seems to be coming together would be open to all interested regardless of license held. There would be no pressure or anxiety about taking an exam at the end. Topics would be chosen from the various license manuals with sessions held prior to our regular monthly meetings.

The comments about inexperienced operators not knowing how to manage their stations in an emergency are a real concern, but it has always been so. Our fellow hams have always responded to emergencies when the need arose. I remember the first hurricane that I operated in, Donna, in 1960. When an Avianca plane ran out of fuel and crashed on the north shore of Long Island, there was an ad hoc response that was overwhelming. The same was true in the days after the 9/11 attacks in NYC and during the 2003 blackout.

You are absolutely correct that we do not have enough operators to meet the potential emcomm needs in nearly any serious situation. Since we always experience an ad hoc response and must transform these new volunteers into an effective team, which ones are likely to be better operators? I have contended for some time that they are not likely to come from the NTS ops, but from the DXers and contesters. It is in this regard that I am promoting participation in FD this year, especially by our newly licensed and upgraded hams. In order to be a skilled operator, one needs to operate. Drills and 'athons are good, but may not be enough to keep the attention of many. One needs to have fun with our hobby. It is not a job. More than 52 years of experience and still eagerly learning. Keep up the good work. - Lew Malchick, N2RQ <n2rq@arrl.net>, East Meadow, New York

Video: Interview with NC Ham who lost Home in Tornado

Readers might be interested in a video I posted on the Brightleaf Amateur Radio Club Web site <http://www.w4amc.com/>. One of our members, Hollis Thigpen, KC3X, of Snow Hill, North Carolina, lost his home in the April 16 tornadoes that came through the eastern part of the state. The video is two minutes long, from WCTI-12, New Bern.

Hollis is interviewed the next day at his home. Also, here <http://www.w4amc.com/> are photos and captions I made at the KC3X QTH 13 days later showing a lot of the destruction, including the 72 foot US Tower bent over at the base. - Dave Langley, W4YDY <http://www.qrz.com/db/W4YDY>, Brightleaf ARC Ham Chatter Editor; Brightleaf ARC Web site Editor, North Carolina

Do's and Don'ts for EmComm Success

I have experienced all of the things on the lists published in the last couple of issues by David Coursey, N5FDL. I would add that probably the most important "Do" is to communicate freely. Sometimes this is the most difficult, but it really needs to be emphasized. What we did in New Mexico when we established the state SAR organization is to ask each team what they thought their expertise is/was. Then we made it clear to them that they would be called when we needed that expertise, otherwise they would be put on standby. That way we did not wear out all of the teams.

On the subject of a simple H-T, I await a response to see if what you published will get any feedback. Meanwhile, I plan to check out the H-T you reviewed in the March issue of QST and see if it meets all the things that I suggested. It is imperative that it be simple enough that one can program it without the book being close at hand. - Bob Skaggs, KB5RX <http://www.qrz.com/db/kb5rx>, Santa Fe, New Mexico

AA Battery/Power Solutions

I found a simple and economical way to have all the battery power I need: Get the correct size AA holders from a place like Jameco or Parts Express and put a few in parallel for longevity. Then add a flexible cable with a power connector on the end that will fit your HT. The battery holders generally will fit nicely into a small arms army surplus ammo pouch and fit on any belt even though the pouches are made for the ALICE belt (that belt is also the most comfortable). See my emcomm web page <http://www.freewebs.com/ai4wm/emergencycommunications.htm>.

In re a simple H-T, I had one of the overly-complicated newer H-Ts and I reverted back to my old standby ICOM IC-2AT. It is a very simple, basic VHF-only H-T and it works fine with my home-brew battery pack. The problem with the old IC-2AT is that a tone board must be added. Being a fire fighter at heart I like to keep it simple and functional. Fancy stuff in an emergency usually just gets in the way and hampers the operation. - Bill MacLane, AI4WM <http://www.qrz.com/db/ai4wm>, Palm Coast, Florida

Timely, Twitter and Passwords

In re last month's article on Twitter alerting, the author suggests creating a "strong password that you might share with just a few people in your group so they could post the alert if you were unavailable. Board members or the club president would be some examples of who you

might grant posting access to."

You don't have to share your password, if you use http://timely.is/ YOU set up Timely for the account. YOU add users to the Timely account. Your group that you allow can post Tweets, either scheduled or within 30 minutes. It's a great tool for networking and team building. Hope that helps. -- Lloyd Colston, KC5FM <http://www.qrz.com/db/KC5FM>, Altus, OK EMA http://wx5em.us

Simple H-Ts

Just a quick note that the simple thumbwheel-operated H-T described in KB5RX's letter is not a TH-22; it's probably an ICOM IC-2AT. I own several of the Kenwood TH series handhelds (2m, 70cm, 23cm), and they all program the same and are fairly simple to use. For the most-used function (set up and store a repeater pair) I have the process coded on an adhesive label on the back of each radio. For the less-used commands, a photo-reduced, laminated function chart I produced in Excel stays in my wallet. -- Marty Woll, N6VI <http://www.qrz.com/db/n6vi>, Vice Director, ARRL Southwestern Division; Assistant DEC, ARES&#65533;LAX

Formidable Footprint

Formidable Footprint is a free online Emergency Response Tabletop Exercise Series sponsored by Disaster Resistant Communities Group (DRC-Group), Depiction software, and Stoneybrook Group LLC. It is a Web-based interactive real-time drill which will take about three hours to complete. It features pictures, video, audio and interactive maps. Teams from all over the nation and some international teams participate. Although it is targeted to CERT and Neighborhood groups, I feel it has a lot of value to ARES&#65533; members because: 1) Many types of decisions and contact data are common to all groups and can be tested by this drill, and 2) ARES&#65533; volunteers are not going to be available if their families and/or neighbors need them. The better their family and neighbor can plan for any disaster, the better their availability for helping others. Summit County ARES&#65533; will gather at a single location and work through the drill as a team. Details can be found here <http://www.drc-group.com/project/footprint.html>. For a good overview of the process, you can view the online video found here <http://www.depiction.com/webinars/formidable-footprint>.

We went through an interactive flood event to be used to elicit responses from our team at various points, such as "Is this request within the responsibility of our group," and "Who would our group contact to handle this item," etc. After the drill there was an online hotwash and we received a report of all our responses to the "injects" such that we can use it for an after action report. Other drills in this series include Wildfire (March 26), Tornado (April 30), Influenza Pandemic (May 28) and Hurricane (June 25). I think ARES&#65533; should publicize the availability of these FREE Tabletop exercises!

On another note, there is a Stop Disasters Game available here <http://www.stopdisastersgame.org/en/playgame.html>. Sponsored by the United Nations International Strategy for Disaster Reduction, it has five scenarios (Tsunami, Hurricane, Wildfire, Earthquake, and Flood) and three difficulty levels. With a limited budget and time, the player must manage the community to minimize loss of life and property damage during the impending event. It is targeted at late teens, but at 57 years of age, I find it a very interesting game and am working to optimize my strategy for the Flood event - the only one I have tried so far. I think, again, this is something that would be of interest to ARES®. The basic intent seems to be to raise the awareness of the value of preparation for disaster, and I think it does an excellent job of that. - Dennis Conklin, AI8P <http://www.qrz.com/db/ai8p>, AEC, Summit County, Ohio ARES®

==> K1CE FOR A FINAL

The tenth anniversary of 9/11 is this September. Here is a link to a first-person report <http://www.w2ik.info/> by 9/11 first responder and radio amateur Bob Hejl, W2IK, that I found to be very moving. Hejl was among the first to be on the scene on 9/11. It is raw and powerful reading. The author is suffering from PTSD as a result of his experience. His account is not to be missed. -- Rick, K1CE <http://www.qrz.com/db/k1ce>, Flagler County, Florida

- ARS Spartan Sprint--CW (Jun 7)

==> DAYTON PHOTO ISSUE

If you weren't able to make it to Dayton this year - here is a
potpourri of photos from my wanderings of the highways and byways of
the world's largest hamfest. A special note of recognition goes to the
Dayton Hamvention committee for their hard work - it is an all-year job
```

and a lot of hours were dedicated to making it fun for all of the attendees. In addition, ham radio vendors donated thousands and thousands of dollars worth of prizes to the dinners, presentations, and seminars - please take a moment to thank them (even if you didn't win) for contributing to and supporting our favorite hobby.

And now - have a great Memorial Day weekend and on with the show!

==> CONVERSATION

As I was walking out the door on Sunday with tired feet and legs,
headed for the parking lot and the long drive home with not enough
sleep on Saturday night this song popped into my head, begging to be
Dayton-ized. I obliged it.

73, Ward N0AX

Sunday Morning Tearin' Down

By Kris Kristofferson but re-engineered by Dr Beldar

Well, I parked on Sunday morning
With no way to plant my feet that didn't hurt.
And the candy bar for breakfast wasn't bad,
So I had one more for dessert.
I had fumbled in my suitcase through my clothes
To find that silly cartoon shirt.
So I grabbed my bag and donned my badge
And stumbled 'cross the lot to finish Day(ton).

For not buying on the day before
It was my own behind that I was kicking.

But I sipped my cup and watched a small kid
Playing with a key that she was clicking.
Then I walked across the aisle
And caught the smoky smell of hamfest hot dogs cooking.
And Lord, it took me back to goodies that I'd missed
Somewhere, somehow along the way.

At a Sunday morning hamfest
I'm wishing, Lord, I had more dough.
'Cause there's bargains left on Sunday
That a ham could take back home.
And there's nothing left this sunrise
More than half the price of Friday morn
>From the sleepy hamfest vendors
On Sunday morning tearing down.

In the park I saw an Elmer
With a laughing learning ham that he was teaching.
And I stopped outside a forum talk
About technical achievements they were reaching.
Then I headed through the crowd
And somewhere far away a lonely rig was beeping,
And it echoed through the tables
Like the disappearing gadgets yesterday.

At a Sunday morning hamfest
I'm wishing, Lord, I had more dough.
'Cause there's bargains left on Sunday
That a ham could take back home.
And there's nothing left this sunrise
More than half the price of Friday morn.
>From the sleepy hamfest vendors
On Sunday morning tearing down.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-05-26
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

** Software update VK3UM EMECalc v 7:10 **

Gentlemen EMECalc v 7:10 is now available from www.vk3um.com
This release includes provision for varying the Solar Flux (sfu)
value and refinements to Sky Noise, Beam Fill factor, and sfu
interpolation values above 10GHz. For a more detailed description of
the changes please refer to
http://www.vk3um.com/Reference%20Data/EMECalc%20v710_Supplementary.pdf
The web site has also been updated to include additional information
regarding the programming and interface connections to some versions
of the FE 5680A Rubidium Standard as well as a method of rejuvenating
Rubidium Lamps. Finally for those of you that may contemplating EME on
higher frequencies and have not seen Graham F5VHX 3 dimensional Dish
Installer Software, I have included it for your enlightenment at
http://www.vk3um.com/Reference%20Data/F5VHX%20Dish%20Installer.pdf

Finally today, 21st May 2011 I can inform you that my eme station
is ready to bring Kazakhstan (UN) to the moon. Here are already
active stations, but I will add some activity and probably 70cm band
to the moon. I build up a 4x11el group for 2m and to the moment a
2x23el group for 70cm. As soon as I get the missing 23el antenna,
which they failed to send me last time, I will have a 4x23el group
for 70cm. After moving from Tashkent/Uzbekistan to Astana/Kasakhstan
end of september 2010 I am still busy, in the job as well as at home.
All qsl cards I received until july 2010 I answered. Those I received
later still have to wait, but will be answered now in summer! I hope
that I can bring UN to many of you and soon also on 70cm. gl and see
your dots on the screen ...

** T8 qrv - Koror Island, Republic of Palau, PJ77 **

Taka JA0BJR, Toshi JP1IOF and Toshi JE1SYN plan to be active from
Koror Island, Republic of Palau (IOTA OC-009, WW Loc. PJ77FI), as
T88ZA, T80T and T8YN respectively on 24-27th June 2011. Look for
them to run two stations on 80-6 metre SSB, CW, FM, RTTY and PSK31
(5 element yagi on 6m). QSL via home calls.
SOURCE: [dx-world.net] via ICPO Bulletin (20-27 May 2011)

** FP/K9OT qrv from GN17 again **

Paul, K9OT and Peg, KB9LIE will once again be active as FP/K9OT from
Miquelon Island (IOTA NA-032, DIFO FP-002, WLOTA 1417, WWLoc. GN17TC)
between 21st July and 4th August 2011. QRV on 80-10 metre W and SSB.
QSL via LOTW, bureau, or direct to K9OT (return postage required for
direct). Website: www.hamradio.pnpfarms.com/
SOURCE: [NG3K] via ICPO Bulletin (20-27 May 2011)

** MD9Y, qrv from the Eary Cushlin House, IO74 **

A group of members from the Club DARC in Germany (section P08-OV Nurtingen) will be staying on the Isle of Man (IOTA EU-116, WLOTA 0449) from 7 July till 15 July 2011 in the Eary Cushlin House, located on the south west cost of the island (WW Loc. IO74PD). Operators include Pit DL1SPH, Gunter DK1SG, Bernd DH1SBB, Gertraud DC5SAN, Guenther DG1SBU, Guenther DG7SF and Erwin DL6SBN. QRV from 80m to 6m using PSK, RTTY and SSB, using MD/homecalls. They will also participate in the IARU HF Championship (09-10 July), using the callsign MD9Y, as a SSB only entry. QSL MD9Y direct via GD3YUM (Martyn Parnell, 1 Derwent Drive, Onchan, Isle of Man IM3 2DF). QSL others via their home calls, direct or by the DARC bureau. SOURCE: [rsgbiota.org] via ICPO Bulletin (20-27 May 2011)

** FS/K9EL on the air on HF and 6m **

I will be operating FS/K9EL June 7-19, 2011. I will be using an IC7000 and verticals for 10-80 and a 3 el yagi for 6m. I will be operating CW, SSB & some RTTY. QSL to my home call. LOTW update will be done upon my return. I may do some 6m operation from PJ7. 73 SOURCE:John K9EL via GOLIST

** J48O from Othonoi islet, HF and 50 MHz **

Operators SV2AEL, SV2CLJ, SV2FPU, SV2HXV, IK0EFR, SV2YC and SW2HXR willbe active as J48O from Othonoi islet, EU-052 between June 17 to 25, 2011. They will live and operate in the island lighthouse of Kastri. Look for them on 80-6m, focus on 6m during peak season. CW, SSB, Digi. QSL via SV2FPU. SOURCE: dx-world.net

---

** Bonaire again in the air with PJ4E **

PJ4E Bonaire will be on six meters from approximately June 4th to June 19th. We will be operating in the attended beacon mode. The frequency will be 50.103 since we will be there ahead of the other PJ Caribbean DX-Peditions. There will be some HF operation, mainly RTTY but six meters will always be on the air. Operators will be W0SD Ed, W0OE Edith and PJ4NX Peter. The QSL manager will be W0SD. Unfortunately Arliss W7XU and Holly N0QJM will not be on the trip this year due to work conflicts. A later announcement will be made in regards to on line logs. The operation will be from a rented house and will be our normal six meterset up with a good antenna and power. 73 and see you on six Ed W0SD.
SOURCE: Ed W0SD / G0JHC via UKSMG Announcement

** "Mother of All 6m Grid DXpeditions" starts this week! **

Interior-West DXpedition: 25 May - 10 July; Operating from 90 grids
and transiting 30 more. Starting Thursday 26 May, David Schaubert,
NJ0W, will begin a 46-day 6m Grid DXpedition covering 90 different
grid squares in the Rocky Mountains, Southwest Deserts, and Great
Plains. Over 400 hours of operating time have been planned. Within
his scheduled hours of operation, David will operate WSJT modes
(mostly FSK441 meteor scatter) when there is no sporadic-E happening
at his location, and SSB/CW when there is. See David s web page at
http://www.6t6kix.com/pages/ham/nj0w.htm for complete details, as
well as for unanticipated updates to the schedule due to the always-
entertaining antics of the ubiquitous Mr. Murphy. Time is a critical
commodity for WSJT meteor-scatter operation because the technology
is speed-limited by its inherent design. Therefore, please READ AND
RE-READ David s published WSJT operating procedures on the above page
DON T WASTE EVERYBODY S TIME by not knowing what you re doing!! If
you have questions, ask them now on the FFMA or WSJTGROUP list. If
you re not an FFMA or WSJTGROUP subscriber, go to:
http://groups.yahoo.com/group/FFMA or
http://groups.yahoo.com/group/WSJTgroup and sign up. Don t cross-post
replies or questions to all five boards listed in the TO header, as
this will generate list traffic that will be unappreciated by many.
Wishing David and all of us the best of luck!
SOURCE: Bill W5WVO via WSJT Reflector

** DX Operation: Bermuda, VP9GE **

Doug, KF4VTT, will be visiting Bermuda June 10-17, 2011 and staying
at the QTH of VP9GE. Although this is not a true DXpedition, Doug
will utilize 160M-6M on SSB, CW, RTTY and possibly PSK31 when time
permits. His XYL and son will be accompanying him, so Doug will need
to be fair about the amount of time spent on the air. As a personal
goal, he hopes to finish DXCC and VUCC from VP9. Any help with this
endeavor would be appreciated. Doug also hopes to be active on
6 Meters during the ARRL June VHF QSO Party on June 11-13. QSL OK
via KF4VTT by Bureau, direct or LoTW.
http://home.mebtel.net/~kf4vtt/vp9/VP9.htm
SOURCE: Doug, KF4VTT, via NG3K DX News

** DX Operation: Montserrat VP2MRT **

Operating june 8th till june 18th on 40m thru 2m depending on condx
as VP2MRT. Will operate the June VHF Contest. QSL via KB4CRT direct
with SASE or GS. LOTW later, no eqsl.
SOURCE: KB4CRT, John, via NG3K DX News

** Nine Grid Squares active on 4 Bands **
(EM52-EM62-EM63-EM64-EM73-EM74-EM75-EM84-EM85)

Our objective is to activate nine maidenhead grid squares across the states of Mississippi, Alabama, Tennessee, North Carolina and Georgia during the 2011 ARRL June VHF QSO Party. Our theory of operation will be on the "Run and Gun" aspect in the Limited Rover category with a effort on using CW and JT65a during times when the bands are not open. We will be stopping at several very high spots to try and work stations direct. We will also be beaconing AD5OW-12 on APRS via the Droid APRS Software so look for us there as well. We will be Calling CQ a lot on the published frequencies below and periodically on the calling frequencies. For JT65a (Tropo) and FSK441 (Meteor Scatter), we will be calling CQ on the standard 50.260 and 144.140 MHz and listening DOWN 6khz for replies. Route Stops: (A detailed route map can be found on our website. The URL is below.) Gadsden, AL (EM64xa), Lookout Mtn, GA (EM74hu), McCamy Lake, TN (EM75qd), Hayesville, NC (EM85ba), Brasstown Bald, GA (EM84cu), Mt. Cheaha, AL (EM73cl)
Operating Frequencies:
Band, CW, SSB, Digital
(A) 50 MHz 50.096 50.133 50.260 CQD6 FSK441 & JT65a
(B) 144 MHz 144.196 144.206 144.140 CQD6 FSK441 & JT65a
(C) 222 MHz 222.096 222.106
(D) 432 MHz 432.096 432.106
Please check out our AD5OW/R VHF/UHF Rover web page at http://www.ad5ow.us/Rover.html for the latest information.
73's de Jim, AD5OW and Jeffrey, N5TIT - The AD5OW/R Rover Team
SOURCE: tnx to Andy, N8OFS, direct to MMMonVHF

** Trip to DM57 / DM56 **

I will be operating from DM57 for the weekend of Jun 3 - 5. I expect to be set up and on the air by late in the afternoon on Friday and will tear down to return home after M/S stops on Sunday AM (unless we get significant Es - then I'll stay as late as I can). I may stop briefly in DM56 on the way home - timing will depend on how the band was in DM57. If the band is good in DM56, I will stay there as late as I can. I will be following the same procedure as NJ0W on his web page (see http://www.6t6kix.com/pages/ham/nj0w.htm) except I will be QSYing up to 50.270 (if this is a bad frequency, please let me know). I'm not sure about Friday evening, but I expect to be on the air Saturday and Sunday starting about 1200Z. I will only have 100 W and a 3 el yagi at about 25'. Es openings will take precedence over M/S. I will not have Internet access and I don't expect to have cell service. If you have a request for a specific time or frequency, please send me an email and I'll see what I can do. Please keep me busy! 73 Bud - SOURCE: Bud, N7CW via [wsjtgroup]

WIANEWS WEEK COMMENCING May 29 2011.

COMMEMORATIVE STATION VK5MGY

VK3EW on top of the DXCC again

Worked All VK Shires Award

Wappa Falls Observatory

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MAY 29 2011.

A NOBLE Park principal has won one of the top education awards in Victoria.

Silverton Primary School principal Tony Bryant won the outstanding school leadership award at the Education Department's awards night on May 13.

Peter Hall, the Minister for the Teaching Profession, said Silverton Primary School staff and students were regarded as leaders in the use of technology in teaching and learning, thanks to Mr Bryant.

Mr Hall said one example was the school's establishment of its own television and FM radio stations.

"Tony has been instrumental in ensuring information and communications technology is embedded into the curriculum - and has transformed his school into a global learning community.

Mr Bryant not only gained the prestige of being voted Victoria's most outstanding school leader but also won up to 10 weeks of paid leave and $50,000.

SPACE FACE

NASA submissions to the Space Shuttle Program's "Face in Space" campaign for the STS-134 mission.

Participants submit photos for uplink to Endeavour via the Mission Control Centre at NASA's Johnson Space Centre in Houston. The images will return to Earth through a data transmission, and contributors will be able to print certificates verifying their photos flew aboard Endeavour.

More photos already have been submitted to fly aboard the last shuttle mission targeted to launch July 8. Submissions will be accepted through to the lift-off date. To take part in the STS-135 Face in Space campaign, visit: http://faceinspace.nasa.gov

HAMS ACROSS AUSTRALIA.

VK1

22nd June General Meeting features TWO Presentation Topics back to back:

Morse Code "Show and Tell" night.

A night of sharing information and experiences for everyone, particularly those with an interest in Morse Code and associated techniques.

"SHOW" Bring along your paddles, keyers, oscillators, QRP Tx's, projects, historical items, etc for a static or live display.

"TELL" Share your code learning experiences, anecdotes, secrets etc. with short individual presentations.

The second Presentation Topic by Dimitrios Tsifakis VK1SV is:

A 5 minute talk on the history / activities of the 600m band, and a LF/HF and QRSS computer system.

VKG Roundup http://www.police.nsw.gov.au/news

TRASH & TREASURE AT VK2WI.

This Sunday the 29th is the Trash & Treasure event at the VK2WI Dural site.

New stock has arrived since the last T & T which should interest you. Major items are listed on the ARNSW website under DISPOSALS.

Commencing at 9.30 am it will be followed in the early afternoon by the Homebrew and Experimenters Group meeting. Also in the morning there will be the usual license assessments - Those wishing to undertake an assessment should attend by 10 am.

Further information may be obtained on the ARNSW phone 02 9651 1490 or mobile 0400 445 829.

Chainsaw Day

This to be held at the Summerland Club Rooms Lismore June 4 to reduce pesky trees from the yard and solar radius. WORKERS NEEDED, HET ALONG TO SCARC rooms.

TELSTRA

The St George Amateur Radio Society will be holding their next meeting at the Telstra Museum, Wednesday evening 1st of June, at 12 Kitchener Parade, Bankstown.

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

When we come to choosing those who will manage our club affairs, it is necessary to find people we can trust.

It was not surprising that others have been addressing these issues. Writing in WorldRadio Online, May issue, Dave Hayes, VE3JX, looks over these qualities, as viewed by the QCWA - that's the US Quarter Century association not the local ladies in VK4.

http://www.worldradiomagazine.com/

Knowledge of the area, such as finances for the treasurer, common sense and humility are some of the qualities which are examined. This is a practical set of criteria used by a large body with local to national structures. At the local level, clubs are often faced with the struggle to maintain membership and can really be challenged at finding active members who volunteer for club positions.

None the less, I believe it is important that we all think over these ideas.

We may not be available to fill a role for our club but we may have a say in electing some-one who will. If we are clear in our own minds of the qualities we value, it will be that much easier to make our vote count.

I'm Geoff Emery and that's what I think....how about you?

VK5

1912 THE EVENT - COMMEMORATIVE STATION VK5MGY

This item we broadcast last week about VK5MGY was picked up by the SARL who noted.

"Interesting, the detector of the receiver on the Carpathia, by which the emergency call from the Titanic was received, was in the Telkom museum when the museum was still in Pretoria. SARL trust that it is still well looked after."

Check out the event web site 1912theevent.com.

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

North West Tasmanian ATV Group Members are notified that the Club's next General Meeting is scheduled to be held on Saturday 4th. June, commencing 2.00 PM at the home of Tony VK7AX, 5 Kywong Crescent, Ulverstone.

Tony will demonstrate the configuration of his Video Streaming setup.

Persons in the N/West Area of VK7 interested in Training and Assessments for all classes of Amateur Radio Licenses are advised that NWTATV Club can provide these requirements and much more.

Contact details can be found on the Club Web Site or the WIA site under VK7 Clubs.

(Tony VK7AX, President - North West Tas. ATV Group)

HOME OF THE GOOD GUYS

Toowoomba ARC suffered a lightning strike to their repeater, SARC gave them some gear to help get it back on air.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

The Illawarra Amateur Radio Society in New South Wales, currently has a construction competition running. Entry is available in two categories:-

The First is for IARS club members.

The second category is for all other amateur radio operators within VK.

Entry is easy, simply, build a crystal set!

Judging will be based on some simple rules:-

The crystal set must work i.e. receive a transmitted signal.

The crystal set can receive either commercial, broadcast or amateur signals.

No external power other than the received signal can be used.

Additional points will be gained by utilizing recycled parts, or home made components.

Additional points will be gained for Innovative design, and unique concepts.

The finished article does not need to be ascetically pleasing.

Testing will be carried out at Industry World Centre, Wollongong NSW.

A full set of rules are available on the society's web site www.iars.org.au

The judging of the contest will be at the IARS November meeting.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

CHURCH AUDIO HEARD ON 10 METERS

Illegal broadcasts from at least one church have been heard on 28.265 MHz by hams in Germany and as a result, amateurs world-wide are being requested to listen AROUND 28.265 in order to identify the station and its location.

If you hear it, please send your report the IARU Monitoring System Coordinator.

NEWS REPORTS SAY JET BLUE TERMINAL AT JFK NYC IS RADIO DEAD ZONE

According to recent news reports, the $743
million Jet Blue Airlines terminal at JFK Airport
in New York is a police radio dead zone. One

that puts Port Authority police officers in a
Ground Zero like communications blackout zone
that has already led to a number of police injuries.

A permanent fix will cost an estimated $3 million
and is many months away from completion. In the
meantime Port Authority police officers assigned
to the terminal are reportedly given
pre-programmed cell phones at the start of their
shifts to call the JFK police command if an emergency crops up.

EMERGING TECHNOLOGY: MAKING GREEN LED'S MORE EFFICIENT

Researchers at Rensselaer Polytechnic Institute
has lead to the development of a new method for
manufacturing green-colored Light Emitting Diodes
with greatly enhanced output.

The research team, led by Physics Professor
Christian Wetzel began by etching a nano-scale
pattern at the interface between the LED's
sapphire base and the layer of Gallium Nitride.
The latter is what gives the LED its green colour.

This new technique results in green LED's with significant
enhancements in light extraction, internal efficiency, and
light output. This discovery brings Wetzel and his team
one step closer to the goal of developing a high performance,
low-cost green Light Emitting Diodes.

Results of the study were published recently in
the journal Applied Physics Letters, and are
featured in the April 25th issue of the Virtual
Journal of Nanoscale Science & Technology.
The latter is published by the American Institute of
Physics and the American Physical Society.

HUMAN MOVEMENT COULD REPLACE BATTERIES

Powering your hand held radio or other electronic
device that converts movement into power could be
on the horizon. This as a team of researchers in
New Zealand say that they are trying to develop
what they call wearable energy harvesters"
capable of converting movement from humans or
found in nature into battery power.

According to Science Daily, the new technology is
based on a class of variable capacitor generators
known as dielectric elastomer generators to
D-E-G's. The scientific investigations currently
underway say that these devices shows great
potential for wearable energy harvesting. In

fact, researchers at the Auckland Bioengineering Institute's Biomimetics Lab believe D-E-G's may enable the creation of light weight, form-fitting, and silent energy harvesters with excellent mechanical properties that match human muscle.

The findings are described in the American Institute of Physics' journal Applied Physics Letters. More on this emerging new technology is on-line at tinyurl.com/3vfsyry.

TV OWNERSHIP DECLINES

In what experts are attributing to both the current economic slide and the rise of alternative digital devices, ownership of television sets in the U.S. has dropped for the first time in 20 years.

According to the A.C. Nielsen ratings service, 96.7 percent of American households currently own TVs, down from 98.9 percent. That's a drop of 2.2% in the past two decades.

According to news articles quoting Nielsen, there appear to be two reasons for the decline. The first is purely economic. Simply said, some low-income households no longer own TV sets, most likely because they cannot afford new digital receivers and outdoor antennas. Likely, when their older non-digital sets using converter boxes fail and can no longer be repaired they simply walk away from any form of in-home visual entertainment.

The other is technological know-how among the current generation of younger viewers. There are the pre-teens, teens and young adults who are growing up with laptop computers rather than the traditional television remote control of their parents era. As they reach adulthood they are simply opting not to buy TV sets. Instead, they are watching their television shows and other forms of entertainment streamed live over the Internet.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

CONTEST RESULTS

NASA has announced the winners of its 'Original Song Contest' after six weeks of public voting. You will recall here on VK1WIA National News we told how songs will awaken the STS-134 astronauts aboard space shuttle Endeavour during their ongoing mission.

"Sunrise Number 1" by Jorge Otero and the band Stormy Mondays from Spain, earned first place.

Shuttle Commander Mark Kelly, Pilot Greg H. Johnson, Mission Specialists Mike Fincke, Drew Feustel, Greg Chamitoff and Roberto Vittori of the European Space Agency will hear the song at 5:56 p.m. EDT on May 31 - the day before the crew returns to Earth. "Sunrise Number 1" received 787,725 votes, or 49.8 percent of the total ballots.

"Dreams You Give" by Brian Plunkett earned second place with 38.8 percent.

It will wake the crew at 6:56 p.m. on May 30.

The public cast over 1.5 million votes!

To listen to the songs and see the all the results, visit: https://songcontest.nasa.gov/voteOrigResult.aspx

Aug 20-21 WW I.L.L.W.

The ILLW a real hit in VK7

The event has grown each year with VK7 having with nine slotted in so far compared with only seven the entire previous year.

VK7DB Sandy Cape, VK7EM Mersey Bluff, VK7HKN Eddystone Point, VK7NET Table Cape, VK7KT Bluff Hill, VK7VTX Low Head, VK7ZM Rocky Cape, VK7ZE Cape Wickham who will join VK3VTH portable 7 Currie Light - both on King Island.

Information about the International Lighthouse and Lightship Weekend to be held on the weekend of August the 20th and 21st, can be found at the website http://illw.net/

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

On top of the DXCC again

The DX world became aware of the constitutional changes for the now the former, Netherlands Antilles.

The ARRL DX Desk had decided that from 10 October last year four new DXCC entities would begin.

In anticipation of the great event, a number of DXpeditions were announced. Like many around the world, David McAulay VK3EW has gained the necessary QSL's.

Then he noticed no-one had yet filed them with the WIA Awards Manager. The WIA has long mirrored the ARRL program and the rulings of its DX Desk. David VK3EW subscribes to the WIA DXCC only.

Finally the process was completed and once again he is proud to be at the top of the Australian DXCC list.

He now has the DXCC of standing 348/340, which includes eight deleted DX entities.

Well done and the effort you made, which shows you are deserving of being
on the top again.

(Jim Linton VK3PC)

MAY

In DX, the Intrepid-DX Group and the DX Friends plan to activate the Southern
Sudan as a new country on or after July 9th. At airtime members of the two
groups report that they are in consultation with representatives of the new
Southern Sudan Government, the International Telecommunications Union and the
International Amateur Radio Union working on making arrangements.

MAY

LAST DAYS FOR MONACO, 3A.

Monaco Telegraphy Group active as 3A2CWG during the month of May in celebration
of its 20th anniversary.
QSL via 3A2LF.

JUNE

COLLINGWOOD OPEN DAY JUNE 4

On the air, the United Kingdom's Royal Naval Amateur Radio Society will run
a special event station on the H.M.S. Collingwood on Saturday June 4th.
The callsign to be used is GB6COD which stands for Collingwood Open Day.
The station will be operational on all amateur bands from 1.8MHz
through 440 MHz. The Society headquarters station will also be open for
viewing from 9.30am to 6pm the same day. The open day will also feature the
Royal Navy Field Gun Competition.

JUNE

The St George Amateur Radio Society will be holding their next
meeting at the Telstra Museum, Wednesday evening 1st of June,
at 12 Kitchener Parade, Bankstown NSW 2200.
As part of the society's 40th anniversary celebrations, they have
been issued with the special event callsign of VK40SGARS from
the 1st of May to the 31st of July

AWARDS

DL0YLWM Women's Football World Cup

The Deutsche Amateur Radio Club is sponsoring an award to celebrate
the 2011 Women's Football World Cup.

Between 1st June and 31st July, the special station DL0YLWM and YL district
stations will be on the air.

Full details at www.darc.ce, search on the website for DL0YLWM.

Worked All VK Shires Award

VK7 news say this award is held June 11 at 06.00utc and ends June 12 06.00utc.

As a guideline the following frequencies are recommended to work those rare ones:

80m..... 3.580 ssb and 3.530 cw

40m..... 7.080 ssb and 7.030 cw

20m..... 14.180 ssb and 14.030 cw

15m..... 21.180 ssb and 21.030 cw

10m..... 28.380 ssb and 28.030 cw

MEDIA WATCH

VK Club Bulletins http://groups.yahoo.com/group/aarnie/

Barry Robinson VK3PV.

Now for a look at Amateur Radio magazine

Featured on the front cover is the WIA National Field Day . Tune-in to the world . Amateur Radio Gets People Talking.

Inside are accounts at least from the Whyalla Amateur Radio Club, Radio and Electronics Association of Southern Tasmania, Darwin Amateur Radio Club, Hills Amateur Radio Group, Geelong Amateur Radio Club, Eastern & Mountain District Club, and Amateur Radio Victoria.

The topic of the month, in at least some quarters, has been the perceptions around the WIA's move to set up its national based emergency services response.

WIA President Michael Owen explains, in detail, the WIA's approach to things.

He gives an assurance that WICEN is not sought to be replaced. A point made previously.

There's also the latest on the discussions with the ACMA about station inspection procedures and the WIA announcement of the 2010 Club Grant scheme winners.

The Publication Committee is not happy with the print and paper quality being achieved. It looks towards a better product in the short-term.

In the June edition of Amateur Radio magazine is a report on the Scouts go bush for John Moyle Field Day by Miles Burke VK6FMAB.

In an item called Botch-ups and other lessons learned, Peter Ellis VK1PE has a somewhat unusual look at it.

Among the technical type articles are: Building and using a touch keyer from Grant McDuling VK4JAZ, Multiband antennas by Kevin Parsons VK2JS, A device holder for SMD construction Winston Nickols VK7EM, and a look at RF earthing by Dale Hughes VK1DSH.

Amateur Radio magazine is a WIA member service posted to members 11 times a year, and also available at selected newsagents.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

The Last Big Field Day is a new 41-minute video from Amateur Radio Video News that tells the story of world class Field Day station W3AO that since 1999 has topped the ARRL's Field Day Top 10 list, beating 2nd place by a wide margin.

In 2004, the operation listed itself as 50A. That's 50 transmitters, 10 towers a myriad of antennas and something that intrigued film maker Gary Pearce, KN4AQ. So armed with his video production gear, Gary travelled to the W3AO site to capture the moment and tell the tale to the world.

As Gary tells the story, it took a few years to find the time to get The Last Big Field Day into post production and duplicated.

NASA and ARISS reach out to educators

It has been discovered many schools are not aware of the Amateur Radio on the International Space Station (ARISS) Project so information has been sent to almost 20,000 educators.

Education Office at NASA's Johnson Space Centre notified almost 20,000 US educators about the Amateur Radio on the International Space Station Project.

According to ARRL ARISS Program Manager Rosalie White, K1STO, this kicks off the first of a number of new processes that the ARISS US team will put into motion to get educators more involved in the program, which coordinates Amateur Radio contacts between the ISS and educational institutions around the world.

REWIND

1962, John Glenn lifts off in Friendship 7 and becomes the first American to orbit Earth, circumnavigating the globe three times in almost five hours.

In the darkness at Gladstone, 10-year-old Owen Bennedick rallied his father to set up a spotlight usually used for roo spotting to shine at the capsule as it passed overhead.

Fifty years later, Owen Bennedick is still watching the sky as the owner of the Wappa Falls Observatory near Yandina.

It's a backyard curiosity, a humble tourist attraction, a hub for local stargazers and the first port of call for media following up reports of unusual sightings in the sky.

Over the years, he has invested heavily in his observatory equipment perhaps just as thrilling for visitors is being able to hold a piece of space in their own hands.

Owen has a meteorite collection, which includes bits of the moon, Mars, Mercury, a piece of asteroid that fell in Argentina, and a ring-in - a piece of trinitite from the Trinity nuclear bomb test in New Mexico in 1945, sealed in a lead glass case - which he picked up at the Yandina markets.

Then just 2 years ago, Owen heard the unedited conversation John Glenn had with NASA radio operators as he orbited the earth in 1962.

John Glenn remarked upon a bright light he could see in the vicinity of Rockhampton/Gladstone.

Owen Bennedick has heard in the crackly tapes, his boy hoods dream came true, his spotlight was seen by John Glenn!

==> + PUBLIC SERVICE: RADIO AMATEURS ASSIST AMERICAN RED CROSS, SERVED
AGENCIES AFTER JOPLIN STORM

On Sunday, May 22 at 5:41 PM, the single deadliest twister in almost
60 years -- and the second major tornado disaster in less than a month
-- swept through the southwestern Missouri city of Joplin, slamming
straight into St John's Regional Medical Center. The tornado killed at
least 117 people. As soon as the storm cleared, area Amateur Radio
operators responded to requests from the American Red Cross and local
hospitals to provide communications support.
```

"On Sunday, right after the tornado hit, I received a call from the American Red Cross office in Springfield, asking for radio support," said ARRL Missouri Section Emergency Coordinator Ken Baremore, W0KRB. "I contacted Greene County Emergency Coordinator William Gilmore, KC0TCF, and asked him to join me in Springfield. We got there at 9 PM and used a newly installed 2 meter beam to talk to the Joplin repeater, establishing communications between the two American Red Cross offices. Cell phone coverage was spotty at best, but mostly non-existent, and the circuit was overloaded most of the time. We left about 12:30 AM." Read more here <http://www.arrl.org/news/radio-amateurs-assist-american-red-cross-served-agencies-during-joplin-storm>.

==> + LEGISLATIVE NEWS: SENATE "COMPANION" BILL TO HR 607 AVOIDS IMPACTING AMATEUR SPECTRUM

On Thursday, May 19, Senators Joe Lieberman (ID-CT) and John McCain (R-AZ) introduced S 1040 -- The Broadband for First Responders Act of 2011 -- in the Senate. While it has a similar objective to HR 607 -- introduced in February by Representative Peter King (R-NY-3) -- this Senate bill, unlike HR 607, does not call for auctioning any portions of Amateur Radio spectrum. Both bills call for the allocation of the so-called "D block" of spectrum, 758-763 and 788-793 MHz, to facilitate the development of a public safety broadband network. Read more here <http://www.arrl.org/news/senate-companion-bill-to-hr-607-avoids-impacting-amateur-spectrum>.

==> + LEGISLATIVE NEWS: ARRL TESTIFIES BEFORE CONGRESS ON INTEROPERABLE PUBLIC SAFETY NETWORK

The Subcommittee on Communications and Technology of the US House of Representatives invited the ARRL to testify at a hearing on "Creating an Interoperable Public Safety Network." ARRL General Counsel Chris Imlay, W3KD, appeared before the Subcommittee on Wednesday, May 25. "While this is not a hearing specifically on HR 607, it provides a welcome opportunity to document our concerns about Section 207(d) of that bill," noted ARRL Regulatory Information Manager Dan Henderson, N1ND. Read more here <http://www.arrl.org/news/arrl-to-testify-on-interoperable-public-safety-network>.

==> FEMA ADMINISTRATOR CALLS AMATEUR RADIO "THE LAST LINE OF DEFENSE"

In an FCC forum <http://www.youtube.com/watch?v=bzx-kvo1i_Y> on earthquake communications preparedness, Federal Emergency Management Agency (FEMA <http://www.fema.gov/>) Administrator Craig Fugate described the Amateur Radio operator as "the ultimate backup, the originators of what we call social media." The forum-- held May 3 at FCC Headquarters in Washington, DC -- brought together officials from the White House, the Department of Homeland Security (DHS <http://www.dhs.gov/index.shtm>), the United States Geological Survey (USGS <http://www.usgs.gov/>), FEMA, the FCC and the private sector. Fugate and FCC Bureau of Public Safety and Homeland Security Chief

Jamie Barnett gave the opening remarks.

Later in the forum, Fugate spoke more on Amateur Radio. "During the initial communications out of Haiti, volunteers using assigned frequencies that they are allocated, their own equipment, their own money, nobody pays them, were the first ones oftentimes getting word out in the critical first hours and first days as the rest of the systems came back up," he told the forum. "I think that there is a tendency because we have done so much to build infrastructure and resiliency in all our other systems, we have tended to dismiss that role 'When Everything Else Fails.' Amateur Radio oftentimes is our last line of defense."

Fugate said that he thinks "we get so sophisticated and we have gotten so used to the reliability and resilience in our wireless and wired and our broadcast industry and all of our public safety communications, that we can never fathom that they'll fail. They do. They have. They will. I think a strong Amateur Radio community [needs to be] plugged into these plans. Yes, most of the time they're going be bored, because a lot of the time, there's not a lot they're going to be doing that other people aren't doing with Twitter and Facebook and everything else. But when you need Amateur Radio, you really need them."

You can watch a video of the forum <http://www.youtube.com/watch?v=bzx-kvo1i_Y> on YouTube. Fugate's remarks begin at 18:55.

==> AMATEUR RADIO IN THE CLASSROOM: NASA AND ARISS REACH OUT TO EDUCATORS

On May 19, the Education Office at NASA's Johnson Space Center's notified almost 20,000 US educators about the Amateur Radio on the International Space Station (ARISS) Project. According to ARRL ARISS Program Manager Rosalie White, K1STO, this kicks off the first of a number of new processes that the ARISS US team will put into motion to get educators more involved in the program, which coordinates Amateur Radio contacts between the ISS and educational institutions around the world. Read more here <http://www.arrl.org/news/nasa-and-ariss-reach-out-to-educators>.

==> + ARRL SECTION NEWS: NEVADA MEMBERS RE-ELECT ARRL SECTION MANAGER

In the only Section Manager election this spring to be decided by member balloting, ARRL members in Nevada re-elected Section Manager Joe Giraudo, N7JEH, of Spring Creek, to a new two-year term of office. Giraudo received 347 votes; his opponent J.D. Weiss, NK7W, of Reno, received 124 votes. Giraudo has been Section Manager since August 2008. His new term of office starts on July 1. Ballots were counted at ARRL Headquarters on May 24.

The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next two-year terms of office, beginning July 1: Jim Cross, WI3N, Maryland/DC; Al Shuman, K1AKS, New

Hampshire; Rich Krohn, N2SMV, Northern New Jersey; Bob Beaudet, W1YRC, Rhode Island; Dan Pruitt, AE6SX, San Joaquin Valley, and Mel Parkes, NM7P, Utah.

In West Texas, no nominating petitions were received for Section Manager by the March 4 receipt deadline. West Texas Section Manager John Dyer, AE5B, of Cisco, decided not to run for another term of office, and his present term ends on June 30; he has been Section Manager since July 2007, and had previously served as Section Manager 2002-2005.

According to the ARRL Rules and Regulations for the Field Organization, the West Texas Section Manager's position will be re-solicited in the July 2011 issue of QST. A Section Manager elected through the re-solicitation will serve a term of 18 months.

==> + ON THE AIR: NATIONAL HURRICANE CENTER'S WX4NHC SCHEDULES ON-THE-AIR STATION TEST

The annual WX4NHC On-the-Air Station Test from the National Hurricane Center in Miami will take place Saturday, June 4, 1300-2100 UTC (9 AM - 5 PM EDT). "The purpose of this annual station test is to test all of our radio equipment, computers and antennas using as many modes and frequencies as possible in preparation for this year's hurricane season," said WX4NHC Assistant Amateur Radio Volunteer Coordinator Julio Ripoll, WD4R. "This is not a contest or simulated hurricane exercise." Read more here <http://www.arrl.org/news/national-hurricane-center-s-wx4nhc-schedules-on-the-air-station-test>.

==> ON THE AIR: RUSSIA NOW PERMITS RECIPROCAL LICENSING THROUGH CEPT

On May 18, the European Communications Office (ECO) in Copenhagen added the Russian Federation to the list of countries that accept the CEPT reciprocal operating arrangements. This means that US hams who hold an FCC-issued General, Advanced or Amateur Extra class Amateur Radio license may operate in Russia, as well as the other countries covered by the European Conference of Postal and Telecommunications Administrations (CEPT), subject to the regulations in force in the country visited. Read more here <http://www.arrl.org/news/russia-now-permits-reciprocal-licensing-through-cept>.

==> CQ ANNOUNCES 2011 HALL OF FAME INDUCTEES

CQ magazine announced its 2011 Hall of Fame inductees on May 20, welcoming 12 new members into the CQ Amateur Radio Hall of Fame, one new member of the CQ DX Hall of Fame and one new member of the CQ Contest Hall of Fame. The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to Amateur Radio, as well as those amateurs who have made significant contributions either to Amateur Radio, to their professional careers or to some other aspect of life on our planet. The

CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of Amateur Radio but who also "give back" to Amateur Radio in outstanding ways. Read more here <http://www.arrl.org/news/em-cq-em-announces-2011-hall-of-fame-inductees>.

==> + FORECASTERS CALLING FOR "ABOVE-AVERAGE" HURRICANE SEASON

Forecasters with the National Hurricane Center are calling for an "above-average" Atlantic hurricane season for 2011. In its initial outlook for the 2011 Atlantic hurricane season -- which runs from June 1-November 30 -- the National Weather Service's Climate Prediction Center (CPC) is calling for a 65 percent probability of an above-normal season, a 25 percent probability of a near-normal season and a 10 percent probability of a below-normal season.

CPC Forecasters say that there is a 70 percent chance of having 12-18 named storms, of which six to 10 could become hurricanes, including three to six major hurricanes (Category 3, 4 or 5). Tropical systems acquire a name -- the first for 2011 will be Arlene -- upon reaching tropical storm strength with sustained winds of at least 39 miles per hour. Tropical storms become hurricanes when winds reach 74 miles per hour and become major hurricanes when winds increase to 111 miles per hour. An average season has 11 named storms, including six hurricanes with two becoming major hurricanes. Read more here <http://www.arrl.org/news/forecasters-calling-for-above-average-hurricane-season>.

==> SOLAR UPDATE

Tad "All alone with the memory of my days in the Sun <http://www.youtube.com/watch?v=Pm5w7gHEtJI>" Cook, K7RA, reports: The Sun was quieter again this week. The average daily sunspot numbers were down nearly 17 points to 51.6, while the average daily solar flux declined nearly 9 points to 83.2. The latest prediction is for the solar flux to remain low at about 80 on May 26-June 2, then rise to 90 on June 3-4, then 85 on June 5-7 and back to 90 on June 8-11, finally peaking at 95 on June 12. We seem to be a long way from recent weeks when sunspot numbers were over 100. The same prediction has some geomagnetic activity this weekend, with the planetary A index on May 26-30 at 8, 12, 15, 12 and 10, then declining to 5 on May 31 and into the first week of June. Currently two new sunspots are emerging in the Sun's southeastern quadrant. Look for more information on the ARRL website on Friday, May 27. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Andrew Lloyd Webber's Memory <http://www.youtube.com/watch?v=Pm5w7gHEtJI> from the musical Cats <http://en.wikipedia.org/wiki/Cats_%28musical%29>.

==> ATLANTIC DIVISION TO HOST TWO WEBINARS

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet.

On Wednesday, June 1 at 9 PM (EDT), ARRL West Gulf Division Director David Woolweaver, K5RAV -- along with ARRL General Counsel Chris Imlay, W3KD, and noted antenna zoning lawyer Fred Hopengarten, K1VR -- will present Antennas, CC&Rs and You <https://www1.gotomeeting.com/register/828951905>. The webinar is hosted by ARRL Atlantic Division Director Bill Edgar, N3LLR. The scope of the webinar will be an overview of the impact that private contracts and land use provisions -- such as homeowners association covenants and deed restrictions -- impact amateurs. The webinar will highlight how CC&Rs differ from public laws, such as zoning ordinances and governmental restrictions (which are covered under PRB-1). The presenters will also discuss some common approaches on how amateurs might try to address these restrictive covenants. Following the presentations by Imlay and Hopengarten, participants will have the opportunity to ask general questions related to the topic. Click here <https://www1.gotomeeting.com/register/828951905> to sign up for the CC&R webinar.

On Wednesday, June 8 at 9 PM (EDT), Edgar and the National Capital Region D-STAR Association will present the second of a two-part webinar discussion on D-STAR technology and its application to emergency communications <https://www1.gotomeeting.com/register/746329904>. This 90 minute webinar will provide a discussion on how D-STAR technology can benefit Amateur Radio EmComm scenarios. Examples of D-STAR applications to EmComm will also be presented, as well as future growth ideas. Click here <https://www1.gotomeeting.com/register/746329904> to sign up for the D-STAR webinar.

==> + ARRL HQ NEWS: ARRL HQ TO CLOSE IN OBSERVANCE OF MEMORIAL DAY

ARRL Headquarters will be closed Monday, May 30 in observance of the Memorial Day holiday. There will be no W1AW code practice or bulletin transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, May 31 at 8 AM (EDT). We wish everyone a safe and enjoyable holiday weekend.

==> THIS WEEK ON THE RADIO

This week:

- May 27 -- NCCC Sprint Ladder
- May 28-29 -- CQ WW WPX Contest (CW)
- May 29 -- ARCI Hootowl Sprint (local time)
- May 29-30 -- Michigan QRP Memorial Day CW Sprint
- June 2 -- QRP Minimal Art Session

Next week:

- June 3 -- NCCC Sprint Ladder
- June 4 -- Wake-Up! QRP Sprint
- June 5 -- 10-10 International Open Season PSK Contest
- June 4-5 -- Maritimes QSO Party; Alabama QSO Party; SEANET Contest
- June 7 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 3-5 -- ARRL Northwestern Division Convention (SeaPac) <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>, Seaside, Oregon; ARRL Wyoming State Convention <http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne, Wyoming
- June 4 -- ARRL Atlantic Division Convention <http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-1>,
Rochester, New York; ARRL East Bay Section Convention <http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley, California; ARRL Georgia State Convention <http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>, Marietta, Georgia
- June 10-11 -- ARRL National Convention <http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>, Plano, Texas
- June 11 -- ARRL Tennessee State Convention <http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville, Tennessee
- July 2 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecracker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention <http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-international-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>, Oklahoma City, Oklahoma

To find a convention or hamfest near you, click here <http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1763 - May 27 2011

Amateur Radio Newsline report number 1763 with a release date of
Friday, May 27, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio faces another challenge from
Mother Nature as more tornadoes hit in the south; the FCC Chairman
makes a surprise visit to Hamvention 2011, a ham is fined $4000 for out
of band operation, and four New York radio amateurs meet with the
sponsor of H-R 607 and he says he will try to eliminate 420 to 440 MHz
from it. Find out the details are on Amateur Radio Newsline(tm) report
number 1763 coming your way right now.

RESCUE RADIO: HAM RADIO RESPONDS TO JOPLIN TORNADO

Ham radio operators are a part of severe weather spotting as well as
being involved in relief efforts as tornadoes continue to ravage the
South. We have the latest in this report:

--

Actually, four days after the severe weather struck, very little is
known about the role being played by radio amateurs in the South,
especially in and around Joplin, Missouri. That's because they are far
too busy saving lives and reporting damage to stop to make reports to
the press.

We do know come from published news reports that quote Ron Kittleman,
K0ADI. He says that hams have been stationed at the Springfield
Missouri office of the National Weather Service. Also, that amateurs
from ARES have been providing communication between hospitals and
assessment teams following the tornado that hit Joplin at approximately
6 pm local time on Sunday, May 22nd.

According to Kittleman, the storm knocked out cell phone and landline
communications across the area. Radio operators from ARES started
relaying medical information between the Freeman Hospital and the St
John's and Cox Health medical facilities in Springfield shortly after
the storm hit.

Another report says that a Kansas and Western Missouri SATERN Teams
from the Salvation Army has been activated for the Joplin tornado
response. As we go to air, SATERN team members are reportedly

assisting with communications in the affected area. Also, a Salvation Army emergency disaster services team based out Pittsburg, Kansas has been deployed to Joplin. Its job is to help carry out mass feeding for residents and first responders through a mobile feeding kitchen capable of serving thousands of meals a day.

As we go to air, the situation across the storm ravaged region remains a fluid one with events changing by the minute. We should know more in the coming days.

>From the Newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF, reporting for the Amateur Radio network

--

More on this ham radio emergency response to this springs wicked weather in future Amateur Radio Newsline reports. (ARNewsline(tm) from published news reports)

--

HAMVENTION 2011: IT WAS THE SHOW TO BE AT

Dayton Hamvention 2011 is in the books and for some, the highlights included an "out of this world" experience in the visit of a NASA astronaut and a surprise guest appearance by one of the government's top communications regulators. Amateur Radio Newsline's Mark Abramowicz, NT3V has the report.

--

"My call sign here on Earth is KF5BOC. But I've never used it. I call that my gravity call sign. But, my real call sign is NA1SS from the space station and I sort of got this emotional attachment to that now."

And, that's what NASA Astronaut Doug Wheelock had to say during Saturday's Youth Forum at the Dayton Hamvention, one of several events he attended during the weekend celebration of Global Friendship, the theme of this year's gathering.

Wheelock was invited to Hamvention to be part of the American Radio Relay League's Expo.

But he spent a lot of time mingling and circulating throughout various areas of the Hamvention grounds and freely signed autographs and chatted with folks and packed a Saturday afternoon forum where he talked about life aboard the International Space Station.

Wheelock says his time aboard the space station was anything but routine.

It was last July 31, only hours after a pre-arranged contact with K2BSA at the Boy Scouts of America Jamboree in Virginia that things got challenging.

"I had just shut down the tread mill and about 10 minutes later the alarms went off," Wheelock recalls. "I looked and I kept silencing the alarms, silencing the alarm. I picked up the mic and said 'Houston are you there?'

"And, they weren't answering and so then I looked and all my crewmates were there and they said: 'What did you do?' I said: 'I just turned off the tread mill, I promise you.'

"Anyway, we had a pump module that failed, we ended up having to go outside and do three space walks."

And, Wheelock says, it was great to know there were people -other than his crewmates and NASA engineers - who he could talk to and decompress as they battled to fix the problem...

"As we came back in from those spacewalks. I got on the ham radio and we talked about it and everything," Wheelock says. "Using that radio and having you guys as an emergency contact for us around the globe was a warm, warm feeling for me as a commander aboard that space station."

And, Wheelock says, he looked at ham radio aboard the ISS as a critical back-up, should all else fail...

"I thought, you know, I have these emergency contacts on every continent on that planet down there," Wheelock recalls. "And, I thought if my communication goes out with Mission Control, I am not hesitating one bit to call some of my friends and say: 'Hey, Chris, can you give Mission Control a jingle and tell 'em that we're okay.' "

And, Wheelock says, becoming a ham has been a life-changing experience....

"The friends that I made in the amateur radio business and community, I now feel like a just an entrenched member of this community and it really truly has changed my life for the better," Wheelock says.

Finally, Wheelock recalls "crossing the line." He thought it was harmless when he did it. But his NASA ham radio instructor informed him after he did it that...well, let's have him tell the story of wishing a frequent friend over Europe by the name of Fabiano a happy birthday...

"I felt like I was kind of slapped on the wrist by NASA and then I thought, and then I felt flattered that my singing of Happy Birthday was actually considered music," he says.

Wheelock truly was a hit, stopping to take pictures with nearly everyone who asked and signing program books and NASA photos.

He'll also be appearing in an upcoming video the ARRL is producing.

Now, what else happened at Dayton?

Well, imagine you're Hamvention chairman Michael Kalter W8CI, and you get word Federal Communications Commission Chairman Julius Genachowski is "in the house" and wants an audience.

No fooling!

Genachowski had a flight diverted to Dayton Friday night because of the storms in the Midwest and was told it might be a problem finding a hotel room because of the Hamvention.

Well, Genachowski found a room and decided to check out ham radio for himself and this big gathering of hams from around the world.

As Kalter and others from the Dayton Hamvention committee tell it, Genachowski spent about two hours at the gathering. He circulated among many, including those in the main arena where he chatted with folks about the advanced technology in use in amateur radio today.

The Dayton Hamvention committee estimated attendance of at least 20-thousand and say they got positive feedback from both the inside vendors and those in the flea market.

One little glitch made this year's Hamvention a bit memorable.

Early in the afternoon, Hara Arena personnel began closing off all the restrooms with yellow caution tape and directing people to porta-potties outside.

Most didn't learn until later that major sewer line broke, sending its contents into an area of the flea market.

Well, the affected flea market spots were moved, the leak was temporarily fixed, and people came back Sunday for the final day of events.

I'll be back next week with more on Hamvention 2011, including a special interview with a YL who has been a big part of activities in Dayton for 24 years. Next year, she's looking forward to 25 and she'll clue us in on what she has in store.

For the Amateur Radio Newsline, from Dayton, I'm Mark Abramowicz, NT3V.

--

More on Hamvention 2011 next week. (ARNewsline(tm). NT3V)

RADIO POLITICS: COUNCIL OF EUROPE ADVISORY COMMITTEE RECOMMENDS RF FREE ZONES

The Council of Europe's Parliamentary Assembly Committee on the Environment released a report titled The Potential Dangers of Electromagnetic Fields and Their Effect on the Environment. The paper, made public on May 6th carries recommendations that, if adopted, could have major implications for wireless carriers and, to a lesser extent, broadcasters and any RF emitter in the European Union.

In regard to standards or threshold values for emissions of electromagnetic fields of all types and frequencies, the Assembly that

prepared the report recommends that the "as low as reasonably achievable" principle be applied. This, covering both the so-called thermal effects as well as the biological effects of electromagnetic emissions or radiation.

The report also is among the first to give credibility to a phenomena that most scientists and researchers have long been skeptical of. Paragraph 8.1.4 of the report recommends member states of the Council of Europe pay particular attention to the needs of what it calls electro-sensitive persons. These are people who claim that they suffer from a syndrome of intolerance to electromagnetic fields. The report suggests the introduction of special measures to protect these people. This includes the creation of wave-free areas not covered by a wireless network. What effect acceptance and implementation of the recommendations would have on ham radio operations in Europe remain to be determined. (RW)

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N7SK0 repeater serving Kingmnan Arizona.

(5 sec pause here)

**

RADIO POLITICS: NY HAM DELEGATION CLAIMS 420 TO 450 MHZ TO BE REMOVED FROM HR-607

A delegation of Amateur Radio operators from the Long Island and metro New York City area say that they met the morning of May 19th with Congressman Peter T. King of New York. King is the mastermind behind HR 607, which in its present form would sell off part of the 70 centimeter band to help defray the cost of a proposed 700 MHz interoperable first response emergency communications network.

According to the groups spokesman, Mike Lisenco, N2YBB, Congressman King said that he fully understands and appreciates the importance of Amateur Radio and the service it provides to the community. Also, that he would see to the modification of the bill so that the 420 to 440 MHz band would be excluded from the spectrum to be auctioned.

According to Lisenco, the Congressman went on to explain that it was never his intention to remove the 70 centimeter band from Amateur use. He also requested that the four ham delegation inform the Amateur Radio community that 70 centimeters is not in jeopardy.

The delegation says that it operated independently of the ARRL's organized effort to derail the portion of the 70 centimeter band that would have put 420 to 440 MHz in jeopardy. In addition to Lisenco the group included Peter Portanova, WB2OQQ, George Tranos, N2GA,, and Jim

Mezey, W2KFV.

As we go to air, its now it's a waiting game to see if Congressman King can keep his promise to get 420 to 440 MHz removed from the measure. As has been pointed out to Newsline by several who understand the U-S legislative system, Representative King lost all control over the content of HR-607 as soon as he submitted it for congressional law making consideration. Because of this, all he can do is recommended that it be changed but he cannot force this to happen.

In reality, HR-607 is now under the control of the Subcommittee on Communications and Technology of the House Energy and Commerce Committee. So until both he and the Subcommittee on Communications and Technology act, the threat to the 420 to 440 MHz spectrum remains real, and ham radio operators nationwide have to keep their eyes and ears open on this one. (N2YBB)

**

RADIO POLITICS: SENATE VERSION OF HR 607 PROTECTS HAM RADIO

In a related story, the ARRL reports that on Thursday, May 19, Senators Joe Lieberman and John McCain introduced Senate measure S 1040 which is similar to HR 607. The big difference is that unlike HR 607, the Senate version does not call for auctioning any portions of Amateur Radio spectrum. (ARRL)

**

RESCUE RADIO: MISSION VIEJO CA USES RACES IN PREPAREDNESS EXERCISE

In an effort to keep itself safe and prepared for emergencies, Mission Viejo, California city staff and members of the local ham radio community recently participated in the Golden Guardian 2011 emergency response exercise.

Golden Guardian 2011 was an emergency preparedness exercise sponsored by the California Office of Homeland Security. As part of the detailed training program, the city called into action the Mission Viejo Radio Amateur Civil Emergency Services or RACES team. Like others of its kind, Mission Viejo RACES is a volunteer group of amateur radio operators that deploy as the city's backup emergency communications system in the event that other methods of communication fail.

The Mission Viejo's exercise was part of a county-wide effort to test emergency communications systems in the City's Emergency Operations Center using a winter storm response scenario. Located at Mission Viejo City Hall, the EOC is a secure facility where city department heads are able to work in the event of a large disaster. Mission Viejo's RACES is headed up by Charley Speelman, WA6RUZ. (K6HIV)

**

ENFORCEMENT: HAM FINED $4000 FOR OUT OF BAND OPERATION

The FCC has issued a Forfeiture Order in the mount of $4000 to Jose Torres, N3TX, of Philadelphia, Pennsylvania. This for what the regulatory agency says was Torres willfully and repeatedly operating his amateur station on an unauthorized frequency in violation of Section 1.903 (a) of the Commission's Rules.

Back in 2009 the FCC issued an Notice of Apparent Liability to monetary forfeiture to Torres after receiving a complaint of interference in 2008. Agents in the Enforcement Bureau's Philadelphia Office used mobile direction finding equipment in April and June of that year to determine the source of interference. Both times, they found that the source was coming from Torres' residence and that the interference consisted of unauthorized radio transmissions on 26.71 MHz.

Torres met with agents in the FCC's Philadelphia Office in February 2009 to respond to the findings in the Notice of Apparent Liability. During the meeting, Torres claimed that he was not at home during the alleged unauthorized operations in April and June of 2008. He also submitted cell phone records in support of this claim. Torres also presented the FCC with his most recent three years of federal tax returns to support his request for a reduction based on an inability to pay the $4000 forfeiture.

In its May 16th announcement affirming the Forfeiture Order, the FCC stated that it found no merit to Torres' claim that he was not at home when the unauthorized transmissions took place. It noted that the cellular phone records prove nothing more than the fact that he was using his cell phone and not the wire-line telephone located in his home. And after reviewing Torres tax records the FCC declined to reduce the amount of the forfeiture, based on Torres claim that was unable to pay it. The FCC says that after having reviewed the documentation Torres provided, it concludes that a reduction of the forfeiture is not warranted.

Torres was given the customary 30 days to pay the monetary forfeiture or to file a further appeal. (FCC)

NAMES IN THE NEWS: VA3WXM ELECTED RAC ONTARIO SOUTH DIRECTOR

Some names in the news. First up is Jeffrey Stewart, VA3WXM who was recently elected as the Radio Amateurs of Canada Director for Ontario South for the remainder of a two year term which ends December 31, 2011. Stewart emerged with the majority vote over Nelson Jenking, VA3NDJ in a mail ballot closing May 13th for the Ontario South Director's position. Stewart has been a certified amateur operator since March 1999 and involved in many aspects of the hobby including a recent term as President of the Mississauga Amateur Radio Club. (RAC)

NAMES IN THE NEWS: CQ ANNOUNCES HALL OF FAME INDUCTEES

And CQ magazine has announced its 2011 Hall of Fame inductees, welcoming 12 new members into the CQ Amateur Radio Hall of Fame.

Topping this years list alphabetically is TV and Film producer Dave Bell, W6AQ, who was chosen for this honor based on his deep involvement in producing multiple amateur radio promotional videos over the past several decades.

Also from Southern California is Nate Brightman, K6OSC. He is credited with being the "spark" behind W6RO, the ham station aboard the Queen Mary in Long Beach, California.

Rounding out the California contingent is Cardinal Roger Mahony, W6QYI, the Archbishop Emeritus of Los Angeles. He was recognized for his leadership as an advocate for immigration reform.

Others recognized include Ron Moorefield, W8ILC of Kettering, Ohio. Since its inception, Moorefield has been one of the guiding lights of the Dayton Hamvention. He was also recognized for his work as a coordinator of the cross-country 1984 Olympic Torch Relay.

There was also one each member inducted into the CQ DX Hall of Fame and the CQ Contest Hall of Fame. The 2011 inductee to the CQ DX Hall of Fame is Michael J. McGirr, K9AJ. McGirr has been a leading DXpeditioner who has operated literally from the ends of the Earth over nearly 30 years. The 2011 inductee to the CQ Contest Hall of Fame is John Sluymer, VE3EJ, who has been an active contester and DXer since 1973. He is a founding member and current president of Contest Club Ontario.

The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways. Formal inductions to the CQ Contest and DX Halls of Fame took place at last weeks Dayton Hamvention. A complete list of this years inductees is on-line at www.cq-amateur-radio.com. (CQ)

HAM RADIO IN SPACE: ISS EXPEDITION 27 CREW RETURNS TO EARTH

International Space Station Expedition 27 Commander Dmitry Kondratyev along with Flight Engineers Cady Coleman, KC5ZTH and Paolo Nespoli, IZ0JPA safely landed their Soyuz spacecraft in Kazakhstan on Monday, June 23rd wrapping up a five-month stay aboard the orbital outpost.

Before making its descent to Earth, the Soyuz backed 600 feet away from the ISS after which Nespoli took the first still images and video of a space shuttle docked to the station. The orbiting laboratory had to rotate 130 degrees to provide an ideal view for the historic imagery.

Russian recovery teams were on hand to help the crew exit the Soyuz and adjust to gravity. Kondratyev was to return to the Gagarin Cosmonaut Training Center in Star City, outside of Moscow, while Coleman and Nespoli will fly directly to the Johnson Space Center in Houston, Texas. (Southgate)

**

HAM RADIO NEAR SPACE: EOSS TO FLY BALLOON NUMBER 164

Edge of Space Sciences will be flying its 164th stratospheric balloon flight on Saturday May 28th at 7:10 Mountain Standard Time out of Windsor, Colorado. This flight will be in support of Colorado University Boulder's Space Grant Consortium. The tentative payload frequencies are 147.555 MHz with a CW I-D of AE0SS for the beacon and 144.340 MHz for APRS tracking using the call AE0SS-11. For the latest information please check the Edge of Space Sciences website at www.eoss.org. (KC0UUO)

**

RADIO FROM SPACE: TWIN VOYAGERS SET TO ENTER INTERSTELLAR SPACE

More than 30 years after they left Earth, NASA's twin Voyager probes are now at the edge of the solar system and set to enter Interstellar space. And with each passing day they are radioing back information that to scientists is both unsettling and thrilling. Jeff Clark, K8JAC, reports:

--

Voyager 2 launched on August 20, 1977, from Cape Canaveral, Florida aboard a Titan-Centaur rocket. On September 5, Voyager 1 launched, also from Cape Canaveral aboard another Titan-Centaur. He initial chore for each Voyager was to take advantage of a rare alignment of outer planets for an unprecedented grand tour. Voyager 1 visited Jupiter and Saturn, while Voyager 2 flew past Jupiter, Saturn, Uranus and Neptune.

The Voyager spacecraft became the third and fourth human spacecraft to fly beyond all the planets in our solar system. Pioneers 10 and 11 preceded Voyager in outstripping the gravitational attraction of the Sun but on February 17, 1998, Voyager 1 passed Pioneer 10 to become the most distant human-made object in space.

No one knows exactly how many more miles the Voyagers must travel before they pop into interstellar space. Most researchers believe, however, that the end is near. The two Voyagers are currently within the Heliosheath at the end of the galaxy. It is believed to be 3 to 4 billion miles in thickness. According to one NASA researcher, that means they could be out within five years or so.

I'm Jeff Clark, K8JAC

--

For more information about the Voyager spacecraft, visit voyager.jpl.nasa.gov and www.nasa.gov/voyager (NASA)

**

DX

In DX, HA0HW will be active again stroke SV8 from Thassos Island through June 5th. He will operate on the HF bands and 6 meters. QSL via his home callsign preferably through the bureau.

TJ3AY has been issued special callsign TJ3IC to be used through months end to commemorate the 51st anniversary of the independence of Cameroon. QSL via F5LGE.

Three Czech Republic operators will be on the Island of Crete until months end signing portable SV9. They also plan a few side trips to offshore islands, which will count as IOTA EU-187. QSL this one as directed on the air.

Lastly, The Pacific-DXer's Web page is reporting that plans are progressing for the upcoming C21AA DXpedition to take place between November 13th and December 5th. Operations will be led by VK4FW, with liaison support by VK4AN. They expect to have at least 3 stations active on all bands 160 through 6 meters using CW/SSB/RTTY/PSK31. Also, a dedicated station will be set up on 6 meters running in the beacon mode. QSL Managers are the Pacific DXers, or by the Bureau via VK4FW.

(Above from various DX news sources)

THAT FINAL ITEM: REGISTRATION OPEN FOR USA NATIONAL ARDF CHAMPIONSHIPS

And finally this week, registration is now open for the biggest event of the year for on-foot hidden transmitter hunters. September 16 through 18 are the dates for USA's national championships of Amateur Radio Direction Finding, or ARDF. Newsline's Joe Moell K0OV,has the details:

--

Who are the best transmitter hunters in the country? That's what we'll find out when the Eleventh USA ARDF Championships get under way near Albuquerque, New Mexico. Members of Albuquerque Amateur Radio Club and

New Mexico Orienteers promise two challenging radio-orienteering courses. One will be on two meters, and the other on 80 meters. This is a test of individuals, and it's all on foot. You'll have five transmitters to find each day, negotiating your way through the forest with your map, compass and direction-finding gear. If you can walk or jog a 5 km racecourse, you have the stamina to complete an ARDF event. If you're a senior citizen, don't worry about being trounced by teenagers, because there are a total of ten age categories, six for men and boys, four for women and girls.

This year, the USA Championships are an international event, combined with the International Amateur Radio Union Region 2 ARDF Championships. If past events are any indication, there will be plenty of international experts in the sport on hand, so you'll have a chance to learn foxtailing tips and techniques from the very best. Positions on ARDF Team USA to next year's World Championships in Serbia are open, so perhaps you can earn a spot for yourself. We're looking for good candidates in all age/gender categories, so encourage your kids and grandkids to give it a try.

If you're new to the sport, arrive two days early for a pre-event training camp, where experts will teach you what you need to know to find those transmitters in the woods.

It may seem like September is a long way away, but the organizers need an accurate head count very soon so they can plan for the buses to take the competitors to the competition sites. So if you're thinking about participating, get the registration form from the Web and send it in right away, or contact the organizers by e-mail to let them know you want to come. There's more information about the event and links to the organizers at www.homingin.com. That's one word "homingin" ---homingin.com. At that site you'll also find lots more about transmitter hunting, including equipment ideas and techniques. View photos of past USA Championships to get a good idea what to expect.

>From southern California, where there's some kind of transmitter hunt almost every weekend, this is Joe Moell, K0OV, for Amateur Radio Newsline.

--

Again that website Joe mentioned is www.homingin.com. (K0OV, ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio

Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 29th May 2011

The news headlines:

* Foundation Syllabus changes on 1 July
* Train the trainers session to be held in Derby
* Japan drops Morse requirement

The syllabus of the Foundation examination changes on 1 July this year. A new question on etiquette and dealing with abuse will be added, making 26 questions in total on each paper. The pass mark is 19 correct answers. Details are on the RCF examinations website at www.commsfoundation.org/rce, where you will need to click on Foundation Syllabus - current.

A Train the Trainers course will take place on 18 June at the Old Mill Community Centre, West Street, South Normanton, Derbyshire. The event will start at 10am and includes a free lunch as well as a raffle. If any tutors would like to attend, please contact Jim Stevenson, G0EJQ, by email to g0ejq@live.co.uk.

The Japanese radio regulatory council recently announced that the Morse requirement for amateur radio licenses will shortly be dropped. The move comes after a public consultation following the decisions taken at WRC-2003. The RSGB understands that the change will be effective from 1 October 2011.

Would all those still intending to take part in the International Museums Weekend in June please register via the IMW website. This includes those who are registering for the first time as well as those who have taken part in the past and need to update their registration. The URL is www.ukradioamateur.co.uk/imw.

The BBC Community Bus paid a visit to West Tyrone Amateur Radio Club. Some of its members attended a 2 day radio production workshop on board the Bus. They learned how a magazine style radio programme is produced and gained new skills in interviewing, collecting vox pops, scripting and presenting. If you would like to listen to the result, go to http://wtarc.co.uk/news.aspx.

At the recent Dayton Hamvention, Sylvia Margolis was posthumously inducted into the CQ Amateur Radio Hall of Fame. The Hall of Fame honours those individuals, whether licensed amateurs or not, who have made significant contributions to amateur radio. Sylvia was a prolific

author for CQ magazine in the 1960s and early 70s and was well known for her humorous look at the hobby. She was also the first Public Relations Officer for the Radio Society of Great Britain. Her son, well-known DXer Laurie Margolis, G3UML, said he was "Somewhat stunned and rather chuffed" when he heard the news.

There are three UK Buildathon events taking place this year. On 5 June the Buildathon team will be at Torbay ARC building a Manhattan-style Sudden receiver. Booking details are on the Torbay club's website at www.tars.org.uk. Then in July, at the QRP in the Country event on the 17th, a Cary regenerative receiver is the project. Finally, the G-QRP Club is planning to have a Friday night Buildathon and social supper on 21 October, the eve of the Rishworth Convention. Details from www.gqrp.com/rishworth.htm. All these will be ideal for Intermediate students to build their projects and get some of the test meter assessments signed off.

And now for the details of rallies and events for the coming week

The 21st annual Waters and Stanton Open Day will take place today, 29 May. Essex CW Club, who won the Region 12 Club of the Year award will collect their trophy from Waters & Stanton, who sponsor both the Region 12 Trophy and the National Trophy scheme too.

D-Star Northants and UKIT are organising a D-Star Meet and Greet Day today, 29 May. This will be held in Northampton at Tetra Communications, Bunting Road, Northampton NN2 6EE. The event will include help and advice from D-Star Northants and UK IT.

Porthcurno Telegraph Museum has an open day today, 29 May. Doors open from 10am to 5pm to celebrate the 70th anniversary of the opening of the wartime tunnels at Porthcurno. This event is open to all, but the museum would particularly like to hear from anyone who was involved at Porthcurno during WW2 or who had an involvement in any other way. Entry to the museum, including the tunnels, will be free to all on this day.

Next weekend, 5 June is a busy day for rallies up and down the country. The Newhaven Fort Amateur Radio Group Rally and Fort Open Day takes place at Newhaven Fort, East Sussex, near the southern end of the A26. Entry is £2 and the doors open at 10.30am. Details from Eddie, G0ECW on 01273 300772.

The Spalding & DARS annual rally will be held at The Sir John Gleed Technology School, Halmer Gardens, Spalding, Lincs, PE11 2EF. There is free car parking and the doors open at 10am. Details from John, G4NBR, on 0794 630 2815.

The 15th Red Rose QRP Festival will take place at Formby Hall, Alder Street, Atherton, Manchester M46 9EY. There is free car parking and entry is £2. There will be a Bring & Buy. Details from Les Jackson, G4HZJ on 01942 870634.

Finally for 5 June, the Hull & District Amateur Radio Society Grand Auction and Mini Rally will be held at the HADARS Club House, Goathland Close, Hull. Doors open at 12 noon and the sale starts at 1.30pm. There will be a Bring & Buy with 10% of proceeds to the club funds. To book any items in before the sale call Keith on 01482 217776.

Now for the news of special events

The Royal Naval Amateur Radio Society will run GB6COD at the open day in HMS Collingwood on 4 June. The station will be operational on all amateur bands from 1.8MHz to 440MHz. The Society headquarters station will be open for viewing from 9.30am to 6pm on the day. Advanced tickets will be available from Gosport and Fareham Tourist Information Offices and Portsmouth News Offices from May 2011.

GB0VUL will be on the air promoting and celebrating the continued flying of XH558, the world's only flying Vulcan bomber. The station will be on the air today, 29 May, from the Air Training Corps Hall in Newbury. This is the 3rd consecutive year this call has been run by members of Newbury and District Amateur Radio Society. More information can be found at www.vulcantothesky.org.

The Geoparks Communication Weekend will take place this weekend, 28 and 29 May. GB6GEO will be on again this year from Occombe Farm in Torbay. There will be several other Geopark stations operating around the world. There is an award available for contacting Geopark stations. More information on qrz.com.

As part of the Imagineering stand at the Bath and West Show, Weymouth College are putting on a special event station to demonstrate amateur radio to visitors. The idea is to particularly allow young people to send greetings via the HF special event station GB0BAW. If there are any local amateurs who are planning on visiting the show and would like to help operate the station that will be on the air for the duration of the agricultural show between 1 and 4 June, please contact Rob, G0ECX whose details are on QRZ.com, or telephone 01305 787120.

And now the HF DX news compiled from 425 DX News and other sources

Glasgow and Clyde RAYNET Group will be active on the Island of Jura, which is IOTA reference EU008, until 2 June. The group is providing emergency safety communications for the annual Fell Race on the 28th. They will also be activating the island on all HF bands using group callsign GS0RAY/P throughout the week. Reports are most welcome. For further details please contact group controller Paul Lucas on 07768 271736 or by e-mail to mm3ddq@yahoo.co.uk.

VE7/DK6AO will stay on Quadra island in British Columbia between May 30 and June 7. QSL via his home callsign either via the bureau or direct.

Jan, PA4JJ will be active holiday style as 9A/PA4JJ from Porec on the Croatian mainland between 6 and 24 June. He will operate RTTY and PSK31 most of the time. QSL via his home callsign.

I2VGW, IZ2LSC and IZ3EZV will be active as HB0/homecall from Liechtenstein between 2 and 5 June. They plan to operate holiday style CW, SSB and RTTY, with main focus to be given to 12, 17 and 30 metres and the upper HF bands. They will also give 6 metres a try. QSL via their home callsigns.

Now the contest news

On 31 May, the 70MHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

CW NFD is the first HF event of the month on 4 and 5 June. With HF propagation much improved this year, smart competing stations will be keeping a very careful listen on 10m. When it opens there will be a real feeding frenzy because, like 160m, QSOs on 10m are worth double points. Running from 1500 to 1500UTC and using all bands from 1.8 to 28MHz, the exchange is signal report and serial number.

The UK 6m Group's Summer Es Contest also takes place for 24 hours over the weekend of 4 and 5 June. You can participate and give points away even if you're not a member. Send a report, serial number and your locator, and expect to receive the same plus a membership number. Remember that many members of UKSMG are experts on 6m, so they're likely to hear you even if your station is far from ideal for the band. The contest runs from 1200 to 1200UTC.

And now the solar factual data for the period from the 16th to the 22nd of May, compiled by Neil Clarke, G0CAS on the 23rd of May.

Solar activity was very low every day except for a C2 class solar flare that took place on the 18th from a sunspot group that was in the process of rotating out of view around the west limb. The solar disc had a number of sunspot groups visible every day with 5 on the 18th. All of the groups were small and magnetically simple. Solar flux levels reflected this and declined from 92 units on the 16th and the 17th to 84 by the 19th. The average was 87 units. The 90 day solar flux average on the 22nd was 108. That's two units down on last week. X-ray flux levels also declined as expected from B1.4 units on the 17th to A6.8 on the 21st. The average was A9.4 units. Geomagnetic activity started at just unsettled levels with the Ap index of 12 and 10 units on the 16th and the 17th respectively. Quiet conditions then prevailed to the end of the period as the effects of the coronal hole declined. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 600 kilometres per second on the 17th to 310 by the 21st. Particle densities remained low throughout. Bz varied between minus and plus 7 nanoTeslas on the 16th, which was the most disturbed day, and between minus 4 and plus 3 nanoTeslas on the quiet days.

Sporadic-E was reported daily on 28 and 50MHz, with double-hop propagation on 50MHz on several days. 70MHz was also open across much of Europe on several days. During the 21st an opening took place on 144MHz but it would appear only affected the Mediterranean area.

And now the solar forecast. This week solar activity is expected to be very low to low. However, the latest STEREO spacecraft images show a large active region that will be rotating into view today or tomorrow. How active this region will be only time will tell. Solar flux levels should be around the 100 mark but could be much higher if this region is still active. Geomagnetic activity is expected to be unsettled today and tomorrow due to the effects of a coronal hole but then activity is expected to be quiet for the rest of the week. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 12MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of about 29MHz. The optimum working frequency with a 90 per cent success rate will be around 22MHz. The best time to try this path will be between 1100 and 1500 hours. Sporadic-E is expected to take place most days. During the more intense openings double hop events could take place along with openings on 144MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Monday 30 May Gloucester Amateur Radio & Electronics Society is having a bank holiday get-together and operating session at Crickley Hill. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 30 May Lincoln Short-Wave Club is operating GB2CWF for Mills On The Air at Ellis Mill. For more information contact Pam Rose, G4STO, on 01427 788356.

On Monday 30 May South Birmingham Radio Society is closed. Contact Don, on 0121 458 1603.

On Tuesday 31 May Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 31 May Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 1 June Lincoln Short-Wave Club is putting G5FZ on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 1 June Midland Amateur Radio Society is on the air and holding training classes. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 1 June South Birmingham Radio Society is having a lecture in the main hall. Contact Don, on 0121 458 1603.

On Wednesday 1 June South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402550.

On Wednesday 1 June Telford & District Amateur Radio Society HQ is closed, there will be a net on 3.675 and 144.6 MHz plus a committee meeting /A. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 2 June Hucknall Rolls Royce Amateur Radio Club is holding a 10km fox hunt at 19.15 GMT from the club car park at Hucknall. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Thursday 2 June Salop Amateur Radio Society is having a talk by Ken, G8DIR on building a simple VHF and UHF antenna. Details on the club website at www.salop-ars.org.uk.

On Thursday 2 June South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603. On Friday 3 June Bromsgrove & District Amateur Radio Club is preparing for NFD and operating on VHF. Contact Chris, M0BQE on 01905 776 869.

On Friday 3 June Coventry Amateur Radio Society is having a talk by M0URX on the Ramsay Island DXpedition, MC0SHL. Contact John, G8SEQ, on 07958 777363.

On Friday 3 June Nunsfield House Amateur Radio Group is having a shack night. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 3 June South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 4 June Lincoln Short-Wave Club is in the Shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Sunday 5 June Lincoln Short-Wave Club is attending the Spalding rally. For more information contact Pam Rose, G4STO, on 01427 788356.

NEWS FOR THE NORTH OF ENGLAND On Monday 30 May Angel of the North Amateur Radio Club is closed. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 30 May Sheffield Amateur Radio Club is holding part 2 of its Foundation pre-course taster, having an informal social night and preparing for VHF NFD. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 30 May Thornton Cleveleys Amateur Radio Society is closed. Details on the web at www.tcars.org.uk.

On Tuesday 31 May Halifax & District Amateur Radio Society is finalising the display stand for Halifax Charity Gala. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 1 June Chorley and District Amateur Radio Society commences its Foundation and Intermediate courses. Places are still available if you act quickly. Contact Denise, M0NES, by email to nessie68@hotmail.com.

On Wednesday 1 June Denby Dale Radio Club is planning for GB2HS at Honley Show. Details from Richard, M0RBG, on 07976 220126.

On Wednesday 1 June Hornsea Amateur Radio Club is having a fox hunt and preparing for NFD. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 2 June South Manchester Radio and Computer Club is having a talk on a regenerative transceiver by Ged, G8RSI and Bill, G4NOL. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 3 June East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 4 June Hornsea Amateur Radio Club commences its weekend National Field Day event at Bewholme. Contact Gordon MacNaught, G3WOV, on 01377 240573.

NEWS FOR NORTHERN IRELAND On Thursday 2 June Bangor & District Amateur Radio Club is holding its annual BBQ at the Scout campsite, Crawfordsburn Country park. Contact Mike, GI4XSF, on 028 4277 2383.

On Monday 30 May GEARS is closed. For more information contact Peter, MI5JYK.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 21st-May, through Friday, 27th-May there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0T, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V8, VE, VK, VK0M, VP2V, VP5, VP6, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/R, ROTUMA. South Korean operators Choi/HL5FUA and Yoon/6K2GCW will be active as 3D2CJ from Rotuma (OC-060) between June 17-24th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. QSL via HL5FUA, direct or by the Bureau. For more details and updates, see: http://www.dxpedition.co.kr/rotuma_2011/index.html

4L, GEORGIA. Andi, UU0JM, will be active as 4L0A during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW.

5B, CYPRUS. Sergey, RN3QO, will be active as 5B/US7IDX during CQWW DX CW Contest (November 26-27th) as a Single-Op/All-Band/Low-Power entry. QSL via RN3QO.

9A16, CROATIA (Special Event). Pope Benedict XVI will be visiting the Republic of Croatia for the first time between June 4-5th. The city of Zagreb will be his host town during his stay in Croatia. The visit inspired the members of the "Croatian Flora Fauna Radio Club" to activate a special callsign, 9A16PB (16 means XVI, and PB means Pope Benedict). Croatian hams will activate 9A16PB between May 28th and June 13th. QSL via 9A2MF. ADDED NOTE: Members of the "Croatian Flora Fauna Radio Club" will also be active as 9A1GEO from the only one Croatian Geo Park ("Papuk", 9AFF-014) during Geoparks Communication Weekend (May 28-29th). Activity will be on all bands and modes. QSL via 9A2MF. For details, look at: http://qrz.com/db/9a1geo

CQ NEWS (CQ Hall of Fame Inductees Announced). The following press release was sent out by Rich Moseson, W2VU, Editor of CQ Communications, Inc., on May 20th: "CQ ANNOUNCES 2011 HALL OF FAME INDUCTEES -- CQ magazine today announced its 2011 Hall of Fame inductees, welcoming 12 new members into the CQ Amateur Radio Hall of Fame - ranging from a champion telegrapher to a Cardinal of the Roman Catholic Church - and one new member each into the CQ DX Hall of Fame and the CQ Contest Hall of Fame. This year marks the 25th anniversary of the CQ Contest Hall of Fame and the tenth anniversary of the CQ Amateur Radio Hall of Fame (The CQ DX Hall of Fame is the oldest of the three, honoring the world's top DXers since 1967).
The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2011 inductees (listed alphabetically) are:
* Bell, Dave, W6AQ - Hollywood TV/film producer; deeply involved in producing multiple amateur radio promotional videos over several decades.
* Brightman, Nate, K6OSC - the 'spark' behind W6RO, the ham station aboard the Queen Mary in Long Beach, California.
* Ensor, Loretta, W9UA (SK) - On-air instructor in Morse code and radio fundamentals between 1929 and 1941, responsible (with her brother) for helping to get at least 900 new amateurs licensed.
* Gunderson, Bob, W2JIO (SK) - Blind ham who was Editor and Publisher of 'The Braille Technical Press;' and the 'answer man' at Hudson Radio on New York's Radio Row, where he worked three days a week as a technical

advisor and consultant for the customers.
* Mahony, Cardinal Roger, W6QYI - Archbishop Emeritus of Los Angeles, advocate for immigration reform.
* Margolis, Sylvia (no call) (SK) - Prolific CQ humor writer in the 1960s and early '70s; first public relations officer for Radio Society of Great Britain.
* McElroy, Ted (no call) (SK) - World champion radiotelegrapher and key manufacturer.
* Moorefield, Ron, W8ILC - One of the guiding lights of the Dayton Hamvention® for at least the past 30 years; national ham radio coordinator for the cross-country 1984 Olympic Torch Relay.
* Raff, Malcolm, WA2UNP (SK) - Astrophysicist, aerospace engineer and biotechnologist; developed some of the earliest DNA sequencing techniques and contributed software to the human genome project.
* Schmieder, Robert, KK6EK - Noted DXer and DXpeditioner, physicist and ecologist.
* Stodola, E. King, W2AXO (SK) - The 'father' of EME (Earth-Moon-Earth) communications.
* Taflove, Allen, WA9JLV - Professor of Electrical Engineering and Computer Science at Northwestern University and a leading authority in the field of computational electrodynamics.

CQ Contest and DX Halls of Fame
The CQ Contest and DX Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also 'give back' to the hobby in outstanding ways.
The 2011 inductee to the CQ Contest Hall of Fame is:
* John Sluymer, VE3EJ - John has been an active contester and DXer since 1973. He is a founding member and current president of Contest Club Ontario, which has grown from 16 to 250 members in less than a decade. John also holds numerous Canadian domestic and DX contest records, is a frequent host for single- and multi-op contest operations from his station; a longtime member of the CQ WW Contest Committee, and a frequent speaker at hamfest forums and club meetings.

The 2011 inductee to the CQ DX Hall of Fame is:
* Michael J. McGirr, K9AJ - Mike is a leading DXpeditioner who has operated literally from the ends of the Earth over nearly 30 years. His many radio journeys have ranged from an Arctic expedition to Nunavut to Heard Island, off the coast of Antarctica, and a variety of places in between, including islands in the Indian Ocean, Caribbean and South Pacific. Mike is also a director of the Island Radio Expedition Foundation (IREF) and 2010 recipient of the W9DXCC Award of Excellence in DXing.

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled for the Dayton Hamvention.®"

DAYTON HAMVENTION SWODXA AWARDS. This year at the DX Dinner Banquet, the SouthWest Ohio DX Association (SWODXA) announced "two" DXpeditions as winners of the "DXpedition of the Year Award":

VP8ORK - Signy Island (South Orkney Islands)
ZL8X - Kermadec Island
Congratulations to both operations!

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following is approved for DXCC credit:
VU4PB • Andaman & Nicobar Island; 2011 Operation

E7, BOSNIA-HERZEGOVINA. Operators Chris/9A5K, Ranko/E70R, Vlado/E70T, Radomir/E74IW, Zoran/E76C, Robert/E77E and Braco/E77DX will be active as E7DX during the CQWW WPX CW Contest (May 28-29th) as a Multi-Single entry. QSL via E77E.

FP, ST. PIERRE AND MIQUELON. Operators Paul/K9OT and Peg/KB9LIE will be making their 8th annual trip to Miquelon Island (NA-032), July 21st-August 4th. They will sign FP/K9OT (prefer CW on 40/30m) and FP/KB9LIE (strictly SSB, mostly 17/20/40m unless higher bands are open). They will try to run a breakable 6M beacon on 50.120. Both will be in the IOTA Contest as a Multi-Ops/Mixed-Mode entry. QSL to their home callsigns, same address, either direct with return postage/IRC or via the Bureau. Logs will eventually be uploaded to LoTW. No eQSLs. Visit the following Web page at: http://www.hamradio.pnpfarms.com

FS, FRENCH ST. MARTIN. John, K9EL, will once again be active from French St. Martin (NA-105, DIFO FS-001, WLOTA 0383, Grid Loc. FK88) between June 7-19th. Activity will be holiday style (on a family vacation) and he will be operating as FS/K9EL whenever possible. He will be using an IC7000 and verticals for 80-10 meters, a 3 element yagi for 6 meters and will be on CW, SSB and possibly some RTTY. Please QSL to his home callsign, Bureau cards are "OK". LoTW update will be done upon his return. John states, "I may do some 6m operation from PJ7."

II9, ITALY. Latvian and Lithuanian operators will be active from IT9GSF's station using the special callsign II9T from Sicily (EU-025) during the CQWW WPX CW Contest (May 28-29th) as a Multi-2 entry. QSL via LoTW. Operators mentioned are Fabio/IT9GSF, Arunas/LY2IJ and YL4U (members of the Latvia Radio Amateur League). For more details, see: http://www.it9gsf.com

IOTA NEWS.....
AS-191. Operators Bert/DK6IR/7Z1IR and Hamdi/7Z1TT will activate Marzok Island (for the first time ever) in the Red Sea Coast Centre (Al Madinah/Makkah Province) Group between June 3-5th. QSL via DK6IR.

EU-052. Vanni, IK4RUX, will be active as SV8/IK4RUX from Zakynthos (Zante) Island (GIOTA INS-015, MIA MG-138, WLOTA 0209) between July 4-14th. Activity will be on the HF bands using SSB. QSL via IK4RUX, direct or by the ARI Bureau.

EU-052. Operators Andrea/IK0EFR, Savvas/SV2AEL, Tom/SV2CLJ, Gianni/SV2FPU, John/SV2HXV, Dimitri/SV2YC and Menios/SW2HXR will be active as J48O from the Kastri Lighthouse on the Othonoi

Islet between June 17-25th. Activity will be on 80-6 meters, focusing on the 6 meter peak season, and using CW, SSB and the Digital modes. QSL via SV2FPU.

NA-142. Swen "RICK", DF2MM will be active as W4/DF2MM from Santa Rosa (USI FL003S) between July 18th and August 25th. Activity will be holiday style with light portable equipment. He will also participate in the RSGB IOTA Contest (July 30-31st). QSL via DF2MM.

IOTA & WFF NORDKAPP EXPEDITION. By the time you read this, operators Bert/DL2RNS and Ric/DL2VFR will be finishing up their activation of IOTA EU-087 (Aln�n or Hems�n) as SD7V/3 and SM3/DL2RNS, before activating Mageroya Island (EU-044) as LA/DL2RNS and LA/DL2VFR between May 28-31st. Activity will be mostly on CW using high power. On their way back home, operators are planning to activate the Pallas-Yll�sttunturin National Park (OHFF-018) possibly for the first time for a couple of hours on May 31st, using the callsigns OH9/DL2RNS and OH9/DL2VFR. On June 1st, they also plan to stop on Seskar� Island (EU-139) for one day operating under the callsigns SM2/DL2RNS and SD7V/2 with high power again. QSL via the respective home callsigns and for SD7V via DL2VFR.

J2, DJIBOUTI. Operators Freddy/J28RO and Darko/J28AA will be active as J25DXA from Arta City (as sea front location) in western part of Djibouti during the CQWW WPX CW Contest (May 28-29th) as a Multi-Op/All-Band entry. Activity will be on 160-10 meters with antennas especially dedicated to the lower bands. Operators Marek/J28WR and Mohamed/J28AP will also be on the air from the same location and using the same callsign but SSB only and not in the contest. Vincent, J28JV, will be busy with his job, but will also operate both in the contest or with Marek and Mohamed during his spare time. The QSL Manager for J25DXA is Michel, F8DFP, by the Bureau or direct (please avoid green stamps; use only valid IRCs). A special card will be issued for this operation. For more details and updates, watch Freddy's Blog page at: http://j28ro.blogspot.com

J49, CRETE. Dick, SV0XBN, will be active as J49XF during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band entry. QSL via SV0XBN.

JW, SVALBARD. Roar, LA1EOA, will once again be active as JW1EOA from Longyearbyen, Spitsbergen Island (EU-026, WLOTA 0125), between June 10-15th. Activity will be on the HF bands using SSB. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (May 30th-June 5th)....

QSL 3A/I1RBJ via F/I1RBJ: GianCarlo Paul Bavassano, 24 rue Sainte Brigitte, 83440 Montauroux, France. Activity was on May 26th only from F1 Monaco Grand Prix paddock.

CY0 QSL STATUS. Randy, N0TG, reports, "Yes, CY0 QSLs are being sent out everyday. I am limited on time to process due to family medical care-provider responsibilities, but everyday progress is made. If anyone has a truly 'urgent' need, let me know via E-mail. LoTW later."

NOT THE QSL MANAGER. Bill, W9OL, reports that he still continues to receive QSL cards for Adrian, YO3APJ. He states, "I do not have logs for YO3APJ, nor authorization to confirm his QSOs. I've posted/informed many of the QSL Manager lists, but I still get QSLs for Adrian via the Bureau which I forward to him." Adrian, YO3APJ, assumed his own QSLing a few years back.

P40L NEW QSL MANAGER. Erik, K5WW, reports, "Now that P40L is active again I am getting QSL requests and E-mails for/about both old and fairly new QSOs. I haven't been P40L's QSL Manager in a number of years. Those QSL requests will be returned, and the E-mails will be replied to; but please note that the current QSL Manager is WA3FRP." PLEASE see details at: http://www.qrz.com/db/p40l

TJ9PF QSL STATUS. Maurice, F5NQL, reports, "The QSL cards for the latest TJ9PF activity in Kibri, Cameroon, - February 10-20th, 2011, by the Provins ARC F6KOP team are printed. QSL Manager, Didier, F5OGL, is expecting to get them this week, from the printer. We ask all of you who asked for direct QSL cards, to have a little patience. The labels are printed and the French stamps are purchased; they are ready to be put on the cards and envelopes. So, the first batch will be mailed very soon. It's useless to renew your cards requests, please don't. By the way, know that, as usually for all F6KOP's DXpeditions, the upload on LoTW, is scheduled when all the direct cards and the first Bureau batches have been answered, so allow us some months."

VP8ORK QSL UPDATE. Don, N1DG, reports that he mailing another 750 cards from VP8ORK OQRS. *** PLEASE NOTE: This portion/item was edited due to UseNet policies. To see the complete/unedited portion/item, go to: http://www.papays.com/opdx1012.html

QSL RECEIVED VIA LoTW: 5V7XO, 5W0IR, 7Q7AA, AH0/AB2RF, CX2TG, DL5DF, EX8AB, G0TYS, JA1BOQ, NP3IR, RA4HL, SM2EKM, TJ1AZ, SM2GCQ, UA6GR and VK6IR

QSLS RECEIVED VIA MAIL: 3D2A, 4A0IARU, 4O3A, 5H1HS, 5H0RS, 5K3W, 5M2TT, 5R8HL, 5X1NH, 9H4JX, 9L0W, 9N7AN, 9N7DX, 9N7JO, 9V1YC, A92GR, CE9/PA3EXX, CE9/VE3LYC, CO6CAC, CO6WR, CW3TD, CW5W, D2SG, DU1IST, E21EJC, EA6BH, EA6LP, EA9EU, EA9PY, EK7DX, ER3MM, FP5BZ, GJ4CBQ, GM4NFC, HC2AQ, HH4/AF4Z, HK6K, HS0ZCW, IS0HQJ, J5NAR, JT5DX, K6VVA/6, KC4QYG, KF6ZWD/HC2, KG4WV, LA6Q, NH0J, OA4TT, OY1CT, P29NI, PJ2/DL6LAU, PJ2/K6AM, PJ2MI, PJ2T, PJ7/K7GSJ, PJ7DX, R1ANH, RI1ANC, RI1FJ, S9DX, SV2ASP/A, SV5/IK2WZD, T30AQ, T32TV, TC3WFF, TJ3AY, TJ3FC, TT8DX, V31TP, V51KC, V55DLH, V73E, V85/9M6XRO, V85TL, VI9NI, VP8ORK, VR2UW, VU2PAI, VU4PB, VY0X, XR0ZA, XV2RZ, ZA3HA, ZD9AH, ZD9T and ZL8X

QSLS RECEIVED VIA THE BUREAU: 3B9WR, 4U1ITU, 7Y3HM, 9K47NLD, A03DMR, A45WD, C21YL, CR3L, DD5AJ, DF2UD, DF3EH, DG0HP, DH0EAV, DH5JG, DK3GI, DK4REX, DP1POL, DL0RO, DL1EST, DL3YEE, DL5YEE, EA8UP, EK6LP, EZ3A, FM5KC, J7DM, JA0JHA, K2XA, ON4UN, OZ5THY/P, TF3AO, UA6LFQ, UP2L, VK7RO and VY2TT

T7, SAN MARINO. Ivo, 9A3A/E73A, will activate the Amateurs Radio Republic of San Marino (A.R.R.S.M.) club station T70A during the CQWW WPX CW Contest (May 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via T70A, by the Bureau.

T8, PALAU. Operators Taka/JA0BJR, Toshi/JP1IOF and Toshi/JE1SYN will be active as T88ZA, T80T and T8YN, respectively, from Koror Island (OC-009) between June 24-27th. Activity will be on 80-6 meters using CW SSB, FM,

RTTY and PSK31. They will have two stations on the air. QSL via their
ome callsigns.

TC100, TURKEY (Special Event). Members of the TCSWAT will be on the air
as TC100HKK from the Hava Kuvvetleri Komutanligi/Air Force Command,
between June 1-6th. Activity is to celebrate the 100th anniversary of
the Turkish Air Force. Operations will be on the HF bands. PLEASE NOTE:
The first ten direct QSL cards (please read the info at <www.tcswat.org>
QSL info Web page carefully) will be answered with a special Turkish
Postal Stamp for the "First Day Cover".

TO8, MARTINIQUE. Valery, R5GA, will be active as TO8A from Martinique
(NA-107) during the CQWW WPX CW Contest (May 28-29th). QSL via R5GA.

UA2, KALININGRAD. Dmitri, UA2FB, will be active as UA2F during the CQWW
WPX CW Contest (May 28-29th) as a Single-Op/Single-Band (40m) entry.
QSL via DK4VW.

V3, BELIZE (Update). Mike, VE2XB, is now active as V31XB from Caye
Caulker Island (NA-073) for several weeks. Activity will be on all HF
bands as well as 6 meters using CW and SSB. Mike states that he will
be looking especially for JA stations to work this IOTA (as well
as everyone else). QSL via VE2XB (see QRZ.com - direct w/sase with CDN
stamps or 3 IRC/3 Greenbacks). ADDED NOTE: Mike will be heading to
J79-land in July for several weeks.

VP2M, MONTSERRAT. John, KB4CRT, will once again be active as VP2MRT from
Gingerbread Hill, St. Peters Parish, Montserrat (NA-103, WLOTA 1475,
WW Loc. FK86VS) between June 8-18th. Activity will be on 40-2 meters
using CW, SSB, possibly PSK, and the June VHF Contest. QSL via KB4CRT,
direct (w/SASE or DX 2GS). LoTW is "OK".

VP5, TURKS AND CAICOS ISLANDS. Dave, W5CW, is once again active as VP5/W5CW
from the VP5JM Hamlet on the Island of Providenciales (NA-002, WLOTA 1476)
until June 14th. Activity will be on 160-6 meters using CW and SSB. Dave
also plans to be in the CQWW WPX CW Contest (May 28-29th) and ARRL June
VHF QSO Party (June 11-12th) as VP5CW. QSL direct to his home callsign
(QRZ.com address) at: PO Box 88, Morris, OK 74445-0088 U.S.A.

VP9, BERMUDA. Doug, KF4VTT, will once again be active as VP9/KF4VTT from
VP9GE's QTH between June 10-17th. Since Doug will be there with his wife
and son, activity will be limited. Look for him on 160-6 meters using CW,
SSB, RTTY and possibly PSK31. As a personal goal, he hopes to finish DXCC
and VUCC from VP9. Any help with this endeavor would be appreciated.
Look for Doug to be active on 6 meters during the ARRL June VHF QSO
Party on June 11-13th. QSL via KF4VTT, by the Bureau, direct or LoTW.
For more details and updates, visit the Web page at:
http://home.mebtel.net/~kf4vtt/vp9/VP9.htm

ZA, ALBANIA. Franc, S59AA, will be active as ZA/S59AA during the CQWW
WPX CW Contest as a Single-Op/All-Band/Low-Power entry.

```

SARL NEWS - SUNDAY 29 MAY 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

CALLING YOUNG RADIO AMATEURS

RTA VENUE CHANGE

DOC DIRECTOR GENERAL APPOINTED

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

CALLING YOUNG RADIO AMATEURS

The SARL is planning various events to celebrate Youth Day on 16 June including a discussion with young radio amateurs still at school about how they became involved in amateur radio and how it has benefited them. The discussion will be by teleconference and be held on Tuesday 31 May 2011 at 19:30. To be considered to be included send an email with your details such as age and school attending as well as your landline number to artoday@sarl.org.za by tonight (Sunday). Youth in Amateur Radio will be transmitted on 16 June at 09:30 and will also be available for download.

The youth day sprint will follow from 10:00 - 12:00 CAT. Details of the competition can be found in the SARL Contest manual on www.sarl.org.za. There are some awesome prizes to be won including:

Two ARRL Antenna Books to be awarded to Radio Amateurs who host the most non-licensed youth in their shacks or special event stations. There are two categories: radio amateurs who are 18 years of age and younger and 19 years and older.

An ARRL Antenna book awarded to the Radio Amateur who sends in the best hi-resolution photograph of a leaner operating his or her station.

All logs submitted by radio amateurs 18 years and younger will go into the draw for one of the following: 3 Remote microphone kits, a Lightning Predictor kit, 5 SARL Student memberships and 3 Basic ARRL Antenna books.

Another exciting event planned is around SumbandilaSat. That will happen at just before 08:00.

More details will be available from www.sarl.org.za early next week. Get the youth involved on 16 June!

RTA VENUE CHANGE

The SARL Radio Technology in Action symposium will be held at a different lecture hall at the Nelson Mandela Metropolitan University than previously advertised. The new venue is in the Old Mutual Centre Lecture Room 003. The date is Saturday 4 June 2011 with registration starting at 08:15 and the conference at 09:00.

A map and driving instructions, as well as the full programme, are available on www.sarl.org.za, select RTA. Andrew Leitch, the Dean of Science, will open the event with a keynote address.

DOC DIRECTOR GENERAL APPOINTED

The Minister of Communications Roy Padayachie has appointed Maboko Rosey Sekese as Director General of the Department of Communications with effect from 1 June 2011 for a period of five years. Rosey Sekese obtained an Electrical Engineering Degree in Telecommunications from the University of Cape Town in 1994 and completed a Master's in Business Administration at the North-West University, Potchefstroom Business School. In 2007 she completed the Senior Executive Development Programme at Pretoria University.

Rosey Sekese has worked in the Department of Communications in the position of Deputy Director General ICT Infrastructure Development. One of her key highlights was the delivery of the FIFA 2010 WORLD CUP Information Communications Technology guarantees where she was the champion of the project, providing strategic leadership, and programme management.

She also has previous technical engineering background having worked for Denel as a Group Manager for Information Technology and as a Senior Engineer at Telkom.

REPORT ON SARL/ICASA LIAISON MEETING

The SARL and ICASA met last Thursday for their scheduled quarterly meeting. A number of issues were discussed. As far as corrections to the regulations are concerned, the committee and ICASA's legal department are still considering various aspects of SARL's complaints and expect to finalise the process in the next few weeks when

corrections will be gazetted.

On the question of ZS and ZR callsigns, ICASA confirmed that ZR licences are now full class A and have the same privileges as ZS licensees. There is no requirement to change the callsign. If however a ZR licensee wishes to change his or her callsign to a ZS, a fee of R127 will be charged, which is R100 for the change of callsign and R27 for the new license.

The SARL petition for an allocation of a 150 kHz segment in the 5 MHz band was discussed. ICASA will review the current occupation of the band and consider the publication of a request for input by the public in the Government Gazette.

The question of licences for Radio Amateurs visiting South Africa from SADC countries was discussed and ICASA agreed to expedite the request and make a proposal to CRASA (Communications Regulators' Association of Southern Africa) for early adoption.

ICASA will inform the CEPT organisation of the changes in the South African license structure so that the full CEPT licensing agreement can be implemented.

The Question of a longstanding interference complaint by a Cape Town Radio Amateur was also on the Agenda. ICASA's Engineering Division will hold an internal meeting with the regional structure to bring finality to the case.

The next meeting will be held towards the end of July 2011.

SARLNEWS NEED EDITOR

Here is your opportunity to get experience in writing and editing news bulletins. Talk to George Honiball, SARL News Editor in chief, on 012 664 4155 or send email to gth@absamail.co.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. New sunspot 1 223 continues to grow in the southern hemisphere. Another new sunspot is forming in the northern hemisphere as well. Up to now there was only a single day in 2011 without sunspots compared to 51 days in 2010 and 260 days in 2009. For the people doing their own frequency predictions, the expected effective sunspot number for the week is about 15.

15 m will provide the best opportunities for DX followed by 20 and 30 m and the WARC bands in between, of course.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS Today 29 May - young amateurs go to artoday@sarl.org.za and send your details if you wish to take part in the teleconference on Young amateurs. 31 May - Youth day teleconference at 19:30. 4 June -

RTA in Port Elizabeth at NMMU in Old Mutual Lecture Room 003. 16 June - transmission of Youth in Amateur Radio at 09:30 16 June - Youth Day Sprint from 10:00 till 12:00 CAT 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.
/EX

Radio News Bulletin
Sunday 29th May 2011

HF Newsreaders Sought

Additional HF newsreaders are being sought to share the workload of Se&#65533;n EI7CD and Ger EI4GXB, especially as the summer months are approaching. It is hoped that a panel of newsreaders can be established nationwide thus making the workload easier for all concerned, and allowing the HF news to be broadcast from different locations around the country.

If you are interested in joining the panel please contact Ger McNamara EI4GXB at ei4gxb /at/ gmail.com or on 087 2532512.

Echo Ireland

The deadline for material for the June edition of Echo Ireland is Friday next and members are invited to submit news items and articles for inclusion.

As we are coming in to the busy season for club activities, we hope to get reports from Club PROs on happenings both past and planned.

Pictures as jpegs are particularly welcome. Please keep text and pictures separate. All input to ei4bz at eircom dot net

---

Licence Examination

It is just over three weeks now to the closing date for applications to sit the next examination for an amateur station licence.

The next exam will be held on Thursday, 7 July, at 2.00 p.m. in the ComReg offices in Dublin. The closing date for receipt of applications to sit this exam is Wednesday 22 June. Full details including entry procedure and examination fee are available at www.irts.ie/exam or just click on the 'Licence Exam' button on the IRTS webpage.

Geopark and CASHOTA weekend.

This weekend is both the Geopark and CASHOTA weekend. The Copper Coast Geopark in Waterford will be activated by SEARG and the Marble Arch Caves Geopark in Fermanagh will be activated by Lough Erne Amateur Radio Club.

South Eastern Amateur Radio Group and the Lough Erne Amateur Radio Club will ensure that Ireland again has its say in the 2011 International Geopark Communication weekend, with special event stations QRV from both of Ireland's Geoparks.

Details on CASHOTA can be found at www.cashota-ireland.org

Cork Radio Club

The May meeting of Cork Radio Club will be held in the Community Centre in Carrigtwohill tomorrow Monday the 30th and will feature a presentation and live demonstration of D-Star by Don Kelly EI8DJ.

The meeting will also hear a report on the successful trip to Brow Head for International Marconi Day and will finalize arrangements for the CW Field Day next weekend. Visitors are very welcome and further information can be had from Jeremy EI5GM on 083-3317710.

South Dublin Radio Club

This Tuesday 31st of May South Dublin Radio Club will be dusting off the soldering irons and building kits that create a flashing badge.

The activity is open to all including those who never soldered before and visitors to the club. The kit includes a custom made printed circuit board, a flashing light emitting diode, a battery holder and a battery. Simply turn up and bring 2 euro.

In exchange you will be taught how to solder and get to bring home a flashing badge to impress the family.

The aim is to turn "black box operators" into "burnt finger operators" and hopefully more complex projects will be attempted into the future.

Directions to the club are on the website:
http://www.southdublinradioclub.ie

This bulletin has been produced by Charlie EI8JB who is standing in for the News Editor Aidan EI7JC who is away on Vacation.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXNL 1730 - Jun 1, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

CN - MOROCCO
Richard,F8FGU, is spending his holidays in the Atlas mountain range
and wants to become active as CN2RN in CW and SSB on the HF bands
between May 31 and Jun 20.
Please send your QSLs via his homecall, via bureau preferred.

E7 - BOSNIA AND HERCEGOVINA
A team of eight Austrian HAMs of the "Austrian Military Radio Society"
(http://www.amrs.at) will show up as E711AMRS from Jun 3-5. They want
to work with three stations in SSB, digital modes and some CW.
QSL cards via bureau or direct to OE4RGC.

FS - ST MARTIN, NA-105
John,FS/K9EL, will be QRV from Saint Martin (NA-105, DIFO FS-001,
WLOTA 0383) from Jun 7-19. He works in CW, SSB and some RTTY on 80m-6m.
His equipment includes an IC-7000, verticals for HF and a 3ele yagi
for 6m. QSL via bureau or direct to his homecall or via LoTW.

HB0 - LIECHTENSTEIN
Tony,HB0/IZ3ESV, Gabriele,HB0/I2VGW, and Andrea,HB0/IZ2LSC, plan to be
active in CW/SSB/RTTY from Jun 2-5. Operation will take place mainly
on the WARC and high bands, including 6m. QSLs via their homecalls.

PJ4 - BONAIRE, SA-006
Ed,W0SD, Edith,W0OE, and Peter,PJ4NX, want to activate Bonaire (SA-006)
as PJ4E from Jun 4-19. They will work on all HF bands but emphasis will
be put on RTTY and 6m (preferred QRG: 50103 kHz).
Your QSL cards should be sent via W0SD (bureau, direct, LoTW).

VK9C - COCOS-KEELING ISLANDS, OC-003
Wally,VK6YS, will be active from Cocos-Keeling (OC-003) signing VK9CI
from Jun 1-7. Since he is spending his holidays mainly with his wife
Gaye, he wants to work on 40m-10m mainly during his evening and morning

hours. He will focus especially on PSK31, RTTY and Olivia.
QSL via VK6YS.

VP5 - TURKS & CAICOS ISLANDS, NA-002
Dave,VP5/W5CW, is active from Providenciales (NA-002) working in CW and SSB on 160m-6m until Jun 14. He also plans to join the upcoming ARRL VHF QSO Party (Jun 11/12) as VP5CW. QSLs direct via his homecall.

XE - MEXICO
Gerhard,DM3DL, has a new job in Mexico and will stay there for the next three years. Finally, he got the permission to work as XE1/DM3DL in Central Mexico since the mid of May. His location is (almost) optimal since he lives on a mountain at a height of 2125m with a free view all around. Unfortunately, only towards EU there is a small but "significant" mountain in his way. He is using a Kenwood TS-2000X with 100 watts with two Kelemen dipoles (40m/20m/15m/10m and WARC bands). Gerhard also plans to become active on 160m/80m later.
Sked requests may be sent via e-mail to dm3dl@darc.de
Please send your QSLs via bureau, direct, LOTW or eQSL to DM3DL.

9J2 - ZAMBIA
As mentioned before Chris,ZS6EZ, is changing his QTH between Zambia and South Africa every six weeks. Right now he is staying in South Africa until Jun 13 and has uploaded his first logs to the LoTW already.
He will be QRV again as 9J2RI after Jun 13.

CROATIA, SPECIAL EVENT STATION
Pope Benedict XVI. is going to visit Croatia on Jun 4/5. Some members of the "Radio Club Croatian Flora Fauna" are activating the special callsign 9A16PB in all modes on all bands between May 28 and Jun 13. QSL cards should be sent via 9A2MF.

FRANCE, SPECIAL EVENT STATIONS
The special event station TM6JUN remembers the "D-Day" which has it's 67th anniversary this year. The station is working from Utah Beach in CW, SSB, RTTY and PSK on 160m-6m from Jun 1-15. QSL via F5SAZ.

"Le jour le plus long" means "The Longest Day" and is the title of a movie, shot 50 years ago at Rivedoux-Plage on Re Island (EU-032). It is a movie about the D-Day and has won two Oscars. The special event station TM50JPL is working from the filming location of this movie on Jun 5/6. QSL via REF bureau or direct to F8FZC.

SPAIN, SPECIAL EVENT STATION
Spain is remembering the D-Day as well by activating the special event station EG1DN on Jun 4/5. QSL via EB1CAM, via bureau peferred.
More information about this activity can be found on QRZ.com at EG1DN.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the

VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 2: QRP-Minimal-Art Session

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
AS-081, HL, Kyongsang-bukto/Kyongsang-namdo Province: A South Korean group will be QRV as 6M0W/5 from Kadok from Jun 4-7. QSL via HL5BMX.

AS-191, HZ: Big pile-ups are guaranteed with the first activation of the IOTA group AS-191 by 7Z1IR and 7Z1TT from Jun 3-5. They want to become active from Marzok. This island is not listed in IOTA directory yet and had to be verified with additional maps. QSL via DK6IR (bureau/direct).

EU-008, GM, Inner Hebrides: Several OPs will be QRV as MS0RSD from Skye from Jun 5-10. QSL via M0URX (bureau/direct).

EU-038, PA, Noord Holland/Friesland/Groningen Province: PA/DL1KD will stay on Texel from Jun 6-20. QSLs via bureau, direct or LoTW.

EU-139, SM, Norrbotten County group: On their way back from the North Cape SD7V/2 and SM2/DL2RNS plan to stop on Seskaroe and want to show up on the air for a few hours on Jun 1/2.
QSLs for SD7V via DL2VFR (bureau/direct) or via homecall.

NA-091, VE, BC Province South group: K6VVA und W6NV will be QRV from Quadra signing K6VVA/VE7 mainly in CW on 40m-15m from Jun 2-5. QSL via N6AWD.

QSLs from Abu Ail and Penguin Island valid for IOTA:

After a rule change you can now submit QSLs of the "deleted countries" Abu Ail (former AS-035) and Penguin Island (former AF-055) for credit of the actual groups AS-009 and AF-070. Please enclose your QSLs with the next IOTA update.

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
23 - 29 May 2011

Solar activity was at very low to moderate levels during the period.
The period began with very low activity, with a few isolated B-class
flares observed. A long-duration B2 flare was observed at 24/2237
UTC from Region 1220 (N13, L=248, class/area Bxo/050 on 23 May).
Activity increased to low levels on 25 May, with two C-class flares
from Region 1223 (S16, L=115, class/area Dso/050 on 27 May). The
first was a C1 flare at 25/2103 UTC, followed by a C1/Sf at 25/2158
UTC. A nine-degree filament eruption was observed between
25/0801-1256 UTC. Activity decreased to very low on 26 May, with
three B-class flares, included a B4/Sf at 26/0110 UTC. Activity
increased to low levels on 27 May, with five C-class flares,
including a C5 flare at 27/1643 UTC from Region 1226 (S21, L=036,
class/area Eki/360 on 29 May). Activity increased to moderate levels
during 28-29 May. A long-duration M1 /Sf was observed at 28/2150 UTC
from Region 1226, as well as an M1/1F observed at 29/1033 UTC. Type
II radio emission (554 km/s shock velocity) was associated with this
event.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during 23 - 28 May. High levels were
reached on 29 May.

Geomagnetic field activity was predominantly quiet during 23 - 26
May. Activity increased to quiet to unsettled levels, with active
periods at high latitudes, on 27 May. Activity increased to quiet to
severe levels during 28-29 May. A co-rotating interaction region, in
advance of a coronal hole high-speed stream (CH HSS), occurred
during 27- 29 May. A CME was was observed to interact with the field
during 28-29 May.

Forecast of Solar and Geomagnetic Activity
01 June - 27 June 2011
```

Solar activity is expected to be low with a chance for M-class flares through 9 June. Activity is expected to decrease to very low to low levels during 10 - 14 June. Activity is expected to increase to low with a chance for M-class flares.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels through 5 June. Normal levels are expected during 9 - 27 June.

Geomagnetic field activity is expected to be at quiet to unsettled levels, with active levels at high latitudes during 1 - 5 June, due to an expected CME and a recurrent CH HSS. Activity is expected to decrease to predominantly quiet levels during 6 - 10 June. Activity is expected to increase to quiet to unsettled levels, with isolated active levels at high latitudes during 11-13 June, due to an expected CH HSS. Quiet to unsettled levels are expected during 14-22 June. Quiet to unsettled levels, with isolated active levels are expected during 23 - 25 June due to a recurrent CH HSS. Actitvity is expected to decrease to mostly quiet during 26 - 27 June.

538. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2011-06-01 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1306908001@panix.com>
Source record: 4528
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Hallo dear MMMonVHF friends,

please find below our lastet NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2011-06-01
We attempt to distribute our Newsletter, once a week (thursday)
from now on - if any special activities will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further detail please be so kind and watch our "News"-page
http://www.mmmonvhf.de/latest.php - you vy welcome for any
input and we do hope you will enjoy the VHF-DX-Portal MMMonVHF!

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** MS-Propagations June, 2011, MMMonVHF Overview **

June is known for the return of three remarkable daytime showers.
Major showers Arietids and Zeta-Perseids, peaking respectively on
June 7th and June 9th in 2011, are both characterized by a broad
maximum (with possible submaxima) and high ZHR value, thus making
first half of June one of the best periods of the year for MS-Dxing.
Even Beta-Taurids, peaking June 28, is characterized by fairly good
ZHR. Have a look to shower predictions for June 2011, featuring also
a short overview of 2011 Eta-Aquariids at our MMMonVHF MS
Propagationpage: http://www.mmmonvhf.de/ms.php

** Antenna System to sell out **

Frank, DL8YHR, is selling a complete 2m EME-antenna setup (2x 28xp
Yagies) incl. 2x HF400 Relais, H-Frame with all cables and 2x power
splitter, GFK tubes for 999 Euro - the system still "on air" and can
be see and tested on request (mail DL8YHRFRANK"at"AOL"dot"COM) - a
foto can be seen at http://www.dl8yhr.de (left, above)
SOURCE: tnx to Frank, DL8YHR direct to MMMonVHF

** UT5EU VHF memorial 2011 on 50 and up - 4th/5th June 2011 **

Founders: Dnipropetrovsk Oblast League amateurs of Ukraine,
Dnepropetrovsk OSOU Competitions are held the first full "Weekend"

(full Saturday and Sunday), June 17:00 UTC Saturday to 05:00 UTC Sunday
(in 2011 - 4-5 June). To participate in the competition are invited
amateurs from Ukraine and other countries and territories worldwide.
The competition involved teams (the team - 2 or 3 operators) and
operators of individual stations. Competitions are held in the
categories of Single OP (SO) - one operator, Multi OP (MO) - many
operators a call and Club stations (CO) club station, a radar, and 3 of
call in a credit. For the category of Single OP to allow only one
signal at a time. For the category of Multi OP and Club stations - one
signal for each band at each time. For Category Club stations - credit
is given for the amount of bonds for a maximum of three call signs,
operating from one location. SOURCE: UV5EOZ direct to MMMonVHF

C37MS qrv from JN02UM on 144 MHz MS / ES / Tropo
I am happy to announce my next DX-pedition.
With the help of very good friends from Italy and Spain I did receive
the licence for this year to operate from Andorra, with the callsign:
C37MS. Operation will take place between June 3 and 7, 2011 from a QTH
in the mountains, loc: JN02UM at 2510 m. asl. This is the first
Meteor Scatter operation since 1997. I will be QRV mainly via MS, but
this period is also good for Sporadic E. No EME this time because this
was done before (C31TLT in 2001 and C37DXU in 2009).
Rig: FT847 with FT857 spare
Ant: 10el. DJ9BV and 2 x 5el. DK7ZB
PA: 3CX800 and HLV600 spare
QRG FSK: 144.358 first per.
QRG SSB: 144.318 when we have a Sporadic E opening MS is stopped.
I will use two receivers with separate antennaï¿½s to monitor ES
activity and calling stations from different directions. This will be
an operation from my car with generator power. Andorra has mountains
all around so it is difficult for VHF work but I hope to work as much
stations as possible; C3 is number 6 on the most wanted DXCCï¿½s list.
SOURCE: tnx to Chris, PA2CHR, direct to MMMonVHF

Frank, DH7FB, will be on a /mm Operation with a sailing ship from
Athina to Korfu (around the Pellepones area) - here a rough timetable:
19.06.11 KM17 - 20.06.11 KM16 - 21.06.11 KM16 - 22.06.11 KM16
23.06.11 KM16 - 24.06.11 KM16 - 25.06.11 KM16 - 26.06.11 KM06
27.06.11 KM07 - 28.06.11 KM08 - 29.06.11 KM08 - 30.06.11 KM09
Call will be DH7FB/mm and Frank will try to be as often as possible
(NOT day by day due to the sailing trip) and if he will be qrv only
after 18 Z and if the ship is not anchoring south of an island. He
will try to be qrv on 144 MHz MS (qrg: 144,370 MHz cq for QSY
144,355 MHz, DH7FB/mm first, FSK441) and as well for some EME Tests.
Equipment will be 200W, 8 ele DK7ZB with 12 dbd (4,4m). pse look into
the dxc... :) SOURCE: tnx to Frank, DH7FB, direct to MMMonVHF

** S92DX in JI39gx DXpedition - October 21-27 **

Matt K0KKO has announced his upcoming DXpedition to Ilhï¿½u das Rolas
in Sao Tome & Principe: http://www.k0kko.net/pb/wp_5bd6e10c/wp_5bd6e10c.html
Note that the first days of the trip are the best cndx of the month
for 6m EME! The 6m EME station at S92DX will be an IC756 pro, ACOM
1000 and M2 6M8GJ yagi. This should result in a number of 6m EME
contacts ;-) - SOURCE: tnx to Lance, W7GJ, via [Magic Band EME]

** K7BV CN-CM-DM Grid Trip / (CM93 Preliminary Announcement) **

LATEST Update from Dennis, K7BV, dated 2011-05-29: Below is the Grid
Trip schedule I have come up with after changing my departure one day
later. In a few weeks, I will do a short grid trip to catch DM03/04/05
for those needing them. K7MAC is planning to do some of the grids I
removed from my original plan a little later this summer. I will be
playing the CN77/78 portion of this with some flexibility built in so
I can get those most out of whatever Es I luck into during those two
days.. Send comments and suggestions today direct to k7bv"at"aol.com
please. I hope I can run the amplifier from most stops. May The Rocks
& Es Be With Us! 73 / SOURCE: Dennis K7BV via WSJT-Reflector
Grid and Trip Details: http://www.mmmonvhf.de/latest.php?id=3818

** Trip to DM57 / DM56 **

I will be operating from DM57 for the weekend of Jun 3 - 5. I expect
to be set up and on the air by late in the afternoon on Friday and
will tear down to return home after M/S stops on Sunday AM (unless we
get significant Es - then I'll stay as late as I can). I may stop
briefly in DM56 on the way home - timing will depend on how the band
was in DM57. If the band is good in DM56, I will stay there as late
as I can. I will be following the same procedure as NJ0W on his web
page (see http://www.6t6kix.com/pages/ham/nj0w.htm) except I will be
QSYing up to 50.270 (if this is a bad frequency, please let me know).
I'm not sure about Friday evening, but I expect to be on the air
Saturday and Sunday starting about 1200Z. I will only have 100 W and
a 3 el yagi at about 25'. Es openings will take precedence over M/S.
I will not have Internet access and I don't expect to have cell
service. If you have a request for a specific time or frequency,
please send me an email and I'll see what I can do. Please keep me
busy! 73 Bud - SOURCE: Bud, N7CW via [wsjtgroup]

** LATEST NEWS from FP/K9OT and FP/KB9LIE **

Operators Paul/K9OT and Peg/KB9LIE will be making their 8th annual
trip to Miquelon Island (NA-032), July 21st- August 4th. They will
sign FP/K9OT (prefer CW on 40/30m) and FP/KB9LIE (strictly SSB,
mostly 17/20/40m unless higher bands are open). They will try to run
a breakable 6M beacon on 50.120. Both will be in the IOTA Contest
as a Multi-Ops/Mixed-Mode entry. QSL to their home callsigns, same
address, either direct with return postage/IRC or via the Bureau.
Logs will eventually be uploaded to LoTW. No eQSLs. Visit the
following Web page at: http://www.hamradio.pnpfarms.com
SOURCE: [DX-ENG] Ohio/Penn DX Bulletin #1012

** special station TM6JUN **

Commemorating the 67th anniversary of D-Day special station TM6JUN
will be active once again from Utah Beach on 1-15 June. Look for
activity on 160-6 metres CW, SSB, RTTY and PSK. QSL via F5SAZ.
SOURCE: [TNX F8REF] via [425ENG] 425 DX News #1047

** Ch'uja Islands (AS-084) qrv HF and 50 MHz **

The Korea Contest Club will be active as D9K from the Ch'uja Islands
(AS-084) on 4-6 June. Plans are to perate CW, SSB and RTTY on all
the HF bands and 6 metres. QSL via operator's instructions.

WIANEWS WEEK COMMENCING June 05 2011.

George Taylor Medal, presented to Jim Linton VK3PC

RD Contest change of time.

Lawrence Hargrave Awards

WIA President speaks of Darwin AGM

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 5 2011.

In the Victorian (VK3) town of Rosanna, Steve Warrillow has just had a great
article featuring Amateur Radio and himself in the local paper.

http://heidelberg-leader.whereilive.com.au/news/story/is-anybody-out-therer/

VK3SN Mr Warrillow has battled the wilderness, bleak weather conditions and
technical obstacles for his hobby, just recently, Mr Warrillow and his brother,
Gerard, headed to a secret spot in the Victorian alps to contest the
Wireless Institute of Australia's John Moyle Field Day tournament - the holy
grail for thousands of ham radio operators.

Mr Warrillow doesn't want to give the location away, but admits it was above 1700m.

"We sat though rain, mist and sunshine," he said. "We had our camp set up with the radio, antennas and the solar panels, because you can't take generators into a national park.

Bragging rights aside, these amateur radio operators would be the lifeline for survivors of a disaster the Heidelberg Leader Newspaper said. "You'd need people with the skills to set up independent communication without using satellites, the internet, and phones."

This story was also picked up by an ABC station in Melbourne and an interview conducted by Richard Stubbs was made.

HAMS ACROSS AUSTRALIA, VK1 2 4 7 AND 5.

CANBERRA VK1

All visitors are welcome to attend this public ceremony at The Australian War Memorial.

Bomber Command wreathlaying ceremony this Sunday June 5 at 11 am, Bomber Command Memorial, Sculpture Garden.

This annual wreathlaying ceremony commemorates the service and sacrifice those who served in Bomber Command

(awm)

Next Wednesday, the 8th June, Rakesh Panwar from the Ionospheric Prediction Service will be in Canberra to give presentations on Solar Weather and a HF Propagation training course.

Rakesh has kindly agreed to give a presentation that evening to interested Hams on pretty much anything to do with the IPS.

The crarc clubrooms will be open from 7:30pm with the presentation starting at 8pm.

Carl VK1KCM would appreciate it if you could send an email to his private email address, carl@stagecraft.cx, if you plan to attend.

Next weekend on the VK2 mid north coast will be the annual Oxley Region Field Day at Port Macquarie. The Oxley Region A R C is celebrating their 40th birthday and invites you to attend on Saturday and Sunday at the Tacking Point Surf Club hall in Mathew Flinders Drive, Lighthouse Beach.

There will be a dinner at the Tacking Point Golf Club Saturday night. There will be fox hunts both days and the traders on Sunday. For a field day program go to www.orarc.org

VK4DLE Ernie Portman April 19 2011 advised by Gordon VK4VP

Silent Key

Sadly we must advise of the passing of an Amateur and member of SCARC.
Ernie Portman VK4DLE passed away on the 19th of April.

He nearly always checked in after the news on a Sunday morning and while not a member who was in the headlines he was always in the background listening to what was going on.

Vale Ernie VK4DLE.

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

The two things that most clubs find over time that are the hardest to maintain are the recruitment of new members and the keeping of current members. When membership renewal time comes around, there is probably an unconscious cringe amongst the management committee and a sucking in of breath waiting to see how the numbers stack up.

When it does happen that there is a number of non-renewals, what does the club know as to why? It is no use just speculating or justifying past action or inaction with self serving excuses. It is no use to the other club members if people stand around wringing their hands and wailing.

There can be as many reasons as there are people involved. So what can we do?

Perhaps what is needed is some one from the membership who can personally contact the non renewed members. They can be given the brief to greet these people and explain that the club is sorry that they have not renewed their subscription. If they indicate they do not intend to rejoin, then ask if they can frankly say what their reasons are. This will help the club and its current members be more responsive to member needs. In marketing, it is stressed that people are receptive and responsive to the use of their name. For this reason, please, oh please, do not resort to impersonal, anonymous form letters or emails.

When we are losing a friend from the circle, the best response is to enquire why and do so directly and personally.

I'm Geoff Emery and that's what I think.....how about you?

International Rally of Qld

Various members of SCARC and other amateurs once again helped out at the International Rally of QLD held at Imbil over the weekend of 14th and 15th of May. This event features the fastest drivers from Australia and the Asia Pacific region.

The SCARC big yellow comms van was at the Derrier Road spectators area where the action was coming thick and fast. If it wasn't a little MK 1 Escort being chased by Big Thommo in the Ford Falcon XY GT it was a Mitsubishi Evo X chopping down trees.

SCARC provided a point where the scores were displayed as soon as they were recorded meaning there was virtually no faster way to see what was happening in the field. It proved a great resource for Jamie the commentator at the spectator area as he was able to track the cars throughout the rally as each one finished a stage.

There were a few equipment failures early on but these were quickly sorted with the help of the team of packet experts on hand. You can't have too many TNC's and radios and this proved very true.

One of the highlights of the weekend was the Saturday night dinner at the Borumba Deer Park that has become a staple of the Rally event, and this year it proved as good as ever. 3 courses cooked in camp ovens and plenty of good cheer and laughter to wash it down.

Sunday saw more competition with the cars running in the reverse direction through the spectators area and provided plenty of photo opportunities.

This was my first year at the rally and I am sure I will be back next year.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'Day again from Far North Queensland, where the wet season is finally drawing to a close and the cooler days are starting, this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

As you are listening to this news broadcast TREC members are, once again, out in the field playing radio and providing communications and check point manning for the Far North Endurance Riders. The weather is great and the horses and riders are enjoying the cooler conditions.

TREC has a meeting planned for Saturday the 25th of June at our clubrooms.

Stu VK4SDD the TREC president has just returned from a few weeks in Hawaii where as well as doing the touristy thing he also managed to work back into VK4 working a couple of fellow TREC members on 10 metres.

TREC members Gary VK4FD and Jeff VK4BOF spent a week at the Undara Volcanic National Park activating the park for the World Flora and Fauna 44. WFF44 is an International award program with stations setting up and transmitting from national parks worldwide in support of the environment.

Well that's your lot for this week.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to the WIA news. Travel Well!

VK5

Hello.

This is Charles on behalf of the south east radio group.

You may not be aware that the buy and sell part of the serg convention is only for one day this year , but the fox hunting will, as usual, be for two days.

We are having the convention at the Margaret street scout hall. The hall is located just behind the mount gamier police station. The hall opens Sunday the 12th of June at 10am. And doors will close at 2pm. So you only have 4 hours to grab a bargain.

Ross from strictly ham will be there as well as lots of second hand goodies. Bring over you home brew and enter it into our home brew contest. It even has a section for foundation licences.

The Australian fox hunting championships will start on the Saturday at 11am at the lakes and do we have a great one for you this year. The fox hunting will go over two days and we promise this year will be one to remember.

Check out the serg web site for more details.

So if you're doing nothing on the June long weekend why not come to mount Gambier and do some fox hunting?

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Congratulations go out to Paul VK4PRO of Alice River who recently successfully completed all elements of the Standard Licence Assessment via the WIA Exam Service in Townsville and has just been issued his brand new callsign by theACMA Look out for Paul on the HF bands real soon now, once he gets some projects completed for the Board of Control.

The SARL is planning various events to celebrate South African Youth Day 16 June including a discussion with young radio amateurs still at school about how they became involved in amateur radio and how it has benefited them.

Youth in Amateur Radio will be transmitted on 16 June at 09:30 and will also be available for download.

==========

NEWS FROM ARNEWSLINE USA

HAM RADIO RESPONDS TO JOPLIN TORNADO

Ham radio operators are a part of severe weather spotting as well as being involved in relief efforts as tornadoes continue to ravage the South. We have the latest in this report:

Actually, four days after the severe weather struck, very little is known about the role being played by radio amateurs in the South, especially in and around Joplin, Missouri. That's because they are far too busy saving lives and reporting damage to stop to make reports to the press.

We do know come from published news reports that quote Ron Kittleman, K0ADI. He says that hams have been stationed at the Springfield Missouri office of the National Weather Service. Also, that amateurs from ARES have been providing communication between hospitals and assessment teams following the tornado that hit Joplin at approximately 6 pm local time on Sunday, May 22nd.

According to Kittleman, the storm knocked out cell phone and landline communications across the area. Radio operators from ARES started relaying medical information between the Freeman Hospital and the St John's and Cox Health medical facilities in Springfield shortly after the storm hit.

Another report says that a Kansas and Western Missouri SATERN Teams from the Salvation Army has been activated for the Joplin tornado response. As we go to air, SATERN team members are reportedly assisting with communications in

the affected area. Also, a Salvation Army
emergency disaster services team based out
Pittsburg, Kansas has been deployed to
Joplin. Its job is to help carry out mass
feeding for residents and first responders
through a mobile feeding kitchen capable of serving thousands of meals a day.

As we go to air, the situation across the storm
ravaged region remains a fluid one with events
changing by the minute. We should know more in the coming days.

>From the Newsroom in Los Angeles, I'm Bill
Pasternak, WA6ITF, reporting for the Amateur Radio network

More on this ham radio emergency response to this
springs wicked weather in future Amateur Radio
Newsline reports.

HAMVENTION 2011: IT WAS THE SHOW TO BE AT

Dayton Hamvention 2011 is in the books and for
some, the highlights included an "out of this
world" experience in the visit of a NASA
astronaut and a surprise guest appearance by one
of the government's top communications
regulators. Amateur Radio Newsline's Mark Abramowicz, NT3V has the report.

--

"My call sign here on Earth is KF5BOC. But I've
never used it. I call that my gravity call sign.
But, my real call sign is NA1SS from the space
station and I sort of got this emotional attachment to that now."

And, that's what NASA Astronaut Doug Wheelock had
to say during Saturday's Youth Forum at the
Dayton Hamvention, one of several events he
attended during the weekend celebration of Global
Friendship, the theme of this year's gathering.

Wheelock was invited to Hamvention to be part of
the American Radio Relay League's Expo.

But he spent a lot of time mingling and
circulating throughout various areas of the
Hamvention grounds and freely signed autographs
and chatted with folks and packed a Saturday
afternoon forum where he talked about life aboard
the International Space Station.

Wheelock says his time aboard the space station was anything but routine.

It was last July 31, only hours after a
pre-arranged contact with K2BSA at the Boy Scouts

of America Jamboree in Virginia that things got challenging.

"I had just shut down the tread mill and about 10
minutes later the alarms went off," Wheelock
recalls. "I looked and I kept silencing the
alarms, silencing the alarm. I picked up the mic
and said 'Houston are you there?'

"And, they weren't answering and so then I looked
and all my crewmates were there and they said:
'What did you do?' I said: 'I just turned off the tread mill, I promise you.'

"Anyway, we had a pump module that failed, we
ended up having to go outside and do three space walks."

And, Wheelock says, it was great to know there
were people - other than his crewmates and NASA
engineers - who he could talk to and decompress
as they battled to fix the problem...

"As we came back in from those spacewalks. I got
on the ham radio and we talked about it and
everything," Wheelock says. "Using that radio and
having you guys as an emergency contact for us
around the globe was a warm, warm feeling for me
as a commander aboard that space station."

And, Wheelock says, he looked at ham radio aboard
the ISS as a critical back-up, should all else fail...

"I thought, you know, I have these emergency
contacts on every continent on that planet down
there," Wheelock recalls. "And, I thought if my
communication goes out with Mission Control, I am
not hesitating one bit to call some of my friends
and say: 'Hey, Chris, can you give Mission
Control a jingle and tell 'em that we're okay.' "

And, Wheelock says, becoming a ham has been a life-changing experience....

"The friends that I made in the amateur radio
business and community, I now feel like a just an
entrenched member of this community and it really
truly has changed my life for the better," Wheelock says.

Finally, Wheelock recalls "crossing the line."
He thought it was harmless when he did it. But
his NASA ham radio instructor informed him after
he did it that...well, let's have him tell the
story of wishing a frequent friend over Europe by
the name of Fabiano a happy birthday...

"I felt like I was kind of slapped on the wrist
by NASA and then I thought, and then I felt

flattered that my singing of Happy Birthday was
actually considered music," he says.

Wheelock truly was a hit, stopping to take
pictures with nearly everyone who asked and
signing program books and NASA photos.

He'll also be appearing in an upcoming video the ARRL is producing.

Now, what else happened at Dayton?

Well, imagine you're Hamvention chairman Michael
Kalter W8CI, and you get word Federal
Communications Commission Chairman Julius
Genachowski is "in the house" and wants an audience.

No fooling!

Genachowski had a flight diverted to Dayton
Friday night because of the storms in the Midwest
and was told it might be a problem finding a
hotel room because of the Hamvention.

Well, Genachowski found a room and decided to
check out ham radio for himself and this big
gathering of hams from around the world.

As Kalter and others from the Dayton Hamvention
committee tell it, Genachowski spent about two
hours at the gathering. He circulated among many,
including those in the main arena where he
chatted with folks about the advanced technology in use in amateur radio today.

The Dayton Hamvention committee estimated
attendance of at least 20-thousand and say they
got positive feedback from both the inside
vendors and those in the flea market.

One little glitch made this year's Hamvention a bit memorable.

Early in the afternoon, Hara Arena personnel
began closing off all the restrooms with yellow
caution tape and directing people to porta-potties outside.

Most didn't learn until later that major sewer
line broke, sending its contents into an area of the flea market.

Well, the affected flea market spots were moved,
the leak was temporarily fixed, and people came
back Sunday for the final day of events.

I'll be back next week with more on Hamvention
2011, including a special interview with a YL who
has been a big part of activities in Dayton for
24 years. Next year, she's looking forward to 25

and she'll clue us in on what she has in store.

For the Amateur Radio Newsline, from Dayton, I'm Mark Abramowicz, NT3V.

COUNCIL OF EUROPE ADVISORY COMMITTEE RECOMMENDS RF FREE ZONES

The Council of Europe's Parliamentary Assembly Committee on the Environment released a report titled The Potential Dangers of Electromagnetic Fields and Their Effect on the Environment. The paper, made public on May 6th carries recommendations that, if adopted, could have major implications for wireless carriers and, to a lesser extent, broadcasters and any RF emitter in the European Union.

In regard to standards or threshold values for emissions of electromagnetic fields of all types and frequencies, the Assembly that prepared the report recommends that the "as low as reasonably achievable" principle be applied. This, covering both the so-called thermal effects as well as the biological effects of electromagnetic emissions or radiation.

The report also is among the first to give credibility to a phenomena that most scientists and researchers have long been sceptical of. Paragraph 8.1.4 of the report recommends member states of the Council of Europe pay particular attention to the needs of what it calls electro-sensitive persons. These are people who claim that they suffer from a syndrome of intolerance to electromagnetic fields. The report suggests the introduction of special measures to protect these people. This includes the creation of wave-free areas not covered by a wireless network. What effect acceptance and implementation of the recommendations would have on ham radio operations in Europe remain to be determined. (RW)

CQ ANNOUNCES HALL OF FAME INDUCTEES

And CQ magazine has announced its 2011 Hall of Fame inductees, welcoming 12 new members into the CQ Amateur Radio Hall of Fame.

Topping this years list alphabetically is TV and Film producer Dave Bell, W6AQ, who was chosen for this honour based on his deep involvement in producing multiple amateur radio promotional videos over the past several decades.

Also from Southern California is Nate Brightman, K6OSC. He is credited with being the "spark"

behind W6RO, the ham station aboard the Queen Mary in Long Beach, California.

Rounding out the California contingent is
Cardinal Roger Mahony, W6QYI, the Archbishop
Emeritus of Los Angeles. He was recognized for
his leadership as an advocate for immigration reform.

Others recognized include Ron Moorefield, W8ILC
of Kettering, Ohio. Since its inception,
Moorefield has been one of the guiding lights of
the Dayton Hamvention. He was also recognized
for his work as a coordinator of the cross-country 1984 Olympic Torch Relay.

There was also one each member inducted into the
CQ DX Hall of Fame and the CQ Contest Hall of
Fame. The 2011 inductee to the CQ DX Hall of
Fame is Michael J. McGirr, K9AJ. McGirr has been
a leading DXpeditioner who has operated literally
from the ends of the Earth over nearly 30
years. The 2011 inductee to the CQ Contest Hall
of Fame is John Sluymer, VE3EJ, who has been an
active contester and DXer since 1973. He is a
founding member and current president of Contest Club Ontario.

The CQ Amateur Radio Hall of Fame honours those
individuals, whether licensed hams or not, who
have made significant contributions to amateur
radio; and those amateurs who have made
significant contributions either to amateur
radio, to their professional careers or to some
other aspect of life on our planet. The CQ
Contest and DX Halls of Fame honour those amateurs
who not only excel in personal performance in
these major areas of amateur radio but who also
"give back" to the hobby in outstanding
ways. Formal inductions to the CQ Contest and DX
Halls of Fame took place at last weeks Dayton
Hamvention. A complete list of this years
inductees is on-line at www.cq-amateur-radio.com.

==========

WEIRD AND WONDERFUL

WHO GIVES WHO THE PIPS!

In the UK last Tuesday the time signal pips which had heralded the "top of the hour" on BBC radio 4 since 1924 "went missing".

Announcers and listeners took to the new form of social media trying to locate them!

Instead of the distinctive six beeps, the first five of which ring for a tenth of a second, the final one for half a second a dignified silence was observed.

Listeners on the internet tweeted "The pips have died. This is as serious as the ravens fleeing The Tower," said one. Another: "My condolences to the friends and family of @BBC_GTS [Greenwich Time Signal]. I recommend five seconds' silence."

During the Cold War it was believed that the commander of British Polaris nuclear submarines were told to tune into Radio 4 every morning to ensure they hear the broadcasts. If no Today programme, complete with pips, was heard, they were meant to go to the safe, open instructions, written from beyond the grave by the prime minister, and attack the enemy.

John-Paul Dunkley, a BBC broadcast engineer, was interviewed about the absence of the pips. He said: "The box that creates the audio of the pips has died in the basement of Broadcasting House."

The much sort after pips are generated thanks to an atomic clock in the basement of Broadcasting House.

Luckily, Mr Dunkley said, the "bongs" that greet the start of the six o'clock and midnight news bulletins, and are recorded from the Palace of Westminster's Big Ben, were unaffected. "That's simpler technology," he said.

Just think of the consequences if the "bongs" were lost! or worse, if WWV were to lose there pips!

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

The International Museums weekend, an annual worldwide event, is being held over the two weekends of 18th - 19th June and 25th - 26th June 2011.

They welcome all individual amateurs, groups and clubs to work with their local museums to host a special event station.

The museums taking part over the years have included ships, castles, air museums, Napoleonic forts, pumping stations, wireless museums, racing museums and many others. For the purposes of the event, the word 'museum' is loosely interpreted.
There really is no shortage of venues in which such an event can be staged, no matter where in the world you might live.

Those clubs and museums which do decide to take part, should use the free on-site 'Registration' facility

http://www.ukradioamateur.co.uk/imw/

The 'Registration' is simply to assist in administration of the event and provide those taking part with an indication of how many and exactly where the museums taking part are located.

If you require more information then go to http://www.ukradioamateur.co.uk/imw/ or contact Harry M1BYT.

(Bobby Wadey MI0RYL)

Aug 20-21 WW I.L.L.W.

TARC ready for the 2011 Lighthouse Lightship Weekend

ARRR! MATEYS !

theTARCinc plans to activate the Cape Cleveland Light (ILLW Number AU0045)
on 20 and 21 August as part of the International Lighthouse Lightship Weekend.
It will be a great weekend full of relaxed operating with the challenge of
deploying HF VHF and UHF antennae in a remote environment and talking to
stations at other lighthouses around Australia and the world.

Travel to and from the site via the mighty barge Hercules.

Pristine surroundings away from the hustle and bustle with a unique view of
Townsville. Spot the Whales, dugongs, sea turtles, dolphins plus much more !

Is your appetite ravenous ?

Contact Steve VK4SJW on 47723767 h to put your name on the list.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

JULY

Hellenic Amateur Radio Association of Australia out to Lord Howe Island VK9HR.
24th July to 2nd August 2011.

JULY

In DX, the Intrepid-DX Group and the DX Friends
plan to activate the Southern Sudan as new
country on or after July 9th. At airtime members
of the two groups report that they are in
consultation with representatives of the new
Southern Sudan Government, the International
Telecommunications Union and the International
Amateur Radio Union working on making
arrangements. More on this proposed operation
will be posted on-line at www.dxfriends.com/SouthernSudan2011

AWARDS

For the last sixty years the Illawarra Amateur Radio Society has
hosted the Lawrence Hargrave Awards. Access to the award is
available to all Amateur Operator license classes. To be eligible to
apply for an award you need a confirmed contact with the clubs
official station VK2AMW. You are also eligible for the award by
logging contacts with financial Illawarra Amateur Radio Society
members. For a full list of the rules and to download an application
form to claim your award visit the Illawarra Amateur Radio Society

FINAL FINAL WITH THE WIA

President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

The WIA Annual Conference took place last weekend in Darwin.

The weekend was an outstanding success thanks particularly to the dedicated band of helpers from the Darwin Amateur Radio Club, WIA manager Mal Brooks and the many others who contributed.
It was layback, captured the atmosphere of the Territory, it all worked and was attended by amateurs from every state and territory other than Tasmania but even one from New Zealand.

Friday night was dinner at the Trailer Boat Club, watching the sun set over Fannie Bay and addressed by the Lord Mayor of Darwin Graeme Sawyer, who spoke of the top end weather and ecology and the depressing damage cause by the cane toad.

While the partners toured Darwin, the statutory Annual General Meeting, followed by the presentation of a number of awards followed by the Open Forum took place on Saturday morning.

Among the awards presented was the George Taylor Medal, presented to Jim Linton VK3PC, recognising his great contribution last year to the Centenary Celebrations in leading and guiding the promotional aspect of the Centenary year as well as his incredibly many years of work for amateur radio in many fields.

Because he could not be in Darwin the award was presented using a Skype link. At the same time Geoff Atkinson VK3AFA was presented with the Chris Jones Award.

Details of all the awards as well as other information from the Open Forum and the WIA Directors meeting on Monday morning will be published on http://www.wia.org.au the WIA website and in AR.

The Open Forum was a constructive discussion of many matters, including unanimous support for the RD contest to start at around lunchtime.

Saturday afternoon was devoted to a symposium, led by David Donnelly VK8DON who described the role of Bush Light in bringing renewable energy to remote communities.

106 people sat down to a successful dinner on Saturday night, with the highlights of Doug McArthur telling stories of radio and amateur radio in old Darwin, and well known singer and local amateur John Mitchell VK8JM providing memorable entertainment.

Sunday saw a visit to Litchfield National Park, the magnetic termites, a visit to Florence Falls, a Barbecue at Wangi Falls provided by members of the Darwin Club, and evening saw the end of the conference with another sunset and a meal at the Mindil Beach Sunset Market.

As I say, the weekend was a success. I think almost everyone saw me and said how much they enjoyed the weekend and how seamless and lay back it all was.

The members of the Darwin Amateur Radio Club, its President Spud Murphy, Secretary Peter Blackadder, the drivers, the barbecue experts, those who looked after the drinks the people who looked after the partners, even meeting everyone on arrival at Darwin airport made 2011 yet another memorable year.

And now put in your diary next year's Annual Conference, the weekend around the 26 May 2012, in Mildura, Victoria supported y the Sunraysia Radio Group.

Yes, when we decided to hold a Conference in Darwin I was a little nervous. It is so far away. But I hoped we could do something for amateur radio by going there.

But the support of the many attending, the support of the amateurs of Darwin, made it a weekend to remember.

Thank you.

==> + PUBLIC SERVICE: CENTRAL MASSACHUSETTS EXPERIENCES RARE TORNADO,
AREA HAMS HASTEN TO HELP

At least two tornadoes touched down in Central Massachusetts late in
the afternoon on Wednesday, June 1. The storm pulverized or sheared off
the tops of roofs on Main Street in Springfield, a city of more than
150,000, located about 90 miles west of Boston. A debris-filled funnel
swept into downtown from the west, then swirled across the Connecticut
River, which runs through the city. Like their counterparts in Alabama
and Missouri who responded when storms hit those regions, hams in
```

Western Massachusetts volunteered their time and radios to the American Red Cross the National Weather Service. Read more here <http://www.arrl.org/news/central-massachusetts-experiences-rare-tornado-area-hams-hasten-to-help>.

==> + PUBLIC SERVICE: ARES® STANDS DOWN AFTER JOPLIN STORMS

Due to the end of the "search and recovery" mode after the EF5 tornado that struck Joplin, Missouri on Sunday, May 22, ARRL Missouri Section Emergency Coordinator Ken Baremore, W0KRB, notified area hams that all Amateur Radio communications from the Emergency Operations Centers to the field operations have been stood down as of May 30. According to Baremore, officials are now focusing on debris and potential body part removal. "We do have some ARES® operators who are scheduled, and we will continue to work with SATERN through the rest of this week," he said. "I want to thank all of you who volunteered and came to Joplin to help with communications, as well as those of you who are still contacting me to see if additional help is needed." Read more here <http://www.arrl.org/news/ares-stands-down-after-joplin-storms-cert-volunteers-needed>.

==> IARU NEWS: ARRL HEADQUARTERS HOSTS OVERSEAS VISITORS

Where is Amateur Radio growing the fastest? The answer may surprise you -- it's China. The enthusiasm of Chinese radio amateurs was very much in evidence at ARRL Headquarters on Tuesday, May 24, when a dozen amateurs from Beijing and Shanghai toured ARRL Headquarters. The group -- which included representatives of Chinese AMSAT -- had attended the Dayton Hamvention® the previous weekend, where a booth for the Radio Association of China and its subsidiary, the Chinese Radio Amateur Club (CRAC, pronounced SEE-rack), was a part of ARRL EXPO.

ARRL Chief Executive Officer David Sumner, K1ZZ, met with Zhu San Bao, BY1CRA, Executive Vice Chairman of The Radio Association of China, to hear about the evolution of Amateur Radio in China and to explain ARRL operations in more detail. China is now represented in the International Amateur Radio Union by the Chinese Radio Sports Association (CRSA). CRAC has been established to cover all aspects of Amateur Radio and is assuming some of the functions of the CRSA.

The Chinese guests capped a busy period of international activity at ARRL HQ that began on Monday, May 16, with a visit by Gopal Madhavan, VU2GMN, who is a Director of IARU Region 3, as well as President of the Amateur Radio Society of India (ARSI). The following day, two officers of the Viet Nam Amateur Radio Club (VARC) -- Chairman Nguyen Minh Duc, XV2REH, and President Nguyen Bac Ai, XV2A -- arrived to tour ARRL Headquarters and to discuss their plans for hosting next year's IARU Region 3 Conference.

All of these visitors included Dayton in their itineraries. While the Hamvention always attracts many foreign visitors, the theme of this

year's event -- Global Friendship -- made their presence especially appropriate. To mark the theme, the ARRL EXPO area included exhibits representing, in addition to China and the IARU itself, four IARU Member-Societies: Deutscher Amateur Radio Club (Germany), Japan Amateur Radio League, Qatar Amateur Radio Society and Radio Society of Great Britain. The Radio Amateurs of Canada booth was nearby, rounding out our "global village."

==> + ON THE AIR: GEAR UP FOR THE ARRL JUNE VHF QSO PARTY

Lots of RF will be generated on 6 meters and up the weekend of June 11-12 during the 2011 ARRL June VHF QSO Party. While many amateurs think of the VHF+ bands as a "local" band for public service, emergency communications or even a bit of fun on FM repeaters, weak-signal VHF+ enthusiasts know better. Even with a modest station, it's possible to work hundreds, or even thousands of miles on the VHF bands during a good opening.

ARRL Contest Branch Manager Sean Kutzko, KX9X, is a big VHF enthusiast. "In more than 25 years of Amateur Radio, weak-signal work on 6 and 2 meters remains the most fun and intriguing activity I do," he said. "There is nothing like a good VHF opening. With its fun and interesting propagation characteristics like sporadic-E, tropospheric ducting, aurora and even meteor scatter and moonbounce, VHF offers QSO opportunities that HF can never satisfy." Read more here <http://www.arrl.org/news/gear-up-for-the-arrl-june-vhf-qso-party>.

==> + ON THE AIR: JOIN THE USA ARDF TEAM IN ALBUQUERQUE

The Annual USA Championships of Amateur Radio Direction Finding (ARDF) will take place in forests near Albuquerque, New Mexico from September 14-18, 2011. USA's national championships are being combined with the IARU Region 2 Championships. According to ARRL ARDF Coordinator Joe Moell, K0OV, they are open to anyone of any age who can safely navigate in the woods with handheld radio gear for several kilometers. Medals will be awarded for the top three finishers on each band in 10 age categories, six for males and four for females. A two day training camp will precede the formal competitions.

Organizers of the 2011 championships are members of the Albuquerque Amateur Radio Club and the New Mexico Orienteers, led by Jerry Boyd, WB8WFK, and Mike Pendley, K5ATM. Registration is now open -- Moell said that it is important for competitors to register early. The organizers need an accurate head count and assurances that there will be sufficient attendees. Read more here <http://www.arrl.org/news/ardf-update-foxhunters-prepare-for-national-and-iaru-championships-in-albuquerque>.

==> + ON THE AIR: ARRL VHF/UHF ADVISORY COMMITTEE SEEKS INPUT

The ARRL would like to encourage more participation in its several VHF/UHF contests held each year. Many of the HF transceivers sold in recent years include 50 MHz, and some also include the 144 and 432 MHz

bands with multi-mode capabilities. The question at hand is how can we encourage more owners of such radios to utilize these bands and modes to participate in VHF/UHF contests?

The ARRL VHF/UHF Advisory Committee (VUAC) has been asked to consider this question, and to make recommendations to encourage, explore and expand the ARRL VHF and UHF contests and other operating activities by using the multi-band and multi-mode capabilities of modern transceivers and related equipment.

The VUAC would like to ask the Amateur Radio community to provide their comments and ideas for consideration.

Please send any comments or ideas you have on this matter to your ARRL VUAC Division representative no later than July 1, 2011. A listing of each Division's VUAC representative can be found at http://www.arrl.org/arrl-staff-vuac-cac.

==> + FCC NEWS: FCC ISSUES CITATION TO ILLINOIS COMPANY FOR ILLEGAL MARKETING OF UNAUTHORIZED RADIO FREQUENCY DEVICES

On June 2, the FCC issued a Citation to Gary L. Stanford -- doing business as Spark Gap CB Shop in Lincoln, Illinois -- for "marketing in the United States unauthorized radio frequency devices and external radio frequency power amplifiers." This is in violation of section 302(b) of the Communications Act, and Sections 2.803(a)(1) (marketing of radio frequency devices prior to equipment authorization) and 2.815(b) (external radio frequency power amplifiers) of the Commission's rules.

On November 1, 2010, an agent from the FCC's Enforcement Bureau office in Chicago visited the Spark Gap CB shop in Lincoln. According to the Citation, the agent asked the clerk if the store had any amplifiers for sale. The clerk showed the agent a display case with external radio frequency power amplifiers for sale from several different manufacturers. The clerk also suggested that the agent consider purchasing a 10 meter Amateur Radio that is modified to operate on frequencies in the 11 meter Citizen's Band. The clerk also showed the agent a 10 meter Amateur Radio that was on display and operating on a Citizen's Band frequency. Read more here <http://www.arrl.org/news/fcc-issues-em-citation-em-to-illinois-company-for-illegal-marketing-of-unauthorized-radio-frequency>.

==> + US DISTRICT COURT DISMISSES MAINE AMATEUR'S COUNTERCLAIMS

After two US Attorneys filed a Complaint in US District Court in October 2010 <http://www.arrl.org/news/us-charges-k1man-with-failure-to-pay-fine> against Glenn Baxter, K1MAN, for not responding appropriately to an order that he pay a $21,000 fine for violating several sections of Part 97, Baxter filed many pro se motions. On May 23, the US District Court in Maine released an Order <http://www.arrl.org/files/media/News/Baxter_Counterclaim_Dismissed.pdf>,

dismissing one of Baxter's motions, an amended counterclaim, on multiple grounds.

The Court dismissed Baxter's claim for the following reasons: That the counterclaim plaintiff [Baxter] does not have standing to file a civil action against the government for its decision not to initiate a prosecution; that this Court does not have subject matter jurisdiction to review a Federal Communications Commission licensing decision, and that the Federal Tort Claims Act does not authorize a civil suit based on a governmental agency's alleged failure to perform its statutory duty.

The fine had been levied, according to the Complaint, "for defendant's willful and repeated violations of Sections 97.101(d) [commencing transmissions on top of existing communications on 3.890 MHz] and 97.113(a)(3) [transmitting communications in which the station licensee or control operator has a pecuniary interest] of the Commission's Rules, and for the defendant's willful violation of Section 97.105(a) [exercising control over station] and 97.113(b) [broadcasting] of the Rules, and for failure to file requested information pursuant to an Enforcement Bureau directive" [information in brackets added]. The Complaint sought to force payment of the $21,000 fine along with a filing fee and "such other and further relief as the Court deems just and proper."

==> ARRL SECTION NEWS: NEW SECTION MANAGER APPOINTED IN SANTA CLARA VALLEY

Phil Steffora, K6TT, of Los Altos, California, was appointed as Santa Clara Valley Section Manager on May 25. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Pacific Division Director Bob Vallio, W6RGG. Steffora's appointment extends through June 30, 2012. First licensed in 1998 as KF6PEQ, Steffora upgraded to General in 2006 and then Amateur Extra in 2008. He has served as a Santa Clara Valley Assistant Section Manager since January 2009, and was Vice President of the Northern California DX Club (NCDXC <http://www.ncdxc.org/>) from 2009-2011. Steffora holds Worked All States, DXCC and other DX and contest achievements. The Section's top ARRL Field Organization position has been open since Bill Dale's, N2RHV, term of office concluded on June 30, 2010. Dale served as Section Manager of Santa Clara Valley for two terms.

==> IN THE SHACK: RADIOSHACK LOOKING FOR SUGGESTIONS FOR DIY PARTS

Back in the day, RadioShack was the first place many of us looked for parts. QST construction projects routinely referenced RS part numbers, and the Shack even sold 10 and 2 meter transceivers. What goes around comes around, and RadioShack is now looking for input from us, as members of the larger DIY community, on parts we'd like to see them carry. There's a video <http://blog.radioshack.com/post/2011/05/19/RadioShack-And-The-DIY-Community-

You-Talked-Were-Listening.aspx>
explaining what they're looking for, and a place to add comments.

==> SOLAR UPDATE

Tad "Sweet dreams 'til sunbeams find you
<http://www.youtube.com/watch?v=PpzB_Akopug>" Cook, K7RA, reports: Last week, we reported that it has been a long time since sunspot numbers passed the 100 mark, but this week, that's exactly where the sunspot numbers have been: On Tuesday, May 31, the daily sunspot number reached a high of 132. The average daily sunspot numbers increased more than 55 points to 89.9, while the average solar flux rose nearly 20 points to 103.1. The latest forecast shows solar flux at 115 on June 2-3, 110 on June 4-8, 105 on June 9-10, 100 on June 11-14, rising to 105 on June 15, and 110 on June 16-26. The planetary A index is predicted to be 10, 8, 10 and 8 on June 2-5, 5 on June 6-8. The next period of high geomagnetic activity is projected for June 22-27, at 12, 22, 18, 18, 15 and 8. Geophysical Institute Prague sees unsettled to active conditions June 3-4, unsettled June 5, quiet conditions June 6-7 and quiet to unsettled June 8-9. Look for more information -- including a look at the three month moving average for daily sunspot numbers, plus have a peek ahead to Field Day conditions -- on the ARRL website on Friday, June 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Dream a Little Dream of Me <http://en.wikipedia.org/wiki/Dream_a_Little_Dream_of_Me>, as sung by Mama Cass Elliot from The Mamas and The Papas <http://en.wikipedia.org/wiki/The_Mamas_%26_the_Papas>.

==> + JIM TALENS, N3JT, WINS MAY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for May is Jim Talens, N3JT , for his article "An Emergency Backup Solar Power System. " Congratulations Jim! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the June issue today.

==> THERE'S STILL TIME TO ENTER THE 2011 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2012 ARRL Calendar.

- Deadline: Photos must be received at ARRL HQ by June 30, 2011.
- Subject: Must be directly related to Amateur Radio, and be in good

taste. Extra points will be awarded for photos showing folks having fun with Amateur Radio. Photos will be judged on overall quality and composition.
- Requirements: Digital images or color prints accepted. A digital image printed on photo paper, however, doesn't work as well as a high-resolution file attachment. Digital images should be high resolution. A digital image up to 8 MB in size can be e-mailed to upfront@arrl.org, subject line "2011 Photo Contest." An image may also be burned to a CD and mailed to ARRL Photo Contest, 225 Main St, Newington, CT 06111. All entries must include caption information describing where the photo was taken, along with a description of the subject of the photo, as well as the names and call signs of any persons shown. If you entered last year's contest, please do not resend the same photo for this year's contest. One entry per person.
- Miscellaneous: The decisions of the judges -- composed of QST editorial and production staff -- are final.

==> THIS WEEK ON THE RADIO

This week:

- June 3 -- NCCC Sprint Ladder
- June 4 -- Wake-Up! QRP Sprint
- June 5 -- 10-10 International Open Season PSK Contest
- June 4-5 -- Maritimes QSO Party; Alabama QSO Party; SEANET Contest
- June 7 -- ARS Spartan Sprint

Next week:

- June 10 -- NCCC Sprint Ladder
- June 11 -- Portugal Day Contest; Asia-Pacific Sprint (SSB)
- June 11-12 -- DRCG Long Distance Contest (RTTY), VK Shires Contest; CWops Mini-CWT Test; GACW WWSA CW DX Contest; REF DDFM 6 Meter Contest
- June 11-13 -- ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party>
- June 12 -- SKCC Weekend Sprint
- June 15 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 3-5 -- ARRL Northwestern Division Convention (SeaPac) <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>, Seaside, Oregon; ARRL Wyoming State Convention <http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne, Wyoming

Amateur Radio Newsline(tm) Report 1764 - June 3 2011

Amateur Radio Newsline report number 1764 with a release date of Friday, June, 3 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The ham radio team in NYC that met with the sponsor of H R 606 has more good news about the future of that bill, a new system for US based educators to request schoolroom contacts with the International Space Station, Japan scraps the last of its Morse code ham radio testing and the ARRL's VUAC is looking for ways to increase activity on the world above 50 MHz. Find out the details are on Amateur Radio Newsline(tm) report number 1764 coming your way right now.

(Billboard Cart Here)

RADIO LAW: HR-607 SPONSOR BEGINS WORK TO ELIMINATE 70 CM HAM B AND FROM THE BILL

Some more good news on the future of House of Representatives measure HR-607 and its possible impact on the amateur radio allocation from 420 to 440 MHz. Mike Lisenco, N2YBB, was one of the four New York City area hams that recently met with the bills sponsor Representative Peter King and elicited a promise to get the measure changed. This, so as to eliminate the possible sale of that ham radio allocation from it. Now says Lisenco, the action to do this is already underway:

--

N2YBB: "After we met with Congressman King on the 19th; shortly after that we were told by his staff that the Congressman requested of the committee that Section 207 which is the section in HR-607 that deals specifically with the sale of spectrum below 512 MHz be completely removed from the bill.

"He went to Conressman Greg Walden, who is a Republican from Oregon, whose callsign is W7EQU, and who is the chairman of the House Subcommittee on Technology, Communications and the Internet.

"Both of them agreed to remove the section and we are being told that the bill will absolutely not move forward until (Section) 207 is removed from it."

--

According to N2YBB, he sincerely believes that Congressman King is a man of his word and will follow through completely on his commitment to remove any reference to the 70 centimeter band from the measure. And according to Lisenco, this is a good lesson in how hams must learn to deal with all political issues on a grass roots level:

--

N2YBB: "I think the lesson that we learn here is that the best approach is to develop working relationships with all legislators; whether they be on a Congressional level; whether they be on a local level such as a City Council member or a state representative.

"It really behooves us to go out and build these working relationships with our representatives because a face-to-face meeting with a constituent is a thousand times more powerful then 10,000 letters."

--

Lisenco notes that unlike the 1950's, 60's, or 70's, that today with the speed at which communications takes place it really is necessary to get a face to face meeting with legislators on issues that affect our service.

As to when the action to remove 420 to 450 MHz from possible resle under HR-607, Lisenco cannot say. He notes that legislation in Washington moves at its own pace but he is certain that Representative King will act in the best interest of his constituents in the amateur radio community which he represents in Congress. (ARNewsline(tm))

HAM RADIO IN SPACE: NEW US ONLY SELECTION PROCESS ANNOUNCED FOR ARISS CONTACTS

An announcement that will change the way in which educators in the Unuited States must apply for ham radio in space classroom contacts with the International Space Station is now in place. Norm Seeley, KI7UP, reports:

--

The Amateur Radio on the International Space Station or ARISS planning group along with the NASA Johnson Space Center Education Office's Teaching From Space staff have jointly announced a new processes that United States based educators will need to follow. This, to submit a proposal for a school contact with the International Space Station crew.

Effective immediately, a application for an ARISS school contact must consist of a comprehensive education plan, of which the ARISS contact is one of many components. Other parameters include the integration of NASA education and ARRL content with surrounding education activities, and incorporate creative ways to maximize the reach of the ARISS contact and the experience for students. .

The proposal should include study topics related to space technology, space exploration or space research, as well as amateur radio, radio science and wireless communications technology. Also, the educator must describe the instructional activities and lessons to be engaged in with students as part of the learning and preparation for the proposed contact

ARISS astronaut contacts under the new processes will begin in January 2012 and end in July 2012. A window of opportunity will open every six months when another NASA news release goes to educators. The first of these opened on May 19th and will close on July 15th.

The initial NASA news release was sent on May 19th to 18,000 educators. NASA's Teaching From Space Office stresses that for the moment the new procedure applies only to schools in the United States. Educational institutions in other countries will continue to follow their existing process.

>From Scottsdale, Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

Full coverage of the ARISS program changes can be found on-line courtesy of the ARRL at tinyurl.com/3ejz5lu (Southgate, ANS, ARRL, others)

RESTRUCTURING: JAPAN SCRAPS FINAL MORSE TESTING

The country that started the no-code licensing revolution some six decades ago has finally dropped the Morse testing requirement for all of that nations ham radio licensees. This with word that the Japanese Ministry of Internal Affairs has decided to scrap Morse testing for the Amateur Radio Class 1 and 2 licenses with an effective date of this coming October 1st.

What amounts to Japan's version of a Notice of Proposed Rule Making on the Morse test was held earlier in the year. There were 39 people who responded. Following a discussion of the information the responses provided, the Ministry announced that Morse telegraphy testing would be discontinued.

Japan pioneered the High Frequency No-Code Amateur Radio or Class 4 license in the 1950's although they still required Morse for the higher license classes. The written exam for the Class 4 is roughly equivalent to the Foundation exam in the United Kingdom and Australia and the discontinued USA Novice.

The Japan Ministry of Internal Affairs announcement on the abolishment of Morse testing is on line in Google translated English at tinyurl.com/3s4bljx (WIA)

RADIO HEALTH: WHO NOW SAYS CELLPHONES MAY CAUSE CANCER

According to the World Health Organization, radiation from cell phones can possibly cause cancer. This as the agency now lists mobile phone as a carcinogenic hazard.

According to published news reports, a team of thirty-one scientists from fourteen nations reached this the decision after reviewing previously reviewed studies on cellular telephone safety. The scientists say that they found enough evidence to categorize personal exposure as possibly carcinogenic to humans. What that means is they found some proof of increase two types of brain cancer with mobile phone users, but have not been able to draw conclusions for other types of cancers.

The wireless industry responded to the announcement saying it "does not mean cell phones cause cancer. The Cellular Telecommunications Industry Association noted added that World Health Organization researchers did not conduct any new research, but rather just reviewed already published studies.

Before its announcement on Tuesday, May 31st the World Health Organization had assured consumers that no adverse health effects from cellular telephones had been established. (Published news reports)

RESCUE RADIO: SPRINGFIELD TORNADO RESPONSE

Two tornadoes touched down in Central Massachusetts on Wednesday, June 1st causing widespread damage to the city of Springfield and several other communities. Amateur radio operators sprang into action on several fronts including providing assistance to the National Weather Service in spreading word about the storms

--

NWS Amateur Station Audio: Hear it by downloading the MP3 version of this weeks newscast at www.arnewsline.org.

--

According to reports reaching our news desk, a half dozen hams associated with a Western Massachusetts ARES group provided support the American Red Cross in staffing shelters in several communities hit by the storms. Also utilized was the services iof hams attached to

RACES at an Emergency Operations Center in near the city of Springfield which was one of the towns hit by a tornado.

At airtime the death toll stands at four but first responders are going door to door looking for other victims trapped in damaged buildings. Massachusetts Governor Deval Patrick called up 1000 National Guardsmen and has declared a state of emergency. More on this situation as information is made available. (KC5FM, Published news reports)

ENFORCEMENT: MIAMI UNLICENSED BROADCASTER FINED $20,000

Yet another unlicensed broadcaster in Florida has been handed a stiff penalty by the FCC. This, as it upholds a $20,000 fine against Nounoune Lubin for operating a radio station in North Miami, withour a government grant to do so.

According to an FCC release, on four occasions in late 2009 and into 2010, agents from the Miami office traced the source of an illegal signal on 90.1 MHz to Lubin's premises. They also traced a cable from an antenna in the backyard to transmitting equipment in her home. The FCC says that even after receiving two Notices for operating an unauthorized station, Lubin continued on the air. That's when it decided to issue a Notice of Aparant Liability to Monetary Forfeiture in the amount of $20,000.

In response, Lubin simply claimed she did not operate the station, but offered no other proof. The regulatory agency was unconvinced. In affirming the fine it said that even if Lubin herself didn't operate the station, the equipment was on her premises, powered on and under her control.

The agency then upheld the original penalty, which has now escalated to a forfeiture order. Lubin was given the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: COURT DISMISSES K1MAN COUNTERCLAIM

Another loss for Glenn A. Baxter, K1MAN, in his legal battle with the United States government which is seeking to collect a $21,000 fine issued against him by the FCC.

On May 23, the US District Court in Maine released an Order, dismissing one of Baxter's amended counterclaims on multiple grounds. In its dismissal the court noted that the counterclaim by the plaintiff does not have standing to file a civil action against the government for its decision not to initiate a prosecution. Also that court does not have subject matter jurisdiction to review a Federal Communications Commission licensing decision, and that the Federal Tort Claims Act does not authorize a civil suit based on a governmental agency's alleged failure to perform its statutory duty.

According to the October 2010 complaint, the $21,000 fine had been levied against Baxter for - and we quote --defendant's willful and repeated violations of Sections 97.101(d) which is commencing transmissions on top of existing communications. Also for violating Section 97.113(a)(3) which is transmitting communications in which the station licensee or control operator has a pecuniary interest. Baxter had also been charged for his alleged willful violation of Section 97.105(a) which is exercising control over station, Section 97.113(b) that deals with propitiations on amateur service stations broadcasting and for his failure to file requested information pursuant to an Enforcement Bureau directive.

The court upheld complaint that seeks to force Baxter to pay the $21,000 fine along with a filing fee and such other and further relief as the Court deems just and proper. Two United States Attorneys filed the complaint against Baxter in US District Court in October 2010, for not responding appropriately to an order that he pay a $21,000 monetary forfeiture. Baxter countered by filing several pro se motions of his own. (ARRL, others)

HAM HAPPENINGS: NEW AMERICAN LEIGON RADIO CLUB SEEKS MEMBERS

QCWA President Bob Roske, N0UF, reports that a new American Legion Radio Club is in the process of organizing. Membership is available to Legionnaires, Auxiliary, Legion Riders and others who qualify. If you are interested in becoming a part of this new group please send your full name, callsign, address and Leigon membership number by e-mail to K9TAL (at) legion (dot) org. (N0UF)

**

NAMES IN THE NEWS: K6TT APPOINTED SANTA CLARA VALLEY CA SM

Phil Steffora, K6TT, of Los Altos, California, has been appointed as Santa Clara Valley Section Manager effective May 25. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Pacific Division Director Bob Vallio, W6RGG.

That ARRL's section's top ARRL Field Organization position has been open since Bill Dale, N2RHV, term of office concluded on June 30, 2010. Steffora's appointment extends through June 30, 2012. (ARRL)

**

NAMES IN THE NEWS: VUAC WANTS INPUT ON HOW TO INCREASE ACTIVITY

According to Jon Platt, W0ZQ, the ARRL would like to encourage more participation in several VHF and UHF contests held each year. In a posting to the VHF Reflector, Platt is quoted as noting that many of the High Frequency transceivers sold in recent years include 50 MHz. Some also include the 144 and 432 MHz bands with multi-mode capabilities. He goes on to say that the question at hand is how can we encourage more owners of such radios to utilize these bands and

modes to participate in VHF and UHF contests?

Platt says that the ARRL VHF/UHF Advisory Committee - the VUAC -- has been asked to consider this question. Also to make recommendations on ways to encourage, explore and expand the ARRL VHF and UHF contests and other operating activities by using the multi-band and multi-mode capabilities of modern transceivers and related equipment.

W0ZQQ says that VUAC would like to ask the amateur radio community to provide its comments and ideas for consideration. Please send any that you have to your ARRL VUAC Division representative no later than July 1st. A listing of each Division's VUAC representative can be found at www.arrl.org/arrl-staff-vuac-cac. (VHF Reflector)

**

NAMES IN THE NEWS: POPE BENEDICT XVI CROATION VISIT TO BE COMMEMORATED BY HAM RADIO

Ham radio will be a part of the celebration as Pope Benedict the 16th will be visiting the Republic of Croatia for the first time between June 4th and 5th.

The city of Zagreb was to be the host town during his stay in Croatia. The visit of Pope Benedict has also inspired the members of the Croatian Flora Fauna Radio Club to activate the special callsign 9A16PB. The PB in the callsign is in honor of Pope Benedict.

Hams in Croatia will keep 9A16PB on the air through June 13th. QSL this very special operation via 9A2MF. We will have more special event information later on in this weeks Amateur Radio Newsline report. (OPDX)

EMERGING TECHNOLOGY: THE BODY AS AN ANTENNA

Microsoft Research has presented some interesting technologies at the recent Association for Computing Machinery's Conference on Human Factors in Computing Systems. One of these is titled "Your Noise is My Command: Sensing Gestures Using the Body as an Antenna."

In this case, the human body isn't transmitting. Rather it is receiving electromagnetic noise from objects the body or hand. It then

feeds this data to a laptop in a backpack for interpretation.

This presentation received one of the conferences thirteen best-paper awards. And as you might have guessed, it was titled "Your Noise is My Command: Sensing Gestures Using the Body as an Antenna." (TV Technology)

RADIO IN SPACE: NEXT MARS ROVER BEING MADE READY FOR LAUNCH

NASA engineers are putting the finishing touches on the next rover to Mars before shipping it off to Florida for launch later this year. What's being described as a small army of technicians dressed in protective suits have been working almost nonstop inside of a clean room at the Jet Propulsion Laboratory in Pasadena, California, assembling the new rover named Curiosity and testing its science instruments.

NASA says that it will begin shipping spacecraft parts to Cape Canaveral beginning next month. The size of a small SUV, Curiosity will drive around Mars and study whether the planet ever had the right environment to support primitive life.

The Mars mission was supposed to launch in 2009, but technical setbacks and soaring costs forced a two-year delay. The $2.5 billion project is now scheduled to launch in late November. (NASA)

**

HAM RADIO NEAR SPACE: BALLOON NUMBER 165 FROM EOSS TO FLY ON JUNE 11TH

Edge Of Space Sciences will be flying its 165th stratospheric balloon flight on Saturday June 11th. Launch is slated for 7:10 AM Mountain time from Deer Trail, Colorado.

This flight will be in support of Colorado University Boulder's Space Grant Consortium Shot Workshop with student built experiments as the payload. These are the tentative payload frequencies 147.555 MHz transmitting the call AE0SS in Morse and 144.340 MHz A-P-R-S using the identifier AEOSS-11.

Some 40 students are participating in this latest launch which will loft a 20 pound payload using a 3000 gram helium filled balloon. For the latest information on this and other Edge of Space Sciences projects, please check the groups website at www dot eoss dot org. The June 11th flight follows closely on the heels of Edge of Space Sciences its 164th stratospheric balloon flight that took place on Saturday May 28th. (KC0UUO)

**

RADIO ON THE MOVE: WHITTER AK. TO BROWNSVILLE TX. ON APRS EQUIPPED BIKE

On the air, keep an ear open foe Keith Stebbings, KE1THR of Joseph, Oregon. This as he attempts a long distance bicycle ride from Alaska to Texas.

Stebbings departed from the Alaskan town of Whittier on May 12th on his touring bike pulling two small trailers. In addition to his regular biking gear, Stebbings is carrying amateur radio equipment that includes an APRS transmitter which will pinpoint his location for the next five months as he heads toward Brownsville, Texas. He has a Yaesu VX-6R handie talkie as well as a Yaesu FT-857 all-band transceiver that runs on batteries kept charged through a solar panel.

When he is not on his bike, Keith Stebbings is the director of the Wallowa Avalanche Center in Oregon. His progress on his 5-month, 8000 mile ride can be tracked on the Internet at aprs.fi by entering the call ke1thr-4 in the callsign search. (Alaska Newsminer, others)

**

DX

In DX, K0YAK is currently based at the US Embassy in Kathmandu, Nepal and is active as 9N7AK during his spare time. He is expected that he will be there until early July using SSB and PSK31 on 20 through 10 meters. QSL's should go via his home callsign.

PA4JJ will be active portable 9A from Porec on the Croatian mainland between June 6th and 24th. He will operate holiday style using RTTY and PSK31 most of the time. QSL via his home callsign.

And while short notice, three operators from Italy will be on the air portable H-B-Zero from Liechtenstein through June 5th. They plan to operate holiday style using CW, SSB and RTTY, with main focus to be given to 12, 17 and 30 meters as well as the upper High Frequency bands as well as 6 meters. QSL as directed on the air.

**

THAT FINAL ITEM: A LADY THAT CONTRIBUTES TO THE DAYTON HAMVENTION

And finally this week the story of a Dayton Hamvention forum leader who has been a part of the annual event for close to a quarter of a century. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the story of this educator who keeps kids coming to Hamvention year after year after year:

--

Carole Perry, WB2MGP, has been the driving force behind Dayton's annual Youth Forum on Saturdays here at the Hamvention for years.

Perry says it's been an incredible experience working with young people who really have an interest in not just turning on a radio and talking or typing on a keyboard, but interest in the technical side.

Perry says she's heard from those who attended past Youth Forums and went on to some pretty exciting careers...

"The kids work for NASA, the kids get involved with the Hubble telescope - they've reported back. They've all gone on - for the most part - into technical pursuits," Perry says. "And even if they never got a license, the fact that they had fun and became technologically a little bit more knowledgeable, then that's the stuff we're there to do with them."

So how did Perry get connected to the Youth Forum?

"I taught 'Introduction to Amateur Radio' for 30 years," Perry says. "And now that I'm retired, it was either the hammock or continue doing this and I chose to do this.

"And, I love working with young people. There's a positive energy that you get when you work with young people. So that's why I love it."

Perry says the Youth Forum at Dayton wouldn't be possible if it weren't for the equipment vendors, ham radio publications, and the Radio Club of America...which she says is especially generous to the youth who make presentations...

"At the end of it, each presenter from RCA gets the 'Young Achievers Award' from RCA as well as a $100 stipend to encourage them for their presentations and for their work in wireless communications," Perry says.

Next year is the 25th anniversary of the Youth Forum and Perry says she's already working on some ideas with the folks at Dayton and others.

"I've got DARA thinking about it, a lot of the publishers of the ham magazines are thinking about it," Perry says. "We're considering doing a reunion of all the kids who have presented over the last 25 years -that's one of the thoughts. So we're going to be working on that."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, reporting from the Dayton Hamvention.

--

Carole Perry, WB2MGP, has received many honors over the years, but perhaps the greatest is the fact that 24 years after she began the Dayton Hamvention Youth Forum, it is still growing in size and importance each year. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)

arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 5th June 2011

The news headlines:

* South Coast Olympic comms tests on 70cm this week

* New ARISS contact record

* Luso Tower sold

As previously announced, the RSGB has been approached by Ofcom to determine sections of the 70cm band that could be released for a limited period around the Olympic Games. The RSGB has has now received an update that the first communications tests for the Olympics affecting 70cm will take place in the Weymouth and Portland area between Friday 3 June and Wednesday 8 June. These will take the form of spot frequency telemetry transmissions in the range 431 to 432MHz plus some more limited activity around 436MHz. All amateurs are requested to respect these tests and not interfere with them. We understand that OFCOM have advised the Olympics organising committee that this spectrum should not be used for this purpose during the actual Games, although further tests may take place later this year.

After spending 157 days aboard the International Space Station, ESA Astronaut Paolo Nespoli, IZ0JPA answered questions of students from 45 different schools, setting a new ARISS record for a single astronaut. Expedition 26/27 established a new ARISS record, working 77 schools in 68 radio contacts during the mission.

The RSGB is pleased to report a great deal of interest in the Luso tower described in this month's RadCom. Several members have expressed an interest in the 36m tower and we can report that it has been sold at the price originally paid for it.

The International Amateur Radio Union Monitoring System Region 1 newsletter is now available online on the IARUMS website, www.iarums-r1.org. You can see detailed reports from the national coordinators within Region 1.

The RSGB CW National Field Day finishes at 1500UTC today, 5 June, and stations will be looking to collect as many points as possible. QSOs on 160 and 10m count as double points and so expect the 10m band to be particularly popular. Results will appear in due course on the RSGB Contest Committee website www.rsgbcc.org.

And now for the details of rallies and events for the coming week

The Newhaven Fort Amateur Radio Group Rally and Fort Open Day takes place today, 5 June, at Newhaven Fort, East Sussex, near the southern end of the A26. Entry is £2 and the doors open at 10.30am. Details from Eddie, G0ECW on 01273 300772. The Spalding & DARS annual rally will be held at The Sir John Gleed Technology School, Halmer Gardens, Spalding, Lincs, PE11 2EF today, 5 June. There is free car parking and the doors open at 10am. Details from John, G4NBR, on 0794 630 2815.

The 15th Red Rose QRP Festival will take place today, 5 June, at Formby Hall, Alder Street, Atherton, Manchester M46 9EY. There is free car parking and entry is £2. There will be a Bring & Buy. Details from Les Jackson, G4HZJ on 01942 870634.

Finally for today, 5 June, the Hull & District Amateur Radio Society Grand Auction/Mini Rally will be held at the HADARS Club House, Goathland Close, Hull. Doors open at 12 noon and the sale starts at 1.30pm. There will be a Bring & Buy with 10% of proceeds to the club funds. To book any items in before the sale then call Keith on 01482 217776.

On Sunday 12 June, the 10th Junction 28 QRP Rally will take place on 12 June at Alfreton Leisure Centre, Church Street, Alfreton, Derbyshire DE55 7BD. The venue is just 10 minutes from junction 28 of the M1 and the A38. Doors open at 10am and there will be trade stands and a Bring & Buy. OT 10, TS, B&B, SIG, C. More details from Russell Bradley, G0OKD on 01773 783658.

Also on 12 June, the Ipswich Radio Rally will be held at The Orwell Crossing Lorry Park, A14 Eastbound, Nacton, Ipswich, IP10 0DD. There will be a car boot sale, a Bring & Buy, RSGB bookstall and Special Interest Groups in attendance. Doors open at 9.30am and the entry fee is £1. Contact Steve, M1ACB on 07711 329624.

A Train the Trainers course will take place on 18 June at the Old Mill Community Centre, West Street, South Normanton, Derbyshire. The event will start at 10am and includes a free lunch as well as a raffle. If any tutors would like to attend, please contact Jim Stevenson, G0EJQ by e-mail to g0ejq@live.co.uk.

Now for the news of special events

Bush Valley Amateur Radio Club will be active on a club day out on 12 June from Slieve Gallion, a peak of the Sperrin Range in Northern Ireland. The club callsign MN0GKL will be used and activity is expected on all bands.

Verulam Amateur Radio Club is celebrating its 50th year with a special event day on Saturday 11 June. The event is being held on the premises of a local school in St Albans in Hertfordshire where the Verulam club is also making a promotion of amateur radio over two days to 15 local schools. Special event callsign GB5OVE will be active on HF SSB, CW and various data modes between 9 and 11 June inclusive.

And now the HF DX news compiled from 425 DX News and other sources

Vincent, F4BKV plans to be active from Shetland, EU-012, Orkney, EU-009 and Great Cumbrae EU-123 between 11 and 13 June prior to joining the MS0INT team. The MS0INT IOTA effort will be operating from various Scottish islands from 14 to 20 June. Full details of locations and callsigns can be found on www.ms0int.com. There will be three stations active on CW and SSB on the HF bands and 6 metres. Several operators will be on the air as MS0RSD from Skye from 5 to 10 June. QSL via M0URX either via the bureau or direct.

PA/DL1KD will stay on Texel from 6 to 20 June. QSLs via bureau, direct or Logbook of The World.

J48O will be active from the Kastri Lighthouse on the Othonoi Islet between 17 and 25 June. Activity will be on 6 to 80 metres using CW, SSB and the Digital modes. QSL via SV2FPU.

Now the contest news

The latest leg of the 80m Club Championships takes place on 6 June from 1900 to 2030UTC. Using datamodes only, the exchange is signal report and serial number.

The following day, 7 June, it's the 144MHz UK Activity Contest from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

Next weekend, 11 and 12 June, is a busy time for contests, mostly short duration events. For 24 hours there's another opportunity to take part in the 6m contest French REF DDFM 6m, running from 1600 to 1600UTC. Participating French stations will add their Department number to their callsign when calling CQ, eg F6XYZ/71. Exchange a report, serial number and the first four digits only of your locator. Locator squares count as multipliers, so French stations will be happy to work the UK, plus there's an award for the top non- French entry. Remember that French stations operate only above 50.200MHz.

Low power enthusiasts will be heading for the hills on Sunday for the 2nd 144MHz Backpackers contest between 0900 and 1300UTC. Using all modes the exchange is signal report, serial number and locator.

The 6-hour Practical Wireless 2m Low Power Contest also takes place on Sunday 12th, the first four hours of which coincides with the 2m Backpackers event. The maximum power level is 3 watts and multipliers are locator squares. Starting at 0900UTC, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from the 23rd to the 29th of May, compiled by Neil Clarke, G0CAS on the 30th of May

First the latest smoothed monthly sunspot numbers which are for July, August, September and October and are 16.7, 17.4, 19.6 and 23.2 respectively.

Several small sunspot regions were visible at the start of the period but on the 27th a large complex region rotated into view and with it solar activity increased to moderate levels. On the 28th and the 29th a M1 class solar flare took place. A large coronal mass ejection accompanied the flare on the 29th. Solar flux levels increased from 80 units on the 25th to 111 by the 29th. The average was 90 units. The 90 day solar flux average on the 29th remained at the same level as last week at 108 units. X-ray flux levels increased from A7.2 units on the 26th to B5.5 by the 28th. The average was B1.1 units. Geomagnetic activity started at quiet levels, the Ap index on the 23rd and the 25th was only 4 units. However, as forecast, a coronal hole disturbance arrived late on the 27th. Active continued to increase on the 28th when the Ap index was 40 units. This disturbance was probably the result of the coronal hole and a coronal mass ejection arriving at Earth around the same time. The average was Ap 15 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 320 kilometres per second on the 26th to a fast 830 kilometres per second by the 29th. Particle densities were low throughout except for a brief increase to 14 particles per cubic centimetre on the 28th. Bz varied between minus 4 and plus 5 nanoTeslas on the quiet days and between minus 12 and plus 9 nanoTeslas on the 28th. Bz remained strongly negative for a 7 hour period during the 28th which allowed auroral propagation to cover most of the UK and Europe. Sporadic-E took place every day up to 50MHz with a good opening on 144MHz on the 26th.

And now the solar forecast. There is a good chance that this week solar activity could increase to moderate levels, particularly during the next few days. Solar flux levels could be as high as the 110's, or maybe higher. Geomagnetic activity should be quiet till end of the week when a recurring coronal hole disturbance is expected to arrive on Friday. The disturbance is then expected to last for the weekend with the daily Ap index in the teens. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 12MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 14MHz. The best time to try this path will be between 1100 and 1400 hours. Sporadic-E is expected to take place almost every day on 28 and 50MHz. There is also a good chance of openings up to 144MHz. In many summer seasons June would appear to be the best month for openings at 144MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 5 June Lincoln Short-Wave Club is at the Spalding Rally. For more information contact Pam Rose, G4STO, on 01427 788356.

On Monday 6 June Gloucester Amateur Radio & Electronics Society has members' Yaesu FT.290 comparison checks. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 6 June South Birmingham Radio Society is planning for VHF Field day. Contact Don, on 0121 458 1603.

On Monday 6 June South Normanton Alfreton & District Amateur Radio Club is having a rally planning night. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Tuesday 7 June Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 7 June Friskney and East Lincolnshire Communications Club is in the shack. Contact Chris, M0MFP, on 01507 442240.

On Tuesday 7 June Loughborough & District Amateur Radio Club is having a vintage radio night. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 8 June Lincoln Short-Wave Club G6COL is on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 8 June Midland Amateur Radio Society Short is holding a committee meeting followed by 80th birthday celebration buffet. All are very welcome from 7.30pm. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 8 June Telford & District Amateur Radio Society is having a talk on RSGB matters by Dave Wilson, M0OBW. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 9 June Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Thursday 9 June South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603. On Friday 10 June Bromsgrove & District Amateur Radio Club is preparing for the VHF contest. Contact Chris, M0BQE on 01905 776 869.

On Friday 10 June Coventry Amateur Radio Society is taking part in Bunkers on the Air at Bulkington, Meriden, Church Lawford. Contact John, G8SEQ, on 07958 777363.

On Friday 10 June Nunsfield House Amateur Radio Group is holding a junk sale. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 10 June South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 11 June Lincoln Short-Wave Club is in the shack and putting GB2CWP on the air. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 11 June Welland Valley Amateur Radio Society is running a carnival weekend radio station at Symington's recreation ground. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Sunday 12 June Friskney and East Lincolnshire Communications Club will be running an amateur radio station at Friskney Village Hall, Friskney, off the A52 between Skegness and Boston. More information from Chris, M0MFP on 01507 442240.

On Sunday 12 June Hucknall Rolls Royce Amateur Radio Club will be at the Junction 28 Rally at Alfreton Leisure Centre. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Sunday 12 June South Normanton Alfreton & District Amateur Radio Club is running its QRP rally. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

NEWS FOR THE NORTH OF ENGLAND On Monday 6 June Angel of the North Amateur Radio Club Come is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 6 June Hornsea Amateur Radio Club is taking part in the 80m CC Data. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Monday 6 June Sheffield Amateur Radio Club is having an informal social evening and taking part in the RSGB 80m Club Contest Datamodes section. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 6 June Thornton Cleveleys Amateur Radio Society is having a natter night and preparing for VHF Field Day. Details on the web at www.tcars.org.uk.

On Tuesday 7 June Halifax & District Amateur Radio Society is finalising the details for our attending the Halifax Charity Gala. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 8 June Hambleton Amateur Radio Society is having a talk on Doppler DF by Bill, G0WGZ. More information from Tony Wilson, G3MAE, on 01609 881530. On Wednesday 8 June Hornsea Amateur Radio Club is having a talk on Ever Ready by Bob, M0GAP. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 9 June South Manchester Radio and Computer Club is having a talk on baluns by Ron, G3SVW. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 10 June East Cleveland Amateur Radio Club is holding a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 11 June Denby Dale Radio Club is operating special event station GB2HS from Honley Show near Huddersfield. club will also have a stand, where they will be offering a free crystal set construction kit to try and interest young people in electronics and amateur radio. Details from Richard, M0RBG, on 07976 220126.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 7 June Livingston & District Amateur Radio Society is having a club evening. Details from Norman, on 07740 946192.

On Wednesday 8 June Lothians Radio Society is holding its AGM. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Wednesday 8 June West of Scotland Amateur Radio Society has Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 9 June Aberdeen Amateur Radio Society has Morse practice and is on the air. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 10 June Borders Amateur Radio Society is having a talk on industrial control by Graham, MM0XXL. More information from Danny, 2M0CDO, on 01890 882850.

On Friday 10 June West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Sunday 12 June Cockenzie & Port Seton Amateur Radio Club is taking part in the Practical Wireless 144MHz QRP contest. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 5 June Echelford Amateur Radio Society is attending the open day at Vandals Rugby Club. Contact John, G4GSC, on 01784 451898.

On Sunday 5 June Worthing & District Amateur Radio Club is having a breakfast meeting in Goring cafe. Contact Phil, G4UDU, on 01903 816684.

On Monday 6 June Braintree & District Amateur Radio Society is holding an aerial clinic. For more information contact John, M5AJB, on 01787 460 947.

On Monday 6 June Burnham Beeches Radio Club is having a talk on PW by the editor, Rob Mannion. Contact Dave, G4XDU, on 01628 625 720.

On Monday 6 June East Kent Radio Society is having a talk on The Men and Bailey Bridges by Martin Stoneham, G4RVV. Details from Karl Davies, M1DFM, on 01227 710120.

On Monday 6 June Norfolk Amateur Radio Club is taking part in the RSGB CC Data contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Monday 6 June Southdown Amateur Radio Society is having a talk on GB2PW and valve amplifiers by John, G3DQY. Details from John, G3DQY, on 01424 424 319.

On Monday 6 June Surrey Radio Contact Club is holding its construction contest. Contact John, G3MCX, on 020 8688 3322.

On Monday 6 June Verulam Amateur Radio Club is holding a committee meeting. Details from Tony, 2EOWAP, on 01727 853087.

On Tuesday 7 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 7 June Chelmsford Amateur Radio Society is having a G5RV evening. Contact Martyn, G1EFL, on 01245 469 008.

On Wednesday 8 June Chesham & District Amateur Radio Society is having a members' forum. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 8 June Harwich Amateur Radio Interest Group is having a talk on the Bardsey Island Activation by M0ZZO and 2E0WMG. Details from Kevan, 2E0WMG, on 07766 543784.

On Wednesday 8 June Havering & District Amateur Radio Club is having an informal evening & Morse class by Peter G3JSR. More information from John, M0UKD, on 07890 222111.

On Wednesday 8 June Norfolk Amateur Radio Club is having a friendly foxhunt leaving at 19.30. Bring a map, compass, DF gear, mobile phone and. plenty of fuel. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 8 June South Essex Amateur Radio Society is having a presentation on the Essex CW Group by Jonathon Michener. Contact Norman, M0FZW, on 01268 692776. On Wednesday 8 June Southgate Amateur Radio Club is having a talk on the Hertfordshire Air Ambulance by David, M0XDS. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 8 June Worthing & District Amateur Radio Club is planning for the 2m QRP contest. Contact Phil, G4UDU, on 01903 816684.

On Thursday 9 June Bittern DX Group is having an informal meeting at Pinewood Park Leisure Club. Details from Linda, G0AJJ, on 01692 404154.

On Thursday 9 June Chelmsford Amateur Radio Society is operating GB5RVA from Sandford Mill. Contact Martyn, G1EFL, on 01245 469 008.

On Thursday 9 June Echelford Amateur Radio Society is having a talk about IOTA by Roger Balister, G3KMA. Contact John, G4GSC, on 01784 451898.

On Thursday 9 June Edgware & District Radio Society is having a surplus equipment sale. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 9 June Reading & District Amateur Radio Club is having a talk on the spectacular history of receivers by John Ellerton, G3NCN. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 9 June Shefford & District Amateur Radio Society is having a Top Band pedestrian DF hunt. Details from David, G8UOD, on 01234 742 757.

On Thursday 9 June Verulam Amateur Radio Club commences its 3 day event celebrating its 50th anniversary at Sandringham School, St Albans. Details from Tony, 2EOWAP, on 01727 853087.

On Friday 10 June Cambridge & District Amateur Radio Club is having a talk on baluns by John, G0GKP. Contact Ron, G3KBR, on 01223 501712.

On Friday 10 June Mid-Sussex Amateur Radio Society is holding a fox hunt. The hall is closed. Contact Peter, G4AKG, on 01444 239371.

On Friday 10 June Radio Society of Harrow is having a presentation and demonstration of the club's new Rigblaster Pro Digital Interface by Stuart M1SMH. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 10 June Wimbledon & District Amateur Radio Society has Foundation licence training and is on the air. Contact Andrew Maish, G4ADM, on 020 8335 3434.

On Saturday 11 June Hastings Electronics and Radio Club is holding an auction of used & surplus equipment from 9am at Holy Redeemer Church Hall, Upper Church Road. Details from Gordon, on 01424 431 909.

On Sunday 12 June Bromley & District Amateur Radio Society is attending the Bromley Pageant of Motoring. Details from Andy, G4WGZ, on 01689 878089.

On Sunday 12 June Chesham & District Amateur Radio Society is taking part in the PW 144MHz QRP contest. More details from Terry, G0VFW, on 01442 831 491.

On Sunday 12 June Felixtowe & District Amateur Radio Society is at the ESWR Rally. More information from Paul, G4YQC, by email to pjw@btinternet.com.

NEWS FOR THE SOUTH WEST On Sunday 5 June Torbay Amateur Radio Society is hosting the Torbay Buildathon, which is open to non- members. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Tuesday 7 June Blackmoor Vale Amateur Radio Society is having a VHF evening. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 7 June West Devon Radio Club is having a talk on military and vintage collectables by Tony Helm, G4BCX. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Thursday 9 June South Bristol Amateur Radio Club is training for VHF NFD. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 9 June Swindon & District Amateur Radio Club is holding a barbecue. Contact Den, M0ACM, on 07810 317750.

On Thursday 9 June Yeovil Amateur Radio Club is having a talk on George's QRP rigs by G3ICO. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 10 June Torbay Amateur Radio Society is helping candidates revise for the Advanced exam. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 6 June Dragon Amateur Radio Club is having a quiz by GW3GUX. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Tuesday 7 June Wrexham Amateur Radio Society is having a test equipment demo. More information from Patrick, 2W0HUU, on 07947 701 927.

On Thursday 9 June Marches Amateur Radio Society is on the air, holding a construction evening and having a natter night. For more information contact Dave, MW0AYM, on 01691 777242.

546. Request for Volunteers for Joplin, MO

Newsgroup: rec.radio.amateur.misc
Date: 2011-06-03 20:47:51 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110603202607.B750D208C2@bmail.arrl.org>
Source record: 4536
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

I just received this from ARRL HQ. If you are interested, please follow the instrucitons below carefully.

In accord with our Memorandum of Understanding with The Salvation Army, we are looking for volunteers to aid them in their work in Joplin, Missouri at this time. There is a specific process to be followed in doing this, so please read this information carefully.

The Salvation Army continues to provide food, drink and other items of basic care to survivors and rescue workers in the impacted areas of Joplin, MO. While cell phone coverage is no longer much of a problem in Joplin, amateur radio continues to be important in certain operations such as those of the Salvation Army where the ability for several persons to hear what is going on at the same time is an asset.

As a SATERN (Salvation Army Team Emergency Radio Network) operator, if deployed, you will be asked to go out on Salvation Army vehicles into the areas impacted by the Joplin tornado to supply logistical support. The Salvation Army vehicles supply basic human needs (particularly food and drink) and you will play a big part in the operation. You will relay information as to inventory, requests for food and drink, maintenance problems that develop, etc. It may surprise you, but at certain periods of the day the radio traffic has been almost constant. The Salvation Army Disaster Response Operations are now running from 7 a.m. to as late as 9 p.m.

DO NOT SELF_DEPLOY!

Wait to be contacted for possible deployment and assignment.

The qualifications for being assigned are:

ü Technician or higher Amateur Radio license.

ü Good health – you will encounter 100 degree heat, exertion and long hours. You need to be in good shape!

ü Ability to take on a 3 to 5 day deployment in the field.

ü Have an HT and a mobile (VHF/UHF) radio – also having APRS is a big plus.

ü Experience with disaster responses. ARES leadership experience a plus.

ü NIMS/ICS training with a minimum of IS-100, IS-200 completed.

The process to volunteer is:

1. Send an email to emergency@arrl.org

Include name, call, contact information (phone & email),
location

and specific information on how you meet each of the criteria above

2. Your information will be checked against the current needs

3. If cleared, your contact information will be sent to our liaison
with SATERN field leadership.

4. If assigned, you will be contacted by SATERN directly and given
further instructions.

The Salvation Army will try to supply you with some type of lodging, if
available. If deployed, you should consider bringing a sleeping bag or
make other sleeping arrangements should you need to be housed at the
Salvation Army.

SATERN operations in Joplin are being held on the 147.00 (positive
offset) repeater. If you are deployed, you will need at minimum a
2-meter handheld radio with a spare battery pack (or cigarette lighter
adapter) and a magnetic mount antenna. Due to some communications
problems experienced on 2-meters within the impacted area, a 2-meter
mobile radio with magnetic mount antenna would be desirable.
Additional information will be furnished to you.

No reimbursement for travel or any other expenses has been authorized
at this time. Therefore, I would recommend that you record your mileage
and save your receipts. You may be able to deduct your mileage from
your taxes (consult your tax preparer). The Salvation Army will of
course provide you food and drink while on duty.

ARRL Nebraska Section
Section Manager: Arthur I Zygielbaum, K0AIZ

SARL NEWS - SUNDAY 05 JUNE 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that it has to be announced that the key of two radio amateurs went silent recently. They are:

Corrie Van Der Westhuizen, ZS4CR, on the 29th May and:

Wallie Els, ZS6WE, on Monday the 30th May after having suffered from a combination of illnesses lately. He was cremated on Thursday the 2nd June.

Our sincerest condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

CELEBRATE 50 YEARS OF RSA

URGENT NOTICE TO ALL AMATEUR LICENSEES

SUMBANDILASAT SO67 YOUTH DAY EVENT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

CELEBRATE 50 YEARS OF RSA

On 31 May 1961, the Republic of South Africa came into being and to celebrate the 50th anniversary the Boland Amateurradioklub will operate a special event station with the callsign ZS50RSA. It was on the air on Saturday 4 June 2011 and will be operating for the next twelve months during special events and during on the air competitions. QSL will be

via the bureau and the SA-QSL on the web. All cards received will be reciprocated.

The Boland Amateur-radio klub aims to achieve the WAZS 500 during the twelve months of operating ZS50RSA.

URGENT NOTICE TO ALL AMATEUR LICENSEES

Last weekend ICASA cancelled over 34 000 radio licenses that have remained unpaid for the past 365 days. This includes all amateur radio licenses that are unpaid for the past year. Check that you have paid your license and if you do not have a valid printed license or an official receipt call ICASA at 011 566 3313 or 011 566 3319 between 08:30 - 16:00 Monday - Friday. If your amateur license was cancelled call now and ICASA will re-instate it if you can prove payment. If you have not paid, do so now using the information and account number on your last license.

ICASA's finance department did not consult with the licensing department and simply cancelled all licenses unpaid for 365 days. It should also be noted that ICASA sends out reminders as a courtesy but the responsibility remains with the licensee to ensure that the license is paid up at all times.

The current fee is still R27 and the new license period is from 1 April to 31 March. If you did not pay R6,75 in January for the three months January to March add that to the R27 in other words pay R33,75.

SUMBANDILASAT SO67 YOUTH DAY EVENT

As part of the SARL Youth Day event on 16 June, SA AMSAT has joined the activity with a special satellite event and competition. The original beacon message will be transmitted on the two morning passes. Each pass is approx 10 minutes and starts at 07:56 and 09:33 CAT respectively. The first pass has a much higher elevation and reception should be possible with a simple antenna and a hand held transceiver. The receive frequency is 435,345 MHz but please tune up and down to compensate for Doppler. To enter the competition, participants under 18 must copy the callsign given in the message. There are several prizes to be won. There is a second competition open to all age groups. Copy the full beacon text either as an mp3 recording or fully written out. Send entries to saamsat@intekom.co.za.

JAPAN SCRAPS FINAL MORSE TESTING

The country that started the no-code licensing revolution some six decades ago has finally dropped the Morse testing requirement for all of that nation's amateur radio licensees. This with word that the Japanese Ministry of Internal Affairs has decided to scrap Morse testing for the Amateur Radio Class 1 and 2 licenses with an effective date of this coming October 1st.

What amounts to Japan's version of a Notice of Proposed Rule Making on the Morse test was held earlier in the year. There were 39 people who responded. Following a discussion of the information the responses provided, the Ministry announced that Morse telegraphy testing would be discontinued.

Japan pioneered the High Frequency No-Code Amateur Radio or Class 4 license in the 1950's although they still required Morse for the higher license classes.

WHO NOW SAYS CELL PHONES MAY CAUSE CANCER

According to the World Health Organization, radiation from cell phones can possibly cause cancer. This as the agency now lists mobile phone as a carcinogenic hazard.

According to published news reports, a team of thirty-one scientists from fourteen nations reached this the decision after reviewing previously reviewed studies on cellular telephone safety. The scientists say that they found enough evidence to categorize personal exposure as possibly carcinogenic to humans.

What that means is they found some proof of increase of two types of brain cancer with mobile phone users, but have not been able to draw conclusions for other types of cancers.

The wireless industry responded to the announcement saying it "does not mean cell phones cause cancer". The Cellular Telecommunications Industry Association added that World Health Organization researchers did not conduct any new research, but rather just reviewed already published studies.

Before its announcement on Tuesday May 31st, the World Health Organization had assured consumers that no adverse health effects from cellular telephones had been established.

The report also did not differentiate between cell phones operating in the 900 MHz band with those at higher frequencies. So your hand-held at 70 cm is most probably very safe!

HF BEACON CALL SIGN CHANGE

The HF beacon ZS4BOT transmitting on 7,027 MHz is changing to ZS0BOT. ICASA contacted ZS4JAN and explained that the original callsign was issued incorrectly. ICASA explained that the call signs of all beacons will be changed to start with ZS0 prefixes.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the Solar activity is expected to be low with a chance for M-class flares through 9 June. Activity is expected to decrease to very low to low levels during 10 - 14 June. During the week numerous C-Class flares took place around Sunspot 1 226, which is changing shapes and sizes. Another sunspot is forming yet again, this time it is located just to the west of Sunspot 1 231. For

those who do their own frequency predictions, the expected effective sunspot number for the week is about 55.

15 m will provide the best opportunities for DX followed by 20 and 30 m and the WARC bands in between, of course.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 16 June - Transmission of Youth in Amateur Radio at 09:30, but receive beacon signal already on 435,345 MHz at 07:56 and 09:33. 16 June - Youth Day Sprint from 10:00 till 12:00 CAT 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

Notes From Conference in Upper Hutt
As usual the weekend commenced with a meeting of Council here on Friday morning, the following is a report on business discussed:

Incoming Council members, Warren Harris ZL2AJ, Stephen Hayman ZL1TPH, Simon Lewis ZL4PLM and Terry Thomas ZL4TAE were welcomed. Michael Owen VK3KI, President of Wireless Institute of Australia, and John Longayroux VK3PX, Treasurer of the Wireless Institute of Australia, were invited as special guests.

Next Council elected Vaughan Henderson ZL1TGC as vice-president. Vaughan was elected unopposed.

Following a suggestion from Evan Sayer the Association Treasurer, Council agreed that a review of the current NZART Constitution is to be undertaken. One of the main aims of this review is to gain charitable status and potentially save having to pay tax.

Council formally approved a submission from the Radio Electronics Group granting them NZART Branch status.

Council again thanked Evan Sayer for ensuring the Associations financial audit was completed in a timely and professional manner.

Council resolved that subscriptions for 2012, will remain at $95 for Transmitting/Non-Transmitting individual memberships. Those members who pay their subscriptions before 30 November, will go in a draw to win a dual band hand held radio.

A membership promotion will be undertaken this year, with a further handheld being offered as a prize. Payment for the new members must be received by the 31 December. Council are very conscious of falling membership and

encourage newcomers to the Association and feel a membership drive with the opportunity to win a prize may assist in increasing members to the Association.

More about these special prize draws will be advised in HQ Info-Line once Council has finalised the detail.

Council also wish to emphasise the need for all Branches and members to subscribe to HQ Info-line. This was an initiative by Jim ZL2BHF some years ago and is now scribed by Jamie Pye ZL2NN, as a form of communication to members between the bi-monthly issues of Break In and the monthly NZART Official Broadcast. HQ Info-line is sent via e-mail fortnightly and contains many updates from Council, FMTAG, Awards etc so that members get the most up to date information. To make sure that you receive HQ - Infoline, just complete the details on the NZART webpage.

Saturday morning proceedings commenced promptly at 8:30 am, having confirmed a quorum of 1145 members being represented.

Life Membership Awarded
Following a report from Council, that concluded with a recommendation to the AGM, that ZL2TAR be award Honorary Life membership to NZART, This was received with acclamation by attendees of the AGM.

Chris Hipkins MP For Rimutaka Welcomed All to Upper Hutt
At this time, just prior to morning tea, there was a small adjournment where the Chris Hipkins MP for Rimutaka welcomed everyone to Upper Hutt, followed by Stuart Watchman ZL2TW who gave a very insightful account of his traumatic experience during the 22nd February earthquake in Christchurch, where he was attending a medical conference at the Grand Chancellor Hotel. As usual Stuart was able to make all smile even about such a catastrophic event.

Those in attendance at the AGM from Christchurch, appreciated Stuart's presentation, as it was not only very graphically informative, but typical of how us kiwi's are able to keep going in trying times and keep a sense of humour.

The minutes from the AGM in Auckland were confirmed, then Evan Sayer, the Association Treasurer briefly detailed the annual reports, further emphasising a need to review our Constitution in order to gain charitable status. Evan also reminded those present that in 1998, the Association was operating with a deficit of over $200,000, however now we have reserves of over this amount. He did warn that while this shows that financial difficulties have been overcome, there still remains the need to increase membership.

All officers reports were presented and accepted. The hard working Officers of the Association, who are obviously undertaking their roles with professionalism and effectiveness, are to be thanked as there were no questions from the floor seeking clarification of any reports.

REMITS
Remit discussions commenced, with some very robust discussion. It was great

that so many branches had actively considered each remit, as 4 of the 13 presented, required a count of votes.

The results are as follows:
Remit 1, Carried, on vote count,
Remit 2 Lost on vote count,
Remit 3 Lost on voices
Remit 4 Lost on voices
Remit 5 Lost on voices
Remit 6 Lost on voices

Remit 7, having received an amendment to include 160m, which was passed by the floor, Carried on vote count.

Remit 8 Lost on vote count
Remit 9 Lost on voices
Remit 10 Lost on voices
Remit 11 Lost on voices
Remit 12 - withdrawn
Remit 13 - withdrawn

Throughout the remit discussions, some presentations of awards were made, to break the intensity of the meeting.

Arthur Godfrey ZL1HV Branch Award
The recipients of the Arthur Godfrey ZL1HV Branch Award were:

Neil Gibbons ZL2TNG, Maurie Vile ZL2ADP both from Upper Hutt branch, Paul (Jono) Jonassen ZL1UP Hamilton branch, Topsy Scott ZL2LS Nelson branch and Maurice McNab ZL3MEM from Christchurch West Branch.

Branches who have taken time to submit these very worthy nominees for consideration are thanked and the opportunity to reward and publicly recognise the efforts of their members is very timely.

The citations for these awards will be appear in the August issue of Break In.

Rothschild Cup
North Shore Branch received the Rothschild Cup this year, with a total of 13 successful candidates passing their amateur radio examination in 2010.

Next Conference
Letitia (Topsy) Scott, took the floor, inviting all to attend the annual conference in Nelson next year. Topsy and the Branch President Paul ZL2CQ have considerable plans underway for what promises to be a very entertaining and fun event.

New Award
This year, from a Nelson branch initiative and sponsorship, a new award was introduced, to recognise a 100% pass mark (that's 60/60 result) in their examination, in the year preceding conference, for amateurs not otherwise eligible in the Best Examination/Youth Achievement Award. There were three recipients of this award for 2010, Suzette James ZL2SGC, Nelson Branch,

Jonathan MacKenzie ZL3JDM, Christchurch Branch and Murray Smith ZL2MJS Lower Hutt branch. Well done to you all.

The Best Examination Result
The Best Examination result went to Thomas Fellows ZL3PSG aged 16 for a pass of 55/60.

There were no nominations for Young Amateur of the Year award, therefore Nelson Sound, who have offered to sponsor this in future years, generously agreed to offer it to our Best Examination result recipient. Congratulations Thomas on receiving a dual band hand held.

General Business
The meeting proceeded to general business with a motion being put from ZL3BM: "That a vote of No Confidence be placed on all current Councillors". This was seconded by ZL2TDD but was lost on voices.

Stephen Cooper ZL2WAU of Tararua Branch asked branches to look through their archives for any amateur radio videos or DVD's here in New Zealand, that can be used on their Tararua Regional TV station which will soon also be broadcast on other Regional TV stations.

Finally it was announced that this year's very worthy recipient of the Amateur of the year Award, was David Searle ZL3DWS for the tremendous results he achieved in his Buildathon projects. David has recently moved from Christchurch for obvious reasons to Bondi in Australia.

David was contacted later in the evening by Terry Carrell ZL3QL. Terry reported David was overwhelmed at the recognition of his work and has asked that this message of his thanks be sent to you all.

Warm fraternal greetings from North Bondi Sydney.

I was greatly surprised, yet proud, to learn that I had become NZART Amateur of the Year.

Proud, because it acknowledges the success achieved by so many Canterbury radio amateurs and beyond, with the ZL3 Radio Buildathon project.

Hundreds of Canterbury kids now know what amateur radio is, and which end of a hot soldering iron to grab to build a simple radio!

So does mum and dad, school friends and all the others who would listen to a kid so proud that his or her first radio really works!

If we each share our enthusiasm for a great hobby with just one young person, their interest in radio, communicating and electronics could last a life time.

When you return to your branch, wouldn't it be great to hold just one event each year when you invite the local kids, parents, anybody; to build something with your members.

It's fun, it builds community and it could spark an interest that lasts a life time.

73's - have a great evening and a most successful conference.

David ZL3DWS / VK2DWS"

Hasn't taken David long to get himself a VK call sign! Many thanks to David, you are missed.

KORDIA
As was mentioned in the May Official Broadcast, we have had some very excellent news that KORDIA will not be charging NZART for the rental on their sites, for the next 5 years. Although we have yet to confirm this in a formal contract, Vaughan Henderson ZL1TGC and Otago Branch 30 are to be heartily congratulated for their by no means small involvement in bringing this about. Thanks to you all.

WIA President Michael Owen VK3KI Spoke to The Meeting
The WIA President Michael Owen VK3KI spoke to the meeting, informing all of the events of the Wireless Institute of Australia in the past year. Michael is very keen to promote VK attendance at the NZART conference weekend and encourages ZL hams to do the same in Australia.

Stirrers Award
The final order of the day was to appoint the stirrers award...this year the recipient was Topsy ZL2LS for appearing in her very skimpy red night attire and almost causing the President to return to smoking, having received such a shock.

The meeting concluded at 2:59pm followed immediately by the AREC forum.

AREC Forum
The forum commenced with a presentation from Geoff Chapman ZL3PX on AREC's involvement in the Christchurch earthquake.

Matthew Lloyd then gave a presentation on his role with the Red Cross telecom response unit.

Then Jeff announced their new National Training Officer, who is Brian Purdie ZL2ADL.

Richard ZL1BNQ gave a brief overview on the old training modular system AREC have used in the past, with a view of modernizing it.

Finally Bill Olsen ZL4AE, gave a presentation on his 6 week trip with Red Cross to Tunisia.

IARU
Running concurrently was a forum by the IARU committee, who are busy preparing budgets to submit to Council for delegates to attend the WRC conference in Geneva in 2012 and the IARU Region 3 triennial Conference in Ho Chi Minh City 2012.

Saturday Evening
The evening commenced with a wonderful talk from guest speaker Ian Johnstone, known for his presentation of the original Crimewatch series and various radio and TV broadcasts.

After a sumptuous meal, we could dance the night away with a rock and roll band featuring songs from the 50's, 60's and 70's.

Sunday
Sunday morning saw a little more precipitation than was expected, however the usual AGM's and forums were not deterred.

WARO AGM
At the WARO AGM Margaret ZL1MB was re-elected as President, Cathy ZL2ADK was elected Vice President, Lynnette ZL1LL Secretary and Janet ZL1JAN Treasurer.

Topsy ZL2LS won the Thelma Souper Memorial Contest, with Sharon ZL2BQ second and Catherine VK4GH third.

The OM section went to Bill cousins ZL2AYZ.

SPAM and OTC
The SPAM and OTC AGM's were also held on Sunday morning , with no change in either.

AMSAT - ZL AGM
25 members attended the AGM, chaired by President Terry Carrell ZL3QL - there were no changes to the committee. Kiwisat progress is now very near completion hardware wise and software is progressing well.

Kiwisat Update
Over 45 members attended the Kiwisat forum. Ian ZL1AOX ran a presentation which included a short video by Fred Kennedy ZL1BYP on the clean room at Massey University in Albany showing the almost complete Kiwisat.

Ian then introduced via Skype, Clayton Gumbrell VK1TKA in Canberra Australia, who described the software development - a first at an NZART conference.

Terry Osborne ZL2BAC completed the presentation showing his progress with the Ground Station Telemetry decoding software.

Other forums
Included in the Sunday afternoon programmes were forums on Police Digital Radio by ZL2FY, STSP Repeater Build by ZL2TW, Voice Over Internet Protocol by ZL2UDF, VHF/UHF by ZL4PLM, APRS by ZL2MAX, PIXIE 11 - JOTA Construction Project by ZL1TGC, and D-Star by Eddie Ross from ICOM.

Sunday evening is to be entertainment by Don Wilson whose claim to fame was the song BIG NORM back in the 1970's.

Upper Hutt Branch
Finally thanks goes to the Upper Hutt Branch for putting on another excellent annual conference.

****

FMTAG Notes For HQ Infoline-231
Outage of Web-Based MED Services
Members will now be aware that all of the MED's web-based services were offline on the 18th, 19th and part of the 20th of May.

The impact on the Amateur Radio Service was relatively minor: repeater licence applications could not be processed during the outage.

However, the same problem that affected the Callsign list, provided by the MED for Call Book, has re-appeared: all of the Temporary Callsigns that have expired in the last two years are displayed as if they are still current.

We await an updated report from the MED.

Final Recommendations
NZART Council, at its face-to-face meeting on 3rd June, approved the following applications, which can now proceed to licensing by the MED.

1.. Branch 63 Upper Hutt has applied to add the D-STAR DV digital mode to, and change the location of, its Mount Climie 860 repeater. The new location will be Topo50 map reference BP32 798.83 423.94. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 438.600 MHz and the receive frequency can remain on 433.600 MHz, and that there will be no interference to other stations.
2.. Branch 74 Wellington VHF has applied to increase the power of, and add the P25 digital mode to its 6625 repeater located at Hawkins Hill, Topo50 map reference BQ31 449.78 236.89. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that the repeater's transmit frequency can remain on 146.625 MHz and the receive frequency can remain on 146.025 MHz, and that there will be no interference to other stations.
3.. Branch 74 Wellington VHF has applied for a 32 cm repeater located at Colonial Knob, Topo50 map reference BP31 513.58 426.16. FMTAG has chosen a repeater transmit frequency of 927.800 MHz and a receive frequency of 921.200 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
4.. Branch 74 Wellington VHF has applied for a 6 m repeater located at Colonial Knob, Topo50 map reference BP31 513.58 426.16. FMTAG has chosen a repeater transmit frequency of 53.750 MHz and a receive frequency of 52.750 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
5.. Branch 85 Mercury Bay has applied for a National System repeater located at Opito Bay, Topo50 map reference BA35 513.81 313.73. FMTAG has chosen a repeater transmit frequency of 434.800 MHz and a receive frequency of 439.800 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
6.. Branch 85 Mercury Bay has applied for a National System UHF Linking Station (ULS) located at Opito Bay, Topo50 map reference BA35 513.81 313.73, to link to Mt Edgecumbe. The link transmit frequency will be 434.975 MHz and the receive frequency will be 439.975 MHz. An Engineering Evaluation, in accordance with the MED's Radio Licence Certification Rules (PIB38), shows that there will be no interference to other stations.
Comments and Applications

Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

Radio Amateurs Assist American Red Cross, Served Agencies After Joplin Storm:

On Sunday, May 22 at 5:41 PM, the single deadliest twister in almost 60 years -- and the second major tornado disaster in less than a month -- swept through the southwestern Missouri city of Joplin, slamming straight into St John's Regional Medical Center. The tornado killed at least 117 people. As soon as the storm cleared, area Amateur Radio operators responded to requests from the American Red Cross and local hospitals to provide communications support.

FEMA Administrator Calls Amateur Radio
ï¿½The Last Line of Defenseï¿½
In an FCC forum on earthquake communications preparedness, Federal Emergency Management Agency (FEMA) Administrator Craig Fugate described the Amateur Radio operator as ï¿½the ultimate backup, the originators of what we call social media.ï¿½ The forum-- held May 3 at FCC Headquarters in Washington, DC -- brought together officials from the White House, the Department of Homeland Security (DHS), the United States Geological Survey (USGS), FEMA, the FCC and the private sector. Fugate and FCC Bureau of Public Safety and Homeland Security Chief Jamie Barnett gave the opening remarks.

HF Newsreaders Sought

Additional HF newsreaders are being sought to share the workload of Se&#65533;n EI7CD and Ger EI4GXB, especially as the summer months are approaching. It is hoped that a panel of newsreaders can be established nationwide thus making the workload easier for all concerned, and allowing the HF news to be broadcast from different locations around the country.

If you are interested in joining the panel please contact Ger McNamara EI4GXB at ei4gxb/at/gmail/dot/com or on 087 2532512

Licence Examination

You will have the opportunity to sit your amateur radio licence examination within the next few weeks.

The next exam will be held on Thursday, 7 July, at 2.00 p.m. in the ComReg offices in Dublin. The closing date for receipt of applications to sit this exam is Wednesday 22 June. Full details including entry procedure and examination fee are available at www.irts.ie/exam or just click on the 'Licence Exam' button on the IRTS webpage.

Blarney Castle Activation

North Cork Radio Group, using their Club Callsign, EI1NC/P, will be activating Blarney Castle over the June Bank holiday Weekend 4th 5th and 6th of June 2011.

For more details see www.cashota-ire.org

Oxburgh Hall Activation

Bittern DX Group will be activating Oxburgh Hall as GB2OH from the 16th June till the 19th June.

Oxburgh Hall, Norfolk was built in 1482 by the Bedingfield family, who still live in parts of the house but the property now maintained by the National Trust. Sir Edmund Bedingfeld was granted a license of castellation by Edward IV, he built this medieval, moated manor house as a glorious status symbol, romantically adorned in the nature of a castle. More information can be found at the Bittern DX website or www.cashota.co.uk

---

North Cork Radio Group

The North Cork Radio Group would also like to inform listeners that Lisa EI9GSB now transmits the IRTS weekly news bulletin on Tuesday evenings at 8pm on the Duhallow Repeater, EI7SMR. The output freq is 430.925 MHz with the input on 438.525 MHz (+7.6 MHz offset), a CTCSS tone of 103.5 Hz is required. Reports are welcome via the call-in directly after the news transmission, SWL reports can be e-mailed to news at ei1nc.com or via our Facebook page.

South Dublin Radio Club

Following the sucessful kit soldering last week, this Tuesday 7th of June the radio club will be demonstrating how to receive the new TV service "Saorview"

Members and visitors will get to see a live off-air demonstration of the Saorview TV service as well as an explanation of the various ways to receive the new channels. There will be a quick discussion on the technology used and the various ways to combine Saorview and UK freeview with hard disk recording.

Visitors are always welcome

Directions are on the club website: http://www.southdublinradioclub.ie

---

Introduction to Amateur Radio

The Mayo Radio Experimenters Network are holding a series of practical hands on open days throughout the summer months. The events will start at 13.00 approx (weather permitting) and will take place on the following dates: Sunday June 12th Sunday July 10th Sunday August 14th Sunday September 11th

Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence.

The location for all events will be the car park at the Halfway House on the Castlebar to Westport Road. If you would like further details please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/eircom/dot/net) , email David Hatfield EI3ECB on ei3ecb/at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

South Eastern Amateur Radio Group

For the fourth successive year, South Eastern Amateur Radio Group participated in the Geopark Communications weekend using the callsign EI2GEO from Tankardstown, Co. Waterford on the Copper Coast Geopark.

The Copper Coast gets its name from the 19th Century copper mines that were once predominant in the area. The Copper Coast consists of 25 kilometres of spectacular coastline. Oceans, volcanoes, deserts and ice sheets all combined to create the rocks, which provide the physical foundation of the natural and cultural landscapes of the Copper Coast. The Copper Coast is an outdoor geology museum with geological heritage that reflects a variety of environments under which the area has evolved over the last 460 million years. Sedimentary and volcanic rocks illustrate the closure of the Iapetus Ocean, the resulting volcanic activity, evidence of the collision of two continents leading to the creation of Ireland and finally the effects of glaciation from the Ice Age. Cross-sections of these are exposed on the many spectacular cliffs along the Co. Waterford coastline.

For radio amateurs and SWLs around the world who contact or hear Geopark stations, the English Riviera Geopark is offering a special commemorative European Geoparks Network radio amateur certificate for contacts with GB6GEO (instant qualifier), or two Geopark stations excluding GB6GEO. (this award will also apply to SWL's on a heard basis). For information on awards, contact Martin Foster G3VOF (details are on QRZ.com).

SEARG would like to thank everyone that contacted or participated in EI2GEO over the weekend. It's been a very successful Geoparks Communications Weekend with many QSOs worked (both SSB and Phone) despite the bad band conditions on HF. It was an added bonus that the ATV link worked so well. A live link from the Geopark with cameras mounted both inside and outside the 'shack' were fed to the local ATV repeater on 23 cms and a Ustream feed was available on the Internet. Special thanks to Jim Farrell (EI8IG) who provided the camper van (and the home-brew beer) and of course Paula McCarthy from the Copper Coast Geopark management for facilitating and supporting us over the past few years.

SEARG are looking forward to next years event!

DX News

The visit of Pope Benedict to Croatia has resulted in the issuing of a special callsign to commemorate the event. Prefix hunters will be glad to work 9A16PB which is on the air until 13 June. QSL info is via 9A2MF.

John K9EL will be active from the Caribbean island of Saint Martin as FS/K9EL from 7 - 19 June. He will use CW, SSB and some RTTY on all bands 80 - 6m during his stay there. QSLs go via the home call and logs will be uploaded to Logbook of the World.

For those who still need Bonaire on 6m now is the time to look for PJ4E which will be operated by W0SD, W0OE and PJ4NX until 19 June. There will also be some activity on the HF bands with the emphasis on RTTY.

Dave W5CW is back in the Turks and Caicos Islands and has been very active as VP5/W5CW on all bands 160 - 6m. He remains there until 14 June and QSLs go to the home call.

The Japan A1 Club is celebrating the 200th Anniversary of the birth of Samuel Morse by airing the call 8J1MORSE until the end of 2011. Calls from other areas of Japan to look for are 8J1MORSE/2, 8J1MORSE/3 etc. Not surprisingly CW will be the preferred mode.

Planned DXpedition to the Island of Navassa

Official authorization has been granted by CONATEL, the communications regulator for Haiti to use the call sign "HH0N". Radio Club D'Haiti, can now use the call sign "HH0N" during the month of January 2012.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th-May, through Sunday, 5th-June there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PY0T, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK0M, VK9C, VP2V, VP5, VP8, VP9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Operator Bill/VK4FW and Eddie/VK4AN are expected to be active as 3D2T and 3D2A (prior to the C21AA Nauru DXpedition - see C2 below), from Nadi between October 24th and November 9th. No details of their activities (bands/modes) on the island were not provided. However, it

was mentioned that they will participate in the CQWW DX SSB Contest (October 29-30th), possibly as Single-Ops or Multi-Op (category was not provided). QSL 3D2T via VK4FW and 3D2A via VK4AN.

3D2/R, ROTUMA (Update/Change). South Korean operators Choi/HL5FUA and Yoon/6K2GCW will be active as 3D2CJ from Rotuma (OC-060) during sometime in September (not between June 17-24th, as first announced). Activity will be on 80-6 meters (no 160m) using CW, SSB and the Digital modes. QSL via HL5FUA, direct or by the Bureau. For more details and updates, see: http://www.dxpedition.co.kr/rotuma_2011/index.html

4J, AZERBAIJAN. Mac, JA3USA, will be in Azerbaijan between June 6-10th. He was assigned the callsign 4JA3USA. Activity will be on the HF bands, mainly SSB. QSL via his home callsign.

8J1, JAPAN. Members of the Japan A1 Club will activate the following special callsign until December 31st: 8J1MORSE, 8J1MORSE/2, 8J1MORSE/3, ...etc, according to the district from which they are active from. Activity is to celebrate 220th anniversary of Samuel Morse's birthday. Operations will be mainly CW, with some SSB (to explain the novices how to join the CW community). Some special awards are also available too. QSL by the Bureau or direct (SAE+IRC) to:
8J1MORSE, 1-14-1-11-B Yoshino, Higashi-ku, Nagoya, 461-0027, JAPAN.
Logs will be uploaded to LoTW as well. For more detail, the English rules and information are available at:
http://8j1morse.a1tokai.net -or- http://8j1morse.blogspot.com

AH0, MARIANA ISLANDS. Toru, JI3QBQ, will be active as AJ2L/AH0 from Saipan Island (OC-086, USI NI002S, WLOTA 1333), Northern Mariana Islands, between June 11-14th. Activity will be on the HF bands. QSL via JI3QBQ.

C2, NAURU (Update). Excerpts from a "C21AA Nauru DXpedition" #2 press release dated June 4th, states members of Pacific DXers are pleased to announce that 6 operators will be active as C21AA from Nauru between November 10th and December 6th, with 3 complete stations on HF as well as a dedicated 6m station. The confirmed team so far consist of Art/NJ7N, Tim/NL8F, Eddie/VK4AN, Bill/VK4FW and 2 more operators to be announced later. The press release also states, "Nauru is currently ranked at 44 on the world wide wanted list, 31 in most of EU and 19 on the wanted Digital mode list." The team fully intends to operate on CW, SSB, RTTY and PSK31, and on all bands 160-6 meters. For logistical reasons, all equipment will be taken on same flight as 'excess baggage'. QSLs will be managed by Pacific DXers, with the task going to Bill, VK4FW. QSLing is available three ways..... direct, by the Bureau or online with Paypal 'postage' support. To request a QSL, and choice/pick the method you want to use, go to: http://www.vk4fw.com/oqrs.php
While each individual operator is responsible for their own personal expenses including air flights, accommodations, food etc..... they are seeking support to help offset other costs, such as the large excess baggage charge, hotel room just for the radio equipment, QSL printing, QSL postage for Bureau cards, phone calls associated with planning, purchase of consumables and, most important of all... the donation of

some equipment to native Nauruan hams! A special Paypal account has
been set up for support at: dxpedition@westnet.com.au (Just add
your callsign/name and any comments in the 'comment/message' box.)
All donors will be listed on the Web site, which is still 'under con-
struction', so the following link doesn't work yet:
http://C21.pacific-dxers.com/supporters.html [unless anonymity preferred]
PLEASE NOTE: A special memento will be sent to donors who support them
with 50 USDs or more. These donors will be listed on the QSL card.
Organizations that provide support will have their logo and link placed
on the Web page as well as their logo on the QSL Card [unless anonymity
preferred].

E4, PALESTINE. Peri, HB9IQB, has been granted a license by the Ministry
of Telecommunications & Technology in Ramallah, and plans to be active
as E4/HB9IQB around the second and third week of December 2011. Activity
has been granted for 160-10 meters, using 100 watts and operations on
CW, SSB and the Digital modes. Peri states, "I will probably concentrate
on CW and the WARC bands, depending on W6/7 and JA openings. Low band
not planned. The rig is an Elecraft K2/100 ATU powered by an Alinco PS
DM-330; Scheunemann paddle, Heil Pro Set 4, Microham periphery and Note-
book. I will be using DX Wire masts and wires for vertical dipoles and
verticals." QSL via his home callsign, by the Bureau or direct (w/SASE
and 2 USDs or 1 new IRC. Log will be uploaded to LoTW one month after
the operation. For more details and updates, watch:
http://www.hb9iqb.ch/palestine.html#Op

ET, ETHIOPIA. The Ethiopian Amateur Radio Society (EARS) club station,
ET3AA, is once again active and on the air as of May 30th. According to
the IARU Region 1 Web page <http://www.iaru-r1.org>, " Professor Doctor
Heiko Schroeder, Head of the Technical Faculty of the University of Addis
Ababa and Hans Blondeel Timmerman, President of IARU Region 1 cut the
ribbon" to reopen the new shack. This is all thanks to donations from
the organization "STARS" and others individuals that helped to revive
ET3AA.An effort led by Sid, ET3SID, the EARS club installed their shack
and built antennas on top of the roof of the Technical Faculty at the
University of Addis Ababa. The station now has a 17 element 6-30 MHz
log-periodic antenna. EARS hopes that by the end of July they will have
more than 25 club members to take the Radio Amateur Exam. To read the
complete story, go to: http://www.iaru-r1.org

FS, FRENCH ST. MARTIN (Postponed!). John, K9EL, who was expected to be
active from French St. Martin this coming week (see OPDX.1012), informed
OPDX of the following on June 4th: "A few days ago I developed chest
pains and on Friday I underwent an operation to install three stents in
arteries around my heart. As a result, I am not able to travel to FS,
Saint Martin, and PJ7 as planned on June 6th. I will advise if I am
able to re-schedule for later in the month."

FW, WALLIS & FUTUNA. Laci, HA0NAR, and two other operators will be active
as FW0R from Uvea Island (aka Wallis, OC-054, DIFO FW-001, WLOTA 0389,
WW Loc. AH16VS) next year (2012) between Janaury 25th and February 23rd.

Operations will be from Vailala village (Hihifo district). They plan to have two stations on the air with amps operating on 160-6 meters using CW, SSB and RTTY. Focus will be on the lower bands, especially 160/80/40/30 meters using Spider (18m) verticals. A week long side trip will be also organized to Futuna Island (OC-118, DIFO FW-017, WW Loc. AH05WQ) for the IOTA hunters in early February. The team also plans to take part in the ARRL DX CW Contest (February 18-19th). For more info/updates and an online logsearch, see the Web page at: http://www.ha0nar.hu

IOTA NEWS.....
AS-051. Operators Mike/KM9D and Jan/KF4TUG are currently anchored in Pulau Singa Besar, Langkawi, Malaysia. Mike has been on the air as 9M2/KM9D. Activity has been on 30/17/15 meters CW. Length of stay is not known. QSL via OM2SA.

AS-137. Operators Pan/BD4QH, Zhiqun/BD4QK, Xinrong/BD4QR, Yun/BH4QBV, Zhixin/BH4QBZ, BH4QDT, BH4QGH and BH4QGR will be active as BY4QA/5 from the Island of Tantou Shan between June 30th and July 3rd. Activity will on the HF bands using SSB as the main mode but will also operate some CW. The team will use an IC-7000 and FT-450 into a Cushcraft R8 and A3DX (3 Bands/3 element Yagi). QSL via BD4QK, direct or by the Bureau.

AS-160. Operators Fan/BA1RB, Zhao/BD1UUK, David/VO1AU, Zhang/BD1BYV, Wang/BA1AAX, Chenxi/BD1WC, BD1VF, Wei/BD1QXU, Vange/BA7IO, Jack/BA4ALC, Chen/BA7CK, Dale/BA4TB, Zheng/BA4EG, Qui/BA7NO, Zhou/BD4SX, Rumei/BD7LMD and Paul/BA7JS will be active as BY1RX/4 from the Island of Fu Rong between July 2-9th. Activity will be on all bands and modes. QSL via BA4TB, direct or by the Bureau.

AS-191. (POSTPONED!) Operators Bert/DK6IR/7Z1IR and Hamdi/7Z1TT, who were expected to activate Marzok Island (for the first time ever) in the Red Sea Coast Centre (Al Madinah/Makkah Province) Group this past weekend, had to postponed their activation until possibly this coming weekend, June 10-12th. QSL via DK6IR.

EU-008. Operators Nick/G0HIK, Norman/G7MRL, Dave/G3VUS and Ivan/G3IZD will be active as GM0HIK and GM3IZD from the Isle of Islay (IOSA NH22, SCOTIA CS25, WLOTA 1826) between June 25th and July 1st. Look for GM0HIK to be active on the 50/70/144 and 432 bands, skeds via KST. Look for GM3IZD to be active on the HF bands. QSL both callsigns via the RSGB Bureau or direct via the address on QRZ.com.

EU-016. Csaba, DH7KU, will be active as 9A/DH7KU from Brac Island (ACIA IC-657, CIA-04, IOCA CI-010, MIA MC-042, WLOTA 0416) between August 21st and September 2nd. Activity will be holiday style on the HF bands. Csaba will also activate Ciovo Island (NOT IOTA, ACIA IC-620, CIA-07, IOCA CI-013) during his stay on Brac. QSL via his home callsign, direct

or by the Bureau. For updates and more details, see the
Web site at: http://www.mydarc.de/dh7ku

EU-038. Alex, DL1KD, will be active as PA/DL1KD from Texel Island
(WLOTA 0043) between June 6-20th. Activity will be on the
HF bands using CW and SSB. QSL via his home callsign, direct
or by the Bureau.

EU-038. Alex, IZ4AMS, will be active as PA/IZ4AMS from Texel Island
(WLOTA 0043) between August 14-17th. Activity will be holiday
style on the HF bands. QSL via his home callsign, by the
Bureau or direct.

EU-125. A group of German Scouts will once again be active as OZ1RDP
from Romo Island (DIA NS-001, Grid Loc. JO45) between June
10-14th. Activity will be on SSB and BPSK31, mainly on
80/40/30/20 meters, and on 2 meters JT65. QSL via DL9BCP,
direct or by the Bureau.

EU-127. Alex, IZ4AMS, will be active as DL/homecall from Helgoland
Island (DID N-014, WLOTA 0518) between August 11-13th.
Activity will be holiday style on the HF bands. QSL via
his home callsign, by the Bureau or direct.

EU-165. An Italian group will be active as IM0P from San Pietro Island,
Sardinia, between July 23rd and August 1st. Activity will be
on all bands and modes. The team also plans to participate in
the RSGB IOTA Contest (July 30-31st). Operators mentioned are
Stefano/IS0ANU, Paolo/IS0BGL, Carlo/IS0JOO, Nicolangelo/IS0BMU,
Franco/IS0EUJ, Giorgio/IZ3KVD, Vittorio/I1BUP, Amaele/I1IZB,
Clay/IZ1DNJ, Dan/I5OYY and Simone/IK5RUN.

EU-170. Csaba, DH7KU, will be active as 9A/DH7KU from Pag Island
(ACIA IC-188, CIA-32, IOCA CI-082, MIA MC-282, WLOTA 1796)
between June 12-22nd. Activity will be holiday syle 40/20
meters using CW. QSL via DH7KU, direct or by the Bureau.
For updates and more details, see the Web site at:
http://www.mydarc.de/dh7ku

EU-174. Laci, HA0NAR, will be active again as SX8R from Thassos Island,
Greece, between July 25th and August 1st. His activity will
include the RSGB IOTA Contest (July 30-31st). Before the contest
he will be active on all HF bands (160-6m) using CW, SSB and
RTTY, plus 6 meters. He plans to use vertical antennas. QSL via
his home callsign, by the HA Bureau or direct.

OC-187. Kan, KU2F, will be active as KU2F/VK4 from Lizard Island
between July 18-21st. Activity will be holiday style on 40-10
meters using CW and SSB. QSL via JE1SCF.

KH2, GUAM. Toru, JI3QBQ, is now active as AJ2L/KH2 from Guam (OC-026)
until June 7th. Activity has been 40/17/15/12 meters CW. QSL via JI3QBQ
only (not via AJ2L).

KH4, MIDWAY ISLAND (Update). Joe, KH4/W5FJG, reports this past week that they are in the final stages of getting all the required approvals to operate year round from Midway Atoll. He expects to hear something in the next week or two. Joe also announced that Dick, N7RO, will be the QSL Manager for his activity. A few equipment donations are being sent to Joe for his station. He reports that a much needed 12VDC power supply is on its way as well as a R-5 vertical antenna. Right now Joe is using one IC-7000, but only a 12 Amp DC power supply, so his output power is limited to about 35/40 watts. His activity has been mainly on 20 meters SSB around 14307 kHz. On June 3rd, Joe reported that he has received the R-5 antenna, and it is now installed. He states that he has been on 15 meters SSB.

KH6BZF PROPAGATION FORECAST/REPORT (June 6-12th)....
Jun 06 HN SOLAR REFERENCE KEYS
Jun 07 HN --------------------
Jun 08 AN BN - Below Normal
Jun 09 AN AN - Above Normal/Geomagnetic Level is QUIET
Jun 10 AN LN - Low Normal
Jun 11 HN HN - High Normal/Geomagnetic Level is UNSETTLED
Jun 12 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MC0, WALES (IOTA Op). The Strumblehead DX & Contest Group will once again be activating Ramsey Island (EU-124) using the club callsign MC0SHL for their annual mini trip/holiday between June 9-13th. The difference this year is the operation will be more relaxed and on air for fun rather than for any contest, although over the weekend of June 11-12th, there is the WFF activity weekend with the island having the designated site of GWFF-072 (see http://www.m0oxo.com and the WFF area on Charles Web page). The guys will be on all bands from 80-6 meters, using 2 FT1000MP MkV's and a K3. They will also be taking amplifiers for each band and will also have the facilities for RTTY this year. Antennas will consist of 2 home-brew Hexbeams, built by Ant (MW0JZE), verticals for 80/40/30m (again home made by Ant and the team). All details of the island and previous activations by the group are on their Web site at:
http://www.mc0shl.com
All QSL requests go through their manager Tim, M0URX, with OQRS facilities on his Web site at: http://www.m0urx.com
All logs will be uploaded to LoTW and Clublog (http://www.clublog.org), either during the trip if they can get a reliable internet connection or immediately after they get back to the mainland and the farm.

PG6, THE NETHERLANDS (Special Event). Look for special event station PG6N to be active during the "Coastal Week" (Week van de Zee) starting

on Saturday, June 11th, and ending on "Kids Day" Saturday, June 18th.
Activity will from the Noordwijk Lighthouse Station (ARLS NET019). They
plan to be on the HF bands as well as 6 and 2 meters because of the
Es-period. PLEASE QSL via the Bureau. For more details see:
http://www.qrz.com/db/PG6N --or-- http://pg6n.jouwweb.nl/english
Also, join their Facebook page at:
http://www.facebook.com/home.php?sk&#65533;oup_173489109367097

JH1AJT, in Thimpu, Bhutan, during the CQWW WPX CW Contest last weekend.

QSL STATUS/LOTW FOR VU4PB. A press release (#9) by Prasad, VU2PTT,
dated June 2nd, states: "QSL status and LoTW uploads for VU4PB is
now on the website at:
http://arsi.info/dxpeditions/vu4pb-mar-2011/113-press-release-9
We have received many online requests for QSLs and our QSL Manager Joe,

W3HNK, as always has been efficiently handling these as well as the direct requests for QSLs that he has been getting. Joe has reported that he has already completed most of the direct and OQRS requests. OQRS requests for QSLs via bureau will also be addressed shortly. We are thankful for the support of all our donors and by end of June we hope to be able to upload our log to ARRL LoTW for members of clubs who supported us as well as for individual donors. We will now initiate the collection of member lists from those clubs - lists can be sent to <webmaster@arsi.info>. As mentioned before the expedition the rest of the LoTW uploads will definitely happen before March 2012."

QSL RECEIVED VIA LoTW: EX8AB, ZS9Z/1

QSLS RECEIVED VIA MAIL: 4S7BRG, 7X2BK, 7Z1TT, A61BK, A71BU, AH0/AB2RF, CE9/VE3LYC, E74A, J28RO, J5NAR, J88DR, JX9NOA, LU8EEM, N0TG/CY0, OA4/DL5YWM, P29NI, PJ4/K4IQJ, SV1UT, T6JC, T88AA, TG9AHM, V73NJ, V73NS, V85TL, VP2MMM, VP5/NY6X, VP8ORK, VP9/AA1AC, VP9/W6PH, VU4PB, YI1RZ, YI9NS,YT1E, Z21BB, ZB3R, ZS2DL and ZS8M

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

S9, SAO TOME AND PRINCIPE. Operators Matt/K0KKO and Ed/K0GUV will be active from Ilheu das Rolas (AF-023), Sao Tome, using the callsigns of S92DX, S9CW and S9SX, between October 21-27th. Activity will be on the HF bands and 6 meters. They plan to have two 6 meter stations on the air (50.105/SSB and 50.105.7/CW). No other details were provided. For updates, watch: http://www.k0kko.net/pb/wp_5bd6e10c/wp_5bd6e10c.html

SOUTH SUDAN DXCC STATUS (by Martti Laine, OH2BH). A press release sent out by Jarmo, OH2BN, dated June 2nd, states: "With great anticipation, DXers the world over are looking forward to the 9th of July this year as the predicted day of South Sudan's declaration of independence. Indeed, that declaration is set to happen, but it will not yet guarantee the birth of a new DXCC entity, at least at that time. The DXCC rules are written in such a way that only a new country's membership in the United Nations and/or its ITU country prefix will result in the anticipated DXCC counter. The U.S. State Department Geographer's list of Dependencies and Areas of Special Sovereignty obviously does not apply in this case.
The opinion from the ARRL is that no exceptions will be made in this case. They state that the event date - i.e. declaration of independence - will not cause potential QSOs to be counted retroactively. Rather, Newington categorically assumes that U.N. membership, which will most likely come first, followed by the release of an ITU prefix by the U.N. telecommunications agency, will lead to country status.
The prospect of a new country has taken an unexpected turn just recently. The country's borderline has never been settled between North and South Sudan in the area (Abyei) where most of the oil reserves are located. It was agreed under the 2005 Peace Agreement that the border issue will be resolved by the people in that province. A referendum to settle the matter has not happened. Instead, the North (ST2) has entered the disputed province with force. Additionally, the North has stated that they will not support an independent State in the south unless the contested region

is theirs. The matter now remains totally in limbo.
<http://www.bbc.co.uk/news/world-13560829>
While the amateur radio project announced earlier this year by 5Z4DZ, ST2AR, W3UR and OH2BH is well underway, it is not yet reasonable to swing your antennas toward South Sudan, as we speak. The project has two well-known DXers now permanently based in South Sudan: SM7PKK and YI1DZ/ST2DZ. The knowledge and the professional presence are in place to proceed with an immediate activation as soon as the above country status matters are resolved......More news to follow."

T48, CUBA (Rare 6m Grid). Members of the Federaci&#65533;n de Radioaficionados de Cuba&#65533;s in Las Tunas, eastern Cuba, will be active on 6 meter from the Grid Square FL10MW, during the next "ARRL June VHF QSO Party" (June 11-13th) using the contest callsign T48K as a "limited multi-operator" entry. This will be the very first time in the history that a ham radio station transmits from this particular square on this band. Operators will be Carlos/CO8CML, Douglas/CO8DM, Ernesto/CM8GJ and Ra&#65533;l/CO8ZZ and will use an Yaesu FT 857 running into a five elements yagi from F9FT.
QSL via DK1WI.

TM6, FRANCE (Special Event). Look for special event station TM6JUN to be active until June 15th. Activity is to commemorate "D-Day" (June 6, 1944) in Normandy. Operations will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL via F5SAZ, direct or by the Bureau.

UT1, UKRAINE ("Berestetskaya Battle - 360 years Award"). The members of the Rivne youth radio club - "Rivne DX Club" and the management of the "National Historical and Memorial Preserve Golf Berestetskaya Battle", have now made a new award/diploma available. The award/diploma called "Berestetskaya Battle 360 years" was founded in memory of the battle, which took place in 1651 between the Ukrainian troops B. Khmelnitsky and the Polish army under John Casimir near Berestechko. To fulfill the terms of the award/diploma "Berestetskaya battle 360 years", it is necessary to work UT1KWA between June 20th and December 31st (2011) or UT1KWA/p from the territory of the "National Historical and Memorial Preserve" in any mode on any amateur bands between June 20-26th (2011). The award is issued electronically and in paper form.
1. For stations in Ukraine a free digital certificate is issued as the result of a two-way radio contact with UT1KWA or UT1KWA /p. (At the request of Ukrainian applicant, you may obtain a paper certificate in the Ukraine by sending the director/manager of the award 5 UAH for postage to send the diploma in the mail with your return address).

2. For stations around the world a free electronic certificate is issued. Applicants should send an E-mail to the manager of the diploma at ut1kwa@mail.ru with QSO data with UT1KWA or UT1KWA/p and a name (optional name) to send the diploma (paper diplomas from Ukraine are not given). The award manager: "RIVNE DX CLUB" UT1KWA, P.O.Box 85, Rivne, 33027, Ukraine.

Watch the following Web page for details at: http://radio-rivne.rv.ua

V6, MICRONESIA. Aaron, W6ANM, will be active as V63FAA from Kosrae (OC-059) between July 26-29th, and Pohnpei (OC-010) between July 30th and August 4th. Activity will be focused on 40 and 20 meters using CW and SSB. A contact can be scheduled via the E-mail address on QRZ.com for any HF band. QSL via LoTW or direct to W6ANM (please include SASE).

VK9L, LORD HOWE ISLAND. Chris, VK3FY, is expected/likely to be on Lord Howe Island (OC-004) for a work assignment sometime during 2011, dates TBA. He will only be able to operate during the week and most likely evenings, as work will take precedence. Modes most likely are to be CW, SSB and some RTTY. QSL via VK3HF.

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

553. Weekly Highlights of Solar and Geomagnetic Activity, 30 May - 05 June 2011

Newsgroup: rec.radio.amateur.misc
Date: 2011-06-07 21:30:09 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20110607213001.D3B3C33C5F@panix2.panix.com>

# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
30 May - 05 June 2011

Solar activity was at low levels during 30 May - 04 June with
C-class flares from Regions 1226 (S21, L = 037, class/area Eki/360
on 29 May) and 1227 (S19, L = 022, class/area Dsi/190 on 31 May). A
C3/2n flare at 02/0746 UTC from Region 1227 was associated with an
Earth-directed partial-halo CME.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels from 30 May - 04 June and returned to normal levels on
05 June.

Geomagnetic field activity ranged from quiet to major storm levels
during the period. Activity was at quiet to active levels during 30
May - 01 June as CH HSS effects persisted. A CME passage occurred on
01 June which caused a brief period of active levels. Activity
decreased to quiet to unsettled levels on 02 June as CH HSS effects
subsided. Quiet levels occurred during 03 - 04 June. A geomagnetic
sudden impulse (SI) occurred at 04/2045 UTC (54 nT, Boulder USGS
magnetometer) associated with the CME observed on 02 June and was
followed by active to minor storm conditions on 05 June with major
storm conditions observed at high latitudes.

Forecast of Solar and Geomagnetic Activity
08 June - 04 July 2011

Solar activity is expected to be at low levels throughout the period
with a chance for an isolated M-class flare from Region 1226 until
it departs the west limb on 10 June.

The greater than 10 MeV and 100 MeV proton flux at geosynchronous
orbit are expected to be above alert threshold levels through 11
June due to a fast moving halo coronal mass ejection (CME) observed
early on 07 June. A return to background levels is expected on 12
```

June and is expected to stay below threshold for the remainder of the period.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 08 - 15 June due to the effects from both the 02 June CME and the 07 June CME. Normal to moderate levels are expected to return until 27 June following a recurrent coronal hole high speed stream.

Geomagnetic field activity is expected to be at quiet to unsettled levels during 08 June as coronal hole high speed stream (CH HSS) effects begin to wane. Active to major storm conditions are expected on 09 June due to the effects of the halo CME observed on 07 June. Activity is expected to decrease to unsettled to active levels during 10 - 12 June due to residual effects of the CME and another CH HSS. Activity is expected to decrease to mostly quiet levels on 13 June as CH HSS effects subside. Quiet levels are expected during 14 - 22 June. Quiet to unsettled levels are expected from 23 - 26 June due to another recurrent CH HSS. A return to quiet conditions is expected on 27 June as the effects of the CH HSS subside.

554. [DXNL] DXNL 1731 (Jun 8, 2011)

DXNL 1731 - Jun 8, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

ET - ETHIOPIA
Hans Blondeel Timmerman, president of the IARU Region 1, and
Heiko Schroeder, head of the Technical Faculty of the University of
Addis Abeba, re-opened the clubstation ET3AA of the Ethiopian amateur
radio society (EARS) on May 30. Sid,ET3SID, put much labour in the new
shack and built many new antennas on the roof of the university.
A more detailed report can be read at: http://www.iaru-r1.org

GJ - JERSEY, EU-013 / GU - GUERNSEY, EU-114
YL Silvia,EA1AP, and OM Alberto,EA1SA, are going to activate the
Channel Islands Jersey (EU-013) and Guernsey (EU-114) from Jun 12-21.
They will sign MJ/EA1AP and MJ/EA1SA from Jersey until Jun 17 and then
MU/EA1AP and MU/EA1SA on Guernsey from Jun 17-21. They will work in
CW/SSB/RTTY on 80m-6m and want to join the IARU 50 MHz Contest also.
The preferred frequencies of Silvia and Alberto are:
CW: 3504, 7004, 10104, 18074, 21024, 24894, 28024, 50103 kHz
SSB: 3780, 7056/7180, 14195, 18145, 21295, 24945, 28495, 50120 kHz
RTTY: 3580, 7035, 10140, 14080, 18100, 21080, 24920, 28080 kHz
QSLs via bureau, direct or LoTW to their homecalls.
More information is at: http://www.gdgdxc.net/channel_islands/index.php

JW - SVALBARD, EU-026
Roar,LA1EOA, will be active as JW1EOA in SSB on HF from Longyearbyen
on Spitsbergen (EU-026/WLOTA 0125) from Jun 10-15. His preferred QRGs
are 7138, 14220, 18125, 21280, 28480 and 50160 kHz.
QSLs via bureau or direct to his homecall.
You can visit his homepage at: http://la1eoa.wordpress.com

KH0 - NORTHERN MARIAN ISLANDS, OC-086
Toru,JI3QBQ, plans to hit the airwaves on all bands signing AJ2L/AH0
from Saipan (OC-086, USI NI002S, WLOTA 1333) from Jun 11-14.
QSL cards should be sent via JARL bureau or direct to JI3QBQ.

V2 - ANTIGUA AND BARBUDA, NA-100
The "Midwest 6 Meter DX Group" members Dave,W9DR (V25DR),
Tom,W9AEB (V25TP), and Dave,K9UK (V25DD), are working "holiday style"
from Antigua (NA-100) from Jun 14-28. Of course, main emphasis will be
put on 6m (50.115 MHz) by V25DR but the other OMs will be QRV also in
CW/SSB/PSK on 80m-10m. QSLs via homecalls. For more information check:
http://www.6meterdxgroup.com/Antigua_DXpedition.html

VP2M - MONTSERRAT, NA-103
John,KB4CRT, will be on Montserrat (NA-103, WLOTA 1475) from Jun 8-18.
He will sign VP2MRT on 40m-2m. QSLs direct or via LoTW to his homecall.

VP9 - BERMUDA ISLANDS, NA-005
Doug,KF4VTT is going to visit VP9GE on Bermuda (NA-005) from Jun 10-17.
He will be QRV as KF4VTT/VP9 in SSB, CW, RTTY and maybe also in PSK31
on 160m-6m. First of all this is a holiday with his XYL, so this is
not a pure DXpedition. QSLs via bureau, direct or LoTW to his homecall.
More information at: http://home.mebtel.net/~kf4vtt/vp9/VP9.htm

YN - NICARAGUA
W5MJ (YN2MJ) and W5PR (YN2PR) will show up from Nicaragua between
Jun 9 and Jun 13. While YN2MJ tries to work Europe mainly on 80m/160m
YN2PR plans to work on 6m and in the ARRL VHF QSO Party.

4J - AZERBAIJAN
Mac,JA3USA, is staying in Azerbaijan from Jun 6-10 and has been spotted
as 4JA3USA from Baku. This is very convenient for him since he only has
to put the number "4" before his homecall. QSLs for 4JA3USA via JA3USA.

9M2 - WESTERN MALAYSIA, AS-051
The two globetrotters Mike,KM9D, and Jan,KF4TUG, are anchoring in
Pulau Singa Besar on Langkawi (AS-051) at the moment and already hit
the bands as 9M2/KM9D. Nothing is known about the length of their stay.
QSL direct via OM2SA.

JAPAN, SPECIAL EVENT STATIONS
The Japanese are celebrating the 200th birthday of Samuel Morse with
several special event stations which are activated until Dec 31. The
calls 8J1MORSE, 8J1MORSE/2, 8J1MORSE/3, etc. (one from each call area)
will be activated mainly in telegraphy of course, but also in SSB to
train some newcomers. All QSL cards should be sent via the JARL bureau
(QSOs will be confirmed automatically) or direct to 8J1MORSE,
1-14-1-11-B Yoshino, Higashi-ku, Nagoya, 461-0027, Japan.
They issue some free awards as well.
More details can be found at: http://8j1morse.a1tokai.net/en

THE NETHERLANDS, SPECIAL EVENT STATION
PG6N is a special event station is operated from the lighthouse
Noordwijk (ARLS NET-019) during the "Coast week" (Week van de Zee)
from Jun 11-18, including the "Kids Day". Operation takes place on HF,
6m and 2m (maybe also DX via Sporadic-E).
You can find more information at: http://pg6n.jouwweb.nl/english

WFF operation: The "Bila Tserkva Radio Club" will be active as EM0UBC
from the "Oleksandriia Dendrological Park" (URFF-91) from Jun 9-12.
QSL via UR4UXD. A free award can be requested via e-mail: bcrc@ukr.net

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
More information about the "KIDS Day" on Jun 18 at the technical museum
in Bad Ischl can be found at: http://adl504.kilu.de/cms/?q=node/160
They will activate the special callsign OE5KIND on HF and VHF.

UPCOMING CONTESTS

Jun 11-16: CW WWSA Contest (see: http://www.wwsatest.org)
Jun 11/12: DRCG Long Distance Contest
Jun 11: Portugal Day Contest
Jun 11: Asia Pacific Sprint Contest

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-010, GM, Outer Hebrides: GM0BUX/p will be QRV in SSB, CW and PSK31 on HF
from North Uist from Jun 12-17. QSL via G0BUX (bureau/direct).

EU-070, F, Provence-Cote D'Azur (Var) Region group: Nine Germans are going
to activate Porquerolles island on the French Mediterranean coast from
Jun 11-18. They will sign F/homecalls in all modes on all bands.
QSLs via bureau or direct to their homecalls.

EU-124, GM, Welsh Coastal Islands: The "Strumblehead DX & Contest Group"
will be QRV from Ramsey Island from Jun 9-13. MC0SHL will work with
three stations in SSB and RTTY on 80m-6m. They also plan to take part
in the WFF GreenDay weekend (Jun 11/12). QSL via M0URX (bureau/direct).
Their website can be found at: http://www.mc0shl.com

EU-129, DL, Usedom: From time to time DL2RU/p will show up from Usedom
from Jun 12-17. He will also visit Ruden (EU-057, DID/GIA-011) for
one day. He prefers to work on 7028, 10122, 14040/14044 and 18086 kHz.
QSL via DL2RU (bureau/direct).

DL/RU5A and DL/SP5VYI will be QRV from Usedom also starting on Jun 10.
QSLs via homecalls (bureau/direct).

EU-132, SP, Szczecin/Koszalin Province group: SO5UM/1, SP5BUJ/1, SP5VYI/1,
SP5X/1, SQ5AWR/1 and SQ5Q/1 are working from Wolling from Jun 8-13.
They plan to use two or three stations in SSB, CW and maybe also
digital modes. Listen for SN0WFF during the GreenDays.
QSL for SN0WFF via SP5X, SO5UM/1 via RU5A and all others via homecalls.

EU-170, 9A, Dalmatia North Group: 9A/DH7KU will be QRV in CW on 20m and 40m
from Pag Island from Jun 12-22. QSL via DH7KU (bureau/direct).

Postponed and cancelled activities:

D9K did not show up from AS-084 as planned. They now plan to activate
Anmyon (AS-080) as D9K or DS1OYR/3, DS4NYE/3, HL1OYF/3 and HL1VAU/3.

The very first activation of the IOTA group AS-191 (Marzok) by 7Z1IR
and 7Z1TT was postponed for one week. However, the IOTA committee
already set a "green light" for the activity from Marzok.

Lighthouse activities (WLOTA/ARLHS/ILLW)

I1UWF/p LH Capo dell'Arma ARLHS ITA-013 Jun 11

IOTA at the HAMRADIO fair in Friedrichshafen:

The IOTA Forum will take place on Saturday, Jun 25, at 10:00 am.
This is the agenda:
- IOTA 50th Anniversary Marathon plus lectures about
- PW6C, Coroa Vermelha Island, SA-062
- EG5CI, Columbretes Islands, EU-069
- OX/DL's from Tasiilaq Island, NA-151
The IOTA meeting was moved from Saturday to Friday evening 19:00 and will
be held in the restaurant of the VFB stadium in the Teuringer street no 2.

SOUTH SUDAN DXCC STATUS (by Martti Laine, OH2BH)

With great anticipation, DXers the world over are looking forward to the
9th of July this year as the predicted day of South Sudan's declaration of
independence. Indeed, that declaration is set to happen, but it will not yet
guarantee the birth of a new DXCC entity, at least at that time. The DXCC
rules are written in such a way that only a new country's membership in the
United Nations and/or its ITU country prefix will result in the anticipated
DXCC counter. The U.S. State Department Geographer's list of Dependencies
and Areas of Special Sovereignty obviously does not apply in this case.

The opinion from the ARRL is that no exceptions will be made in this case.
They state that the event date - i.e. declaration of independence - will
not cause potential QSOs to be counted retroactively. Rather, Newington
categorically assumes that U.N. membership, which will most likely come
first, followed by the release of an ITU prefix by the UN telecommunications
agency, will lead to country status.

The prospect of a new country has taken an unexpected turn just recently.
The country's borderline has never been settled between North and South

Sudan in the area (Abyei) where most of the oil reserves are located.
It was agreed under the 2005 Peace Agreement that the border issue will be resolved by the people in that province. A referendum to settle the matter has not happened. Instead, the North (ST2) has entered the disputed province with force. Additionally, the North has stated that they will not support an independent State in the south unless the contested region is theirs. The matter now remains totally in limbo.

While the amateur radio project announced earlier this year by 5Z4DZ, ST2AR, W3UR and OH2BH is well underway, it is not yet reasonable to swing your antennas toward South Sudan, as we speak. The project has two well-known DXers now permanently based in South Sudan: SM7PKK and YI1DZ/ST2DZ. The knowledge and the professional presence are in place to proceed with an immediate activation as soon as the above country status matters are resolved.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DJ2VO, DJ5AV, DJ6VM, DK1RV, DK8JB, DL1MDV, DL1SBF, DL2BQV,DL7VOA, DO3ME, F5NQL, F6AJA & Les Nouvelles DX, G1VDP, G3KMA, NG3K, OE2IKN, OH2BN, W1AW, W9AEB, SWL Norbert Maibaum and others.

NEW HF OPERATORS - THINGS TO DO

The upcoming Kids Day event on June 18th is a great way to have some
fun with your kids and introduce them to HF radio. This is just one
week before Field Day, too, so why not get them used to the microphone
and they'll be ready to try out the GOTA station!

BULLETINS

You may have received a newsletter last time in which the too-many
photos were badly placed due to problems with browser versions and
other formatting issues. To see all of the photos and captions, click
on the link at the top of the email that reads "If you are having
trouble reading this issue..." or visit arrl.org/contest-update-issues
<http://arrl.org/contest-update-issues> and click on the link for the
May 25th issue.

BUSTED QSOS

The Luso tower rotator plate pictured is intended to rotate the entire
tower and goes at the bottom. Yikes! (Thanks, Tom N4NW) The plaque
RA3AUU was shown receiving for the P33W team was a CQ WPX plaque, not
the CQ WW. (Thanks, Doug K1DG)

CONTEST SUMMARY
```

Complete information for all contests follows the Conversation section

June 11-12

- CWops Monthly Mini-CWT Test (June 8)
- ARRL June VHF QSO Party
- Portugual Day
- WFF Green Days
- World Wide QRP Contest
- DRCG Long Distance Contest--Digital
- Australian Shires Contest
- Asia-Pacific Sprint--Phone
- GACW WWSA CW DX Contest
- REF DDFM Six Meter Contest

June 18-19

- Kid's Day--Phone
- NAQCC Monthly QRP Sprint--CW (June 15)
- SARL Youth Day Sprint--Phone (June 16)
- All-Asian DX Contest--CW
- SMIRK QSO Party
- West Virginia QSO Party
- Feld-Hell 10 Meter Sprint
- WAB 50 MHz Phone

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

VHF+ contesters will want to congratulate Gene Zimmerman W3ZZ on his years of service as the author of the QST column "The World Above 50 MHz" as Gene announces his retirement <http://www.arrl.org/news/gene-zimmerman-w3zz-to-retire-from-the-world-above-50-mhz>from that duty after the July issue. Gene has been writing the column since 2002 and will no doubt put his new spare time to work on the air and figuring out how to help the W8GP Grid Pirates team stay competitive in the VHF+ contests. Beginning with the August 2011 issue of QST, Jon Jones N0JK, of Wichita, Kansas, will take over the column. Jon is also a familar figure on the VHF+ contest scene and brings a wealth of practical experience to the job. Well done, Mr Z and welcome, Mr J!

Ed W0YK's Muns Vineyard <http://www.munsvineyard.com/> and Don AA5AU's rttycontesting.com <http://rttycontesting.com/> are excited to announce the new 10-Meter RTTY Contest <http://www.rttycontesting.com/the10meterrttycontest.html> to be held for the first time on Sunday, December 4, 2011. rttycontesting.com will sponsor plaques for the winning Single and Multi-op entrants. If you are interested in sponsoring a plaque, such as continental or USA winner, etc, please contact the sponsors directly. Also, the top ten single operators will receive a bottle of Muns Vineyard fine California wine.

The hard-at-work WRTC 2014 <http://www.wrtc2014.org/> leadership team was very visible at multiple events during the recent Dayton Hamvention. As WRTC 2014 Chairman Doug K1DG, says, "We have much to do

in a short time!" Members of the WRTC 2014 organizing committee met with the new WRTC Advisory Council <http://www.arrl.org/news/wrtc-2014-announces-advisory-council-members> members (Tim K3LR, Craig K9CT, and George NR5M), explored equipment options with ham radio vendors, discussed event plans with interested contesters, and did some fund-raising at the Contest Dinner and announcing the winner of the Poisson D'Avril <http://poissondavril.webs.com> donation competition. Keep WRTC on your radar as 2014 will be here before we know it!

While filling out a survey of NIST services <http://www.tf.nist.gov/survey> in support of WWV, Bob N6TV found a handy NIST time widget <http://time.gov/widget.html>, which not only displays accurate time, but conveniently measures your network delay.

Scientists have discovered a species of bacteria that live on caffeine <http://www.scientificamerican.com/blog/post.cfm?id=new-bacteria-lives-on-caffeine-2011-05-24>,
producing carbon dioxide and ammonia. I think I operated with that guy at Field Day one time.

If you were wondering about HF conditions later this week, this story from Space Weather News <http://spaceweather.com>for June 7th should give you a clue. "This morning around 0641 UT, magnetic fields above sunspot complex 1226-1227 became unstable and erupted. The blast produced an M2-class solar flare, an S1-class radiation storm, and a massive CME. A recording of the blast from NASA's Solar Dynamics Observatory ranks as one of the most beautiful and dramatic movies of the SDO era. High-latitude sky watchers in both hemispheres should be alert for auroras during the late hours of June 8th or 9th when a CME from today's eruption could deliver a glancing blow to Earth's magnetic field." Ol' Sol...he's ba-a-a-ck!

The Youth DX Adventure <http://www.qsl.net/n6jrl/> (YDXA) team received a nice surprise at the Dayton Hamvention when the winner of the IC-718 prize donated by Icom America, Frank WB6RMB, asked that the radio be donated in turn to the YDXA for use on their travels. Thank you, Frank! (Thanks, Tim K3LR)

The Contest University <http://www.contestuniversity.com/> presentations "Contesting the Right Way" by Doug K1DG (should be required viewing for anyone submitting a contest log) and Rob NC0B's "Contest Radio Performance" have been posted to the Potomac Valley Contest Club <http://www.pvrc.org/> website under the Recorded Webinars link. (Thanks, Ken K4ZW)

Thanks to the professors at Youth Contest University <http://www.contestuniversity.com/> (YCTU) led by Scott W3TX, along with Ben AK2X, Sarah, AK2D, Mark N5OT and several others. Yuri, VE3DZ and his friend provided Russian translation assistance for the Skype video conference between YCTU and young YL CW hams in Russia thanks to Paul, N0AH. It was exciting to see such awesome enthusiasm from YCTU.

You'll enjoy this neat detective story
<http://www.nxtbook.com/nxtbooks/cmp/eetimes051611/index.php?startid=46>
by Steve Lubbers KE8FP about troubleshooting a moonbounce station. All
contest operators will be able to relate. And the following story about
gravity isn't bad either!

Winner of the ARRL's Rookie Roundup in one of last year's contests,
Anna W0ANT received the Young Ham of the Year Award
<http://www.rockymountaindivision.org/awards.html> in the Rocky
Mountain Division.

Dave W9ZRX <zephd@indy.rr.com> announces that new versions
<http://www.k3lr.com/w9zrx/> of the VHF Super Check Partial (SCP), and
Prefill Databases are now available. The new release is now based on
logs from 2009-2011 only and includes DTA and SCP files to support most
popular logging programs. The Excel format (XLS/XLSX) has been
discontinued but the CSV files can be opened by Excel. The SCP database
contains 10079 call signs and the Prefill 9736. Send Dave your
Cabrillo-formatted files after the ARRL June VHF QSO Party for an
update prior to the CQ WW VHF Contest in July. Dave wishes to thank
John N4XI for his software assistance, as well.

The N1MM team is pleased to announce the release of new, reorganized
documentation for N1MM Logger. The material has been arranged into
three new sections that you will find in the Documents menu of the N1MM
website <http://n1mm.hamdocs.com/tiki-index.php?page=Document+Home>.
The authors of this revised documentation would like to acknowledge the
huge contribution made by Thomas PA1M who wrote and maintained the
original N1MM Logger manual for a decade. (Thanks, Larry K8UT, Pete
N4ZR, and Rich VE3KI)

Try this online certificate service <http://www.ae7q.net/Generate.php>
if you'd like to print out a spiffy version of your hard-won Amateur
Radio license. It's not official, but good enough to show your family
certainly! Or to show all those other hams in your Zip Code
<http://www.ae7q.com/list/CallByZip.php>. (Thanks, John KE7KDQ)

"I just looked under the sofa cushions and there it was..." If you
were wondering where all the missing mass in the Universe went, you can
rest easy because a 22-year-old Australian student solved the problem
<http://www.cosmosmagazine.com/news/4358/aussie-student-find-missing-mass>
over her summer break. I guess it beats the typical summer job! The
best line may be at the conclusion of the story.

In the antique technology news, engineers at the National Museum of
Computing at Bletchley Park, England have succeeded in rebuilding a
Tunny Machine
<http://www.zdnet.co.uk/news/after-hours/2011/05/26/tunny-code-breaker-rebuilt-at-bletchle
y-park-40092902/>.
These were used to decode German messages during World War II and were
destroyed at the end of the war. The team had to reassemble the
documentation from bits and pieces of information and recollections
from the original builders, so now you have a perfect excuse for never

throwing anything away.

Tom West
<http://www.nytimes.com/2011/05/28/business/28west.html?_r=1&hpw>, the shy computer engineer who became an unlikely symbol of high tech to multitudes of general-interest readers as leader of the engineering team portrayed in Tracy Kidder's book "The Soul of a New Machine," died on May 19 at his home in Westport, Mass. He was 71. (Thanks, Trey N5KO)

Jim KI7Y reports that the Williamette Valley DX Club <http://www.wvdxc.org/> (WVDXC) lost one of its oldest members recently - Jim W3CP. Jim was active in contests well into his 90s and had a distinguished career <http://www.nrl.navy.mil/pao/pressRelease.php?Y=2011&R=20-11r> at the Naval Research Labs.

Do you have a Kindle and want to read e-books in other formats such as PDF? Mike VE3EQP reports that several freeware programs such as MobiPocket <http://www.mobipocket.com/> and Calibre <http://calibre-ebook.com>, will convert most ebook formats to work well in the Kindle. Many free ebooks are available on the Web, legally, from The Gutenberg Project and others and Amazon also provides many free books to Kindle users. I find having an engineering dictionary on my Kindle to be very helpful, for example.

We live in a sea of jargon with more being generated every day. Luckily, you can keep up with the latest in this online jargon dictionary <http://www.catb.org/jargon>. For example, you'll be able to make use of the term 'bogosity' <http://www.catb.org/jargon/html/B/bogosity.html>, I'm sure! (Thanks, Matt W0XEU)

Web Site of the Week - There's an intriguing link on the Kansas Section web site <http://ksarrl.org/deeplink/> with the title "Amateur Nirvana! 500 Websites! All Ham links! Nothing but Ham Radio." It's a great resource for web information about our hobby. Thanks to Orlan W0OYH and Kent KB0RWI for compiling these ham radio links. (From the Midwest Division newsletter by Midwest Division Director, Cliff K0CA)

WORD TO THE WISE

In theory, theory and practice are the same. In practice, theory and practice are different - Unknown.

The difference between theory and practice in theory is less than the difference between theory and practice in practice - AD3F.

I don't think anyone has made an EZNEC-to-EZNEC QSO yet. - W7IUV

==> SIGHTS AND SOUNDS

Awesome photos from the Dayton Hamvention have been published by Tom K8CX <http://hamgallery.com/dayton2011/>. More Dayton photos <https://picasaweb.google.com/cx6vm.jorge/DAYTON2011?feat=email#5610263568997355186>

are online from Jorge CX6VM - it was great to meet Jorge with whom we all have many contacts in our logs. (Thanks, Hector XE2K)

The 2011 Hamvention Antenna Forum presentations <http://www.k3lr.com/> from K4IQJ, ON4UN, W8VVG and K9LA have been posted online later thanks to hosting from N5KO and help from K5TR. The TopBand Dinner presentations <http://topbanddinner.com/> on VP8ORK by VE3EJ and low-cost receiving antennas by K3LR are also available for download. (Thanks, Tim K3LR)

The video of Wayne WA6HHQ's presentation of the brand-new Elecraft KX3 <http://www.youtube.com/watch?v=mbtyRyEEADo> can be found on YouTube. (Thanks, Bob N7XY)

Wow! Take a look at the K7XC 6 meter kilowatt rover <http://k7xc.tripod.com/6mkwrover/index.html> - just in time for this weekend's ARRL June VHF Contest. (Thanks, Paul NG7Z)

The recent 7th District QSO Party (7QP) covers a lot of territory and so does this video by K6BBQ <http://www.codxc.com/new/page.asp?content=dryland7s> about his recumbent bicycle operation! (Thanks, Jim K7WA)

Have you listened to Bob Heil's new Ham Nation podcast <http://twit.tv/hn1> yet? Bob's first guests were Joe Walsh, WB6ACU, and Dave Jennings, WJ6W. The show is produced in cooperation with Leo Laporte of the TWIT (This Week in Tech) Network.

Spurious emissions aren't always a Bad Thing, no matter what Part 97 says. Why, just look at these guys flailing away at the Hamvention Contest Super Suite! The Spurious Emissions Out of the Band <http://www.youtube.com/watch?v=FhGy6vUZbME>held the crowd in thrall with a "Free to get in, $5 to get out" policy. (Enter "Spurious Emissions Band" into the YouTube search window to find all seven of the videos which were taken by Ken K6LA.)

==> RESULTS AND RECORDS

K8CC from the Mad River Radio Club, K3WW from the Frankford Radio Club and K3LR from North Coast Contesters hosted the pizza party Thursday night. The Potomac Valley Radio Club and Yankee Clipper Contest Club hosted the two weekend pizza parties in the Super Suite <http://contestsupersuite.com/>. 93 Pizzas and 300 QSL wings were consumed over all 4 nights - lots of smiles!

Preliminary Results for the February 2011 NAQP RTTY <http://ncjweb.com/naqprttyprelim.php> are now online. Many new records were set - congratulations! Final published results will be in the July / August 2011 Issue of the National Contest Journal <http://ncjweb.com/>. See you again in NAQP RTTY on July 16th. (Thanks, NAQP RTTY Manager, Mark K6UFO)

If you have questions about submitting logs or the CQ WPX CW contest, you may be able to save some frustration by using the new log submission web page <http://www.cqwpx.com/logcheck/>. It will check your log format and explain any errors that are found. Once you have fixed any errors you can have it submit the log direct to the robot. (Thanks, CQ WPX Director, Randy K5ZD)

Stan EI6DX's contest analyzer has just finished parsing Russian DX Contest (RDXC) logs and results <http://www.ei6dx.com/cqww-contest-analysis/cqww-activity-analyzer/> are now available. Clearly RDXC is gaining a lot of popularity and it is now one of the top three world-wide contests. For example, combined CW and SSB rates of RDXC are higher than those of CQWPX CW for same hours in 2010. For more, check out the online information.

OPERATING TIP

Summertime propagation can be quite different than in the winter and as the northern hemisphere enters the summer months, the southern hemisphere contesters are entering winter. Don't forget to listen for them in ways you hope they listen for you in our winter!

==> TECHNICAL TOPICS AND INFORMATION

A great article on fitting PL-259 connectors to ?" hardline using brass compression fittings includes photos by Henry K4YCR in the June 2011 issue of the Potomac Valley Radio Club's PVRC Newsletter. <http://pvrc.org/Newsletters/jun11.pdf>

Weatherizing a battery <http://w1pns.wordpress.com/2011/05/11/weatherizing-sort-of-a-battery-for-portable-qrp-ops/> for portable operation is covered in this online article by Peter W1PNS. There's more to it than meets the eye.

For re-sealing a fiberglass tube such as for a collinear or whip, conversations from the ham-antennas reflector <http://groups.yahoo.com/group/ham-antennas> point to a coating of clear polyurethane varnish rated for exterior use. It's available from your local hardware or paint store in both spray and brush-on form.

Need a table of aluminum tubing sizes <http://www.rfcafe.com/references/general/aluminum-tubing.htm>? The RF Caf? has lots of resources just like that.

Soldering to steel, or nickel or stainless steel is not that difficult if you use the right materials as shown in this video <http://www.youtube.com/watch?v=NpT_5tN1zYA> by Sigi DG9BFC.

Scott N7SS recommends Maguire's Mirror Glaze Plastic Polish #10 for getting rid of scratches and scuffs in plastic bezels and displays.

Chuck K7QO has a great web page tutorial <http://www.k7qo.net/> on making project enclosures from PCB material. Just right for gadgets and

adaptors and those little bitty things our stations seem so full of. (Thanks, Allen VE3GAM)

Plastic rivets <http://www.itw-fastex.com/rivets.html> - who knew? (Thanks, George K4GVT)

What's killing your WiFi signal? PC Pro <http://www.pcpro.co.uk/features/367672/whats-killing-your-wi-fi> dispels the notion that other WiFi signals are drowning yours out in favor of the same type of RF interference generators <http://www.pcpro.co.uk/features/367681/what-can-get-in-wi-fis-way> that plague hams - wireless video cameras, fish tank heaters, and all manner of other noise emitters. The story also lists some software tools you can use to track and diagnose problems.

Will graphene modulators <http://www.extremetech.com/article2/0,2845,2385134,00.asp> count for digital modes? At these bit rates, the whole CQ WW RTTY contest would be over in about 500 msec!

If you need to fill in gaps in concrete, the usual material is called grout. Outdoors, such as for tower bases, you'll need non-shrinking grout. Hard to find at general hardware stores (don't use the type intended for bathrooms) you might have better luck at a masonry supply house. (Thanks, Steve K7LXC)

Jim K9YC has published a new set of slides <http://www.audiosystemsgroup.com/publish.htm> from his presentations on how to deal with RFI. There's lots of information here as well as his tutorials on ferrites.

Designers of audio and RF switching gear for the ham shack should browse Analog Devices' "Ask The Applications Engineer" series of helpful notes, particularly "Switch and Multiplexer Design Considerations for Hostile Environments <http://www.analog.com/library/analogdialogue/archives/45-05/switch_mux.html>" and "Electromagnetic Interference (EMI) Filtering Reduces Errors in Precision Analog Applications <http://www.analog.com/library/analogdialogue/archives/45-01/EMI_filtering.html>." The ham shack is an environment with plenty of static discharges and lightning pops along with the usual kilowatt-level voltages and currents. A few pennies worth of simple components can save hours of frustrating misbehavior.

While web-crawling in search of information on loopstick antennas, this little bon mot caught my eye - "In a triode, no one can hear you screen."

Technical Web Site of the Week - Roger W3SZ is a mighty busy guy and has developed some very advanced DSP hardware and software <http://www.nitehawk.com/w3sz/hardware.htm> for the SDR station. (From the May 2011 "Cheese Bits" newsletter of the Mt Airy VHF Radio Club <http://www.packratvhf.com/> "Packrats")

==> CONVERSATION

This issue's editorial comes from ARRL Media and Public Relations Manager, Allen Pitts W1AGP. Allen deals with a flood of news on ham radio every day and does his best to make sure the right information gets to the right people. Allen also recognizes that beyond the after-the-fact stories, there are whole audiences out there we need to make aware of ham radio. He's working on a new video project at HQ and I thought the readership would like to know about it. Plus, it might inspire us to do a little outreach of our own. Field Day is coming up and there's no better opportunity! 73, Ward N0AX

When One Wild Idea Breeds Another

There's no doubt that the emergency communication aspect of Amateur Radio is a primary draw when the general population discusses ham activities. That's the one that gets us into the newspapers and on TV and, for better or for worse, brief sound bites and video clips are how most of the population seems to learn about their world these days.

But there is another species of sentient human out there, and it is one that we need to address. These are the people who shun the role of being just another "consumer" (a "sheeple") and want to open the box, tinker with the wiring and see what else they can make of a product. They are the D.I.Y. (Do It Yourself) crowd, the ones that attend Maker Faires <http://makerfaire.com/>, the people that write the apps, not just download them, and have an unquenchable creative sparkle that often causes (literally) sparks. In another era they would be shunned as "nerds," but in today's world the term is "geek" and being a geek is "cool." Muscles and hair alone are not enough anymore. In more and more movies and on TV, it is the geek who McGyver's the solution that saves the day - and the geek is often female!

For the most part they are young(er), bright, literate and genuinely excited in trying something new just for the fun of it. Launch a balloon-camera into near space? Sure! See the kids at K2GXT. Create an electric dress that lights with different colors depending on your mood? Just ask KC2UHB! Want to play with light and see how far one LED of a particular frequency can send a message? K4THZ is your club! There's a whole list of them at WeDoThat-Radio <http://www.wedothat-radio.org/> and this just scratches the surface.

Most already know about Amateur Radio but they are not your "usual" hams. Just as they will take the latest Gee-Whiz electronic box from Best Buy, open it and see what else they can do with it, they do the same with radio. They may not have any interest at all in contesting or in making the DXCC, but they glow with thoughts and dreams of what could be, might be, and how they can use the electromagnetic spectrum to make it happen. And because the Amateur Radio bands are the last frontier where an individual still can try things on their own, even if it fizzles, they are drawn to the Service.

So how do we reach out to them? First and foremost we need to accept and claim them as "hams." Maybe they don't have tribanders on their houses but they're hams in the best sense of the word. Secondly, we need to speak to them in their own way - and that language is by inspiration as one idea seeds another and then another. To do this, the ARRL is creating a special video that will be coming out in the fall of 2011. This successor to "Amateur Radio Today" with Walter Cronkite speaks in a new way to an entirely new audience, the 16 to 26-ish year-old "geek." Along with a supporting group of short (YouTube-size) auxiliary videos, the main video will present several unusual and curious projects that the DIY-hams are doing. No, it's not your grandfather's radio - it's creative radio for creative minds. It's people experimenting in basements and garages just to see if they can make "it." But isn't that where Amateur Radio started?

There will be much more about this in the fall. Stay tuned!

Allen Pitts - W1AGP

==> CONTESTS

8 June through 21 June

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Kid's Day-- Phone, from Jun 18, 1800Z to Jun 18, 2400Z . Bands (MHz): 3.5-28. Exchange: Name, age, location, favorite color. Rules <http://www.arrl.org/kids-day>

CWops Monthly Mini-CWT Test-- CW, from Jun 8, 1300Z - see Web site. Bands (MHz): 3.5-14. Frequencies: Multiple operating periods, twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Portugual Day-- Phone, CW, from Jun 11, 0000Z to Jun 11, 2400Z . Bands (MHz): 3.5-28. Exchange: RS(T) and serial or district code. Logs due: Sep 1. Rules <http://portugaldaycontest.rep.pt/>

WFF Green Days-- Phone, CW, Digital, from Jun 11, 0000Z to Jun 12, 2359Z . Bands (MHz): 1.8-28. Exchange: RS(T) and WFF number if available. Logs due: 30 days. Rules <http://wff44.com/en/contest>

World Wide QRP Contest-- Phone, CW, from Jun 11, 0000Z to Jun 19, 2400Z . Bands (MHz): 1.8-28, 50-432. Exchange: RS(T). Logs due: Jul 11. Rules <http://en.jaqrp.org/>

DRCG Long Distance Contest-- Digital, from Jun 11, 0000Z -- see Web site. Bands (MHz): 3.5-28. Frequencies: Multiple operating periods. Exchange: RST, CQ Zone, and UTC time. Logs due: Aug 1. Rules

<http://www.drcg.de/>

Australian Shires Contest-- Phone, CW, from Jun 11, 0600Z to Jun 12, 0600Z . Bands (MHz): 3.5-28. Exchange: RS(T) and VK Shire or CQ Zone. Logs due: Sep 1. Rules <http://groups.yahoo.com/group/vkshires>

Asia-Pacific Sprint-- Phone, from Jun 11, 1100Z to Jun 11, 1300Z . Bands (MHz): 14-21. Exchange: RST, serial. Logs due: 7 days. Rules <http://jsfc.org/apsprint/aprule.txt>

GACW WWSA CW DX Contest-- CW, from Jun 11, 1500Z to Jun 12, 1500Z . Bands (MHz): 3.5-28. Exchange: RST, CQ zone. Logs due: Jul 30. Rules <http://www.wwsatest.org/>

NAQCC Monthly QRP Sprint-- CW, from Jun 15, 0030Z to Jun 15, 0230Z . Bands (MHz): 3.5-14. Frequencies: Monthly on 2nd Tuesday or 3rd Wednesday (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

SARL Youth Day Sprint-- Phone, from Jun 16, 0800Z to Jun 16, 1000Z . Bands (MHz): 7. Exchange: RS and age. Logs due: 7 days. Rules <http://www.sarl.org.za/>

All-Asian DX Contest-- CW, from Jun 18, 0000Z to Jun 19, 2400Z . Bands (MHz): 1.8-28. Exchange: RST, operator age (YL may send 00). Logs due: Jul 31. Rules <http://www.jarl.or.jp/English>

West Virginia QSO Party-- Phone, CW, Digital, from Jun 18, 1600Z to Jun 19, 0200Z . Bands (MHz): 3.5-28. Frequencies: CW--35 kHz from band edge, Phone--35 kHz from General/Nov/Tech segments. Exchange: RS(T), WV county or S/P/C. Logs due: Jul 20. Rules <http://www.qsl.net/wvsarc>

Feld-Hell 10 Meter Sprint-- Digital, from Jun 18, 2000Z to Jun 18, 2200Z . Bands (MHz): 28. Frequencies: Monthly on 3rd Saturday. Exchange: RST, QTH, Feld-Hell number. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

VHF+ CONTESTS

ARRL June VHF QSO Party-- Phone, CW, Digital, from Jun 11, 1800Z to Jun 13, 0300Z . Bands (MHz): 50+. Exchange: Grid square. Logs due: Jul 14. Rules <http://www.arrl.org/contests>

World Wide QRP Contest-- Phone, CW, from Jun 11, 0000Z to Jun 19, 2400Z . Bands (MHz): 1.8-28, 50-432. Exchange: RS(T). Logs due: Jul 11. Rules <http://en.jaqrp.org/>

REF DDFM Six Meter Contest-- Phone, CW, from Jun 11, 1600Z to Jun 12, 1600Z . Bands (MHz): 50. Exchange: RST, serial number, grid square. Logs due: 15 days. Rules <http://concours.ref-union.org/>

SMIRK QSO Party-- Phone, CW, from Jun 18, 0000Z to Jun 19, 2359Z . Bands (MHz): 50. Exchange: Grid square and member number. Logs due: Aug 1. Rules <http://www.smirk.org/>

WAB 50 MHz Phone-- Phone, from Jun 19, 0900Z to Jun 19, 1500Z. Bands (MHz): 50. Exchange: RS, serial, WAB square or DXCC entity. Logs due: 21 days. Rules <http://www.worked-all-britain.co.uk/>

==> LOG DUE DATES

8 June through 21 June

June 9 - ARS Spartan Sprint
<http://adventure-radio.org/wiki/index.php?title=Spartan_Sprint_Rules>

June 10 - His Maj. King of Spain Contest, CW
<http://www.ure.es/contest/431-sm-el-rey-contest-english-version.html>

June 11 - Wake-Up! QRP Sprint
<http://qrp.ru/modules/sections/index.php?op=viewarticle&artid=7&page=1>

June 12 - ARCI Hootowl Sprint
<http://www.qrparci.org/content/view/1518/118/>

June 12 - DigiFest <http://www.mixw.net/misc/DigiFest/rulese2011.html>

June 13 - FISTS Spring Sprint <http://www.fists.org/sprints.html>

June 13 - RSGB 80m Club Championship, Data
<http://www.rsgbcc.org/hf/rules/2011/r80mcc.shtml>

June 15 - Indiana QSO Party <http://www.hdxcc.org/inqp/rules.html>

June 15 - Nevada Mustang Roundup

WIANEWS WEEK COMMENCING June 12 2011.

RANDOM HACKS OF KINDNESS.

RD Contest Time unchanged for 2011

Another new broadcaster of this news joins the team.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 12 2011.

RANDOM HACKS OF KINDNESS.

In Silicon Valley USA where the latest geek type innovations are celebrated,
a group of hackers is creating new purposes for old technology.

Random Hacks of Kindness, has, like many smart things born in the region,
quickly spread around the globe. The idea sprang from a community of hackers
working on code for the good of humanity.

Last Saturday and Sunday, hundreds of engineers gathered around the world to
code for good.

In Silicon Valley, the event was held at Google's Mountain View campus.
Similar gatherings occurred at 17 other locations, from Toronto to Bangalore.

It's not about reinventing the wheel, but using the wheel for new purposes, said Chris Messina, a Google employee whose title is open web advocate and who participated in the third official RHoK held this past weekend.

"When the Internet goes down or when you lose the resources you depend on, we need to create new solutions," he said.

Maybe figuring out ways to use ham radio systems during disasters.

"You wouldn't think of the ham radio as bleeding-edge technology," he said. "But it will work when other technology won't when infrastructures go down. It's sort of like Twitter for truckers.

Using it for disasters' that's the hack. It's very cheap and can be massively deployed if necessary."

(press release)

800 MHz

Nine news through the week reported on the Australian Communications and Media Authority's review of radio frequency spectrum in the 800 MHz band

It noted fresh emergency radio frequencies could be set aside for emergency services in the wake of a summer of cyclones, storms and floods.

Federal Attorney-General Robert McClelland has released the terms of reference for a committee which is looking to equip police, fire, ambulance and counter-terrorism agencies with what he describes as "reliable and robust mobile broadband capability".

"The government is determined to make this technology available to our agencies" Mr McClelland said. "This presents the opportunity to build a new dedicated mobile broadband capability for emergency response organisations".

Currently they access that capability through commercial carriers.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary Sarah Thompson VK3AUD secretary@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Peter VK4OD as the RD Contest Manager has had to make the decision that this year's Contest, the start time will remain as shown in the 2010 Rules, as posted on the WIA Website. It seems he had no reply from the WIA Directors as to exactly what the new time was to be and software writers for the major contest loggers need that info "quick smart".

In further news dealing with the WIA Clive VK4ACC was just one of close on 100 hams at the Darwin Meeting of the WIA at their AGM weekend.

(audio intensive, no text available).

HAMS ACROSS AUSTRALIA.

VKG Roundup http://www.police.nsw.gov.au/news

The Parkes Film Society is embarking on a fundraiser to raise money to purchase a projector to greatly improve the clarity and brightness of films screened at the M&D Little Theatre. This projector will allow for High Definition screenings.

"One of the other advantages of a proper venue projector is the ability to do outdoor screenings," Conrad Mill, Parkes Film Society president said.

"The idea is that people would bring their car and kids and we would use an inflatable screen and low-powered FM transmitter to allow people to view the movie and listen to it on their radios

VKC Roundup http://www.police

Are you interested in working long distances on the VHF, UHF and microwave bands? Then consider attending the annual Gippsland Technical Conference - GippsTech - held at Churchill each July. Learn about the latest developments in techniques and equipment and discuss any issues that you have with the many knowledgeable amateurs present.

Presentations this year range from how to cheaply recycle coaxial crimp connectors through to the setting up of a complete solar powered remote radio station - one amateur's solution for his local QRM. Hear all about the latest developments in an amateur chirp radar system and how it allows you to determine how propagation is working. All this and more, over two days of information and fellowship.

GippsTech 2011 will be held over the weekend of July 9 and 10.

Registrations for this popular event close on July 1.

Further details can be found at the Club website:
www.vk3bez.org

(Peter VK3PF, President of the Eastern Zone Amateur Radio Club in the Latrobe Valley, Victoria.)

'VK3GT and VK3SN will be leading a team of intrepid friends on a back country adventure as they ski across the Bogong High Plains. The group will be up in the Victorian Alps above 1800 m in what is expected to be some of the best Winter snow for many years.

They will once again be using rugged ultra light solar powered gear with homebrew antennas to work 20 & 40m each afternoon and 80m every night.

They will move across the white snowy wilderness by day, setting up camp at night in remote huts, snow caves and even igloos. Listen out for them from 15-19 August calling CQ from the roof of Victoria.'

VKR Roundup http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

One of those areas which has a certain mystique in our hobby is "home brew". Whether we are tinkerers of full blown constructors, amateur radio has evolved as a sharing hobby where what is learned is proudly shared with one's colleagues.

With the development of the w-w-w, sharing projects and experiments has taken a whole new direction for many amateurs. A notable example of this phenomenon is the story of Frank, K0IYE. I have often followed links to Frank's book "Crystal Sets to Sideband" which is a free internet book and it was with pleasure that I was able to read Frank's story in the May, 2011, issue of World Radio Online.

http://www.worldradiomagazine.com/

There is a further article in this issue showing the construction of one of Frank's projects. Anyone familiar with Drew Diamond's use of "ugly construction" will feel at home with the use of the "Manhattan" technique used in this audio amplifier.

Even in this age of the ready made, for the hobbyist there is a place for rolling one's own. Part of this is the self imposed challenge of succeeding at something different and part of it is using equipment you have made. Another part is being able to share what we have picked up along the way with other amateurs. For his efforts in explaining, developing and sharing his journey, a big thank you to Frank, K0IYE.

I'm Geoff Emery and that's what I think.....how about you?

CLUBBING - TO SUPPLY NEWS ITEMS:-
email qnews@wia.org.au

CENTRAL QUEENSLAND AR CLUB
Rockhampton
cqar.com.au

4 months in and the Central Queensland Amateur Radio Association Inc is firing on all cylinders.

Thanks to Jason - VK4FJGS and Ray VK4HOT we are the 200th entry for the International Lighthouse and Lightship Weekend. We will be located at Seahill Lighthouse and transportation details are still being finalised.

Jack - VK4JRC recently organised a bulk buy of Tigertronics SLUSB interfaces. Since these interfaces arrived there has been a lot of activity locally across the bands with members experimenting with SSTV, Digital SSTV, PSK and Packet. Ray VK4HOT has been extremely proud of the QSO cards he has received from locations as remote as Portugal. Jack - VK4JRC is organising a Digital Modes workshop with a Barbeque to assist with the learning curve of Digital Modes.

This weekend will be aimed at assisting with the Tigertronics interfaces but other interface methods can be included. Dates and location are to be advised.

Frank - VK4FLR is currently in the process of looking at cost effective ways that members can get in on microwave activity after Frank - VK4FLR and Graham - VK4NFZ have been active on 23cm making the trip 48.8klm over some rough country from Bouldercombe to Zilzie. Other operators have been listening in on receivers for their signals.

A Fox Hunt will be organised in the near future thanks to Jason - VK4FJGS. Jason is also busily providing links to some great Fox Hunting resources which will be placed on our website. We think a Fox Hunt will really inspire young potential Amateur Radio Operators to take the first step.

We currently have a raffle for a Yaesu FT-1802M VHF FM radio. Tickets are $1.00 each. Contact our President Andrea - VK4FROG at president@cqara.org.au if you are interested in purchasing tickets. More details and Andrea's email address is available on our website www.cqara.org.au

For more information and news please visit our website, again www.cqara.org.au

I'm Adam - VK4MTJ on behalf of the Central Queensland Amateur Radio Association Inc.

USM Events Noosa Century Bike Ride

Well SCARC has been at it again. Only a week after the International Rally of Qld, SCARC members assisted by Caboolture and Gympie club members have provided safety and strategic comms for the Noosa Century bike ride. The ride consisted of 2 stages, a 100km ride for the fit people and a 160km ride for the ultra fit.
Many checkpoints across the course required amateurs to assist in the reporting of progress and any accidents or breakdowns. The SAG wagon came through at the end of the riders to sweep up and collect any unfortunates that had failed through physical or mechanical means.
As there were amateurs in the two lead vehicles and the sag wagon these were fitted out with APRS which allowed the display of these 3 vehicles on a computer at the event headquarters at Noosa Lions Park. Thanks to a strategically placed digipeater there were no black spots for APRS coverage throughout the entire course. The event organisers were very impressed with the support given to them for this ride.

Scarc would like to thank all SCARC members and the members of the various clubs that helped out for this event.

NNC

What does NNC stand for you may ask. Its the acronym for a group of amateurs that like camping at various locations across South East Queensland, and the next event is July 8-10 at the Borumba Dam just out from Imbil. There has been

over 40 people at these events in the past and certain people have been known to upgrade from tents to caravans just for this event, especially when your bed is longer than the tent and your feet hang out the end. So what is this NNC? Well I will give you a clue, the middle N stands for Nutty and that certainly helps. Yes its Noel's Nutty Campers coming to a campground near you. A combination of camping, amateur radio, campfire cooking, car boot sales and plenty of tall stories means this is a memorable event not to be missed. If you would like to come along contact the Nutmaster himself, Noel VK4NL through the various means and he will be only too happy to get you onboard for a fun weekend.

TABLELANDS RADIO AND ELECTRONICS CLUB
vk4wat@wia.org.au
www.treclub.org.au

G'Day again from Far North Queensland this is Dale VK4DMC for the Tablelands Radio and Electronics Club, TREC, in Far North Queensland.

As this news goes to air TREC members Gary VK4FD and Jeff VK4BOF (locally known as Snoopy and Charlie Brown) are on air and looking for contacts for the VK Shires contest.

They are using the TREC call-sign VK4WAT/p from the township of Mount Surprise which is in the Etheridge Shire (ET4) in Far North Queensland on or near the following frequencies:

3.615MHz
7.135Mhz
14.190MHz
21.245MHz
28.450MHz
+/- QRM of course.

The next meeting of TREC will be held on Saturday the 25th of June at our clubrooms.

Well that's your lot for this week.

Visit the TREC website at www.treclub.org.au for club information and you can also download the latest monthly club news in TREC-NEWS. Past issues are also available on the site.

This has been Dale VK4DMC and you are listening to QNEWS. Travel Well!

July Reast Presentation

The 3 "Rs" - Resonance, Reactance and Resistance

Mike VK7MJ on July 6 at 7:30pm in the Queen's Domain clubrooms will present in a very practical way some basic AC theory which is aimed at the foundation and standard licensees who are looking to upgrade or as an entertaining refresher for all other amateurs.

Mike will take us through what happens when a capacitor, inductor and resistor are connected into an AC circuit.

This presentation will be a scary mathematics free zone....HIHI. So, don't worry come along and learn and refresh your AC theory knowledge.

http://reast.asn.au/events.php#threers

(Justin, VK7TW)

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

REAST Scholarship

Secretary Tony, VK7VKT, is working with New Town High ready to start progressing 5 students through the steps needed to acquire their Foundation licence.

This comes as part of the WIA grant that REAST were fortunate enough to secure.

There is no doubt that with the electronics curriculum that these lads are already working through that they will complete the course with flying colours.

Now of course we don't want them to simply get their licence and leave them floundering. So, if you are in VK7 Would you like to be a mentor?

REAST are looking for 5 amateurs who would like to keep in touch with these lads through email for the first few months after they get their licence, just to help them with the many questions we all had that were too afraid to ask in person.

Interested? Let Tony, VK7VKT know through the email of Secretary@REAST.asn.au.

(73's, Tony VK7VKT

This year in New Zealand, from a Nelson branch initiative and sponsorship, a new award was introduced, to recognise a 100% pass mark (that's 60/60 result) in their examination, in the year preceding conference, for amateurs not otherwise eligible in the Best Examination/Youth Achievement Award.

There were three recipients of this award for 2010, Suzette James ZL2SGC, Jonathan MacKenzie ZL3JDM and Murray Smith ZL2MJS.

Well done to you all.

The Best Examination Result

The Best Examination result went to Thomas Fellows ZL3PSG aged 16 for a pass of 55/60.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

New Zealand's very worthy recipient of the Amateur of the year Award, was David Searle ZL3DWS for the tremendous results he achieved in his Buildathon projects. David has recently moved from Christchurch for obvious reasons to Bondi VK2 in Australia.

Speaking from Australia's 2nd favourite beach, David said "I was greatly surprised, yet proud, to learn that I had become NZART Amateur of the Year.

Proud, because it acknowledges the success achieved by so many Canterbury radio amateurs and beyond, with the ZL3 Radio Buildathon project.

Hundreds of Canterbury kids now know what amateur radio is, and which end of a hot soldering iron to grab to build a simple radio!

So does mum and dad, school friends and all the others who would listen to a kid so proud that his or her first radio really works!

If we each share our enthusiasm for a great hobby with just one young person, their interest in radio, communicating and electronics could last a life time.

David ZL3DWS / VK2DWS"

URGENT NOTICE TO ALL SOUTH AFRICAN AMATEUR LICENSEES

Over in South Africa their body ICASA cancelled over 34,000 radio licenses that have remained unpaid for the past 365 days.

This includes all amateur radio licenses that are unpaid for the past year.

ZS hams have been advised by the SARL " If your amateur license was cancelled call now and ICASA will re-instate it if you can prove payment. If you have not paid, do so now using the information and account number on your last license.

New ARISS contact record

After spending 157 days aboard the International Space Station, ESA Astronaut Paolo Nespoli, IZ0JPA answered questions of students from 45 different schools, setting a new ARISS record for a single astronaut. (AND PROBABLY FOR A MARRIED ONE AS WELL)

Expedition 26/27 established a new ARISS record, working 77 schools in 68 radio contacts during the mission

NEXT MARS ROVER BEING MADE READY FOR LAUNCH

NASA engineers are putting the finishing touches on the next rover to Mars before shipping it off to Florida for launch later this year. What's being described as a small army of technicians dressed in protective suits have been working almost non-stop inside of a clean room at the Jet Propulsion Laboratory in Pasadena, California, assembling the new rover named Curiosity and testing its science instruments.

NASA says that it will begin shipping spacecraft parts to Cape Canaveral beginning next month. The size of a small SUV, Curiosity will drive around Mars and study whether the planet ever had the right environment to support primitive life.

The $2.5 billion project is scheduled to launch in late November.

(NASA)

==========

NEWS FROM ARNEWSLINE USA

COUNCIL OF EUROPE ADVISORY COMMITTEE RECOMMENDS RF FREE ZONES

The Council of Europe's Parliamentary Assembly Committee on the Environment released a report titled The Potential Dangers of Electromagnetic Fields and Their Effect on the Environment. The paper, made public on May 6th carries recommendations that, if adopted, could have major implications for wireless carriers and, to a lesser extent, broadcasters and any RF emitter in the European Union.

In regard to standards or threshold values for emissions of electromagnetic fields of all types and frequencies, the Assembly that prepared the report recommends that the "as low as reasonably achievable" principle be applied. This, covering both the so-called thermal effects as well as the biological effects of electromagnetic emissions or radiation.

The report also is among the first to give credibility to a phenomena that most scientists and researchers have long been sceptical of. Paragraph 8.1.4 of the report recommends member states of the Council of Europe pay particular attention to the needs of what it calls electro-sensitive persons. These are people who claim that they suffer from a syndrome of intolerance to electromagnetic fields. The report suggests the introduction of special measures to protect these people. This includes the creation of wave-free areas not covered by a wireless network. What effect acceptance and implementation of the recommendations would have on ham radio operations in Europe remain to be determined.

JAPAN SCRAPS FINAL MORSE TESTING

The country that started the no-code licensing revolution some six decades ago has finally dropped the Morse testing requirement for all of that nations ham radio licensees. This with word that the Japanese Ministry of Internal Affairs has decided to scrap Morse testing for the Amateur Radio Class 1 and 2 licenses with an effective date of this coming October 1st.

What amounts to Japan's version of a Notice of Proposed Rule Making on the Morse test was held earlier in the year. There were 39 people who responded. Following a discussion of the information the responses provided, the Ministry

announced that Morse telegraphy testing would be discontinued.

Japan pioneered the High Frequency No-Code
Amateur Radio or Class 4 license in the 1950's
although they still required Morse for the higher
license classes. The written exam for the Class 4
is roughly equivalent to the Foundation exam in
the United Kingdom and Australia and the discontinued USA Novice.

The Japan Ministry of Internal Affairs
announcement on the abolishment of Morse testing
is on line in Google translated English at tinyurl.com/3s4bljx

CQ ANNOUNCES HALL OF FAME INDUCTEES

And CQ magazine has announced its 2011 Hall of
Fame inductees, welcoming 12 new members into the
CQ Amateur Radio Hall of Fame.

Topping this years list alphabetically is TV and
Film producer Dave Bell, W6AQ, who was chosen for
this honour based on his deep involvement in
producing multiple amateur radio promotional
videos over the past several decades.

Also from Southern California is Nate Brightman,
K6OSC. He is credited with being the "spark"
behind W6RO, the ham station aboard the Queen Mary in Long Beach, California.

Rounding out the California contingent is
Cardinal Roger Mahony, W6QYI, the Archbishop
Emeritus of Los Angeles. He was recognized for
his leadership as an advocate for immigration reform.

Others recognized include Ron Moorefield, W8ILC
of Kettering, Ohio. Since its inception,
Moorefield has been one of the guiding lights of
the Dayton Hamvention. He was also recognized
for his work as a coordinator of the cross-country 1984 Olympic Torch Relay.

There was also one each member inducted into the
CQ DX Hall of Fame and the CQ Contest Hall of
Fame. The 2011 inductee to the CQ DX Hall of
Fame is Michael J. McGirr, K9AJ. McGirr has been
a leading DXpeditioner who has operated literally
from the ends of the Earth over nearly 30
years. The 2011 inductee to the CQ Contest Hall
of Fame is John Sluymer, VE3EJ, who has been an
active contester and DXer since 1973. He is a
founding member and current president of Contest Club Ontario.

The CQ Amateur Radio Hall of Fame honours those
individuals, whether licensed hams or not, who

have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The CQ Contest and DX Halls of Fame honour those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways. Formal inductions to the CQ Contest and DX Halls of Fame took place at last weeks Dayton Hamvention. A complete list of this years inductees is on-line at www.cq-amateur-radio.com.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2011

Tablelands Radio and Electronics Club, TREC, in up here in Far North Queensland has members Gary VK4FD and Jeff VK4BOF on air looking for contacts for the VK Shires contest.

They are using the TREC call-sign VK4WAT/p from the township of Mount Surprise which is in the Etheridge Shire (ET4) in Far North Queensland on or near the following frequencies:

3.615MHz
7.135Mhz
14.190MHz
21.245MHz
28.450MHz
+/- QRM

Winter UHF/VHF Field Day

Although the WIA contest manager has not supplied us yet with dates, we understand that the Winter UHF / VHF Field day is around the corner, possibly on June 19th.

In VK2, CCARC better known for their running of Australia's longest, biggest running hamfest at Gosford/Wyong will enter 2 teams in the UHF/VHF Field, VK2EH/P and VK2WFD/P.

VK2WFD (or if you like, VK2 Wholly Foundation Driven) will be operated only by Foundation licensed operators (with Advanced license holders in attendance for supervisory duties only) to give some of the newer members of our hobby a taste of the fun of contesting and its procedures.

VK2WFD will be competing in the 8 hour section from 12 noon Saturday 19th of June.

So, when you hear VK2WFD during the contest, give them a call and welcome them to the world of contesting in this great hobby of ours.

2012

March 17-18 VK JOHN MOYLE MEMORIAL FIELD DAY

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

HF BEACON CALL SIGN CHANGE

The HF beacon ZS4BOT transmitting on 7,027 MHz is changing to ZS0BOT.

ICASA contacted ZS4JAN and explained that the original callsign was issued incorrectly.

ICASA explained that the call signs of all beacons will be changed to start with ZS0 prefixes.

POPE BENEDICT XVI CROATION VISIT COMMEMORATED BY HAM RADIO

Ham radio was a part of the celebration as Pope Benedict the 16th visited the Republic of Croatia for the first time, this was between June 4th and 5th.

The city of Zagreb was the host town during his stay in Croatia. The visit of Pope Benedict also inspired the members of the Croatian Flora Fauna Radio Club to activate the special callsign 9A16PB.

The PB in the callsign is in honour of Pope Benedict.

Hams in Croatia will keep 9A16PB on the air through June 13th, tomorrow.

QSL this very special operation via 9A2MF.

In DX, K0YAK is currently based at the US Embassy in Kathmandu, Nepal and is active as 9N7AK during his spare time. He is expected that he will be there until early July using SSB and PSK31 on 20 through 10 meters.
QSL's should go via his home callsign K0YAK.

PA4JJ will be active portable 9A from Porec on the Croatian mainland between June 6th and 24th. He will operate holiday style using RTTY and PSK31 most of the time, again QSL via his home callsign PA4JJ.

Short-wave broadcasts suspended pending review

Portuguese broadcaster R.D.P. has temporarily suspended its short-wave transmissions as of 1 June because of the low number of listeners and as a means of cutting costs.

RDP said it would be reviewing the service to see whether it would go back on air at a later date. Listeners around the world can still follow their favourite programmes via satellite, cable and Internet.

The Portuguese broadcaster said it was "just one of many global broadcasters who are reducing or closing their SW transmissions".

Kiwisat Update

Over 45 members attended the Kiwisat forum at the recent NZART conference.

Very little news has come from what is expected to be a great feather in the
ZL cap! Ian ZL1AOX ran a presentation which included a short video by
Fred Kennedy ZL1BYP on the clean room at Massey University in Albany showing
the almost complete Kiwisat.

Ian then introduced via Skype, Clayton Gumbrell VK1TKA in Canberra Australia,
who described the software development - a first at an NZART conference.

Terry Osborne ZL2BAC completed the presentation showing his progress with the
Ground Station Telemetry decoding software.

ARISSat-1 Reception Challenge

ARISSat-1 is scheduled for deployment from the ISS in July.

It has a composite VHF downlink that will easily fit into the FUNcube Dongle
receive spectrum. The telemetry is 1000 bps BPSK and can, of course, also be
received with a normal SSB 2 metre wireless receiver.

The expected signal levels from ARISSat should be similar to those we expect
from FUNcube itself (and also eventually from UKube) and the team are keen to
discover what will be the minimum and best type of antennas for schools to use
with a FCD. Therefore user experience with the ARISSat signals will be very
valuable in making this determination.

To encourage everyone to receive ARISSat signals we are offering a FUN reward
for listeners!

There are a number of categories for this challenge -they include:

1+ The first FCD user, from each continent, who can post a spectrum recording of the received signal together with evidence of decoding the data using the ARISSat software and of sending it to the ARISSat data warehouse .

2+ The first non-FCD user, from each continent, who can provide evidence of having decoded the signals and of sending it to the ARISSat data warehouse.

3+ The listener, using a FCD or not, who can demonstrate satisfactory reception of the telemetry in the same ways as described above, using the "smallest" possible receive antenna. The actual closing date for this part of the challenge will be announced later.

4+ All other entrants who can demonstrate that they have been having FUN!

Please submit your "entries", including your location, station details (including FCD serial number where applicable), postal address and reports to g0auk<at>amsat.org

Good luck,

ARISSat-1
http://www.arissat1.org/

WW SPECIAL INTEREST GROUP --- MILITARY

Commando Solo heard on new shortwave frequency

Commando Solo, the US airborne radio station operating above Libya on behalf of NATO, has been heard using a new shortwave frequency, 10125 kHz, USB mode, transmitting messages intended for Gaddafi's forces.

This frequency is in the 30 metre amateur band, but is also used by the Libyan army.

Commando Solo has previously used 6877 kHz and 10404 kHz. The change in frequency is probably due to the jamming by the Libyan Army.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts,
please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

LATEST NEWS from Hans-Walter, UN/DL9LBH, dated 2011-05-21:
Finally today, 21st May 2011 I can inform you that my eme station
is ready to bring Kazakhstan (UN) to the moon. Here are already
active stations, but I will add some activity and probably 70cm band
to the moon. I build up a 4x11el group for 2m and to the moment a
2x23el group for 70cm. As soon as I get the missing 23el antenna,
which they failed to send me last time, I will have a 4x23el group
for 70cm. After moving from Tashkent/Uzbekistan to Astana/Kasakhstan
end of september 2010 I am still busy, in the job as well as at home.
All qsl cards I received until july 2010 I answered. Those I received
later still have to wait, but will be answered now in summer! I hope
that I can bring UN to many of you and soon also on 70cm. gl and see
your dots on the screen ... 73 Hans UN/DL9LBH in Astana/Kazakhstan

Frank, DH7FB, will be on a /mm Operation with a sailing ship
from Athina to Korfu (around the Pellepones area)
Here a rough timetable: 19.06.11 KM17, 20.06.11 KM16, 21.06.11 KM16
22.06.11 KM16, 23.06.11 KM16, 24.06.11 KM16, 25.06.11 KM16
26.06.11 KM06, 27.06.11 KM07, 28.06.11 KM08 ,29.06.11 KM08
30.06.11 KM09 - Call will be DH7FB/mm and Frank will try to be as
often as possible (NOT day by day due to the sailing trip) and if he
will be qrv only after 18 Z and if the ship is not anchoring south
of an island. He will try to be qrv on 144 MHz MS (qrg: 144,370 MHz
cq for QSY 144,355 MHz, DH7FB/mm first, FSK441) and as well for some
EME Tests. Equipment will be 200W, 8 ele DK7ZB with 12 dbd (4,4m).
pse look into the dxc... :)

** K5QE again in VHF-Contest via MS/EME **

Hello to everyone in the EME community. This year, the ARRL June VHF Contest will be held June 11th and 12th. We want to work as many EME stations on 2M AND 432 as possible to increase our grid count. Please help us with this event by working us on JT65b or CW. Thank you very much. I understand that the EU contests ban EME contacts, but that is NOT the case with the ARRL contests, so your contact is very important to us. Hence, I would really appreciate the EU stations making the effort to work me, as your contact will certainly be a rare grid for our log. Read all: http://www.mmmonvhf.de/latest.php?id=3864

** MC0SCL qrv from IO71 on HF and 50 MHz **

The Strumblehead DX & Contest Group will once again be activating Ramsey Island (IOTA EU-124, WW Loc. IO71HU), Pembrokeshire, southwest Wales, using the club call MC0SHL for their annual mini trip/holiday from the 9th to 13th June 2011. The difference this year is the operation will be more relaxed and on air for fun rather than for any contest, although over the weekend of 11th and 12th June there is the WFF activity weekend, with the island having the designated site of Ramsey island NR WFF GWFF-072 (see www.m0oxo.com/ and the WFF area on Charles web page). QRV on 80m through to 6m, using 2 FT1000MP MkV's and a K3. They will also be taking amplifiers for each band and will also have the facilities for RTTY this year. All details of the island and previous activations by the group are on their website at: www.mc0shl.com/ and all QSL requests go through their manager Tim, M0URX with OQRS facilities on his website www.m0urx.com/ - all logs will be uploaded to LOTW and Clublog (www.clublog.org/) either during the trip if they can get a reliable internet connection or immediately they get back to the mainland and the farm.

** Nicaragua qrv HF and 50 MHz again **

Look for W5MJ (YN2MJ) and W5PR (YN2PR) to be active from Nicaragua on 9-13 June. YN2MJ will be QRV mostly on 160 and 80 metres with an emphasis on Europe, while YN2PR will be be QRV on 6 metres, ARRL VHF QSO Party included.
SOURCE: [TNX The Daily DX] via 425 DX News #1048

** IM0P from San Pietro Island qrv HF and 50 MHz **

Operators IS0ANU, Daniele IS0BGL, Carlo IS0JOO, Nicola IS0BMU, Franco IS0EUJ, Giorgio IZ3KVD, Vittorio I1BUP, Antonio I1ZB, Claudio IZ1DNJ, Danio I5OYY and Simone IK5RUN will be active as IM0P from San Pietro Island (IOTA EU-165, IIA CI-009, MIA MIS-031, WLOTA 2989, WAIS FM10) between 23rd July and 1st August 2011. This includes an Island

DXpedition entry in the RSGB IOTA Contest (30-31 July). Plans are to
be QRV on 160-6 metre SSB, CW and RTTY. QSL via QRZ.com.
SOURCE: [NG3K] via ICPO Bulletin (03-10 June 2011)

** Ilheu das Rolas, IJ39 qrv on HF and 50 MHz **

Matt K0KKO and Ed K0GUV plan to be active from Ilheu das Rolas (IOTA
AF-023, WLOTA 1622, WW Loc. JI39GX), Sao Tome & Principe using the
callsigns of S92DX, S9CW and S9SX on HF and 6m. QRV between October
21-27, 2011. They will have two 6m stations (1 - IC756PROIII, ACOM1000
8ele M2 (also used for EME); 2 - IC756PROIII, 1KW Amp TBD, 11ele
short boom). Operating frequency of 50.105 MHz SSB, 50.105.7 MHz CW.

** T48, CUBA (Rare 6m Grid) **

Members of the Federaciï¿½n de Radioaficionados de Cubas in Las Tunas,
eastern Cuba, will be active on 6 meter from the Grid Square FL10MW,
during the next "ARRL June VHF QSO Party" (June 11-13th) using the
contest callsign T48K as a "limited multi-operator" entry. This will
be the very first time in the history that a ham radio station
transmits from this particular square on this band. Operators will be
Carlos/CO8CML, Douglas/CO8DM, Ernesto/CM8GJ and Raï¿½l/CO8ZZ and will
use an Yaesu FT 857 running into a five elements yagi from F9FT.
QSL via DK1WI. SOURCE: Ohio/Penn DX Bulletin #1013

** SX8R from Thassos Island, KN20, qrv HF and 50 MHz **

Laci, HA0NAR, will be active as SX8R from Thassos [aka Thasos] Island
(IOTA EU-175, GIOTA NAS-037, MIA MG-124, WLOTA 4186) between 25th
July and 1 August 2011. QRV 160-6 metres in CW, SSB and RTTY using
vertical antennas. Laci will also participate in the RSGB IOTA
Contest (July 30-31). QSL via home call.
SOURCE: [dx-world.net] via ICPO Bulletin (03-10 June 2011)

** FW, WALLIS & FUTUNA in 2012, qrv HF and 50 MHz **

Laci, HA0NAR, and two other operators will be active as FW0R from
Uvea Island (aka Wallis, OC-054, DIFO FW-001, WLOTA 0389, WW Loc.
AH16VS) next year (2012) between Janaury 25th and February 23rd.
Operations will be from Vailala village (Hihifo district). They plan
to have two stations on the air with amps operating on 160-6 meters
using CW, SSB and RTTY. Focus will be on the lower bands, especially
160/80/40/30 meters using Spider (18m) verticals. A week long side
trip will be also organized to Futuna Island (OC-118, DIFO FW-017,

WW Loc. AH05WQ) for the IOTA hunters in early February. The team also plans to take part in the ARRL DX CW Contest (February 18-19th) For more info/updates and an online logsearch, see the Web page at: http://www.ha0nar.hu SOURCE: Ohio/Penn DX Bulletin #1013

** C2, NAURU (Update) **

Excerpts from a "C21AA Nauru DXpedition" #2 press release dated June 4th, states members of Pacific DXers are pleased to announce that 6 operators will be active as C21AA from Nauru between November 10th and December 6th, with 3 complete stations on HF as well as a dedicated 6m station. The confirmed team so far consist of Art/NJ7N, Tim/NL8F, Eddie/VK4AN, Bill/VK4FW and 2 more operators to be announced later. The press release also states, "Nauru is currently ranked at 44 on the world wide wanted list, 31 in most of EU and 19 on the wanted Digital mode list." The team fully intends to operate on CW, SSB, RTTY and PSK31, and on all bands 160-6 meters. For logistical reasons, all equipment will be taken on same flight as "excess baggage" QSLs will be managed by Pacific DXers, with the task going to Bill, VK4FW. QSLing is available three ways..... direct, by the Bureau or online with Paypal 'postage' support. To request a QSL, and choice/ pick the method you want to use, go to: http://www.vk4fw.com/oqrs.php While each individual operator is responsible for their own personal expenses including air flights, accommodations, food etc..... they are seeking support to help offset other costs, such as the large excess baggage charge, hotel room just for the radio equipment, QSL printing, QSL postage for Bureau cards, phone calls associated with planning, purchase of consumables and, most important of all... the donation of some equipment to native Nauruan hams! A special Paypal account has been set up for support at: dxpedition@westnet.com.au <mailto:dxpedition%40westnet.com.au> (Just add your callsign/name and any comments in the 'comment/message' box.) All donors will be listed on the Web site, which is still 'under construction', so the following link doesn't work yet:
http://C21.pacific-dxers.com/supporters.html
[unless anonymity preferred] PLEASE NOTE: A special memento will be sent to donors who support them with 50 USDs or more. These donors will be listed on the QSL card. Organizations that provide support will have their logo and link placed on the Web page as well as their logo on the QSL Card [unless anonymity preferred].

** KB7ME CN71 Grid Trip, 50 MHz, 144 MHz and up **

Hello to all, I will be activating Grid CN71 for this years June VHF contest, 50 and 144 bands only. This will be the third year in a row for me in CN71. Will operate again from CN71xw. Lets hope for 6m E's. Last two years have been poor in CN71. The good news is I plan to be

QRV from Sat June 11 thru the morning of Friday June 17 assuming we don't get chased out by rain or run out of gas for the generator's. Will do 50 Mhz SSB/CW and WSJT MS with a Icom Pro3, kw amp and 6m5x yagi. On 144 Mhz, same modes, with my old Yaesu Ft-736r, 400 watt amp and a newly built 14 ele LFA design yagi. Internet/cell phone coverage is flaky at best. The better of two sites has fair cell coverage,(If I have cell service will have internet)(For outside contest use), however my preferred location was not accessable last year. Will run WSJT MS each morning/evening using the calling freq/50.260 and listening up typically 5 or 10, always first sequence I will be sending my grid for TX2 at all times. Outside the contest you send sh R26. If we are blessed with E's will announce myself SSB, on 50.125 and listen for callers on 50.180 typically. On CW you will find me around 50.095 +- qrm. On 144 Mhz WSJT MS I will CQ on the calling freq/144.140. possibly listening up or down. SSB/CW 144.200 +- qrm.I will have gear for 222/432/1296 with me but not qrv. If you want to try these bands, I am open to a schedule outside the contest Note: I will always sign KB7ME, not /p or /6. I will upload all q's to LoTW and qsl 100% for cards received. Hope to work you from this rare one. SOURCE: Mike KB7ME on WSJT Reflector

---

** K7NX in DN00 starting June 10, qrv 50 & 144 MHz **

Curby (KE7LHT) and Lloyd (K7NX) will be QRV from DN00 for the VHF QSO party next weekend. We'll probably run 6 meters only. Following the QSO party, I will remain in DN00 and plan to operate daily on 6 meter SSB and CW (will monitor 50.125), plus I'll be on 6 and 2 meter FSK441 early each morning - 6 meters on even numbered dates, and 2 meters on odd numbered dates. Look for me on 50.260 or 144.140. For FSK441, I will always transmit first, and will include my listening frequency in the CQ - I will switch my transmit freq to my listening frequency when I hear you. Then I'll go back to CQ on the calling frequency after the qso completes. We'll have internet/ping jockey running the week of June 13, but I'll likely head out portable later in that week and lose internet access. Operating equipment is an Elecraft K3 with a 5 element beam on 6 meters (and hopefully a 400 watt amp if I can get it running), and an IC-706 with a Mirage 160 watt amp on 2 meters with an 11 element beam. Everything is generator powered. Curby also has a brand new FT-897 so I'll get him fired up to permanently activate DN00. It's possible that I will make a multiple day trip over to DN10 also, probably around June 22 or 23. I'll have someone post that activity if it happens. I will cease operation on June 27 and head out of those grids. I hope to work all of you! QSL to CBA. SOURCE: Lloyd, K7NX via WSJT Reflector

---

** K7BV CM93 - Preliminary Announcement **

LATEST Update from Dennis, K7BV, dated 2011-06-08: I will leave my hours to join Barry at our boat to load the last of our gear and antennas shortly. We will depart Seal Beach Harbor a short time later. With some luck, we will have the a station on 6 meters (50155 SSB/CW and 50255 WSJT meteor scatter) this evening. Good luck to all - May the Es Be With Us! 73 Dennis K7BV SOURCE: Barry KS7DX via WSJT group reflector

---

** C6AKQ, FL15, in June ARRL VHF Contest, HF and 50 MHz **

N5KM and N4BP will travel to Freeport, Grand Bahama on June 9 and remain until June 13 to include the ARRL June VHF Contest. The call used during the contest will be C6AKQ (QSL via N4BP). Before and after the contest we plan to operate 80-10 Meters including the WARC bands with the calls C6AKQ and C6A/N5KM. For all activity, we will use both CW and SSB. We will have two operational stations allowing us HF activity even during the VHF contest. Rigs will be the Elecraft K3 and Icom 706MKIIG. Antennas will be a 40M dipole at 80 feet (to be used also on Six Meters), 80M dipole at 100 feet, and 6M dipole at 60 feet. 73 SOURCE: Bob Patten, N4BP via Reflector

---

** N8OFS/P Caboose Portable in the SMIRK Contest 2011... **

Howdy gang... Now that the SMIRK Contest 2011 Rules have been announced, http://smirk.org/contest.html I can announce my entry in the Contest... I will once again be "Broadcasting Live and Direct" from the BIG Caboose at the AC&J Railroad... Jefferson Ohio Ashtabula County, EN91or... I will be using the same trusty setup I always use out there... Kenwood TS-60 at 50W to 29.4ft of LMR-400 to the "DOMINATOR" antenna at 29.5ft... http://lpfmantenna.com/6-meter-antenna.html I will be parked and locked calling on 52.525FM... Pictures will be available sometime during the week after the Contest, which I will post the links to all the reflectors once I upload them to noars.net... The only slight "glitch" is that I won't be able to be on the air the whole 48 hours I will be on the air from 0000Z June 18 thru 1900Z June 19... Since this is the first weekend of Passenger Train season at the Railroad, I hafta be out of the Caboose so they can "put it away" when they put the Passenger Train away Sunday afternoon... I hope to work all my 6 Meter FM friends during this time... I have several "locals" up there that now have 6 Meter FM gear... So if ya work me I might be able to get ya a point or two by passing you off to "locals" that may be sitting around their rigs listening... May the prop godz be with us... PeAcE... SOURCE: Andy N8OFS via Reflector

==> FOLLOW THE 2011 ARRL NATIONAL CONVENTION ON FACEBOOK AND TWITTER

If you can't make it to the 2011 ARRL National Convention -- held in
conjunction with Ham-Com in Plano, Texas June 10-11 -- you can follow
all the activities on Facebook <http://www.facebook.com/ARRL.org> and
Twitter <http://twitter.com/arrlexpo>. Photos will be posted to the
ARRL's Facebook page <http://www.facebook.com/ARRL.org> throughout the
Convention, while the ARRL EXPO Twitter account
<http://twitter.com/arrlexpo> will carry live tweets. Discover more
about the 2011 ARRL National Convention here
```

<http://www.arrl.org/2011-arrl-national-convention>.

==> + PUBLIC SERVICE: ARRL, SATERN TEAM UP TO ASSIST IN JOPLIN

After the devastating EF5 tornado that swept through Joplin,
Missouri
<http://www.arrl.org/news/radio-amateurs-assist-american-red-cross-served-age
ncies-during-joplin-storm>
last month, radio amateurs responded to assist with providing support
in multiple ways. On Friday, June 3, the Salvation Army -- which has a
Memorandum of Understanding with the ARRL -- contacted the ARRL
<http://www.arrl.org/news/satern-seeks-amateur-radio-volunteers-for-joplin-op
erations>,
seeking the League's assistance to provide hams who could help support
the agency's work in Joplin. More than 50 Amateur Radio operators
responded to the request to help the Salvation Army Team Emergency
Radio Network (SATERN <http://www.satern.org/>) supply logistical
support to the affected areas. Just two days later, all personnel needs
had been met. These hams helped to relay information back to the
Salvation Army's Joplin headquarters about inventory, requests for food
and drink and maintenance problems. Both the ARRL and SATERN greatly
appreciate the response from the amateur community.

==> + ARRL FIELD DAY: IT'S NOT TOO LATE TO PREPARE FOR FIELD DAY

Now is the time to start getting information out to the public about
your ARRL Field Day <http://www.arrl.org/fieldday> activities. ARRL
Field Day -- the largest on-the-air operating event -- is the one of
the best opportunities of the year for showing our Amateur Radio
capabilities to the public. ARRL Media and Public Relations Manager
Allen Pitts, W1AGP, notes that the ARRL has made many media materials
available for local use. "Our visibility to the public is important in
antenna, band preservation and texting issues, so we encourage you to
use this opportunity to showcase what Amateur Radio can do," he said.
Download an audio PSA that can air on your local radio stations here
<http://www.arrl.org/public-service-announcements>. Get a press
release, a government proclamation template and invitation letters that
you can use to invite your local officials to your Field Day site here
<http://www.arrl.org/files/file/Field-Day/2011/2011_FD_PR_info.pdf>.
Find high-definition video files suitable for airing on your local
television stations here <http://p1k.arrl.org/pub/pr/>. Get more
information on ARRL Field Day, including the 2011 ARRL Field Day logo
and operating tips here. More info, the logo and tips are here
<http://www.arrl.org/current-contact-issue>. Find a Field Day station
near you here <http://www.arrl.org/field-day-locator>. ARRL Field Day
is June 25-26.

==> + 2010 ARRL ANNUAL REPORT NOW AVAILABLE

The ARRL Annual Report for 2010 -- now available online
<http://www.arrl.org/annual-reports> and in print -- reviews the major
events of the year and documents the renewed growth of both the ARRL

and the activities of the Amateur Radio Service. For the fourth consecutive year, ARRL membership grew -- totaling 156,475 members at year end. In his introduction, ARRL Chief Executive Officer David Sumner, K1ZZ, noted numerous challenges facing the ARRL. "But we also have great strengths," he explained, "and if we harness them effectively over the next few years, the ARRL and Amateur Radio will be well positioned for a bright second century -- at least as bright as their first." Read more here <http://www.arrl.org/news/2010-arrl-annual-report-now-available>.

==> WRC-12: US PROPOSES WRC-12 ALLOCATIONS FOR HF RADARS

The ARRL and its partners in the IARU have been involved in the preparations for several items on the 2012 World Radiocommunication Conference (WRC-12) agenda. Agenda item 1.15 is "to consider possible allocations in the range 3-50 MHz to the radiolocation service for oceanographic radar applications." Such radars have been in operation in coastal areas for many years, typically under experimental licenses.

Based on protection requirements for the Amateur Service that the IARU had arranged to be included in ITU documentation, the Conference Preparatory Meeting (CPM) Report for WRC-12 that was adopted in February concluded that sharing between oceanographic radars and the Amateur Service "seems to be difficult." Sharing studies, therefore, focused on in-band compatibility in the bands used only by the fixed and/or land mobile services. The CPM Report offers three methods of satisfying the agenda item through various combinations of primary and secondary allocations, with the objective of satisfying the operational need for safety systems (e.g. for the detection of tsunamis) and providing for the operation of other systems while protecting other allocated services from harmful interference. Read more here <http://www.arrl.org/news/us-proposes-wrc-12-allocations-for-hf-radars>.

==> + CHECK OUT THE JULY ISSUE OF QST

The July issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting, this issue of QST has something for just about everyone.

Radio amateurs who were active in the 1950s through the 1970s have most likely built a radio from a kit. But even 60 years later, hams can experience the fun that goes hand-in-hand with kit building. In his article "Electronic Kits Still in the Picture," Mark A. Lacy, W5TXR, says that hams today can still have the thrill of building a radio from kits that incorporate today's technology. Hams know that sunspots and solar activity influence band conditions. But how can we use that information ? QST Technical Editor Joel Hallas, W1ZR, explains the daily sunspot number, solar radio flux and more in his article "Solar Indices -- What Do They Mean?"

Join John Reisenauer Jr, KL7JR, as he takes to Canada's Northwest Territories and the Yukon to heed the call of the wild -- and the unpredictable challenges of Amateur Radio -- in his article "The Call Sign of the Wild." In his article "After the 73s," QST Assistant Editor Steve Sant Andrea, AG1YK, relates that although ARRL's Logbook of The World has changed the way many hams verify a contact, others still rely on QSL cards. Hams across the country participated in the 2010 ARRL Simulated Emergency Test, giving served agencies and the news media a public demonstration of our capabilities. ARRL Field Organization Supervisor Steve Ewald, NV1X, presents the results of the SET in the July issue.

<http://www.arrl.org/multimedia> ARRL Contributing Editor Howard Robins, W1HSR, takes a look at the Kenwood TH-D72A dual band handheld transceiver in this month's Product Review. He says that this rig "seamlessly folds APRS operation and a packet TNC into a full featured, easy-to-use dual band handheld." ARRL Contributing Editor Ward Silver, N0AX, checks out the Down East Microwave L222-28 1 meter transverter. He says the transverter "is a fine solution for amateurs looking to expand station coverage to the 1.25 meter band. It can be adapted to interface with a variety of radios and receivers, and transmits well." Silver also test drove the Tennadyne T-28 VHF/UHF log periodic antenna. He says that this antenna "is ruggedly built and will get you on six amateur bands with some gain from a single feed line."

Jay Townsend, WS7I, delivers the results of the 2011 ARRL RTTY Roundup. This year, participants in 132 countries submitted almost 1600 logs containing half a million contacts. Ken Harker, WM5R, has the results of the 2010 ARRL 10 Meter Contest. For the first time ever in this contest, Mexican states counted as multipliers, with 26 of the 32 Mexican states on the air.

Of course, there are the usual columns you know and expect in the July QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your July issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> + FCC NEWS: FCC TAKES STRONG STANCE AGAINST RADIO JAMMING, ISSUES $24,000 FINE TO CALIFORNIA MAN

On June 6, the FCC issued a Forfeiture Order <http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0606/DA-11-990A1.pdf>
in the amount of $24,000 against Kevin W. Bondy of Encino, California, for engaging in unlicensed radio operation and intentional interference to licensed radio operations and for refusing to allow an inspection of his radio equipment by FCC personnel. Bondy -- licensee of General Mobile Radio Service (GMRS <http://wireless.fcc.gov/services/index.htm?job=service_home&id=general_mobil

e>)
Station WQGX752 -- is accused of repeatedly and intentionally jamming four land mobile frequencies assigned to The Oaks Shopping Center in Thousand Oaks, California.

In assessing the $24,000 fine, the FCC noted that it was responsible for making and enforcing regulations to prevent interference and to maintain control over the use of the radio spectrum in a manner that promotes the public interest and convenience. "Bondy's acts cut at the heart of the Commission's responsibilities to protect the nation's airwaves and regulate use of the spectrum," the Order said. "Bondy operated a radio without a license on the specific frequencies assigned and licensed by the Commission to The Oaks, for the explicit and expressed purpose of prohibiting The Oaks's use of its licensed frequencies. This type of conduct inhibits the Commission's ability to effectively regulate and maintain control over the use of the spectrum and will not be tolerated." Bondy has until July 6 to pay the fine.

==> + FCC NEWS: FCC SEEKS COMMENTS ON TERMINATING CERTAIN DOCKETED PROCEEDINGS

In a Public Notice
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0603/DA-11-992A1.pdf>
(CG Docket No 11-99) released on June 3, the FCC's Consumer & Governmental Affairs Bureau (CGB <http://transition.fcc.gov/cgb/>) is seeking comments on whether or not it should terminate approximately 800 docketed proceedings
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0603/DA-11-992A2.pdf>.
There are numerous proceedings pertaining to Amateur Radio on the list. These proceedings -- some going back to 1991 -- include dockets where no further action is required or contemplated, as well as those in which no pleadings or other documents have been filed since December 31, 2004. The record in a terminated docket will remain a part of the FCC's official records; the various pleadings, orders and other documents in that docket will continue to be accessible to the public, post-termination. With this Public Notice, the CGB is seeking comment from interested parties on the possible termination of those proceedings. Comments will be accepted within 30 days after the Public Notice is published in the Federal Register; reply comments must be filed within 45 days after publication. As of June 7, a publication date has not been set. Instructions on how to file comments are listed beginning on page 2 of the Public Notice
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2011/db0603/DA-11-992A1.pdf>.

==> + ON THE AIR: ARRL VHF/UHF ADVISORY COMMITTEE SEEKS INPUT

The ARRL would like to encourage more participation in its several VHF/UHF contests held each year. Many of the HF transceivers sold in recent years include 50 MHz, and some also include the 144 and 432 MHz

bands with multi-mode capabilities. The question at hand is how can we encourage more owners of such radios to utilize these bands and modes to participate in VHF/UHF contests?

The ARRL VHF/UHF Advisory Committee (VUAC) has been asked to consider this question, and to make recommendations to encourage, explore and expand the ARRL VHF and UHF contests and other operating activities by using the multi-band and multi-mode capabilities of modern transceivers and related equipment.

The VUAC would like to ask the Amateur Radio community to provide their comments and ideas for consideration.

Please send any comments or ideas you have on this matter to your ARRL VUAC Division representative no later than July 1, 2011. A listing of each Division's VUAC representative can be found at http://www.arrl.org/arrl-staff-vuac-cac.

==> + ON THE AIR: NEW RUSSIAN PREFIX SYSTEM IN USE

If you have been on the HF bands lately, you may have noticed that a number of new prefixes are in use by stations in the Russian Federation. Here is a summary of the changes recently adopted by the Russian telecommunication authorities. Thanks to SRR President Roman Thomas, R5AA (ex-RZ3AA) for the information.

- Russian prefixes with the numeral 2 are no longer limited to Kaliningradsk. Stations with RA2 and UA2-UI2 (with F and K as the first letter in the suffix) are in Kaliningradsk; otherwise, these prefixes will used in European Russia.
- Stations with the following prefixes are in European Russia: R1, RA1-RZ1 (except RI1 as noted below), R2, RB2-RZ2, R3-R7, RA3-RZ7, UA1 and UA3-UI7. Also, stations with the prefixes R8, R9, RA8-RZ9 and UA8-UI9 (with F, S, T, W or X as the first letter in the suffix) are in European Russia.
- Except for those listed above, all stations with 8, 9 and 0 as the numeral are in Asiatic Russia.
- Russian Antarctic stations use temporary call signs in the series RI1ANA-RI1ANZ and RI00ANT to RI99ANT.
- Franz Jozef Land stations use temporary call signs RI1F, RI1FJ and RI1FJA-RI1FJZ.
- Malyj Visotskij island stations use temporary call signs RI1M, RI1MV and RI1MVA-RI1MVZ.

==> + CHANGING OF THE GUARD: GENE ZIMMERMAN, W3ZZ, TO RETIRE FROM "THE WORLD ABOVE 50 MHZ"

If you're a VHF+ fan, you probably read "The World Above 50 MHz," written by Gene Zimmerman, W3ZZ, of Gaithersburg, Maryland. For the last nine years, Zimmerman -- an ARRL Life Member -- has written this popular QST column, but the July 2011 issue will be his last. "When I accepted the duties of VHF Editor in 2002, I did so well knowing that my tenure would be circumscribed and likely not to exceed a decade in

time," he wrote in his farewell column. "There are many reasons for this, most importantly that an individual begins to run out of new ideas after a given amount of time and that the position -- and the readership -- would benefit from fresh viewpoints." Beginning with the August 2011 issue of QST, Jon Jones, N0JK, of Wichita, Kansas, will take over the column. Read more here <http://www.arrl.org/news/gene-zimmerman-w3zz-to-retire-from-the-world-above-50-mhz>.

==> SOLAR UPDATE

Tad "Until the Sun went down <http://www.youtube.com/watch?v=QqqBs6kkzHE>" Cook, K7RA, reports: Although higher early in the reporting week, the average daily sunspot numbers declined more than 4 points to 85.7, while the average of daily solar flux numbers was down 1.5 points to 101.6. The predicted solar flux for the near term is 88 on June 9-15, and 90, 95, 95, 92, 92 and 92 on June 16-21. The solar flux is then expected to rise to a peak of 115 on June 28. The predicted planetary A index is 20, 25, 12, and 8 on June 9-12, then 5 on June 13-22, then peaking at 15 on June 24-25. Check out this link <http://www.thesuntoday.org/current-observations/a-spectacular-event-a-filamentprominence-eruption-to-blow-your-socks-off/> sent by Scott Bidstrup, TI3/W7RI, showing some fantastic HD videos of recent solar eruptions. Look for more information on the ARRL website on Friday, June 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Human League's (Keep Feeling) Fascination <http://en.wikipedia.org/wiki/%28Keep_Feeling%29_Fascination>.

==> THERE'S STILL TIME TO ENTER THE 2011 ARRL PHOTO CONTEST!

Have you ever wanted to see a photo of yours in QST, the annual ARRL Amateur Radio Calendar or another ARRL publication? Well, here's your chance! If you're among the winners, not only will your photographic skill be propagated far and wide, but we're offering $100 as the First Prize. The winning photo and three runners-up will be published in QST. All submitted photos will also be considered for the 2012 ARRL Calendar.

- Deadline: Photos must be received at ARRL HQ by June 30, 2011.
- Subject: Must be directly related to Amateur Radio, and be in good taste. Extra points will be awarded for photos showing folks having fun with Amateur Radio. Photos will be judged on overall quality and composition.
- Requirements: Digital images or color prints accepted. A digital image printed on photo paper, however, doesn't work as well as a high-resolution file attachment. Digital images should be high resolution. A digital image up to 8 MB in size can be e-mailed to upfront@arrl.org, subject line "2011 Photo Contest." An image may also

be burned to a CD and mailed to ARRL Photo Contest, 225 Main St, Newington, CT 06111. All entries must include caption information describing where the photo was taken, along with a description of the subject of the photo, as well as the names and call signs of any persons shown. If you entered last year's contest, please do not resend the same photo for this year's contest. One entry per person.
- Miscellaneous: The decisions of the judges -- composed of QST editorial and production staff -- are final.

==> DXCC DESK APPROVES CURRENT VK0KEV MACQUARIE ISLAND DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the current VK0KEV DXpedition to Macquarie Island has been approved for DXCC credit. "If you had cards that were recently rejected for this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to extremely heavy e-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts or in the live, daily DXCC Standings <http://www.arrl.org/dxcc/>."

==> THIS WEEK ON THE RADIO

This week:

- June 10 -- NCCC Sprint Ladder
- June 11 -- Portugal Day Contest; Asia-Pacific Sprint (SSB)
- June 11-12 -- DRCG Long Distance Contest (RTTY), VK Shires Contest; CWops Mini-CWT Test; GACW WWSA CW DX Contest; REF DDFM 6 Meter Contest
- June 11-13 -- ARRL June VHF QSO Party <http://www.arrl.org/june-vhf-qso-party>
- June 12 -- SKCC Weekend Sprint
- June 15 -- NAQCC Straight Key/Bug Sprint

Next week:

- June 17 -- NCCC Sprint Ladder
- June 18 -- Feld Hell Sprint; AGCW VHF/UHF Contest
- June 18-19 -- West Virginia QSO Party; Stew Perry Topband Challenge; All Asian DX Contest (CW); SMIRK Contest
- June 19 -- WAB 50 MHz Phone Contest
- June 20 -- Run for the Bacon QRP Contest
- June 22 -- SKCC Sprint; NAQCC Straight Key/Bug Sprint
- June 22-23 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee
- July 2 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecra
cker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention
<http://www.arrl.org/hamfests/montana-state-convention-glacier-waterton-inter
national-hamfest>,
Essex, Montana
- July 29-30 -- ARRL Oklahoma State Convention
<http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-2011>,
Oklahoma City, Oklahoma

Amateur Radio Newsline(tm) Report 1765 - June 10 2011

Amateur Radio Newsline report number 1765 with a release date of Friday, June 10, 2011 to follow in 5-4-3-2-1.

The following is a QST. RADAR could come to 60 meters and displace ham radio, South Africa cancels the licenses of those who forgot to pay the annual fee; Amateur radio is well represented at the 2011 Hurricane Conference in Texas and meet some of the ham radio heroes of the Joplin tornado. All this and more on Amateur Radio Newsline(tm) report number 1765 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE HERO HAMS OF THE JOPLIN TORNADO

Some high drama has emerged in the aftermath of the tornado that ripped through Joplin, Missouri, on Sunday night May 22nd. It's a story of true ham radio heroism as supplied to us by Patti Flowers-Palmer, KD0AEL, and Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

--

Patti Flowers-Palmer, KD0AEL, tells Amateur Radio Newsline that it was on Sunday evening, May 22nd while a young amateur was finishing with post Skywarn Net Control duties that a voice was heard calling for help over the 146.91, W0EBE, repeater. Caleb Burns, KD0BWT, responded to that call. It was coming from the Freeman Hospital in Joplin, Missouri. The news it carried was that a devastating F5 tornado had destroyed much of the community as well as its regional medical facility.

In that exchange, crucial medical supplies were ordered and medical teams were called to duty. Initially, the call was made by an Information Technology person at that location. He was relieved by Thomas Ellicott, N0EKP, who deployed to assist his own stricken community.

As that transmission was taking place, Steve Palmer KA0SPM, and his wife Patti KD0AEL, Andrew Brashers KD0HUN and Jonathan Rinty KD0OSF, all who had been deployed as Skywarn spotters, responded by driving to Cox South Hospital in Springfield, Missouri. Meantime, Tom Hargis WX0SML and Jamas Justice, KD0GUU, both of whom had been deployed with

Skywarn, drove to St. John's Regional Medical Center also located in Springfield. Both of these hospitals are regional Medical Centers for Southwest Missouri.

Upon arriving and finding that the radio rooms near the Incident Command Centers were void of any amateur equipment, operators at both locations began relaying information from doctors and nurses from using their own mobile radio gear. This, to begin the crucial process of moving injured from the overwhelmed Freeman Hospital to several Springfield trauma centers.

With immediate needs met, the hospitals worked with the amateurs to provide locations for the operators to set up mobile radios as base stations so that communications could continue. One was located in an incident command at St. John's and the other in the ambulance bay of Cox South. As this was occurring, KD0BWT grabbed a handie-talkie and headed for Ozarks Community hospital where he established mobile command. A short time later, Pat Conway WA6JGM and Clifton Smith KC0SQU responded by taking a mobile unit to Ozarks and setting up a more permanent station at that location.

The amazing band opening that had allowed the initial communications began to fade and KA0SPM deployed to the National Weather Service in Springfield where he relayed messages via the 145.21 repeater. That machine had survived the tornado that ravaged other parts of the Joplin area.

According to KD0AEL, before the night was over, there was a tremendous outpouring of offers from amateurs over the entire area who offered any assistance they could provide to keep communications flowing. During the week that followed, a number of hams continued to call to offer assistance and they were directed to the coordinators of the CERT search and rescue efforts.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, reporting from Reno, Nevada.

--

As a side note, Patti says that the operator that received the first transmission was on his honeymoon but had been acting as net control for the Greene County Skywarn. Talk about total dedication to duty. (KD0AEL)

**

RESTRUCTURING: RADAR COULD COME TO 60 METERS

The 60 meter ham radio allocation could come under threat from low frequency RADAR. The ARRL and Southgate news both report that the United States has submitted a National Telecommunications and Informational Agency developed plan that could see 5.250 to 5.450 MHz being co-allocated to High Frequency Radar systems.

The NTIA proposals would see Radiolocation getting primary allocations that would include at 5.250 to 5.450 MHz as well as 14.350 to 14.990 MHz along with a number of others across the entire High Frequency spectrum. This would not only mean sharing or giving up 5 MHz, but it would also place wideband noise generating signals directly adjacent to the 20 meter band as well.

While there is no international allocation to the Amateur Service in the 5.250 to 5.450 MHz band, the United States and a growing number of other nations world-wide have authorized at least limited amateur operations on a non-interference basis to this spectrum

The full story is on-line at the ARRL website. You can get directly to it by using the shortcut of tinyurl.com/LFRADAR. (Southgate, ARRL, others)

**

RADIO LAW: SOUTH AFRICA'S TELECOMMUNICATIONS REGULATOR CANCELS 34,000 LICENSES FOR NON PAYMENT

When is a ham not a ham? In South Africa it appears to be when he forgets to pay his yearly licensing fee. Amateur Radio Newsline's Bruce Tennant, K6PZW, explains:

--

South African hams who failed to pay their annual license fee, may now find that they are license free. This, after South Africa's telecommunications regulator the Independent Communications Authority of South Africa, better known as ICASA, has cancelled over 34,000 radio licenses that have remained unpaid for the past 365 days. This includes all amateur radio licenses that are in arrears for the past year.

According to the South African Radio League, ICASA's finance department did not consult with the regulatory agency's licensing department before taking this action. Rather, it simply cancelled all licenses unpaid for the past 365 days.

South African hams that had their license cancelled are being advised by the South African Radio League to call the Independent Communications Authority to have it reinstated. Those that have already paid only need to provide proof of payment. Those who have not paid up can do so by following the information and account number on their last valid license document.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

It should also be noted that as a courtesy ICASA normally sends out reminders that regulatory fees are due. However, the ultimate responsibility remains with the licensee to ensure that the license fee

is paid up at all times. (SARL)

**

RADIO LAW: BILL TO AUTHORIZE ENGINEERS ON COMMISSIONERS STAFF INTRODUCED IN HOUSE

Meantime back in the United States, Representative Cliff Stearns from Florida has introduced House Bill 2102 This is a companion measure to Senate Bill 611, presented earlier this year by Senator Olympia Snowe of Maine. Both bills would authorize each FCC commissioner to appoint a fourth staff assistant who is an engineer or computer scientist.

Last March, the Society of Broadcast Engineers national leadership says that it met with Stearns' Washington staff and asked that he consider sponsoring the legislation. In a press statement, the SBE says that with bills now introduced in both Houses of Congress, it will be working to gain co-sponsors for each measure and will continue to push to see this legislation eventually approved by Congress and signed into law.

The president of the Society of Broadcast Engineers is Vinny Lopez. He is encouraging SBE members to write senators and representatives to ask them to support S.611 and H.R.2102. Radio amateurs who want to see more technical expertise returned to the FCC might want to read these two measures and comment on them as well. (RW)

ENFORCEMENT: FCC FINES LOS ANGELES MAN $24,000 FOR UNLICENSED OPERATION

The FCC has come down hard on a Los Angeles area man that the agency alleges to have tried to run a shopping center off of its assigned land mobile channels. We have more in this report:

--

Back in March of 2009 the FCC was asked by The Oaks shopping Center in the Los Angeles suburb of Thousand Oaks to investigate what appeared to be interference on the radio frequencies used by the mall's security officers. By March 5th, agents from the FCC's Long Beach office had T-hunted the source of the interference to an unlicensed and unauthorized repeater transmitter in a secured radio communications facility on Oat Mountain. Oat Mountain is a popular radio site at

about 3000' above surrounding terrain located in the Santa Susana Mountains North-West of Los Angeles. At that time the agent observed pulsating signals on 461.375 MHz and 466.375 MHz emanating from the repeater transmitter and also observed a beam antenna pointed in the direction of the shopping center.

On March 6, 2009, in an effort to locate the point of origin of the transmission from the, the agent again monitored 461.375 MHz and 466.375 MHz in the vicinity of The Oaks and observed pulsating signals that interfered with the normal transmissions on those frequencies.

Later that day, in consultation with personnel from The Oaks and the Ventura County Sheriff's Department, the Los Angeles agent used direction-finding to locate the source of the transmissions. This, while personnel from The Oaks spoke to the as yet unidentified subject on 464.7125 MHz and 462.8375 MHz.

During the time The Oaks personnel engaged in radio communications with the subject, he acknowledged he was intentionally interfering with the shopping centers ability to communicate in order to render its repeater unusable and to force The Oaks off of its licensed channels. Specifically, the subject told The Oaks personnel that they had "plenty of warning."

All this time the FCC had been busy T-hunting the signal and at approximately 7:30 p.m. the Los Angeles agent located the transmitter originating the voice transmissions to a vehicle parked at a National Park Service parking structure across the street from the shopping center. The Ventura County Sheriff's Department then secured the area and identified the subject as Kevin Bondy.

The Los Angeles agent identified himself to Bondy and explained that a refusal to allow an inspection could result in a fine. Then the agent asked Bondy if he could perform an inspection of all radios in his vehicle. Initially Bondy refused to allow an inspection, then a few minutes later, agreed to allow an inspection, then refused again after the Los Angeles agent began. Bondy's refusal was witnessed by Ventura County Sheriff's Department deputies.

About three months later on May 14, 2009, the Los Angeles Office issued a Notice of Apparent Liability for Forfeiture to Bondy in the amount of $24,000. After being granted an extension by the Los Angeles Office, Bondy filed a response on August 21, 2009, arguing that he did not commit the violations, that he did not refuse to allow the inspection, and that he lacks the ability to pay the proposed forfeiture amount.

Now, in its In its June 6th notice, the FCC said that in deciding to affirm the $24,000 fine, the agency notes that it is responsible for making and enforcing regulations to prevent interference and to maintain control over the use of the radio spectrum in a manner that promotes the public interest and convenience. It says that Bondy's actions cut at the heart of the Commission's responsibilities to

protect the nation's airwaves and regulate use of the spectrum. As such, whether he can afford to pay it or not he can afford it, the $24,000 fine remains adding that the ability to pay a forfeiture is just one of the criteria the agency must consider when determining the appropriate forfeiture penalty for violations of the Communications Act and the FCC's own Rules. It then gave Bondy until July 6th to pay the amount in full.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--
Bondy was ordered to pay in full the $25,000 fine within 30 days of the release date of its notice. If he fails to do so, the FCC says it can refer the case to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: ANOTHER UNLICENSED BROADCASTER FEELS THE FCC $20000 NAL STING

The proposed fines to unlicensed broadcasters just keep on coming. This with word that the FCC is pursuing a $20,000 Notice of Apparent Liability for Forfeiture that it has issued against Recardo Millwood for his alleged operation of an unlicensed radio transmitter on 88.9 MHz in The Bronx, New York.

According to its May 12th release, back on five occasions in late 2010, agents from the Enforcement Bureau's New York Office responded to a complaint regarding an apparent unlicensed broadcast station operating in the New York City borough of Bronx. In each instance they determined that the source of the transmissions was a radio station operating with a transmitter located in the building on White Plains Road and an antenna located on the roof of an adjacent building. A person who identified himself as Recardo Millwood stated that he was the owner and operator of the radio station that identified itself as Sela Radio.

During station inspections the agents verbally warned Millwood about the penalties for operation of an unlicensed radio station. These verbal warnings were followed up by written correspondence to Millwood but the FCC says the illegal transmissions continued.

Now it has acted by issuing Millwood the $20,000 Notice of Apparent Liability for Forfeiture. This based on fact it had warned Millwood to cease transmissions on more than one occasion.

Millwood was given the customary 30 days to pay the proposed fine or to file an appeal. (FCC)

RADIO LAW: FCC SEEKS PUBLIC COMMENTS ON CALM ACT

The FCC is asking for public comment on the implementation of the Calm Act, which aims to regulate the volume on TV commercials to that of associated programming.

The Calm Act was enacted by Congress last December 15th. It requires that the FCC adopt regulations for television broadcasters, cable operators and other multi-channel programming distributors on or before this December 15th to limit volume excursions between programming and commercials.

The legislation stems from numerous long term viewer complaints about excessively loud television commercials. In its Notice of Proposed Rule Making or NPRM issued May 27th, the FCC notes that commercial audio levels have been a leading source of criticism reported to the regulatory agency since its Consumer Call Center began reporting complaints in 2002. The NPRM addresses regulatory enactment, compliance, viewer complaint procedures, enforcement and other matters concerning adoption of the Calm Act.

Comments to the Notice of Proposed Rule Making will be accepted for 30 days after its publication in the Federal Register and reply comments will be due no later than 45 days after the Federal Register publication. The new regulations will go into effect one year after they are adopted. (FCC, TV Technology)

RESCUE RADIO: HAM RADIO AT THE 2011 HURRICANE CONFERENCE

Amateur radio was well represented at the 2011 Hurricane Conference held at the George R. Brown Convention Center in Houston, Texas on Saturday June 4th. Members of the South East Unit headed by Emergency Coordinator, George Fletcher, AD5CQ, provided communications by shadowing key staff throughout the event. They also had a booth in the vendors section manned by Alfred Perez, N5VEV and Mike Urich, KA5CVH.

In addition to the one on one contact at the booth, ARRL literature on how to become a radio amateur along with information on Harris County ARES was available. A portable station was located at the booth for display and was also used as a net control point manned by Scott Reeve, KT5SR.

Contact information was collected from approximately 200 people who indicated that they were interested in learning more about ham radio. As a follow-up, each one will be contacted and directed to the closest area club that provides classes and testing sessions. This information will also be distributed to those clubs for follow-up.

Pictures of the event are on the Harris County ARES web-site. It's in cyberspace at the shortcut link of tinyurl.com/3h5caeh (KA5CVH)

NAMES IN THE NEWS: GET WELL WISHES TO SOUTHGATE NEWS RICHARD BRUNTON G4TUT

A shout-out of get well wishes to our friend Richard Brunton, G4TUT, who operates the Southgate Amateur Radio Club news source website in the United Kingdom. For several days last week the Southgate clubs news log was not being updated. On Saturday, June 4th, Richard posted that he had been taken to the hospital on Tuesday, May 31st and was not released until last Saturday afternoon.

Since its inception, what's become known as the Southgate News has become the ham rtadio equivalent of a wire service to the world of amateur radio. As such is a truly valuable resource to all those who report the news of the hobby. Richard is its heart and soul and we wish him all the best in recovering from whatever ailment he had. (ARNewsline(tm), Southgate)

NAMES IN THE NEWS: K7BV SAYS HE'S NOW CANCER FREE

And some good news that many have been waiting to hear. Dennis Motschenbacher K7BV, who is the Executive Vice President of Amateur Radio Sales for Vertex-Standard says that he is now cancer free.

One of the most respected people in any aspect of the hobby, in August 2010, Dennis was diagnosed with throat cancer that had spread to lymph nodes on the right side of his neck. Since then, he has been going through very aggressive therapy to rid himself of the disease. And as his day to day health would allow, he chronicled his almost year long experience in an on-line blog simply titled Dennis K7BV Cancer: Uncensored. And in his May 26th entry he announced that he was officially cancer free and that: "life is good."

The only word that can be used to describe Dennis story of his battle to overcome the disease is inspirational. His blog is well worth reading by anyone, but especially by those who have been diagnosed with any life altering illness. If that's you, or if you know someone like that, send them to http://k7bvcancer.blogspot.com.

In the meantime, we know that you join us in saying, K7BV -welcome back. You were truly missed. (K7BV Blog)

PUBLIC RELATIONS: A GREAT LESSON IN HAM RADIO PUBLIC RELATIONS

One of the best ever public relations spots ever done was aired recently on KCTV channel 5 in Kansas City. It featured only a reporter, two hams and an H-T, but is an excellent example of how an interview should take place.

The interviewees were Hamclass.org instructors, Brian Short, KC0BS and Matt May, KC4WCG. The HT was a Yaesu VX-7R, but it was the comments made by Short and May that made this such an outstanding bit of morning television:

--

KC0BS: ""Actually, there are a lot of ways that people can get involved in a response, but all of them require some expertise. You need to bring something to the party, so as to speak. There's are great opportunities through the Red Cross, the Salvation Army and another great example of that is amateur radio."

--

If you are a ham involved in publicizing the hobby, or just want to see how to do an interview correctly, then this is must watch television. Its now up on YouTube.com. You can reach it by taking the shortcut link of tinyurl.com/42ntagq (Various sources. Audio courtesy of YouTube)

STRANGE BUT TRUE: BIRDS ATTACK TV STATION PERSONNEL

And heres one from the strange but true file. Looking a bit like the Alfred Hitchcock movie thriller "The Birds," staffers at Atlanta's WXIA television have been dodging an aggressive flock of Brown Thrashers near its studios. The birds appear to have taken up residence atop a driveway light pole and regularly swoop down to attack passers by. Video of these airborne assaults on the WXIA staff can be seen on-line at tinyurl.com/3qmxk4b (Broadcasting)

**

EMERGING TECHNOLOGY: LASER AND FIBER OPTICS SET NET DATA SPEED RECORD

Researchers have set a new record for the rate of data transfer using a single laser. The speed reached is 26 terabits per second.

The trick was to use what is known as a "fast Fourier transform" to unpick more than 300 separate colors of light in a laser beam. Each is then encoded with its own string of information.

The technique is described in the journal Nature Photonics. The report says that at those speeds, the entire Library of Congress collections could be sent down an optical fiber in about 10 seconds. (Science OnLine)

**

ON THE AIR: UK MANOR HOUSE OXBURGH HALL

On the air, news that the United Kingdom's Bittern DX Group will be activating Oxburgh Hall in Norfolk as GB2OH from June 16th to the 19th. Oxburgh Hall is a historic site that was built in 1482 by the Bedingfield family, whose descendants still live in parts of the estate but the property now maintained by the National Trust.

Sir Edmund Bedingfeld was granted a license to construct the manor by Edward IV. Bedingfeld built this medieval, moated home as a glorious status symbol, romantically adorned in the nature of a castle. More information regarding Oxburgh Hall can be found at the Bittern DX website or www.cashota.co.uk (RSGB)

**

DX

In DX, word that South Korean operators HL5FUA and 6K2GCW will be operational as 3D2CJ from Rotuma sometime and not between June 17th and the 24th as first announced. ctivity will be on 80 through 6 meters using CW, SSB and the digital modes. QSL via HL5FUA, direct or by the Bureau.

Another postponed operation is that of K9EL who was expected to be active from French Saint Martin this past week. At the last moment he informed the Ohio Penn DX Newsletter that it been postponed due to medical reasons. Specifically, John told the newsletter that he had developed chest pains and underwent surgery to install three stents in arteries around his heart. He added that he is unable to travel to French Saint Martin at this time, but that he will advise if he is able to re-schedule the trip for later in the month. In the meantime, we wish John a very speedy recovery.

VK4FW and VK4AN are expected to be active from Fiji as 3D2T and 3D2A between October 24th and November 9th. No details of their bands or modes have yet been provided. It was mentioned that they will participate in the CQ World Wide DX SSB Contest on October 29th and 30th. QSL 3D2T via VK4FW and 3D2A via VK4AN.

JI3QBQ will be operational portable AH0 from Saipan in the Northern Mariana Islands from between June 11th and the 14th. Activity will be on the High Frequency bands. QSL via JI3QBQ.

Lastly, keep an ear open for special event station TM6JUN to be active until June 15th. This operation is to commemorate "D-Day" which was June 6, 1944 on the beachhead at Normandy, France. Operations are on 160 through 6 meters using CW, SSB, RTTY and PSK. QSL via F5SAZ, either direct or via the bureau.

(Above from various DX News Sources)

**

THAT FINAL ITEM: TECHNOLOGY AND THE ARTS - FUTURE DANCE

And finally this week, something a bit different in the meaning of the word "communications." Its out of the performing arts meets modern technology file and involves a performer and a choreographer of Dance Theater living in New York. Her name is Ashley A. Friend and she recently teamed up with another choreographer named Michael Freeman to produce a rather amazing video and live performance titled Future Dance. What makes Future Dance different is through the use of modern digital technology Ashley appears to be completely disassembling and reassembling herself as she performs:

--

Ashley Friend: "I was doing some modern ballet movements and then the video was sort of spliced into sections to make it (the sections) go slower or faster all the way from the feet to the tip of the finger so that the feet would move and the rest of it would be very disjointed. The rest of the body would stay (in position) and then the knees would move and then the hand would move and it would start moving in more and more of a circular pattern."

--

No, Ashley does not really go to pieces. Rather it's all the proverbial smoke and mirrors in the form of some amazing and very modern digital techniques in the hands of a video production artist known as Peyton:

Future Dance was performed on Saturday, April 30th at the Gaga Arts Center in Garnerville, New York. You can it on-line at tinyurl.com/futuredance. More of Ashley's work can by seen on YouTube by searching for Ashley A. Friend. Her own website is www.dancecore.org.

Also, you can hear our complete interview with Ashley on this weeks RAIN Report. Its on-line right now at www.therainreport.com.

As we said at the beginning of this story, combining the performing arts with modern digital technology is yet another way for mankind to communicate. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for these years Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 12th June 2011

The news headlines:

* WRC-12 preparation on Oceanographic radars on 5MHz

* Latest DXpedition to Macquarie Island approved for DXCC credit

* ARISSat-1 challenge

Some members may have noticed the ARRL news item on Oceanographic radars on 5MHz, which concerns a US proposal in the WRC-12 preparatory process for allowing wave-sensing radars to use 5.250 - 5.450MHz, amongst other frequencies. Whilst the Inter-American Telecommunication Commission, CITEL, may adopt this proposal, our regional telecommunications organisation, CEPT, is moving toward a European Common Proposal that in the 5MHz region proposes the band 5.060 – 5.160MHz.

ARRL DXCC Manager reports that the current VK0KEV DXpedition to Macquarie Island has been approved for DXCC credit. If you have cards that were recently rejected for this operation, send an e- mail to the ARRL DXCC Desk. Once your record is updated, results will appear in Logbook of The World accounts or in the live, daily DXCC Standings.

ARISSat-1 is scheduled for deployment from the International Space Station in July. It has a composite VHF downlink that will fit into the FUNcube Dongle receive spectrum. The telemetry is 1000 bps BPSK and can also be received with a normal SSB 2m receiver. The expected signal levels from ARISSat should be similar to those expected from FUNcube itself. The team are keen to discover what will be the minimum and best type of antennas for schools to use with a FUNcube Dongle. Therefore user experience with the ARISSat signals will be very valuable in making this determination. To encourage everyone to receive ARISSat signals, AMSAT UK are challenging listeners. There are a number of categories for this challenge for both 2m receiver and Dongle users. Full details can be found at www.uk.amsat.org.

A report on ISP Review says that a pilot using Broadband over Power Line will take place in the village of Shap in Cumbria. This pilot is being run alongside the installation of Smart Meters and there are concerns that BPL may be deployed along with the rollout of Smart Meters in the rest of the UK. The pilot is being run by a USA based telecoms firm called Gridline Communications that has teamed up with

Electricity Northwest, Cable and Wireless Worldwide and T-Systems. You can read the ISP Review report at www.ispreview.co.uk under news headlines for 7 June. The RSGB EMC committee has written to Ofcom about this pilot. The May issue of the EMC Journal also has several important stories on the growing problem of interference to radio reception from consumer PLT devices. Download issue 94 of the EMC Journal from www.compliance-club.com/pdf/Issue94.pdf. A new amateur radio group has been formed for radio amateurs who are also members of one of the emergency services. The group will initially be coordinated via Facebook. It is open to retired or serving members of any of the emergency services and is free to join. Simply search for Emergency Services Amateur Radio DX Group on Facebook and sign up, or contact Jim, GM0GMN, QTHR, for further information.

The International Museums weekend is being held over the two weekends of 18 and 19 June and again 25 and 26 June. All individual amateurs, groups and clubs are encouraged to work with their local museums to host a special event station. The museums taking part over the years have included ships, castles, air museums, Napoleonic forts, pumping stations, wireless museums, racing museums and many others. There really is no shortage of venues in which such an event can be staged, no matter where you might live. Those clubs and museums that do decide to take part should please use the online Registration facility at www.ukradioamateur.co.uk/imw. The Registration is simply to assist the organisers in administration of the event and provide those taking part with an indication of how many and exactly where the museums taking part are located.

The Open University Students Association Amateur Radio Forum is going QRT this month, brought about by changes to the new virtual learning environment. Over its OU life the forum has had many a world wide radio enthusiast who are students of the Open University call in to the forum. It is hoped that under the new OU environment another forum can rise up.

And now for the details of rallies and events for the coming week

The 10th Junction 28 QRP Rally will take place today, 12 June, at Alfreton Leisure Centre, Church Street, Alfreton, Derbyshire DE55 7BD. The venue is just 10 minutes from junction 28 of the M1 and the A38. Doors open at 10am and there will be trade stands and a Bring & Buy, special interest groups and catering. More details from Russell Bradley, G0OKD on 01773 783658.

Also today, 12 June, the Ipswich Radio Rally will be held at The Orwell Crossing Lorry Park, A14 Eastbound, Nacton, Ipswich IP10 0DD. There will be a car boot sale, a Bring & Buy, RSGB bookstall and Special Interest Groups in attendance. Doors open at 9.30am and the entry fee is £1. Contact Steve, M1ACB on 07711 329624.

A Train the Trainers course will take place on 18 June at the Old Mill Community Centre, West Street, South Normanton, Derbyshire. The event

will start at 10am and includes a free lunch as well as a raffle. If any tutors would like to attend, please contact Jim Stevenson, G0EJQ, by e-mail to g0ejq@live.co.uk.

The Newbury Radio Rally and Boot Sale will take place on 19 June at the Newbury Showground, next to M4 junction 13. There will be a big display area of amateur radio stations, exhibitions, special groups, clubs and societies. There is free car parking, admission is £2 and doors open at 9am. Sellers have access from 8am and pitches cost £10. Details from rally@nadars.org.uk. Now for the news of special events

King's Lynn Amateur Radio Club is having a field day station in the grounds of Castle Rising Castle, by kind permission of Lord Greville Howard, today, Sunday 12 June. The station will be operating on all HF bands. Any amateurs in the King's Lynn area on that day are welcome to call in and see the station. The castle is north of Kings Lynn, just off the A149 Hunstanton road.

Reading and District Amateur Radio Club will be operating GB2MBA for Museums on the Air on 18 and 19 June at the Museum of Berkshire Aviation, Mohawk Way, Woodley.

GB2RAF will be on the air from the RAF Air Defence Radar Museum at RAF Neatishead, Norfolk NR12 8YB on 18 June for International Museums on the Air Weekend.

Welland Valley Amateur Radio Society will put GB0BON on the air on 19 June to commemorate the 366th anniversary of the Battle of Naseby. The station will be located at Rupert's Viewpoint, just south of Market Harborough in Leicestershire, on the Clipston Road. Rupert's Viewpoint is one of the highest vantage points in the area.

Bittern DX Group will be activating Oxburgh Hall as GB2OH until 19 June as part of the Castles and Stely Homes on the Air programme. More information can be found at the Bittern DX website or at www.cashota.co.uk.

And now the HF DX news compiled from 425 DX News and other sources

On 11 June, a three day activation of market Reef will commence. They will have two stations active as OJ0B, primarily for 17, 20 and 30m CW and SSB. It is also expected that one of the lighthouse keepers, Harri, OH6VM/OH0VM will follow the group for another week with the beam. QSL via OH2BH.

J48O will be on the air from Kastri lighthouse on the Othonoi islet, which is IOTA reference EU-052, from 17 to 25 June. More information can be found on QRZ.com.

John, K9EL will be active from the Caribbean island of Saint Martin as FS/K9EL until 19 June. He will use CW, SSB and some RTTY on all bands from 6 to 80m during his stay there. QSLs go via the home callsign and logs will be uploaded to Logbook of the World. Now the contest news

The 6-hour Practical Wireless 2m Low Power Contest takes place on Sunday 12th, the first four hours of which coincides with the 2m Backpackers event. The maximum power level is 3 watts and multipliers are locator squares. Starting at 0900UTC, the exchange is signal report, serial number and locator. Low power enthusiasts will be heading for the hills again for the 2nd 144MHz Backpackers contest between 0900 and 1300UTC. Using all modes the exchange is signal report, serial number and locator.

The 432MHz UK Activity Contest takes place on 14 June from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

The following day, 15 June, is the latest CW leg of the 80m Club Championships from 1900 to 2030UTC. The exchange is signal report and serial number.

The biggest RSGB VHF event of the month is undoubtedly the 50MHz Trophy, which takes place for 24 hours over the weekend of 18-19th. There will be plenty of UK portables operating, some from rarely activated squares, so unless your locator map has all the squares coloured in there's likely to be potential for working some new ones. This event is often blessed with enhanced propagation for at least part of the time, so as well as the potential to work some new UK squares, some new Continental ones might also come your way. Operation is from 1400 to 1400UTC, using all modes and the exchange is signal report, serial number and locator.

The Worked All Britain 50MHz Phone contest takes place next Sunday, 19 June, from 0900 to 1500UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website www.worked-all-britain.co.uk or from the Contest Manager, G3XKT, by e-mail to aebbooks@ntlworld.com.

The IRTS 80m Counties contest also takes place on the 19th from 1400 to 1700UTC. For those outside EI/GI, work EI and GI only. Send a report and serial number, and expect to receive the same plus County And now the solar factual data for the period from the 30th of May to the 5th of June, compiled by Neil Clarke, G0CAS on the 6th of June.

With numerous sunspot groups visible every day, all were small and quiet except for two regions that produced C class solar flares every day except for the 4th and the 5th. By then they had decayed and became much smaller. With a couple of the larger solar flares a coronal mass ejection took place. Solar flux levels declined from 114 units on the 1st to 103 by the 4th and the 5th. The average was 109 units. The 90 day solar flux average on the 5th was 106 units, that's two units down on the previous week. X-ray flux levels averaged B3.2 units and showed little variation day to day. Geomagnetic activity was quiet on the 30th but by the 31st and the 1st, a coronal mass ejection arrived that departed the Sun on the 29th. The Ap index for the 31st and the 1st was 13 and 12 units respectively. Activity returned to quiet levels till the 4th and the 5th when the Ap index increased to 15 and 27 units

respectively. This disturbance was in response to a coronal mass ejection which occurred on the 2nd and a coronal hole disturbance arriving around the same time. The average was Ap 13 units. Solar wind data from the ACE spacecraft saw solar wind speeds decrease from 720 kilometres per second on the 30th to 380 by the 3rd before speeds increased again to 560 by the end of the period. Particle densities were low but increased to 22 and 18 particles per cubic centimetre on the 4th and the 5th respectively. Bz varied between minus and plus 4 nanoTeslas on the quiet days and between minus 19 and plus 20 nanoTeslas during the disturbance on the 4th.

And now the solar forecast. This week the quiet side of the Sun is expected to be looking our way. Solar activity should be very low to low. Unless a large sunspot group appears during the week, solar flux levels are expected to be around the 90's or even lower into the 80's. Easier to forecast are coronal holes, which rotate like sunspots every 28 days. Sunspot groups tend not too last for more than a couple of rotations, at least at this stage of the cycle anyway. However, coronal holes can last for many months and for this reason are much easier to forecast. A coronal hole disturbance should be taking place today and maybe tomorrow but then for the rest of the week activity should be at quiet levels. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be around 12MHz. Paths this week to the east coast of North America should have a maximum usable frequency of about 23MHz. The optimum working frequency with a 90 per cent success rate will be around 17MHz. The best time to try this path will be between 1500 and 2200 hours. This path should be open via multi-hop sporadic-E on 28 and 50MHz on some days. Now, at the peak of the summer season expect openings almost everyday on the lower VHF bands and also occasionally on 144MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 12 June South Normanton Alfreton & District Amateur Radio Club is running the Junction 28 QRP Rally at Alfreton Leisure Centre. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Sunday 12 June Hucknall Rolls Royce Amateur Radio Club will be at the Junction 28 Rally. More information from Dave Wilde, G1YAI, on 0844 4355593.

On Monday 13 June Gloucester Amateur Radio & Electronics Society is operating HF. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 13 June South Birmingham Radio Society is painting and renovating the shack. Contact Don, on 0121 458 1603.

On Monday 13 June South Normanton Alfreton & District Amateur Radio Club is holding a rally post mortem. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Tuesday 14 June Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 14 June Eagle Radio Group is having a talk on toy making by Gordon, G4WEC. Details from Terry, G0SWS, on 01507 478590.

On Tuesday 14 June Loughborough & District Amateur Radio Club is having an evening on oscilloscopes and invites members to bring theirs along. More information from Chris, G1ETZ, on 01509 504 319.

On Tuesday 14 June Mid-Warwickshire Amateur Radio Society is having a technical topics evening. Details from Don, G4CYG, on 019 2642 4465.

On Tuesday 14 June Worcester Radio Amateurs Association is having a talk. For more information email Rich Moles, 2E0MOL, via secretary@m0zoo.co.uk.

On Wednesday 15 June Lincoln Short-Wave Club is visiting Bateman's Brewery. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 15 June Midland Amateur Radio Society is having a laptop computer evening and training classes. Details from Norman, G8BHE, on 01214 229 787. On Wednesday 15 June South Kesteven Amateur Radio Society is having a quiz night with questions provided by Graham, 2E0GLE. Contact Nigel, M0CVO, on 01476 402550.

On Wednesday 15 June Telford & District Amateur Radio Society is having an illustrated talk on the Papua New Guinea DXpedition by G3UKV and G3JKX. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 16 June Cheltenham Amateur Radio Association is having a talk on Radio Winchcombe by Philip Arkell. Contact Derek Thom, G3NKS, on 01242 241099.

On Thursday 16 June South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 17 June Bromsgrove & District Amateur Radio Club is preparing its special events station. Contact Chris, M0BQE on 01905 776 869.

On Friday 17 June Coventry Amateur Radio Society is taking part in the 2nd Round G4ZMC Trophy at Hatton Locks. Contact John, G8SEQ, on 07958 777363.

On Friday 17 June Nunsfield House Amateur Radio Group is having a talk on planet hunting by Andy Barker. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 17 June South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 18 June Lincoln Short-Wave Club is in the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 18 June Telford & District Amateur Radio Society commences its weekend event for the 6m Trophy contest at IO82NN. Contact Mike, G3JKX, on 01952 299 677.

On Saturday 18 June Welland Valley Amateur Radio Society commences its weekend special event station operation, GB0BON, at Rupert's Viewpoint. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

SARL NEWS - SUNDAY 12 JUNE 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

SILENT KEYS

It is with regret that we must announce the keys of two radio amateurs went silent recently, they are:

John van Hoogstraten, ZS1CR, on Monday 6 June and

Pieter Smith, ZS6BGX, of Tzaneen and member of the Wolkberg Amateur Radio Club on Wednesday 8 June in the age of 82 years.

Our sincere condolences go to their families and friends.

TWO MAJOR EVENTS THIS WEEK

FOUR RADIO AMATEURS RECOGNISED FOR THEIR ACHIEVEMENTS

119 NEW AMATEURS GET THEIR CALL SIGNS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

TWO MAJOR EVENTS THIS WEEK

The SARL is holding two major events this week, Youth Day on 16 June and the Programming in Windows course on Saturday 18 June 2011 at the NARC in Gauteng.

Book for the "Learning to program in windows" before Wednesday to secure your place on the course. The course will only be presented once in each venue. Full details are on www.sarl.org.za. Learn how to produce your own applications in Windows and how to run peripherals from USB ports. An optional USB interface that will switch relays and read push buttons and voltages is available. Design your own shack control program with stand-alone applications. You can do it!

Celebrate Youth Day on 16 June with a series of events starting with monitoring SumbandilaSat, SO67, just before 08:00, a series of interviews with young people about amateur radio at 09:30 on 7 082 kHz, 14 250 kHz and on 145,750 MHz in Gauteng. You can also listen on the podcast and on the web or do you own relay on the local repeater. Get young people talking? Invite them into your shack or set up in a public space. There are many prizes to be won for both the young people and the amateurs hosting them. Get all the details on www.hamradio.org.za.

ICASA has agreed that all radio amateurs who host young people and submit a log are automatically granted "educational station status" which means that you may let unlicensed young people operate your equipment under your supervision. Make this the biggest and best youth day event ever.

The youth day sprint takes place from 10:00 - 12:00 CAT. Get the details from the SARL Contest manual on www.sarl.org.za.

ZS50RSA ON THE AIR DURING YOUTH DAY

The Boland Amateur Radio Club will be using a special callsign, ZS50RSA this coming Thursday, during the Youth Day festivities, from 09:00 till late in the afternoon. The station will mainly be using 40m but will move to other bands as deemed necessary. Make contact with the station and send your QSL via the bureau or make use of SA-QSL.

FOUR RADIO AMATEURS RECOGNISED FOR THEIR ACHIEVEMENTS

This week the South African Amateur Radio Development Trust recognised four radio amateurs for their achievements in the various sectors of the amateur radio service.

Winning the 2011 award for technical innovation, Hannes Coetzee ZS6BZP received the state of the art Icom IC7000 transceiver for his entry in the innovation competition sponsored by Multisource. He designed and developed a software derived receiver for the reception of satellite signals from low earth orbiting amateur satellites operation on 2 m and 70cm. The aim of the competition was to encourage more innovation in amateur radio. The unit he developed is not just innovative but has practical application in amateur radio. The article describing the receiver will be available on www.amateurradio.org.za and be published in Radio ZS later this year.

Nokia Siemens Networks annually sponsors three awards as well as the award function. The Garth Milne Radio Amateur of the Year Award Technology was been bestowed on Hal Lund ZS6WB for his untiring support

of amateur radio satellite activity and his encouragement of the amateur community to experiment with space communication. Unfortunately he could not attend the function due to ill health and the award was accepted on his behalf by Pierre van Deventer.

The NSN Radio Amateur of the Year Award - Operational was presented to Johann Du Plessis ZS6PSS for his support of the John Vorster Technology high School Amateur Radio Club and young radio amateurs in general. Under his guidance the club is the largest and most successful school based amateur radio club in South Africa. A model to be followed!

The NSN Radio Amateur of the Year Award - Community Service was presented to Paul van Spronsen ZS1PVS for his support of SARL HAMNET and communication disaster and sporting support communication in the Western Cape. Although relatively new to amateur radio he has made his mark and is recognised for his excellent work.

Congratulations to all winners and thanks to the sponsors Nokia Siemens Networks and Multisource.

HAVE YOU CHECKED THAT YOU HAVE PAID YOUR AMATEUR RADIO LICENCE?

Check that you have paid your license and if you do not have a valid printed license or an official receipt call ICASA at 011 566 3313 or 011 566 3319 between 08:30 - 16:00 Monday - Friday. PLEASE HAVE YOUR LICENSE NUMBER HANDY. If you have not paid, do so now using the information and account number on your last license. The amount is R7.50 for January - March 2011 and R27 for April 2011 - March 2012, a total of R34.50

CHANGING FROM ZR TO ZS?

You don't have to as both are now class A licenses and have full access to HF. In fact a ZR may be more rare than a ZS when it comes to DX. If you however want to change, check out the details on www.sarl.org.za where it spells out what you have to do.

NEW MEMBERS

The SARL welcomes the following new members to its community: Erik Seather, ZSL1015 Amanda Green, ZSL1022 Wynand Steenberg, ZSL1023 Ockert Strydom, ZSL1024 Marnus Meyer, ZSL1025 Thinus Joubert, ZSL1026 en Conrad Human, ZSL1027 May your association with the SARL be mutually beneficial.

119 NEW AMATEURS GET THEIR CALL SIGNS

The Radio Amateur Examination results were published over last weekend on the web but were too late to make the SARLNEWS cut off time.

The youngest candidate who wrote the class B exam is 9 years old and the youngest who wrote the class A exam is 11 years old. The oldest person to write is 71 years. The overall pass rate for class A is 79% and Class B 50%.

Examiner Mark Zank, ZS6YES, said that he is concerned about the low Class B pass rate as it seems that candidates did not spend enough time with the study guide which is available free of charge on the web. Every question asked in the examination comes from the guide. "Although this is an entry level examination, care needs to be taken to study the material and to take note of the contents of the study notes", he said.

JG Woodburne, ZS3JW, with 97% scored the highest marks in the Class A examination and J Flemming, ZU3JW, achieved 97% in the Class B RAE. Both reside in the Northern Cape town of Kathu. Congratulations to both candidates and their tutors.

The standard agreement with ICASA is that new amateurs may use their call signs immediately and do not have to wait for the paperwork. Letters and certificates are in preparation and will be mailed soon.

The full list of candidates who passed, as well as an interesting regional analysis is available on www.sarl.org.za.

2011/2012 SUBSRIPTIONS ARE DUE

Please pay your SARL subscription for the 2011/2012 financial year by the end of June. Accounts were mailed to all current members. When making a payment please ensure that your callsign is in the payment reference.

CONTEST NEWS

The Contest committee has released the results of the SARL Digital contest held on 29 May 2011 for which 14 logs were received. A breakdown into frequencies and modes shows: 40 m - 30 PSK contacts and 16 RTTY contacts 20 m - 7 PSK contacts and 5 RTTY contacts 80 m - 6 PSK contacts and 1 RTTY contact

Station participation per division were: Div 1 - 7 Div 2 - 6 Div 3 - 2 Div 4 - 3 Div 5 - 1 Div 6 - 12 Div 7 & 8 - 1 each

The results are:

1st - ZS6GRL 705 points 2nd - ZS2CR 633 points 3rd - ZS6AKU 606 points

The winner of the "Lucky draw" prize is Derek ZS2J, and many thanks to the stations that submitted logs.

CLUB NEWS

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 25 June 2011 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Phillip ZS6PVT at 083 267 3835.

CALL FROM KLAUS ZS1QO

Somebody in Div. 6 contacted Klaus, ZS1QO in Cape Town in connection with glass fibre masts. Unfortunately Klaus was admitted to hospital and the details of the person. got lost. This is a call that the

respective person. contact the XYL of Klaus, Shireen on Cell 083 628 3437 so that the matter can be resolved.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity was fairly low with a few C-Class flares taking place since the M2.5 solar flare on Tuesday that created a very bright Coronal Mass Ejection (CME). Sunspot 1 226 has rotated onto the western limb and out of direct earth view. All remaining sunspots 1 227, 1 228 and 1 232 are small and remain quiet. There is a chance for at least C-Class flares around 1 227 before it rotates onto the western limb as well. New sunspot 1 234 is growing in the southeast but does not yet pose a threat for strong solar flares. For the people doing their own frequency predictions the expected effective sunspot number for the week will be about 30.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m and also some sporadic 15 m openings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 June - Transmission of Youth in Amateur Radio at 09:30, but receive beacon signal already on 435,345 MHz at 07:56 and 09:33. 16 June - Youth Day Sprint from 10:00 till 12:00 CAT 16 June - ZS50RSA on the air. 18 June - Programming in Windows course in Gauteng. Book at www.sarl.org.za. 25 June - West Rand flea market starting at 12:00 in Kroton Street, Weltevredenpark.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Gustav, ZS6BWN.

Thank you for listening, 73.

ZL1OOIBM and 100 years of IBM

IBM logos, circa 1924 and 1972.

In 2011, IBM is marking its 100-year anniversary. Although much has changed since the company was formed on June 16, 1911, the one constant at IBM has been its focus on making the world work better. In 1926, IBM President Thomas J. Watson, Sr., said, "Everything we do in our work is benefitting the business interests and the social welfare of the whole world." Throughout its history, IBM has focused on just thati¿½changing the world, one customer at a time. That focus on innovation has helped produce many things we take for granted today:

http://www.ithistory.org/membership/ibm-100th-anniversary.php

On its website, the company said, "IBM is marking the 100-year anniversary of its founding on 16 June 1911, with a year-long global initiative.

http://www.ibm.com/us/en/

Here in in New Zealand, ZL1GWE has obtained a temporary Callsign: "ZL1OOIBM" to mark the occasion, apart from already pledging my time to the IBM community service on behalf of NZART as the Monitoring System Coordinator, I and hopefully my other IBM colleagues intend to promote Amateur Radio throughout the world. Amateur radio, also affectionately known as "ham radio", is a hobby of constructing, experimenting and communicating as we know. But we also have a serious side to in terms of supporting the emergency services through the Amateur Radio Emergency Communications (AREC) which is a sub group of the New Zealand Association of Radio Transmitters (NZART) that organise's emergency communications in times of disaster.

You will find me on air, from 16th June 2011, using the callsign "ZL1OOIBM on the National System, VHF and HF bands, I personally look forward to celebrating the 100 years on this special occasion and throughout the

ensuing year. My colleagues from IBMHAMs group, will also be celebrating the day probably around 14.347 - which is the normal IBMHAMS frequency from 1600 UTC i.e. W0IBM. Look out for other IBMers, I will arrange a suitable special QSL card for the occasion - the 100th birthday of IBM throughout 2011/12.

I look forward to your participation.

de John ZL1GWE

Licence Examination

You will have the opportunity to sit your amateur radio licence examination within the next few weeks.

The next exam will be held on Thursday, 7 July, at 2.00 p.m. in the ComReg offices in Dublin. The closing date for receipt of applications to sit this exam is Wednesday 22 June. Full details including entry procedure and examination fee are available at www.irts.ie/exam or just click on the 'Licence Exam' button on the IRTS webpage.

World Castles Weekend

The World Castles award will be holding an activation weekend on Sat 25th - Sun 26th July, for anyone interested in activating a site. More information can be found at: http://www.wcagroup.org/ENG/wcw.html Time: >From 00:00 UTC of Saturday till 23:59 UTC of Sunday. Bands: All HF and VHF amateur bands. if interested go to the World Castle Website to register. If you require a location refence, then contact your local CASHOTA representive who can issue one at, www.cashota.co.uk.

Hoghton Tower Activation

Central Lancs ARC will be activating Hoghton Tower on the 26th June 2011. This stately home, located preston, lancashire, has been the ancestral home of the de hoghton family since william the conqueror. For more details go to www.cashota.co.uk

---

Introduction to Amateur Radio

The Mayo Radio Experimenters Network are holding a series of practical hands on open days throughout the summer months. The events will start at 13.00 approx (weather permitting) and will take place on the following dates: Sunday June 12th Sunday July 10th Sunday August 14th Sunday September 11th

Anyone with an interest in radio related matters, who would like to have the opportunity to participate or observe the operation of an amateur radio station, or meet club members, will receive a warm welcome. Whatever you're level of interest, the club will be pleased to help in taking your interest further, be it a complete novice, shortwave listener or formal assistance in progressing to a full amateur radio licence.

The location for all events will be the car park at the Halfway House on the Castlebar to Westport Road. If you would like further details please contact: Padraic Baynes EI9JA on 0876957154 (email pbaynes1/at/eircom/dot/net) , email David Hatfield EI3ECB on ei3ecb/at/gmail/dot/com or text or phone the club mobile phone number 086 20 89 777

Space Weather Prediction Service

On 06 September 2011 the Space Weather Prediction Center (SWPC) will discontinue the broadcast of its propagation forecasts on WWV at 18 minutes past the hour and WWVH at 45 minutes past the hour. The messages will still be available at www.swpc.noaa.gov/ftpdir/latest/wwv.txt This response from Patrick V. Gajdys of the SWPC: "The reason for discontinuing this service is entirely budget-driven. As we begin to receive reductions to our funding levels, we are forced to examine our entire program and make cuts. The WWV service costs are quite high and the information we provide on it is currently duplicated via the Internet service. A very large majority of our customers use our Internet feeds, so when comparing the two duplicate services it was clear to us that the WWV service was that most logical service to cut. All comments received will be compiled and presented to NWS before stopping the transmissions."

Howth Martello Radio Group

The Howth Martello Radio Group, EI0MAR will be QRV on the weekend of the 18/19 June for International Museums Event from Ye Olde Hurdy Gurdy Museum of Vintage Radio in Howth. The website of the organisers of this amateur radio event is www.ukradioamateur.co.uk/imw/index.html where a

list of museums registered for the event can be inspected.

Among the museums activated in previous years were HMS Belfast (GB2RN), moored on the Thames and Bletchley Park in Milton Keynes (GB2BP).

Visitors are welcome to visit the museum which is located in the Martello Tower overlooking the East Pier in Howth. The museum is open daily until the end of October from 11am until 4pm. The website address www.ei0mar.org.

DX News

John KB4CRT is QRV from the island of Montserrat until 18 June. He is using the callsign VP2MRT. QSLs go via the home call or via Logbook of the World.

The club station of the Ethiopian Amateur Radio Society (callsign ET3AA) was reopened on 30 May. The opening was attended by Hans Blondeel Timmerman PB2T, President of IARU Region 1. The club shack is located at the Technical Faculty of the University of Addis Ababa. More than 25 members hope to sit their Amateur Radio examination by the end of July so hopefully we will be hearing a lot more activity from Ethiopia on the bands soon.

This is the time of year when many amateurs take gear with them on their summer vacations to various islands. The Dutch island of Texel is on the air at present. The operator is Alex DL1KD who is signing PA/DL1KD until 20 June. Later in the summer the island will again be activated by Alex IZ4AMS who will be active as PA/IZ4AMS from 14-17 August. Texel Island counts as EU-038 for the Islands on the Air Award.

The Pacific island of Nauru which is quite a rare DXCC entity will be activated by a team of 6 operators between 10 November and 6 December. The callsign will be C21AA and they plan to have 3 complete stations on HF.

EI5JQ, EI/SQ7JT, EI4JZ, EI9KC will be active from Great Blasket Island - EU-007 during RSGB IOTA 2011 contest. CW / SSB Applied call-sign: EJ0PL QSL via EI5JQ (Bureau / Direct)

Commando Solo

Commando Solo, the US airborne radio station operating above Libya on behalf of NATO, was heard on 1 June using a new shortwave frequency, 10125 kHz, USB mode, to transmit messages intended for Gaddafi's forces. This frequency is in the 30 metre amateur band, but is also used by the Libyan army. Commando Solo has previously used 6877 kHz and 10404 kHz. The change in frequency is probably due to the jamming by the Libyan army noted on 10404 kHz the previous day.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

June 13, 2011
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, N6PSE, W7GJ, K8CX, K8YSE, W8GEX (60m News), K9EL, 2E1EUB, AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3TXF, I1JQJ/IK1ADH & 425 DX News, JG2GSY, LA4LN, OH2BN, ON5NT, OZ6OM & 50 MHz DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and ZL1AAO for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-June, through Sunday, 12th-June there were 215 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JY, K, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0T, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V8, VE, VK, VK0M, VK9C, VP2M, VP2V, VP5, VP8, VP8/o, VP9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite Op). Paul, 2E1EUB, will once again be active as 2M1EUB starting July 2nd, for two weeks (depending on the WX). He states that he will be operating from the van again and activating some rare new grid squares. Activity will be from the islands of Harris and Lewis

(These islands are located off the coast of western Scotland). Most of the operations will be on the AO-7 bird. Paul states that he will be mobile all over northern Scotland and on the Island of Skye. Watch QRZ.com for updates, as well as the AMSAT BB mailing list. A new QSL card will be printed.

3D2/R, ROTUMA. The following press release was sent out by Hrane, YT1AD, on June 8th (edited): "DXpedition to Rotuma as 3D2R -- After many months of careful planning, we are pleased to announce our DXpedition to Rotuma-3D2R with a large multi-national DXpedition Team. Rotuma is located in the South Pacific Ocean and is #32 on Club Log's most wanted DXCC list. Hrane Milosevic, YT1AD, has recently visited Fiji and has obtained the license of 3D2R and a landing permit. We have received the Rotuma Island Council's official approval as well as from the Prime Minister's Office. The team of 19 operators will meet in Fiji on September 24th, and sail to Rotuma with an arrival slated for September 27th. We will be active on all bands and modes from September 27th to October 7th, 2011.
We will focus on the low bands at this time of the year and will make every effort to satisfy the needs of EU operators.
At this time, we are seeking Foundation, Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition. Our official website is: http://www.yt1ad.info/3d2r/index.html
.... 3D2R Team"

3XY, GUINEA. Operators Georg/DK7LX, Wolf/DL4WK, Sigi/DL7DF, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI will be active as 3XY1D from Guinea between October 18th and November 1st. Activity will be on 160-6 meters using CW, SSB and the Digital modes. They plan to have several stations on the air using 5 transceivers (4 x K2, 1 x IC7000), 4 x kW linears, 2 x 18m Lowband Verticals, a 2 element vertical for 40m, a 2 elemet vertical for 30m, a vertical R7 for 40/30/20/17/15/12/10m, 2 Spiderbeams for 20/17/15/12/10m, a 5 element Yagi for 6m and some Beverage antennas. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. QSL via DL7DF, direct or by the Bureau. For more details and updates, visit: http://www.dl7df.com/3xy1d/index.html

5W, SAMOA (6m EME Op). Lance, W7GJ, plans to be active as 5W0GJ from the northeast corner of Savai'i Island (Grid AH36un), Samoa, on a 6 meter EME DXpedition during the final week of August. He reports that license and airline tickets are now in hand. Operations will take place between August 23-31st. QSL direct to W7GJ. Complete details and schedule of operation is available at: http://www.bigskyspaces.com/w7gj/Samoa2011.htm

7Q, MALAWAI. Malcolm, GM3TAL, will be active as 7Q7MH during July as part of the "Explorer Scouts" that will go on a "Scottish Scout New Horizons Expedition" and will also be carrying out practical development work at the Malawi National Scout Campsite near Zomba. Although this is not a "DXpedition", look for activity on the upper HF bands (and possibly 6 meters), using CW and SSB. This will be a month long "field day" operation under canvas – no towers or comfy resort style shacks and no Internet! More details are expected soon on: http://www.7q7mh.org

8J1, JAPAN (Date Correction). Members of the Japan A1 Club will activate the following special callsign until November 30th (not December 31st as reported in OPDX.1013): 8J1MORSE, 8J1MORSE/2, 8J1MORSE/3, ...etc, according to the district from which they are active. Activity is to celebrate 220th anniversary of Samuel Morse's birthday. Operations will be mainly CW, with some SSB (to explain to novices how to join the CW community). Some special awards are also available too. QSL by the Bureau or direct (SAE+IRC) to: 8J1MORSE, 1-14-1-11-B Yoshino, Higashi-ku, Nagoya, 461-0027, JAPAN. Logs will be uploaded to LoTW as well. For more details, the English rules and information are available at: http://8j1morse.a1tokai.net -or- http://8j1morse.blogspot.com

DXCC NEWS. Bill Moore, NC1L, Awards Branch Manager, reports that the following are approved for DXCC credit:
TJ9PF – Cameroon; 2011 Operation. Special Note: "We have been notified that the TJ9PF QSL labels have been printed with the year 2001 instead of 2011. This is a known software bug that has been fixed. Regardless, we do not believe the integrity of the TJ9PF logs or operation are affected by this printing error. Also, the TJ9PF logs have now been uploaded to LoTW, providing a primary source of QSO confirmations. We will add instructions to the DXCC system internally to note this operation's correct year. No one wants to promote the wasting of resources to reprint labels or cards, or to require resending of cards to fix an error which has little effect on the program. DXCC will accept TJ9PF QSLs showing the date as 2001.

VK0KEV – Macquarie Island; 2011 Operation. If you've had this operation
rejected in a recent application please send a note to dxcc@arrl.org . You can verify the update to your record either by checking your LoTW account, or, you'll see a change in the live daily listing on the DXCC web site.

E51, SOUTH COOK ISLANDS (E51AAO operation). Bruce, ZL1AAO, informs OPDX (edited): "I am preparing for some part-time DX operation/holiday-style from Rarotonga (OC-013), Cook Islands. The above callsign is available and has been promised to me (Pick up the license on arrival). I will be promoting my activity through DX groups and local radio clubs/groups. I will be on the island for 10 days from August 19-28th. The property I am staying at is located on Muri beach, a popular resort area. It will be our first visit to Rarotonga, so the usual tourist activities will be on the agenda with radio number two on my itinerary. Anyone who has been there before and can give helpful advice will be much appreciated. E-mail me at: bruce.steel@paradise.net.nz ...."

EF8, CANARY ISLANDS. Look for EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969), to be on the air during the RSGB IOTA Contest (July 30-31st) as a Multi-Op/All-Band/High-Power entry. Operators mentioned are Valery/RD3A, Juan/EA8CAC and Alex/UA5C. QSL via UA3DX.

FS, FRENCH ST. MARTIN (Attempt #2 - Refer to OPDX.1013). John, K9EL, will once again be active as FS/K9EL from French St. Martin (NA-105, DIFO FS-001, WLOTA 0383, Grid Loc. FK88) between June 20th and July 3rd. The first week will be limited due to family vacation, but the second week will be devoted to operating. John will be using an IC7000 and verticals for 80-10 meters and a 3 element yagi for 6m. He will be operating on CW, SSB and some RTTY. QSL via his home callsign. LoTW updates will be done upon his return home. John may do some 6m operations from PJ7 depending on demand and conditions.

GJ, JERSEY. Members of the Bristol Contest Group will be active as GJ6YB/P from Jersey (EU-013) between June 17-19th. Activity will be during the IARU 50MHz Contest. Operators mentioned are Robin/G3TKF, Pete/G4CLA, Matt/M0MAT, Alan/G3XSV, Steve/G3ZVW, Neil/EI3JE, Andy/M1EBV, Geoff/G4FKA and Ian/G4FSU. QSL via G3SWH. For more details, see the Bristol Contest Group Web page at: http://gj6yb.org

HB0, LIECHTENSTEIN. Operators Matthias/DL4ML, Jochen/DG1SFJ, Guenther/DJ8KI and Manfred/DL4MP will be active as HB0/homecall from Liechtenstein between June 18-21st. Activity will be on all HF bands including 30/17/12m, and also on 6 and 2 meters during Sporadic E propagation. Their location is near Steg at 1400m ASL (Grid Loc. JN47tc). QSL via their home callsigns, by the Bureau or direct using the QRZ.com address.

IOTA DXPEDITION (Reminder). Just a reminder that the MS0INT Team (Col/MM0NDX [team leader], Christian/EA3NT, Ramon/EA3OR, Raul/EA5KA, Stan/EI6DX, Vincent/F4BKV and Simon/IZ7ATN] will activate IOTAs EU-010, EU-059 and EU-111 between June 14-20th. See OPDX.1011 for details. All QSL requests for MS0INT and MS0INT/p go via M0URX. All QSL requests for MM/<homecall> are via RX3RC. For updates and more details, watch: http://ms0int.com

IOTA NEWS.....
AS-066. Members of the Vladivostok Contest Club will be active as RW0MM/p from Reyneke Island during the RSGB IOTA Contest (July 30-31st) as a Multi-Op/Island/DXpedition entry. QSL via RW0MM.

EU-007. Operators Adam/EI5JQ, Bronel/EI4JZ, Ark/EI9KC and Jerzy/SQ7JT will be active as EJ0PL from Great Blasket Island during the RSGB IOTA Contest (July 30-31st). QSL via EI5JQ.

EU-010. Bob, G0BUX, will be active as GM0BUX/P from North Uist Island between now and June 17th. Activity will be on the HF bands using CW, SSB and PSK31. QSL via his home callsign.

EU-017. Alex, IK8YFU, will be active as ID9/IK8YFU from Stromboli Island between July 23-30th. Activity will be on 40-6 meters. QSL via IK8YFU. Logs will be uploaded to LoTW.

EU-052. A multi-team of 7 experienced operators will be active as J48O from the very rare Othonoi Islet (GIOTA INS-045) between June 17-25th. Activity will also include operations from the Kastri Lighthouse (9 days at Lighthouse) on the island. They plan to

set up 5 stations on the island. Activity will be on 160-2
meters using CW, SSB and the Digital modes (RTTY/PSK). Focus
on 6 meters for intercontinental QSOs using 2 different
directional antennas and also on 2 meters with a 8 element
QUAD and 11 element yagi. Operators mentioned are Giannis/SV2FPU
(Team leader and QSL Manager), Thomas/SV2CLJ, Savas/SV2AEL,
Giannis (John)/SV2HXV, Marios/SV2HXR, Dimitris/SV2YC and Andy/
IK0EFR. Suggested frequencies are:
CW - 1823, 3503, 7003, 10105, 14003, 18073, 21003, 24893,
28003, 50093 and 144053 kHz
SSB - 1843, 3799, 7060/7160, 14260, 18160, 21260, 24960,
28460, 50160 and 144303 kHz
DIGI - 1841, 3581, 7041, 10141, 14081, 18101, 21081, 24921,
28111, 50201 and 144138 kHz
For more details, visit the J48O Web site at: http://www.j48o.com
For further information about "Greek Islands On The Air" -
the GIOTA Web page is at: http://www.greekiota.gr

EU-170. Operators Ivo/9A1AA, 9A3BMR, Alen/9A3MA, Rolando/9A3MR and
Zrinko/DK8ZZ will be active as 9A1CKL from Zirje Island during
the RSGB IOTA Contest (July 30-31st) as a Multi-Op entry. QSL
via DK8ZZ direct.

EU-170. Daniel, DK3CH, will be active as 9A/DK3CH from Dugi Otok
Island between July 28th and August 10th. Activity will
include the RSGB IOTA Contest (July 30-31st). QSL via his
home call sign.

NA-009. NA-009. Sarah, NQ6K, is expected/planning to be active as
NQ6K/VY0 from Devon Island (with possible side trips to
Beechy and Cornwallis Island) while working there for NASA
for three weeks beginning late June/early July. Devon Island
is the world's largest uninhabited island, roughly the size
of Vermont (and Scotland). She is a veteran of three scientific
expeditions there in 2008, 2009 and 2010, and has done some
emergency communications there, but has not operated on HF
from there yet! See her detailed Web page at:

http://findatlantis.com/wiki/index.php/Devon_Island_2011_DXpedition

NA-193. Operators John/VE8EV and Gerry/VE8GER will be active as XK1T
from Tent Island, Yukon (new one for CISA) between June 15-19th.
Activity will be mostly SSB on 20 meters but some operations
on CW and satellite are also likely. Also, some operations may
take place on 30/17/15m. QSL via VE8EV. For updates, watch
John's Blog page at: http://ve8ev.blogspot.com

OC-142. Operators Andrew/VK4NM and Peter/VK4LAT will be active as VK4MM/P
from Fraser Island, Queensland, Australia, between July 29th
and August 1st. Activity will include the RSGB IOTA Contest
(July 30-31st). QSL via M0OXO direct.

OC-156. Dmitriy, RW6AML, will be active as 3D2ML from Waya Island, Fiji, between July 6-17th. Activity will be on the HF bands using CW and SSB. QSL via his home callsign.

K8CX'S 2011 DAYTON HAMVENTION PHOTO GALLERY. Tom's, K8CX, 2011 Dayton Photo Gallery is now up at: http://hamgallery.com/dayton2011/ This is Tom's 15th consecutive year for the gallery, and it contains 254 photos taken at Crowne Plaza at various events and hospitality suites. You may submit your own Dayton photos to be included in this gallery. Please read the guidelines listed on the top of the gallery page. There is also an interesting Dayton Hamvention history link on top of this page.

KH6BZF PROPAGATION FORECAST/REPORT (June 13-19th)....
Jun 13 HN SOLAR REFERENCE KEYS
Jun 14 AN --------------------
Jun 15 AN BN - Below Normal
Jun 16 AN AN - Above Normal/Geomagnetic Level is QUIET
Jun 17 AN LN - Low Normal
Jun 18 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jun 19 AN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less

LJ2, NORWAY. Members of the "Veteran Club of the Signals Soldiers of the Norwegian Armed Forces" will activate the historical callsign LJ2T again from "The Signals Museum of the Norwegian Armed Forces" near Lillehammer between June 30th and July 3rd. Activity will be on all bands between 160m and 70cm using CW, SSB, FM and the Digital modes. Like last year, there are plans for activity on 4 meters (70 MHz) from this QTH locator JP51ED. QSL via LA5EAA. For more info, see: http://www.qrz.com/db/LJ2T

MU, GUERNSEY. Members of the Dutch Contest and Expedition team (PA6Z) will be active as MU/PA6Z from Guernsey (EU-114) between October 23-30th. Activity will be on 160-6 meters using CW and SSB. Operators mentioned are Marcel/PA9M, Frank/PA4N, Jelmer/PA5R, Dervin/PD9DX, Arbo/PH0AS, Arend/PA2AWU and Dick PA4VHF. QSL via PA9M, direct or by the Bureau.

OJ0, MARKET REEF. After the activity by the OJ0B team this past weekend, look for Harri, OH6VM/OH0VM, one of the lighthouse keepers, to follow the OJ0B group for another week as OJ0VM using the beam that the OJ0B team installed. QSL OJ0B via OH2BH and OJ0VM via OH6VM. See pictures of the lighthouse and beam on QRZ.com (under OJ0VM).

PY0F, FERNANDO DE NORONHA. Marcelo, PY2FN, will be active as PY0FO from Fernando de Noronha (SA-003) between July 2-9th. Activity will be on 160-6 meters CW only. Suggested frequencies are: 1814, 3514, 7014, 10114, 14014, 18084, 21014, 24894, 28014 and 50094 kHz. QSL via his

home callsign, direct or by the Bureau. Logs will be uploaded to LoTW.

ST0, SOUTHERN SUDAN. The following press release (Bulletin #3) was sent
out on June 6th (edited): "DXpedition to Southern Sudan -- The Intrepid-DX

Group and the DX Friends/Tifariti Gang continues to move forward with our plans to activate the new country of Southern Sudan with a large multi-national DXpedition.
We have held several successful meetings with representatives of the Government of Southern Sudan. We have been issued an amateur radio license for the purpose of this DXpedition. The Government of South Sudan is very supportive of our plans to visit Juba and to help them celebrate the birth of their new country.
The Government of South Sudan will declare their independence from Sudan on July 9th, 2011. They have applied to the UN for admission as a member state. The UN General Assembly and Security Council will vote on the matter in the weeks following the declaration of independence.
While there have been attacks and fighting in the disputed border region of Abyei, these issues are not expected to derail the emergence of this new country.
We plan to be in the new capital of Juba and to be ready to start our DXpedition upon admission by the UN. We will have 18 operators operating 24X7 on seven active stations.
At this time, we are seeking Foundation, Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition.
Our official website is http://www.dxfriends.com/SouthernSudan2011/

Thank you,
The Intrepid-DX Group and The DX Friends.
http://www.dxfriends.com/
http://www.intrepid-dx.com/ "

T8, PALAU.- Nao, JK1FNL, will once again be active as T88NA from Palau (OC-009) between June 18-20th. QSL via his home callsign.

TO5, MARTINIQUE (NA-107). Al, F5VHJ, will once again be active as TO5A, during the CQWW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, direct or by the Bureau. Logs will be uploaded to LoTW.

ZC4, U.K. SOV. BASE AREAS ON CYPRUS. Reports indicate that Mike, KF6RCP, is currently on holiday/vacation on the U.K. Sovereign Base Areas on Cyprus and is active as ZC4MIS for the next four months. Activity is mainly on the beach using a FT-817ND with a LDG Z817 tuner and a Buddistick. His operations will be mainly on 20 meters using SSB and the Digital modes PSK31 and JT65. See his set up on QRZ.com. Skeds are available by E-mailing him at: kf6rcp at gmail.com
QSL via KF6RCP. QSL also via LoTW or eQSL.

ZD7, ST. HELENA. Nigel, G3TXF, will be active as ZD7XF from St. Helena (AF-022) between June 22-30th. Activity will be from the QTH of Barrie, ZD7MY, which is at 1200 ft. ASL and has an excellent take-off to the north. Operations will be mainly on the HF bands using CW. Nigel plans to take antennas for 160/80m as well as for 6m. QSL via his home callsign. Nigel mentions that there will not be any Internet access in the shack (nor is there any mobile phone service on the island). However, logs will be uploaded to both LoTW and ClubLog whenever practical. For more details

on Nigel's ZD7XF operation, visit his Web page at:
http://www.g3txf.com/dxtrip/ZD7XF/ZD7.html

ZL8X DXPEDITION BOOK AVAILABLE. It was announced this past week that a
ZL8X book is available and it is a "must for every serious DXer who wants
to see more details about ZL8X operation from down under, from the Kermadec
Islands. This unique photo book contains a bunch of pictures from the
beginning of the adventure till the last sunset. It also includes a
detailed map of their camps and over 140 colorful pictures. For more
details,
go to: http://www.kermadec.de/fotobook/index.php
ADDED UPDATES: For more details about the ZL8X:
* Status of QSL card mailing
* DXpedition Of The Year
* Presentation in Friedrichshafen
See the Web page at: http://www.kermadec.de

569. IN SEARCH OF INSECTOSAUR! - Biggest Bug Contest

Newsgroup: rec.radio.amateur.misc
Date: 2011-06-14 20:23:34 UTC
From: Rosie Gillam <rosiegillam@gmail.com>
Message-ID: <36e75ce2-6bab-4ad8-a238-e779e16e3c8f@p13g2000yqh.googlegroups.com>
Source record: 4359

Rampant rainfall, soaring temperatures, and high humidity have had a drastic affect on the insect community. In addition to being called one of the worst mosquito seasons in decades, bed bug infestations are being reported at an astounding rate.

This summer why not make the bug season pay off? Got a roach the size of a small dog, moth, spider or other pest on steroids? Black Flag, America’s leader in insect control since 1833, has launched a nationwide search for America’s biggest bug. Sixty insectophiles will be awarded with prizes and money.

Be brave and get close enough to snap a photo to claim the bug bounty. To enter the photo contest, visit www.blackflag.com for details, official rules, and entry form. The contest runs from June 1st through August 5th.

Let me know if you would like more information.

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
06 - 12 June 2011

Solar activity has been at very low to moderate levels during the period. Activity began at low levels on 06 June, when Region 1226 (S21, L=036, Eki/360 on 29 May) produced two C-class flares, a C1 flare at 06/0135Z and a C1 flare at 06/0950Z. A 12-degree long filament, centered near N25W34, erupted during the period. SDO/AIA 193 imagery revealed material movement along a large filament channel, first visible at 06/0441Z, which continued through about 06/0900Z. Activity increased to moderate levels on 07 June as Region 1226 produced a M2/2N. Associated with this event was a Type II radio sweep, a Type IV Radio Sweep, a Tenflare of 710 sfu, and a full halo asymmetric CME with an estimated plane of sky speed of 1155 km/s. Discrete radio emissions included 1415 MHz - 15400 MHz. Activity decreased to very low levels on 08 June. Activity increased to low levels during 09-10 June as Region 1226 produced two C-class flares, a C1/Sf at 09/0321Z and a C4/Sf at 09/0348Z. Region 1234 (S16, L=245, Bxo/010 on 09 June) also produced a C1 flare at 09/1028. From around the west limb, Region 1226 produced a final C2 flare at 10/1751Z. Activity decreased to very low levels for the remainder of the period.

The 10 MeV proton flux exceeded 10 pfu, beginning at 07 June/0820Z, reaching maximum at 07/1820Z, and ending at 08/1710Z. The maximum 10 MeV flux was 73 pfu. The 100 MeV proton flux exceeded 1 pfu, beginning at 07/0720Z, reaching maximum at 07/1025Z, and ending at 08/0210Z. The maximum 100 MeV flux was 4 pfu.

The greater than 2 MeV electron flux at geosynchronous orbit was at normal to moderate levels during 06-08 June. Fluxes increased to moderate to high levels during 09-10 June. Flux levels decreased to moderate levels during 11-12 June.

The geomagnetic field ranged from quiet to minor storm levels during the period. Activity on 06 June began at unsettled to active levels,

with an isolated minor storm at high latitudes, due to the continued effects of a coronal hole high speed stream (CH HSS) and the arrival the 02 June CME. On 07 June, solar wind speeds, as measured by the ACE spacecraft, increased from 380 km/s to around 480 km/s, following a density spike. These characteristic appear to be the arrival of another CH HSS. From 07- 09 June, activity stayed at quiet to active levels with an isolated minor storm period from 08/0000-0300Z as effects of the CH HSS continued. On 10 June, quiet to unsettled levels were observed with an isolated minor storm period at high latitudes as measurements by the ACE spacecraft indicate the likely arrival of the CME from 07 June. Quiet to active levels were observed from 11-12 June, as a solar sector boundary crossing was observed, preceding another CH HSS.

Forecast of Solar and Geomagnetic Activity
15 June - 11 July 2011

Solar activity is expected to be at very low levels with a slight chance for C-class flares during 15-20 June. Activity is expected to increase to low to moderate levels, with a slight chance for M-class flares during 22 June - 04 July, as old Region 1226 returns. Very low to low levels are expected for the remainder of the period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 15-18 June. Normal to moderate levels are expected from 19 - 22 June. An increase to high levels from 23 - 27 June is forecast. Normal to moderate levels are expected for the remainder of the period.

The geomagnetic field is expected to decrease to mostly quiet levels during 15-21 June. Activity is expected to increase to quiet to unsettled levels, with isolated active levels on 22 - 25 June, due to a CH HSS. Activity is expected to decrease to predominantly quiet levels from 26 June - 01 July. Activity is expected to increase to quiet to unsettled levels, with isolated active levels from 02 - 03 July, as another CH HSS becomes geoeffective. Activity is expected to decrease to predominantly quiet levels from 04 - 07 July. Activity is expected to increase to quiet to unsettled levels on 08-09 July as a CH HSS moves into a geoeffective position. Predominantly quiet levels are expected for the remainder of the period

DXNL 1732 - Jun 15, 2011
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

editor: Helmut Schlaffer, DL7MAE
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

FO - FRENCH POLYNESIA / MARQUESAS ISLANDS / AUSTRAL ISLANDS
Yves,F6CTL, and his XYL are travelling to the Polynesian islands again
for the 5th time. Though Yves emphasizes that this is NOT a DXpedition
he will take his IC-7000 and a vertical or dipole with him. He plans
to work with 100 watts in SSB and digital modes from following islands:
Jun 18-22 Ua Pou Marquesas Islands, OC-027
Jun 22-26 Ua Huka Marquesas Islands, OC-027
Jun 27-29 Raitea French Polynesia, OC-067
Jun 30-Jul 3 Bora Bora French Polynesia, OC-067
Jul 3-7 Rangiroa French Polynesia, OC-066
Jul 7-10 Tahiti French Polynesia, OC-046
Jul 11-14 Rimatara Austral Islands, OC-050
QSL cards should be sent via his homecall, direct or via French bureau.

FS - ST MARTIN, NA-105
John,FS/K9EL, will be active again in CW, SSB and some RTTY on 80m-6m
from Saint Martin (NA-105, DIFO FS-001, WLOTA 0383) between Jun 20 and
Jul 3. His equipment includes an IC-7000, verticals for HF and a 3ele
yagi for 6m. QSL via bureau or direct to his homecall or via LoTW.
The first week is planned as a family holiday and the second week as
DXpedition. John had to postpone this trip by one week.

HB0 - LIECHTENSTEIN
DL4ML, DL6OLI, DJ8KI, DG1SFJ and DL4MP will be QRV from Liechtenstein
from Jun 18-21. Their QTH is situated 1.400m a.s.l. and they will work
on all bands from 80m-10m, 6m and 2m. Equipment includes verticals and
dipoles and one station with a 600 watts amplifier. On 6m they will use
a 4 ele yagi and on 2m a 7 ele yagi with 170 watts. Altogether they
want to operate three stations simultaneously.
QSL cards should be sent via bureau or direct to their homecalls.

KH0 - NORTHERN MARIANA ISLANDS, OC-086
Tony,JA6CNL, will show up as KH0N from Saipan (OC-086) from Jun 17-21.
He also plans to take part in the All Asian CW DX Contest. Tony prefers
to work in CW on 80m and the WARC bands outside of the contest.
QSL cards should be sent via his homecall.

T8 - PALAU, OC-009
Nao,JK1FNL, will be QRV as T88NA from Palau (OC-009) from Jun 18-20.
QSL cards should be sent - also via bureau - to his homecall.

TK - CORSICA, EU-014
Marco,TK/IW2IGA, and Sebastiano,TK/IK2WZM, will be active in SSB and
digital modes on 80m-10m from Corsica (EU-014) from Jun 18-25.
QSLs via bureau or direct to their homecalls.

ZC4 - BRITISH SOVEREIGN BASES ON CYPRUS, AS-004
Mike,KF6RCP, is spending his holidays on Cyprus (AS-004) for the next
four months and will be QRV as ZC4MIS during that time. His station
includes a FT-817ND, a LDG Z817 Tuner and a Buddistick antenna and is
put up at the beach most of the time. Mike is working mainly on 20m in
SSB/PSK31/JT65. Skeds can be arranged via e-mail to kf6rcp@gmail.com
QSL via KF6RCP, also via LoTW or eQSL.

8Q - MALEDIVES, AS-013
Vlad,RA9LR (ex-S79LR), will be active from the Maledives (AS-013)
signing 8Q7LR from Jun 21 until Jul 2. Vlad prefers to work in digital
modes on 40m-10m, but sometimes also in SSB.
QSL via bureau or direct to UA9LP.

SOUTH SUDAN
In our last issue we wrote that the group around OH2BH has postponed
their DXpedition because the new DXCC status will not come into effect
automatically after the independence of this country.
Regardless of that the members of the "Intrepid-DX Group" and the
"DX Friends/Tifariti Gang" (http://www.dxfriends.com/SouthernSudan2011)
are still sticking to their plans to hit the airwaves on July 9. They
already have a licence from the appropriate government authorities.
They plan to hit the airwaves with 18 operators and at least seven
stations at the same time from the future capital Juba. They are still
looking for sponsors to support their efforts.
Meanwhile South Sudan already applied for a membership within the
United Nations. After joining the United Nations South Sudan will
become a new DXCC entity automatically.

DXCC: Once again there will be a QSL checkpoint for the DXCC on the HAMRADIO
fair in Friedrichshafen. Thanks to the presence of the ARRL MVP Manager
Dave Patton,NN1N, you can also bring QSL cards for 160m or deleted
entities.

The QSL cards of the current VK0KEV activity from Macquarie Island are
accepted for DXCC credit now. The same applies to the QSL cards of
TJ9PF (Cameroon 2011). Due to a software bug the QSL labels of TJ9PF
show the year 2001 instead of 2011. The DXCC Desk has been informed

about that and accepts those QSLs as well.

SILENT KEYS: Alexey A. Voronkin (UR5EDU) died when he fell from his antenna mast. Other DXers who put away their key forever were:
Kurt Klement (HS0ZIE/SM7WGP), Jack L. Sheldon (KG7X),
Sergei P. Velikanov (RX6CU), Vladimir E. Pakhorukov (UA9YC),
Terry Young (VP6TY), Guy J. Shields (W4GBU),
Russell W. Shepherd, Jr. (W4SKW), and John W. Lynch (WA3G)

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de
---
The homepage of the upcoming DXpedition to Malpelo Island provides much material for discussion. They offer QSL cards and LoTW confirmations only against payment. Twelve OPs plan to become QRV as HK0NA next year.
Check: http://store01.prostores.com/servlet/malpelodx2012/StoreFront

UPCOMING CONTESTS

Jun 19: DIE Contest (see: http://www.diplomadie.net)
Jun 18/19: JARL All Asian DX Contest

IOTA collected by Ric,DL2VFR (e-mail: iota@dxhf.darc.de)

Island activities:
EU-010, GM, Outer Hebrides: An international team will be QRV as MS0INT from the islands Benbecula, South Uist, North Uist, Grimsay, Baleshare and Bemeray from Jun 14-20. QSL via M0URX. See also: http://www.ms0int.com
Following activities are planned this week:
Jun 14 - MM/F4BKV and MM0NDX/p, South Uist, Berneray (EU-010)
Jun 15 - MM/F4BKV and MM0NDX/p, Benbecula (EU-010),
MM/F4BKV and MM/EI6DX, Grimsay (EU-010),
MM/EA5KA and MM/EA3OR, North Uist (EU-010),
MM/EA3NT and MM0NDX/p, Baleshare (EU-010),
MM/IZ7ATN, Berneray (EU-010)
Jun 16 - MS0INT/p, Monachs (EU-111), for 24 hours
Jun 17-20 - MS0INT Hirta, EU-059, with three stations (CW, SSB, 6m)

EU-052, SV8, Ipeiros/Dytiki Ellas Region Group: Several Greek HAMs plan to activate Kastri lighthouse (ARLHS GRE-078) on Othonoi Island for the very first time from Jun 17-26. See also: http://www.j48o.com
QSLs for J48O via SP2FPU (bureau/direct).

EU-059, GM, St Kilda: MS0INT wants to show up from Hirta Island as well from Jun 17-20. QSL via M0URX (bureau/direct).

EU-111, GM, Monach Islands: Even the Monachs are on the list of planned activities of MS0INT (Jun 16). QSL via M0URX.

EU-177, SM, Sodermanland/Ostergotland County Group: SD1B/5 plans to become active from Aspoja from Jun 19 until Jul 1. QSL via DL8AAV.

NA-009, VY0, Nunavut (Parry Islands) Group: The activity of NQ6K/VY0 from Devon Island - the largest uninhabited island on earth - was originally planned for the mid of June. The new date is scheduled for the end of the month.

NA-026, K, NY State group: K2EFG announced to become QRV from Fire Island on 20m and 40m from Jun 18-23. QSL via K2EFG (bureau/direct).

NA-046, K, MA State South group: K1VSJ will be active again from Martha's Vineyard between Jun 16 and Sep 5.

NA-112, K, NC State West group: N4LA will spend his holidays on Emerald Island from Jun 20-25. From time to time he wants to work in SSB on 10m-40m. QSLs direct or via LoTW. See also: http://www.n4la.com

New Prefixes in Russia

A number of new prefixes from the Russian Federation appeared on the bands
lately after the recent changes of the Russian telecommunication authorities
- Russian prefixes with the number 2 are no longer limited to Kaliningradsk.
Stations with RA2 and UA2-UI2 (with F and K as first letter in the suffix)
are in Kaliningradsk; otherwise, these prefixes will be used in European
Russia.
- Stations with the following prefixes are in European Russia:
R1, RA1-RZ1, R2, RB2-RZ2, R3-R7, RA3-RZ7, UA1, UA3-UI7, as well as R8, R9,
RA8-RZ9 and UA8-UI9 (with F, S, T, W or X as first letter in the suffix)
are in European Russia.
- Except for those listed above, all stations with 8, 9 and 0 as the numeral
are in Asiatic Russia.
- Russian Antarctic stations use temporary call signs in the series
RI1ANA-RI1ANZ and RI00ANT-RI99ANT.
- Franz Jozef Land stations use temporary call signs RI1F, RI1FJ and
RI1FJA-RI1FJZ.
- Malyj Visotskij island stations use temporary callsigns RI1M, RI1MV and
RI1MVA-RI1MVZ.

June 15, 2011

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> "WHAT AN UNBELIEVABLE RESPONSE"

Missouri SEC Ken Baremore, W0KRB <http://www.qrz.com/db/w0krb>, sent
the following open letter to volunteers involved in the Joplin,
Missouri tornado disaster:
```

"I want to thank all who volunteered and came to Joplin to help with communications as well as those who are still contacting me to see if additional help is needed. Due to the ending of the search and recovery mode and going to the debris and potential body part removal functions, the decision was made that effective at the end of shift today (Monday, May 30, 2011) all ham communications from the EOCs to the field operations are being stood down. We do have some ARES® operators that are scheduled and will continue to work with SATERN <http://www.satern.org> through the rest of this week.

```
"Ham communications between Springfield and Joplin started Sunday night
between Freeman Hospital in Joplin and some of the hospitals in
Springfield as that was the only means of communication. The links were
shut down Monday morning when their needs were met. Likewise, the radio
station at the Springfield Red Cross was started Sunday evening to
allow communications between the Springfield and Joplin offices and to
the shelter that was set up in Joplin. That communication link stayed
open until Tuesday as it was the only reliable method of
communications.
```

"I asked Cecil Higgins, AC0HA, Assistant DEC for District D, to respond to Joplin on Tuesday morning and act as "Ham in Charge" during the disaster and help to set up additional communication links as required. Thomas Zeller, KB0ORZ, EC for Jasper County, and LaVerne Wilson, NQ0B, EC for Newton County, were already in place, with members of their respective ARES® groups trying to support the EOCs and Red Cross, but relief was needed.

"Our ham operators expended almost 2000 hours during this week. What an unbelievable response. I know that many of you were scrambling to find

the necessary equipment to allow you to come help this week. It is a great feeling for me to know that I am part of an organization with people willing to give up vacation or personal time to help out in a time of need. I hope we don't have another need anytime soon but it is nice to know that we have hams and ARES® members ready to serve. Again, I can't thank you all enough." -- 73, Kenneth Baremore, W0KRB, Missouri Section Emergency Coordinator [See also Missouri ARES® <http://www.ares-mo.org/>.]

==> ARES® A HIT AT ARRL NATIONAL CONVENTION IN TEXAS

The ARES® Forum and ARES® booth were popular areas at the 2011 ARRL National Convention <http://www.arrl.org/2011-arrl-national-convention> at Ham-Com in Plano, Texas, this past weekend. ARRL Emergency Preparedness Manager Mike Corey, W5MPC conducted the standing room only ARES® forum. Corey gave the same program that he presented in Dayton and received another enthusiastic, positive response from the audience. Topcis covered during the ARES® forum included: training, creating a positive public image, actions we can take to improve ARES®, and dispelling some emcomm myths. Several good questions and comments came from the Texas crowd.

ARRL Southeastern Division Director Greg Sarratt, W4OZK, reported enjoying talking to many emcomm-oriented convention-goers from Texas and the entire region at the League's National Convention ARES® booth. Many hams were interested in the ARES® response and incorporation of D-STAR in the April Alabama tornado outbreak. Sarratt said "the Texas hams have a fine ARES® program, and I enjoyed their hospitality and greatly appreciate their well wishes for the Alabama Tornado victims."

==> WD4R: NATIONAL HURRICANE CENTER'S ANNUAL STATION TEST A SUCCESS

The crew at WX4NHC performed its annual National Hurricane Center Hurricane Season Station Test on June 4. This is our 31st year of volunteer public service at the center. The station radio equipment and antennas were tested on multiple frequencies and fine tuned for what may become a busy season by some predictions.

We made more than one hundred contacts on HF around the USA, Canada, with several Caribbean countries, and even as far as England. We also tested several of our local repeaters on VHF/UHF.

The VoIP Hurricane Net conducted a net for two hours on EchoLink/IRLP

using a similar format used during our hurricane activation as a practice test, which resulted in several dozen contacts. The WX4NHC operators for this test were: AF4VJ, K4AG, K4PAA, KJ4YDX, WB4L, WD4R and WX2L.

We welcomed a new WX4NHC operator, Mike Kelley, KJ4YDX, who recently upgraded to General. Kelley is the Vice Chairman for the University of Miami School of Medicine and was Chief Operating Officer for the UM/Medishare Haiti Mission Command Center and Field Hospital in Port-au-Prince, Haiti, in the aftermath of the earthquake.

We extend our thanks to all who listened for us and made contacts. Your contacts helped us confirm our equipment and antennas' performance and helped us practice our operating skills at NHC. We hope we can count on your support during the next hurricane on the Hurricane Watch Net 14.325 MHz or the EchoLink Conference WX_Talk (node 7203) or IRLP (node 9219).For more information: www.wx4nhc.org <http://www.wx4nhc.org/> -- Julio Ripoll, WD4R, WX4NHC Amateur Radio Assistant Coordinator (Celebrating 31 years at the National Hurricane Center

<http://www.nhc.noaa.gov/>)

==> ECAC DRAFTING MDEC SPECS

In January, 2007, a landmark report with recommendations was tendered with the ARRL Board of Directors at their Annual Meeting. The document was the culmination of the hard work and deliberation of the ARRL National Emergency Response Planning Committee, a special select group chaired by then-Vice President and current ARRL President Kay Craigie, N3KN. One of the key concepts proposed by the committee was the Major Disaster Emergency Coordinator (MDEC) appointment. The idea was to have a manager who would coordinate Amateur Radio operations, operators and resources supporting served agencies during a major disaster relief operation when section and regional ARES® assets are overwhelmed similar to operations performed in the Hurricane Katrina response. The MDEC's line of authority would be derived from the ARRL's disaster response emergency manager at HQ and would parallel the affected area's Section Managers. The MDEC position was envisioned to be a continuous appointment but would only be active when called upon by the HQ manager.

The recommendation was to have the MDEC be responsible for the "establishment of an as needed emergency communications structure - the Disaster Field Team - designed to fulfill served agency requests and/or augment the existing Field Services structure established by the Section Manager." The Disaster Field Team (DFT) would be assembled from the ARRL national ARES® database. The purpose of the DFT would be to provide support for the infrastructure of relief organizations that bring resources into the disaster zone and cannot be served by the local Field Organization. The MDEC function has been tested in exercises with served agencies and ARES with success.

The ARRL Emergency Communications Advisory Committee (ECAC) is currently drafting appointment protocols and requirements. As presently conceived by the committee, there will be several MDECs geographically arranged by ARRL Division. The geography, and hence the actual MDEC headcount, is being determined at this time.

The ECAC was established at the January, 2010 Board meeting. Each of the 15 ARRL Divisions has a representative on the ECAC. There is also a representative from Radio Amateurs Canada, a Board of Directors liaison, and a HQ staff liaison. Committee members are exceptionally qualified and recognized members of the emergency communications community. The committee will report its recommendations and draft appointment guidelines to the Programs and Services Committee.

Members include: Jim Cross, WI3N (Atlantic Division); Bill Niemuth, KB9ENO (Central Division); Jim Zahradnicek, KD0S (Dakota Division); Jim Coleman, AI5B (Delta Division); Chairman Dale Williams, WA8EFK (Great Lakes Division); Jim Mezey, W2KFV (Hudson Division); Reynolds Davis, K0GND (Midwest Division); Dave Colter, WA1ZCN (New England Division);

Gordon Grove, WA7LNC (Northwestern Division); James R Latham, AF6AQ (Pacific Division); Charlie Miller, AE4UX (Roanoke Division); Jeff Ryan, K0RM (Rocky Mountain) ; Rick Palm, K1CE (Southeastern Division); Grant Hays, WB6OTS (Southwestern Division); Glen Reid, K5FX (West Gulf Division); and Doug Mercer, VO1DTM (Radio Amateurs of Canada). Board Liaison is Mickey Cox, K5MC. And Staff Liaison is Mike Corey, W5MPC.

==> TIP: THE FIXER

Something that every ARES® team needs is a "fixer" - a skilled tech equipped not so much with radios, but with test equipment and supplies of tools, wire, connectors, and repair materials. The team "fixer" is a person who can fix or jury-rig just about anything and who can improvise as needed to keep things running. With a majority of team members focused on communications and organization, this function needs attention during planning and training for response and deployment. It's a great path for mentoring hams from non-technical backgrounds so they are better prepared to maintain operational status under field conditions. In addition, this function is a natural for hams from a "do it yourself" (DIY) background - a prime source of recruitment to Amateur Radio. -- Ward Silver, N0AX <http://www.qrz.com/db/n0ax>, ARRL QST Contributing Editor

==> Q&A: ARES® VERSUS RACES

Q: I would enjoy reading an article about the similarities and differences between the ARES® groups and the RACES groups. I am part of an ARES® group, but I really don't know why ARRL has two organizations that seem to be doing the same thing. -- Mike Sallee, KC9FWL, Bloomington, Illinois

A: After World War II, it became evident that the international situation was destined to be tense and the need for some civil-defense measures became apparent. Successive government agencies designated to head up such a program called on amateur representatives to participate.

In the discussions that followed, amateurs were interested in getting two points across: First, that Amateur Radio had a potential for and capability of playing a major role in this program; and second, that our participation should be in our own name, as an Amateur Radio Service, even if and after war should break out. These principles were included into the planning by the formulation of regulations creating a new branch of the amateur service, the Radio Amateur Civil Emergency Service, RACES.

RACES is administered by local, county and state emergency management agencies, and supported by FEMA. It is a part of the Amateur Radio Service that provides radio communications for civil-preparedness purposes only, during periods of local, regional or national civil emergencies. These emergencies are not limited to war-related activities, but can include natural disasters such as fires, floods and

earthquakes.

RACES operation is authorized by emergency management officials only, and this operation is strictly limited to official civil-preparedness activity in the event of an emergency communications situation.

Operating Procedure

Amateurs operating in a local RACES organization must be officially enrolled in the local civil-preparedness agency having jurisdiction. RACES operation is conducted by amateurs using their own primary station licenses and by existing RACES stations.

The FCC no longer issues new RACES (WC prefix) station call signs. Operator privileges in RACES are dependent upon, and identical to, those for the class of license held in the Amateur Radio Service. All of the authorized frequencies and emissions allocated to the Amateur Radio Service are also available to RACES on a shared basis.

While RACES was originally based on potential use for wartime, it has evolved over the years, as has the meaning of civil defense (which is also called civil preparedness), to encompass all types of emergencies.

While operating in a RACES capacity, RACES stations and amateurs registered in the local RACES organization may not communicate with amateurs not operating in a RACES capacity. Such restrictions do not apply when such stations are operating in a non-RACES--such as ARES&#65533;--amateur capacity. Only civil-preparedness communications can be transmitted.

Test and drills are permitted only for a maximum of one hour per week. All test and drill messages must be clearly so identified. With the approval of the chief officer for emergency planning and applicable state, Commonwealth, district or territory, however, such tests and drills may be conducted for a period not to exceed 72 hours no more than twice in any calendar year.

ARES&#65533; and RACES

Although RACES and ARES&#65533; are separate entities, the ARRL advocates dual membership and cooperative efforts between both groups whenever possible for an ARES&#65533; group whose members are all enrolled in and certified by RACES to operate in an emergency with great flexibility. Using the same operators and the same frequencies, an ARES&#65533; group also enrolled as RACES can "switch hats" from ARES&#65533; to RACES and RACES to ARES&#65533; to meet the requirements of the situation as it develops. For example, during a "nondeclared emergency," ARES&#65533; can operate under ARES&#65533;, but when an emergency or disaster is officially declared by a state or federal authority, the operation can become RACES with no change in personnel or frequencies.

This situation is still not well understood and accepted throughout the United States; both ARES&#65533; and RACES still exist, separately, in many

areas.

Where there is currently no RACES, it would be a simple matter for an ARES® group to enroll in that capacity, after a presentation to the civil-preparedness authorities. In cases where both ARES® and RACES exist, it is possible to join both or to be involved in either. As time progresses, the goal would be the merger into one strong organization, with coordination between ARES® and RACES officials using the same groups of amateurs. In some sections of the U.S. today, the ARES® structure has also been accepted as the RACES structure.

==> FEMA ADMINISTRATOR: AMATEUR RADIO "THE LAST LINE OF DEFENSE"

In an FCC forum <http://www.youtube.com/watch?v=bzx-kvo1i_Y> on earthquake communications preparedness, Federal Emergency Management Agency (FEMA <http://www.fema.gov/>) Administrator Craig Fugate described the Amateur Radio operator as "the ultimate backup, the originators of what we call social media." The forum-- held May 3 at FCC Headquarters in Washington, DC -- brought together officials from the White House, the Department of Homeland Security (DHS <http://www.dhs.gov/index.shtm>), the United States Geological Survey (USGS <http://www.usgs.gov/>), FEMA, the FCC and the private sector. Fugate and FCC Bureau of Public Safety and Homeland Security Chief Jamie Barnett gave the opening remarks.

Later in the forum, Fugate spoke more on Amateur Radio. "During the initial communications out of Haiti, volunteers using assigned frequencies that they are allocated, their own equipment, their own money, nobody pays them, were the first ones oftentimes getting word out in the critical first hours and first days as the rest of the systems came back up," he told the forum. "I think that there is a tendency because we have done so much to build infrastructure and resiliency in all our other systems, we have tended to dismiss that role 'When Everything Else Fails.' Amateur Radio oftentimes is our last line of defense."

Fugate said that he thinks "we get so sophisticated and we have gotten so used to the reliability and resilience in our wireless and wired and our broadcast industry and all of our public safety communications, that we can never fathom that they'll fail. They do. They have. They will. I think a strong Amateur Radio community [needs to be] plugged into these plans. Yes, most of the time they're going to be bored, because a lot of the time, there's not a lot they're going to be doing that other people aren't doing with Twitter and Facebook and everything else. But when you need Amateur Radio, you really need them."

Readers can watch a video of the forum <http://www.youtube.com/watch?v=bzx-kvo1i_Y> on YouTube. Fugate's remarks begin at 18:55.

==> LETTERS

Here are three ideas for future editions of the ARES® E-Letter. First, with more than 35 years in AREC and ARES® communications, a question was posed at an ARES®/RACES meeting this past Monday evening which I could not answer. Basically, has anyone assembled a profile on the quantities of messaging traffic typically experienced during various types of emergency ARES® and RACES activations? Those posing this question are not looking for an answer based on bands and modes of operation, but more along the lines of rough percentages of tactical voice communications vs. written traffic support by type of emergency. Uncovering this data from other areas would help improve resource planning and training in this Section, and I presume other recipients of the ARES® E-Letter across the country as well.

The second topic I would like to suggest is sharing of District-level and Section-level written plans that outline mutual aid agreements for sharing of re-deployable ARES® resources among counties, districts, and sections.

And thirdly, last month's ARES® E-Letter mentions the subject of "self-deployment" by amateurs, most of who are untrained in ARES® methodologies and could be more of a hindrance than a help to emergency work. It would be interesting to hear how other areas of the country have planned for and dealt with this highly anticipated situation. In my local area, for example, the Clark Regional Emergency Services Agency has made plans for establishing gathering points throughout their service area where spontaneous responders, including medical personnel, can assemble following a major emergency event. The local ARES®/RACES group has plans in place to "collect" Amateur Radio volunteers at these same points, do a quick interview of their experience and capabilities, and deploy them alongside trained ARES® members as needed. I hope these suggestions are topic ideas you can use. -- Steve Aberle, WA7PTM, ARRL Official Emergency Station (OES), Western Washington Section

==> NVOAD CONFERENCE BRINGS TOGETHER 30 DISASTER GROUPS

On May 24 through May 26 all roads led to the heart of the country for the 19th Annual NVOAD Conference at the Hyatt Regency Hotel in Kansas City, Missouri. The mission and purpose of NVOAD <http://www.nvoad.org/> (National Voluntary Organizations Active in Disaster) is to provide a forum where organizations share knowledge and resources throughout the disaster cycle -- preparation, response and recovery -- to help disaster survivors and their communities. The conference was well attended, with 550 people checking in. ARRL is a national member of NVOAD.

A number of forums gave participants the opportunity to hear firsthand from the other organizations about their roles in aiding with disaster recovery. Over 30 organizations had booths displaying the various services they provide, ranging from small portable water purification units, clothing items made from plastic bottles and even shrink-wrapped diaper packets!

The importance of such a forum was punctuated by the devastating tornado in Joplin just before the conference began. In addition, during the first full day of the conference several tornadoes were sighted nearby and were reported to be heading toward the downtown area. Appropriate precautions were taken and attendees were directed to suitable shelter. Fortunately, no damage occurred.

The Service Project during the conference was greatly enlarged this year with the beginning of construction of a house for a local family. Another hands-on project <http://numanainc.com/index.php/faq/> in which my wife and I participated during the event included packaging food kits to be sent to Louisiana in preparation for the upcoming hurricane season.

Jim Andera, K0NK, from Gardner, Kansas gave an excellent presentation on "Amateur Radio in Emergencies and Disaster Relief Efforts." He first provided background on Amateur Radio and the different modes that amateurs use. He went on to describe the communication capabilities amateurs can provide in disaster communications. After the session, a number of people wanted to know more about Amateur Radio and its public service aspects. Andera left the convention to lend a hand in Joplin.

The 2012 National VOAD Convention will be held in Virginia. --Chuck Skolaut, K0BOG, ARRL HQ

==> K1CE FOR A FINAL

One of things missing from many tornado reports is discussion of the insidious psychological traumas that are inflicted upon survivors that linger forever after the media trucks and emergency management vehicles have rolled out of town. A good friend of mine, Dan Woll, wrote of his personal experience in a gripping account published in the Cap Times, Wisconsin, a few days ago. It helps us as responders to have a deeper empathy for what the survivors are going through, and what they will go through for the rest of their lives, Click here <http://host.madison.com/ct/news/local/article_fb1f9c80-9140-11e0-84c2-001cc4c002e0.html>f
or
a must-read.

I'd like to thank Greg Sarratt, W4OZK, for asking me to serve on the League's Emergency Communications Advisory Committee (ECAC) as Southeastern Division rep. The committee was authorized and constituted by the Board of Directors last year. There are a number of qualified panelists on the committee and I am looking forward to working with them. A report on current ECAC work is included above, in this issue. See you next month! 73, Rick Palm, K1CE <http://www.qrz.com/db/k1ce>

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

WIANEWS WEEK COMMENCING June 19 2011.

VHF INTERFERENCE PROBLEM SOLVED

WIA DIRECTOR BOB BRISTOW VK6POP SPEAKS

WYONG FIELD DAY DATE ANNOUNCED FOR 2012

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 19 2011.

The most recent case of an interfering device on 147.0067 MHz, affecting the
VK4RBN 2m repeater has been resolved.

Tim VK4TIM has had confirmation from one of ACMA's field officers that the
source of the interference in the Carindale area, was another one of those
Omni WEP-910D wireless headsets.

Once again, as in the previous dealt with, the device was radiating a carrier
at the address it was traced to, and that once again, VK4TIM had correctly
located the address of it's operation.

This device is no longer operating.

We should always keep an eye out for things such as this, and Tim was alerted
to it's presence when listening to the VK4RBN repeater whilst mobile, with
an evening to spare, it took only an hour to locate, and was very good
DF practice.

There is a high likelihood that there will be more of these devices out there and operating, and they are easy to find. We all need to be proactive in locating sources of interference in the Amateur bands.

NEVER EVER make direct contact with the household you track interference down to, fully document and contact theACMA.

It is believed that there has been a significant number of these things sold in Australia, an importer of them was prosecuted by the ACMA some years back, unfortunately not before potentially several hundred had been sold.

The carrier frequency of these devices is typically around 6kHz above the VK4RBN 147.000 frequency.

(Tim Moore, VK4TIM)

BUSHFIRE early warning sirens will be trialled in Steels Creek ahead of the next fire season.

The trial follows a two-year campaign by the community, many of whom were caught off-guard on Black Saturday as the massive fire front swept towards them.

Steels Creek resident Norm Stewart welcomed the prospect of early warning sirens in an area with poor mobile phone services.

"On the day of Black Saturday there was nothing on the radio warning us a fire was in our area, so we approached the Government to ask for an early warning system," Mr Stewart said.

"When our power goes out there is no phone service."

A second early warning system will be trialled in Olinda, with installation and testing of both expected to be completed before the start of the 2011-12 bushfire season.

As announced here on WIA national news, in AR magazine and on the WIA website, a commemorative Centenary DVD is being made available for purchase.

This professionally recorded and produced twin DVD boxed set includes footage from the 'WIA Centenary Convention Weekend of Activities' held last year in Canberra. Registrations to obtain a copy of the DVD will close at the end of this month 30th of June 2011. Don't miss out, register today to reserve copy, go to the WIA website and simply click "WIA Centenary Celebrations" under the news and events tab.

FROM ANDERSSON HOUSE THE WEEKLY WIA DIRECTORS SPOT.

Focus on Young People

It has been known for a long time that the Amateur Radio population in Australia is aging, and if nothing were to be done to address the situation, the hobby would be in danger of fading away.

A few years ago Amateur Radio Licensing in Australia underwent a review and restructure, bringing about changes that have now been proven to be successful in bringing new people into the hobby.

I've heard it said many times that the hobby has been "dumbed down", by the introduction of the Foundation license, however there is no evidence to support that assertion. In fact a large number of Foundation License holders go on to gain their Standard or Advanced licenses as a matter of course. This cements the position of the Foundation License as an entry level device to attract new people into the hobby.

So is the Amateur population growing? Yes, it is, and steadily, however the total number isn't growing by the number of new licensees entering the hobby. Why is this?

It's because our average age of Amateurs is quite high, and a number of Amateurs leave the hobby each year due to infirmity, lack of facilities in aged accommodation, or simply by going silent key. This slows down the net growth of licensees.

The WIA Board is seeking to attract younger people into the hobby, and has already adopted some strategies, and will develop others in the future. Concern about bringing younger people into Amateur Radio was expressed clearly several times at the Open Forum of the recent WIA AGM conference in Darwin.

The Board will soon announce and call for applications for the Club Grants Scheme for 2011, and some of the grants will help fund projects that will encourage young people to take an interest in Amateur Radio. The Board has already announced a low WIA membership fee for full time students under the age of 25.

The responsibility to pass on this great hobby to the younger generations rests with all of us, and whether we achieve it by our direct action, or by supporting the actions of others, we should all do what it takes.

I'm Bob VK6POP

HAMS ACROSS AUSTRALIA.

web service:- http://www.arnsw.org.au/html/news_vk2wi.htm
VKG Roundup http://www.police.nsw.gov.au/news

Hello everyone from the Central Coast Amateur Radio Club. My name's Rod VK2FVRJ.

Central Coast ARC Lecture Nights continue!

Lecture nights at the Central Coast ARC have proven to be very popular and will continue with this month's lecture being on the "Radio Mobile" software. The software shows topographical routes between two points and the possibility of communication between the points on VHF and UHF bands. This is very useful

information to have when setting up a VHF or UHF station whether it be at home, portable or for a contest.

The lecture will be given by Dave, VK2JDH to-morrow, Friday 17th June (for those reading the early edition) at the Central Coast ARC clubrooms in Dandaloo St, Kariong.

Lectures start promptly at 7:30pm, so please arrive early to avoid disruption and to get that special seat!

Upcoming lecture topics include - Green Electronics, APRS and Satellite Communications.

So come along and enjoy another great lecture at the club on the hill - Central Coast Amateur Radio Club!

International Lighthouse & Lightship Weekend

After entering two teams in the just completed VHF/UHF Winter Field Day contest, one station which allowed our less experienced Foundation licensees to get a taste of contesting, the Central Coast Amateur Radio Club is now gearing up for the International Lighthouse and Lightship Weekend, on the 20th August. The CCARC will be operating from the surrounds of Nobby's head lighthouse in Newcastle and as far as the club is aware, this will be the first time that Nobby's Lighthouse has been registered for this annual event. CCARC will be operating alongside many other local clubs at various venues in Newcastle and on the Central Coast during this worldwide event.

CCARC Field Day at Wyong

A now the date we have all been waiting for,
the CCARC Field Day at Wyong will be on Sunday, 26th February 2012.

That's right! Sunday 26th February 2012

So put this date in your diary, book the leave pass and start saving those pennies for Amateur Radio's Big Day Out!

The Central Coast Amateur Radio Club meets on the first Friday of the month with the next meeting Friday 1st July 2011. The meeting will be held at the clubrooms in Dandaloo St Kariong at 7.30pm. The clubrooms are usually open each Saturday from 10.30 am and a Project and Development group meets each Tuesday at 7.30pm.

For more information, visit the club's website www.ccarc.org.au or call
02 4340 2500

(Rod VK2FVRJ Central Coast Amateur Radio Club Publicity Officer)

The Blue Mountains amateur radio club holds a HF NET ON 3.543 kHz on Tuesday night at 8pm, it also holds a 2 metre net on the club repeater
147.050 / 147.650, the repeater superimposes a 67Hz CTCSS subtone on Transmit for those who wish to use this feature.
A 123Hz CTCSS Subtone is required to access this repeater.

The Blue Mountains amateur radio club is holding its annual WINTERFEST on Sunday August 28th entry is $5 more details can be found by contacting the club.

A Queen's Birthday report

The aimed three activations under the Keith Roget Memorial National Parks Award by Tony Hambling VK3VTH over the long weekend took place from the Gunbower, Barmah and the Lower Goulburn National Parks.

He reports a decent 69 contacts logged which included all mainland states and some DX as well. No doubt his portable combination of a K3 transceiver and beam antennas did the trick.

Tony VK3VTH said that the interest is continuing in the Amateur Radio Victoria operating award is growing and a few guys chased him from park to park.

Full details of the Keith Roget Memorial National Parks Award can be found under the Awards section of the website amateurradio.com.au

(Jim Linton VK3PC)

VK4

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP, and I've been thinking.

Has the time come for us to get rid of our monthly magazine and our weekly broadcasts as well as our club newsletters?

Is it time to just depend on RSS feeds and Tweets? Has the cyber technology expunged the need for mass produced information?

Some years ago, I can remember people saying that the Internet had replaced the role of amateur radio. Similarly, I can remember that when single sideband was in its infancy, both in land mobile and amateur services that people were forecasting the demise of AM - fondly remembered as ancient modulation. Broadcasting still makes good use of AM as do amateurs who are using newer methods and technology to explore this mode.

One thing that news broadcasts and publications provide is an aggregated view a mass of items presented coherently. With the use of multiple platforms our amateur news services do bring the world to our shacks. This is only true if people are prepared to share their local news and not just horde it on their own web site. In doing this they are ensuring that others have to find it and can not complain that outsiders don't know. This is reversing the idea of the global village.

I'm Geoff Emery and that's what I think....how about you?

HOME OF THE GOOD GUYS

KORDIA

NZART have had some very excellent news that KORDIA will not be charging NZART for the rental on their sites, for the next 5 years.

Although yet to confirm this in a formal contract, Vaughan Henderson ZL1TGC and Otago Branch 30 are to be heartily congratulated for their by no means small involvement in bringing this about.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Ark's Academy conducted a combined standard / advanced course over the last six weeks in the Melbourne Area and would like would like to congratulate

Brian -- For Upgrading from Standard To Advanced
Rodney For Upgrading from Standard to Advanced
Charlie For Upgrading from Foundation to Standard
Miki For Upgrading from Foundation to Standard

Hope your new license levels enable you to enjoy Amateur Radio for a long time to come, well done from all the Team at Ark's Academy

Also thanks to Lino VK3EI , Lionel VK3NM for their efforts during the course and Keith VK3FT for his assistance with the Assessments

(John VK3DQ)

119 NEW AMATEURS GET THEIR CALL SIGNS

The Radio Amateur Examination results were published in South Africa and showed the youngest candidate who wrote the class B exam as 9 years old and the youngest who wrote the class A exam 11 years old.
The oldest person to write is 71 years.
The overall pass rate for class A is 79% and Class B 50%.

JG Woodburne, ZS3JW, with 97% scored the highest marks in the Class A examination and J Flemming, ZU3JW, achieved 97% in the Class B RAE.

The standard agreement with ICASA is that new amateurs may use their call signs immediately and do not have to wait for the paperwork. Letters and certificates are in preparation and will be mailed soon.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

FCC SEEKS PUBLIC COMMENTS ON CALM ACT

The FCC is asking for public comment on the implementation of the Calm Act, which aims to regulate the volume on TV commercials to that of associated programming.

The Calm Act was enacted by Congress last December 15th. It requires that the FCC adopt regulations for television broadcasters, cable operators and other multi-channel programming distributors on or before this December 15th to limit volume excursions between programming and commercials.

The legislation stems from numerous long term viewer complaints about excessively loud television commercials. In its Notice of Proposed Rule Making or NPRM issued May 27th, the FCC notes that commercial audio levels have been a leading source of criticism reported to the regulatory agency since its Consumer Call Centre began reporting complaints in 2002. The NPRM addresses regulatory enactment, compliance, viewer complaint procedures, enforcement and other matters concerning adoption of the Calm Act.

A GREAT LESSON IN HAM RADIO PUBLIC RELATIONS

One of the best ever public relations spots ever done was aired recently on KCTV channel 5 in Kansas City. It featured only a reporter, two hams and an H-T, but is an excellent example of how an interview should take place.

The interviewees were Hamclass.org instructors, Brian Short, KC0BS and Matt May, KC4WCG. The HT was a Yaesu VX-7R, but it was the comments made by Short and May that made this such an outstanding bit of morning television:

KC0BS: "Actually, there are a lot of ways that
people can get involved in a response,
but all of them require some expertise.
You need to bring something to the party,
so as to speak. There are great
opportunities through the Red Cross, the
Salvation Army and another great example
of that is amateur radio."

If you are a ham involved in publicizing the hobby, or just want to see how to do an interview correctly, then this is must watch television. Its now up on YouTube.com. You can reach it by taking the shortcut link of tinyurl.com/42ntagq

EMERGING TECHNOLOGY: LASER AND FIBER OPTICS SET NET DATA SPEED RECORD

Researchers have set a new record for the rate of data transfer using a single laser. The speed reached is 26 terabits per second.

The trick was to use what is known as a "fast Fourier transform"
to unpick more than 300 separate colours of light in a laser beam.
Each is then encoded with its own string of information.

The technique is described in the journal Nature Photonics. The report says that at those speeds, the entire Library of Congress collections could be sent down an optical fibre in about 10 seconds.

THE HERO HAMS OF THE JOPLIN TORNADO

Some high drama has emerged in the aftermath of the tornado that ripped through Joplin, Missouri, on Sunday night May 22nd. It's a story of true ham radio heroism as supplied to us by Patti Flowers-Palmer, KD0AEL, and Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

Patti Flowers-Palmer, KD0AEL, tells Amateur Radio Newsline
that it was on Sunday evening, May 22nd while a young

amateur was finishing with post Skywarn Net Control duties that a voice was heard calling for help over the 146.91, W0EBE, repeater. Caleb Burns, KD0BWT, responded to that call. It was coming from the Freeman Hospital in Joplin, Missouri. The news it carried was that a devastating F5 tornado had destroyed much of the community as well as its regional medical facility.

In that exchange, crucial medical supplies were ordered and medical teams were called to duty. Initially, the call was made by an Information Technology person at that location. He was relieved by Thomas Ellicott, N0EKP, who deployed to assist his own stricken community.

As that transmission was taking place, Steve Palmer KA0SPM, and his wife Patti KD0AEL, Andrew Brashers KD0HUN and Jonathan Rinty KD0OSF, all who had been deployed as Skywarn spotters, responded by driving to Cox South Hospital in Springfield, Missouri. Meantime, Tom Hargis WX0SML and Jamas Justice, KD0GUU, both of whom had been deployed with Skywarn, drove to St. John's Regional Medical Centre also located in Springfield. Both of these hospitals are regional Medical Centers for Southwest Missouri.

Upon arriving and finding that the radio rooms near the Incident Command Centers were void of any amateur equipment, operators at both locations began relaying information from doctors and nurses from using their own mobile radio gear. This, to begin the crucial process of moving injured from the overwhelmed Freeman Hospital to several Springfield trauma centres.

With immediate needs met, the hospitals worked with the amateurs to provide locations for the operators to set up mobile radios as base stations so that communications could continue. One was located in an incident command at St. John's and the other in the ambulance bay of Cox South. As this was occurring, KD0BWT grabbed a handy-talkie and headed for Ozarks Community hospital where he established mobile command. A short time later, Pat Conway WA6JGM and Clifton Smith KC0SQU responded by taking a mobile unit to Ozarks and setting up a more permanent station at that location.

The amazing band opening that had allowed the initial communications began to fade and KA0SPM deployed to the National Weather Service in Springfield where he relayed messages via the 145.21 repeater. That machine had survived the tornado that ravaged other parts of the Joplin area.

According to KD0AEL, before the night was over, there was a tremendous outpouring of offers from amateurs over the entire area who offered any assistance they could provide to

keep communications flowing. During the week that followed,
a number of hams continued to call to offer assistance and
they were directed to the coordinators of the CERT search
and rescue efforts.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM,
reporting from Reno, Nevada.

==========

IRTS NEWS DESK

World Castles Weekend

Now I know there are not many Castles in VK but yes you do have some!

That one on the Sunshine Coast in VK4 comes to mind!

Well The World Castles award will be holding an activation weekend on
Sat 25th - Sun 26th June, for anyone interested in activating a site.

More information can be found at:
http://www.wcagroup.org/ENG/wcw.html

Time: From 00:00 UTC of Saturday till 23:59 UTC of Sunday.
Bands: All HF and VHF amateur bands.

In this part of the world, Central Lancs ARC will be activating Hoghton Tower
on the 26th June 2011. This stately home, located preston, lancashire, has
been the ancestral home of the de hoghton family since william the conqueror.
For more details go to www.cashota.co.uk

5MHz Oceanographic radar

Some may have noticed the ARRL news item on Oceanographic radars on 5MHz, which
concerns a US proposal in the WRC-12 preparatory process for allowing
wave-sensing radars to use 5,250-5,450kHz, amongst other frequencies.

Whilst the Inter-American Telecommunication Commission, CITEL, may adopt this
proposal, our regional telecommunications organisation, CEPT, is moving toward
a European Common Proposal for 5,060-5,160kHz.

Macquarie Island DXpedition DXCC credit approved

ARRL DXCC Manager reports that the current VK0KEV DXpedition to
Macquarie Island has been approved for DXCC credit.

If you have cards that were recently rejected for this operation, send an e-mail
to the ARRL DXCC Desk. Once your record is updated, results will appear in
Logbook of The World accounts or in the live, daily DXCC Standings.

Emergency Services AR DX Group

A new amateur radio group has been formed for radio amateurs who are also members of one of the emergency services.

The group will initially be coordinated via Facebook. It is open to retired or serving members of any of the emergency services and is free to join. Simply search for Emergency Services Amateur Radio DX Group on Facebook and sign up.

SIX Meter Repeater VK3RDD

The Gippsland Gate Radio and Electronics Club are currently overhauling their 6 m repeater VK3RDD located at Cockatoo. Albert VK3BQO and Geoff VK3ZGW have spent considerable time and effort designing a new repeater controller to replace the existing one..

The new controller can be adapted to fit into any new or existing repeater installation regardless of frequency.

This will be a major rebuild of VK3RDD which has been operating for many years of reliable service until recent times.

Upgraded Tx/Rx equipment will also be included.

They expect their repeater to be back in operation in approx. 4 weeks and apologize to regular users for this essential outage.

Please direct any enquiries / comments to secretary@ggrec.org.au

Morse celebrations

Members of the Japan A1 Club will activate the following special callsign until December 31st:

8J1MORSE, 8J1MORSE/2, 8J1MORSE/3 etc,
according to the district from which they are active from. Activity is to celebrate 220th anniversary of Samuel Morse's birthday.

Operations will be mainly CW, with some SSB (to explain the novices how to join the CW community). Some special awards are also available too.

QSL by the Bureau

Logs will be uploaded to LoTW as well.

For more details, the English rules and information are available at:
http://8j1morse.a1tokai.net

Ethiopian Amateur Radio Society gets back on the air

The Ethiopian Amateur Radio Society (EARS) club station,
ET3AA, is once again active and on the air as of May 30th.

According to the IARU Region 1 Web page Professor Doctor
Heiko Schroeder, Head of the Technical Faculty of the University of Addis Ababa
and Hans Blondeel Timmerman, President of IARU Region 1 cut the ribbon" to
reopen the new shack.

The station has a 17 element 6-30 MHz log-periodic antenna.

To read the complete story, go to: http://www.iaru-r1.org

(southgate)

NEW RUSSIAN PREFIX SYSTEM IN USE

If you have been on the HF bands lately, you may have noticed that a number of
new prefixes are in use by stations in the Russian Federation.

The ARRL have issued a summary of the changes recently adopted by the Russian
telecommunication authorities.

Russian prefixes with the numeral 2 are no longer limited to Kaliningradsk.
Stations with RA2 and UA2-UI2 (with F and K as the first letter in the suffix)
are in Kaliningradsk; otherwise, these prefixes will used in European Russia.

Stations in European Russia:
R1, RA1-RZ1 (except RI1 as noted below), R2, RB2-RZ2, R3-R7, RA3-RZ7, UA1
and UA3-UI7. Also, stations with the prefixes R8, R9, RA8-RZ9 and
UA8-UI9 (with F, S, T, W or X as the first letter in the suffix) are in

European Russia.
Except for those listed above, all stations with 8, 9 and 0 as the
numeral are in Asiatic Russia.

Russian Antarctic stations use temporary call signs in the series
RI1ANA-RI1ANZ and RI00ANT to RI99ANT.

Franz Jozef Land stations use temporary call signs RI1F, RI1FJ and
RI1FJA-RI1FJZ.

Malyj Visotskij island stations use temporary call signs RI1M, RI1MV
and RI1MVA-RI1MVZ.

All very complicated, so again we suggest you visit at least wia.org.au
and read the summary in this weeks text edition of wia national news.

MEDIA WATCH
www.cq-amateur-radio.com/WorldRadio.html
VK Club Bulletins http://groups.yahoo.com/group/aarnie/

John VK5NX who conducted last weekends 40 meter broadcast of this news from Adelaide had 32 call-backs!

" Well what a blast, I had Stations call in from
VK 1--1, VK2 -- 4, VK3 -- 8, VK4 -- 1,
VK 5-16, VK6 -- 1, VK7 -- 1,
in all a Total of 32 Stations, I figure that is a reasonable score for
40m relay for Sunday 12th June. Best 73 John VK5NX ...!!!..."

Ham Radio in New York Times Podcast

Amateur Radio features in a technology Podcast produced by the New York Times.

In the Podcast, Walt Baranger talks about Amateur Radio, which he describes as a breeding ground for new engineers.

The Amateur Radio item occurs about a third of the way through the show, listen to it at

http://podcasts.nytimes.com/podcasts/2011/06/01/technology/personaltech/02techtalk_pod/02techtalk.mp3

New York TimesTech Talk
http://www.nytimes.com/ref/technology/techtalk.html

(southgate)

Let us have a look inside Amateur Radio magazine

The July edition of the WIA journal is jam-packed with interesting articles including coverage of the recent annual convention held in Darwin.

The technical items include a review of the Icom IC-9100 transceiver by Michael Coleman VK3KH and Peter Freeman VK3PF, more of that magnetic loop by Jim Tregellas VK5JST and a six metre conversion of the PRM80 from Matt Bilston VK3VS.

In a fitting tribute the late Neil Penfold VK6NE silent key discusses the ins and outs of QSLing.

A "Gs" visit to VK from the findings of Ian Hollingesbee G3TDT slash VK3BIH makes an interesting read.

The Publications Committee reports that it is low on suitable articles and front cover photographs and invites contributions for both.
Amateur Radio magazine, a WIA membership service and available at selected news agents.

I'm Barry Robinson VK3PV and you are listening to VK1WIA.

WW SPECIAL INTEREST GROUP --- MILITARY

Revolutionary military antenna approach unveiled

Eleven years of development have finally paid off for Fractal Antenna Systems, Inc.

The firm announced that it has perfected a new wideband antenna approach based upon its proprietary fractal technology. The new approach, dubbed 'dissimulation (tm) antennas', is designed to solve the problems encountered with real antennas in the warfighter's environment.

The modern warfighter needs wideband antennas. Previous efforts that are now in use, are highly restricted by their size, component complexity, weight, power handling, and heat dissipation, as well as frequency coverage.

One key advantage to the dissimulation(tm) antenna approach is the deceptiveness of their appearance relative to their performance matrix.
"Good luck eyeballing one of these antennas and guessing what they are being used for or how well they work. Most can hardly be recognized as being antennas.

The dissimulation (tm) antenna line is sold to US Gov't, DOD, and NATO nations only.

WW SPECIAL INTEREST GROUPS --- Internet Linking of Repeaters

IRLP turns 10 in VK3

VK3's first IRLP node turned 10 years old on the 11 June 2011.
Ten years ago Tony VK3JED and myself David VK3JDA were talking on air about this new system, IRLP that Tony had seen in Sydney.

In about 10 minutes on air we had donations of a PC, Radio and money for the Controller board. Node 630 started is life on VK3RGL 2 meter repeater and now Node 6300 lives on the MDRC's 70cm repeater VK3RMC.

(David VK3JDA)

REWIND

Percy Roberts, Vk6XR, was back in 1961 among a group of Katanning Hams who took part in the 24 hour Remembrance Day Contest.

Now some 50 later Percy's Great Grandson VK6FAME is set to follow in his footsteps!

Davis Burke is VK6FAME, he obtained his license in January this year, at the age of 10 years and one month. (Is he the youngest in VK6? That'd be interesting to find out). He'll be contesting in the RD contest from Perth.

His great grandfather, Percy (Robbie) Roberts, VK6XR, was a 'Rat of Tobruk' in the war in 1941, who held his ham license for approx. 60 years, after being a comms officer in the war. Robbie passed away 6 years ago.

Unfortunately, Robbie never saw either David or David's Dad Miles get their calls.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts,
please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelyhood of it being
broadcast in the very next edition of WIA National News.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

RAC Bulletin 2011-014E ARES ID Cards.
2011-06-16

Good morning,

Many of you have been waiting for your new/updated ARES ID cards for some time now. A couple of days ago, driven by your inquiries and the sense that I had seen no mail from Industrial Plastics, our supplier, I followed up with a phone call. Apparantly the owner, Brian Ewin had fallen ill and had been hospitalized which meant closing the business in his absence.

Brian is back and feeling himself, and this past Monday completed all back logged items and a bunch of cards are enroute to me. I will expidite them upon arrival. Brian sends his sincere apology to you all. Unfounately the manner in which he feel ill made it impossible for him to gives us a heads up. Thanks for your understandng!

Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

** Silent Key: Pierre Pasteur: HB9QQ **

I am very sad to inform you that Pierre, HB9QQ became silent key a few
days ago. Pierre was one of the pioneers on VHF DX in Europe. He was
QRV on Tropo, MS, ES, FAI, Airplainscatter and of course moonbounce.
In the early 80ï¿½s he published an exellent book about 144 DX. His
favorite band was 144 for many decades. In his later years he became
QRV 50 MHz and enjoyed it very much there too. He was QRV through-out
the years on 144 and 50 MHz EME.Pierre was a gentleman and a great
friend. He teachd so many of us how to DX on 144. His perfect CW-
keying and his voice making QSOs in several European languages will
never be forgotten. He was a great operator and at the same time a
passionate mechanic.I knew Pierre since 1979, when I got my VHF
license. In his late years we became friends and spent many hours
talking about EME. Pierre did activate 8Q7 many times on HF and on
50 MHz (teresstrial only). He asked me about joyining forces to
activate 8Q7 on 50 MHz EME. I imediately ï¿½caught fireï¿½ and added 144,
432 and 1296 to the effort. We prepared togeather the DXpedition for
a little more than one year. Pierre did a phantastic job putting
togeather all equipment we needed. In early 2010 we set-up the
station in a snow-storm at below 10ï¿½C dreaming to do it again at 30ï¿½C
in the white snow in 8Q7. He was somuch looking forward to it. It was
a great experience for all of us to put 8Q7QQ on the moon on 50, 144,
432 and 1296! Pierre said several times to me, ï¿½that will be my
biggest and last DXpeditionï¿½... Yes Pierre, you were right! Many thanks
for all you did for the VHF-community and your friends all over the
world! I and we all will keep your memories in our hearts! Rest in
peace! Dan, HB9CRQ for the 8Q7QQ-team and the HB9Q-team

The Team of MMMonVHF will pass our deep sympathy and condolences
to Pierres family. Rest in peace, Pierre! SOURCE: The MMMonVHF Team

---

** Silent Key: Cor Maas: VE7BBG **

Hello to all What a sad loss. I used to work Cor back in the 80s and
we often worked cross band EME from 432 to 1296. He came up with the
original W2IMU 1296 feed in the center of the 432 dual dipole array
and suggested early on to place the groundplane of the 432 feed about
a quarter wave (at 1296) behind the mouth of the W2IMU for 1296 which
significantly improved operation on 1296. I copied Cor's original dual
band feed years ago and it worked well for nearly 20 years. This is
the same feed that VK3UM wrote up several years ago in Dubus. Cor
deserves the original credit for this one. May he rest in piece. 73
SOURCE: Al Ward W5LUA via MoonNet
The Team of MMMonVHF will pass our deep sympathy and condolences
to his family. Rest in peace, Cor! SOURCE: The MMMonVHF Team

** F/M5AEF IN98op qrv HF and 50 MHz **

Robin M5AEF, writes; F/M5AEF IN98op Robin will again be perating QRP from Normandy (dept 50) 14-19th June. This operation co-incides nicely with the IARU region 1 contest! QRV daily on 50 MHz USB/CW above 50.200. Also JT6M and WSPR modes are available. QSL is via buro and LOTW. SOURCE: CQ Six - 50 MHz DX News #20110614

** Nauru (OC-031 / WWLoc RI39) back on the air end of the Year **

NJ7N, NL8F, VK4AN, VK4FW and two more operators will be active as C21AA from Nauru (OC-031) from 10 November to 6 December. They will operate SSB, CW, RTTY and PSK31 on 160-6 metres, with three complete stations on the HF bands as well as a dedicated 6m station. QSL via VK4FW - direct, bureau or through OQRS (instructions at www.vk4fw.com/oqrs.php). The website for the expedition can be found at http://c21.pacific-dxers.com/C21AA.html SOURCE: 425 DX News #1049

** Special event station GB0BON qrv HF to 70 cm **

GB0BON will be activated by the Welland Valley Amateur Radio Society on 19th June 2011 for the 366th anniversary of the Battle of Naseby, the decisive battle of the English civil war. The battle took place

on the 14th June 1645 in the small hamlet of Naseby just south of the town of Market Harborough in Leicestershire. The station will be located on a high point that overlooks the battlefield. This is the same location that Prince Rupert chose as his base to direct the battle from as it gave him a clear viev of the surrounding area. They will operate on all bands from 3.5Mhz to 70cm and try to be on air for as long as the petrol in the generator lasts. QSL's are 100% via eQSL and we will reply to any cards sent direct via G4XEX or via the RSGB bureau. For direct please send IRC's or 2 US$ and a sae. (UK SAE). SOURCE: [G4XEX] via ICPO Bulletin (10-17 June 2011)

** Possible K7BV ID-UT-MT Grid Trip **

Having returned ashore from a challenging but reasonably successful CM93 boat trip with Barry KS7DX that gave us the honor of working 16 of the 22 Leader Board stations needing this grid, I find myself wondering "Now what?" I am considering a trip up to the Glacier-Waterton International Hamfest July 15-17. My primary grid focus would be to the much needed DN58 for a couple days. I would expect to have my usual 3el and KW - 6m only. Other stops should be possible so I am asking for suggestions. The obvious route is up from So.Cal through Las Vegas, Salt Lake, and on up into Idaho and Montana to DN58 and then over to Glacier Hamfest in DN38 Is this date too late in the year for burning the gas to try and activate some of the rare grids along and near the drive route? Comments to k7bv at aol.com, please. Thanks! 73 SOURCE: Dennis K7BV via WSJT Reflector

---

** Benin, TY **

The rumour says, there will be an operation from Benin on 6 meter, during a week in mid August...

** DEADLINE for your NEWS input to MMMonVHF**

... for your News (pse use: http://www.mmmonvhf.de/newsuser.php) to the next MMMonVHF Newsletter will be next wednesday 2359 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USER of the VHF-DX-Portal MMMonVHF and as well by a lot of free usable HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USER who did send us info and News **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/kontact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

==> +: THE 2011 ARRL NATIONAL CONVENTION VENTURES DEEP IN THE HEART OF
TEXAS

The ARRL National Convention -- held in conjunction with Ham-Com in
Plano, Texas June 10-11 -- featured the ARRL EXPO, a large exhibition
area within the main exhibit hall. The ARRL EXPO featured a project
building activity and the ARRL Youth Lounge, while booths highlighting
various ARRL departments and programs such as Education & Technology,
Emergency Communications, Radiosport, ARRL VEC, ARRL Equipment and Club
Liability Insurance Programs, Regulatory and Legislative Programs, ARRL
Development and the ARRL Foundation were on hand. The exhibit area was
anchored on one side by a huge ARRL store where attendees could browse
```

and buy the latest ARRL publications, join or renew their League membership. ARRL EXPO was supported by a team of 73 ARRL volunteers, officials and staff. Read more here <http://www.arrl.org/news/the-arrl-national-convention-ventures-deep-in-the-heart-of-texas>.

==> + 2011 DAYTON HAMVENTION: CHECK OUT THE NEW PRODUCTS THAT DEBUTED AT DAYTON

One of the most exciting things at the Dayton Hamvention each year is the introduction of new products. This year was no exception. From HF transceivers to receivers to test equipment to station equipment, there was a plethora of new products just about everywhere you turned. Read more here <http://www.arrl.org/news/new-products-at-dayton-2011>.

==> + NEW ONLINE INTRODUCTORY EMERGENCY COMMUNICATIONS CLASS NOW AVAILABLE

Registration is now open for the new online Introduction to Emergency Communications course (EC-001). Course information, including a description, pre-requisites and instructions on how to register are available on the ARRL website. Slots are still available for the section which begins Friday, July 29; the registration deadline is Sunday, July 17. ARRL Education Services Manager Debra Johnson, K1DMJ, explained that she is also looking for qualified volunteers to provide support as Mentors for the course, as well as Field Instructors who want to lead classroom sessions to instruct the course material.

The new Introduction to Emergency Communications course includes updated content from the previous Basic Emergency Communications Level 1 course, as well as some content previously included in the former Level 2 course. The EmComm training program has been restructured to offer two courses: This enhanced basic course for EmComm volunteers who want to serve as part of an ARES® response team and the management course -- Public Service and Emergency Communication Management for Radio Amateurs (EC-016) -- for those who are serving in ARES® leadership and management roles. Read more here <http://www.arrl.org/news/new-online-introductory-emergency-communications-course-now-available>.

==> + ARRL FIELD DAY: IT'S NOT TOO LATE TO PREPARE FOR FIELD DAY

Now is the time to start getting information out to the public about your ARRL Field Day <http://www.arrl.org/fieldday> activities. ARRL Field Day -- the largest on-the-air operating event -- is the one of the best opportunities of the year for showing our Amateur Radio capabilities to the public. ARRL Media and Public Information Manager Allen Pitts, W1AGP, notes that the ARRL has made many media materials available for local use. "Our visibility to the public is important in antenna, band preservation and texting issues, so we encourage you to use this opportunity to showcase what Amateur Radio can do," he said. Download an audio PSA that can air on your local radio stations here

<http://www.arrl.org/public-service-announcements>. Get a press release, a government proclamation template and invitation letters that you can use to invite your local officials to your Field Day site here <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_PR_info.pdf>. Find high-definition video files suitable for airing on your local television stations here <http://p1k.arrl.org/pub/pr/>. Get more information on ARRL Field Day, including the 2011 ARRL Field Day logo and operating tips here. More info, the logo and tips are here <http://www.arrl.org/current-contact-issue>. Find a Field Day station near you here <http://www.arrl.org/field-day-locator>. ARRL Field Day is June 25-26.

==> + EMCOMM NEWS: ARRL'S EMERGENCY COMMUNICATIONS ADVISORY COMMITTEE MOVES FORWARD WITH MDEC PLANS

At the 2007 Annual Meeting of the ARRL Board of Directors, the ARRL National Emergency Response Planning Committee -- led by then-ARRL First Vice President Kay Craigie, N3KN -- presented a report to the Board that outlined how the League should respond to emergencies. One of the key concepts proposed by the committee was the Major Disaster Emergency Coordinator (MDEC) appointment. The idea was to have a manager who would coordinate Amateur Radio operations, operators and resources in supporting served agencies during a major disaster relief operation when Section and Regional ARES® assets are overwhelmed, similar to operations performed in the Hurricane Katrina response. The MDEC's line of authority would be derived from the ARRL's Emergency Preparedness Manager -- currently Mike Corey, W5MPC -- and would parallel the affected area's Section Managers. The MDEC position was envisioned to be a continuous appointment, but would only be active when called upon by the Emergency Preparedness Manager.

The ARRL Emergency Communications Advisory Committee (ECAC) -- established at the 2010 Annual Meeting -- is currently drafting appointment protocols and requirements for the MDEC. As presently conceived by the committee, there will be several MDECs geographically arranged by each ARRL Division. The geography, and hence the actual MDEC headcount, is being determined at this time. The committee will report its recommendations and draft appointment guidelines to the ARRL's Programs and Services Committee. Read more here <http://www.arrl.org/news/arrl-s-emergency-communications-advisory-committee-moves-forward-with-mdec-plans>.

==> + ARRL HQ NEWS: LONGTIME HQ STAFFER JON BLOOM, KE3Z, LEAVES ARRL

May 31 marked the last day at ARRL HQ for ARRL Information Technology Manager Jon Bloom, KE3Z. Bloom -- an ARRL Life Member who had been with the League for 27 years -- resigned from the League to pursue other opportunities. Michael Keane, K1MK -- hired in 2009 as a programmer in the IT Department -- has been selected as the new Information Technology Manager. Read more here <http://www.arrl.org/news/longtime-hq-staffer-jon-bloom-ke3z-leaves-arrl>.

==> SUPPORT ARRL: ARRL AND COMBINED FEDERAL CAMPAIGN MARK DECADE OF PARTNERSHIP

For the past 10 years, the US Office of Personnel Management has designated the ARRL to participate in the Combined Federal Campaign (CFC <http://www.opm.gov/cfc/>). In that time, this campaign for federal government civilian employees, US Postal Service workers and members of the military has generated more than $170,000 for ARRL programs since it first became an option for giving by federal employees to the League. The CFC provides an easy way to support ARRL's effort to represent its members and all radio amateurs.

Similar to the United Way, the CFC encourages individuals to pledge by payroll deduction to non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching ARRL's ability to serve its members and all of Amateur Radio. Those wishing to select the ARRL to receive all or part of their payroll deductions should designate organization 10099 when completing their CFC donor forms. Donations to ARRL can be designated for Diamond Club contributions, the ARRL Spectrum Defense Fund or the ARRL Education & Technology Program. Donors may also make unrestricted contributions to the League.

One important note: Since the CFC does not provide the ARRL with the names of individual donors, the ARRL Development Office would appreciate a copy of the donor form to ensure that each contribution is applied according to the donor's wishes and the contribution or pledge can be properly acknowledged.

==> SOLAR UPDATE

Tad "The damp of the river fog rises after the Sun goes down <http://poetry.eserver.org/paul-revere.html>" Cook, K7RA, reports: The average daily sunspot numbers for the past week declined by more than half, nearly 52 points to 35.1, when compared to the previous week. The average daily solar flux declined nearly 12 points to 90.1. NOAA and the USAF predict rising solar flux for the near term, with solar flux at 105 on June 16-20 to 110 on June 21-22, and then dipping below 100 after June 28. Predicted solar flux for ARRL Field Day weekend is 105 on June 24-26. The predicted planetary A index for June 16-25 is 5, 7, 8, 5, 8, 8, 5, 12, 15 and 10, followed by 5 on each day through the end of June. It seems that a recurring coronal hole may disturb our Earth's geomagnetic field, with the maximum effect on June 24 -- the day before Field Day -- but geomagnetic conditions should be very quiet by Sunday, June 26. Our inbox is exploding this week with all the e-mail concerning the meeting of the Solar Physics Division of the American Astronomical Society at New Mexico State University in Las Cruces, and the report from the meeting about predictions for a major drop in solar activity, which you can read here <http://www.boulder.swri.edu/%7Edeforest/SPD-sunspot-release/>. But

support for this position isn't unanimous, and in tomorrow's bulletin we'll look at a report by astrophysicist Douglas Biesecker that is skeptical of this prediction. Look for more information on the ARRL website on Friday, June 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Henry Wadsworth Longfellow's Paul Revere's Ride <http://poetry.eserver.org/paul-revere.html>, in celebration of Battle of Bunker Hill <http://en.wikipedia.org/wiki/Battle_of_Bunker_Hill> (June 17, 1775).

==> + LOGBOOK OF THE WORLD NOW ON FACEBOOK!

Last week, the ARRL added a Logbook of The World page <http://www.facebook.com/LogbookOfTheWorld> to social networking site Facebook. With almost 300 fans, the page is growing every day. The LoTW page on Facebook offers the latest LoTW news, as well as comments from users. Have you checked out the ARRL Facebook page <http://www.facebook.com/ARRL.org> lately? With almost 18,000 fans, it's the most popular Amateur Radio page on Facebook!

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Do you own a D-STAR or APCO-25 transceiver?
- When it comes to QSL cards, do you buy from a printer or make your own?
- Have you ever built a kit that included Surface Mount Devices (SMDs)?
- When was the last time you used Amateur Radio to assist a non-emergency public service event (such as a footrace or parade)?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the September 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- June 17 -- NCCC Sprint Ladder
- June 18 -- Feld Hell Sprint; AGCW VHF/UHF Contest
- June 18-19 -- West Virginia QSO Party; Stew Perry Topband Challenge; All Asian DX Contest (CW); SMIRK Contest
- June 19 -- WAB 50 MHz Phone Contest
- June 20 -- Run for the Bacon QRP Contest

- June 22 -- SKCC Sprint; NAQCC Straight Key/Bug Sprint
- June 22-23 -- CWops Mini-CWT Test

Next week:

- June 24 -- NCCC Sprint Ladder
- June 25 -- VK/Trans-Tasman 160 Meter Contest (Phone)
- June 25-26 -- ARRL Field Day <http://www.arrl.org/fieldday>;
Ukrainian DX DIGI Contest; His Majesty King of Spain Contest (SSB);
Marconi Memorial HF Contest; ARCI Milliwatt Field Day

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- July 2 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecra
cker-hamfest-1>,
Marysville, Pennsylvania
- July 15-17 -- ARRL Montana State Convention

Amateur Radio Newsline(tm) Report 1766 - June 17 2011

Amateur Radio Newsline report number 1766 with a release date of
Friday, June 17, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Scientists say that we may be headed to a
prolonged low in solar activity, hams in Norway provide flood relief
communications, the first ever national E-A-S test to be held in
November, a New Orleans C-B operator faces a $15,000 fine and the FCC
gets a Harvard scholar. Find out the details are on Amateur Radio
Newsline(tm) report number 1766 coming your way right now.

PROPAGATION: SCIENTISTS SAY SOLAR CYCLE HEADED INTO LIMBO

For years, astronomers and space scientists have been predicting the
Sun would move into solar maximum by around 2012. During this period
there would be many intense flares and lots of sunspot activity. Now
they are thinking that the opposite may be happening and Amateur Radio
Newsline's Michael Grebert, KJ4ZZV, has the details:

--

According to three studies released in the United States on Tuesday,
June 14th, experts believe the familiar sunspot cycle may be shutting
down and heading toward a pattern of inactivity unseen since the 17th
century.

According to experts from the National Solar Observatory and Air Force
Research Laboratory, the signs of this include a missing jet stream,
quickly fading spots, and slower activity near the poles.

Frank Hill is the Associate Director of the National Solar Observatory
's Solar Synoptic Network. At a meeting of the American Astronomical
Society's Solar Physics Division in Las Cruces, New Mexico Hill said
that the fact that three completely different views of the Sun point in
the same direction is a powerful indicator that the sunspot cycle may
be going into hibernation.

As every ham knows, solar activity tends to rise and fall in 11 year
cycles. The solar maximum and solar minimum each mark about half the
interval of the magnetic pole reversal on the Sun, which happens every
22 years.

According to Hill, the current cycle, number 24, may be the last normal one for some time but the next one, cycle 25, may not happen for some time. He adds that this is important because the solar cycle causes space weather which affects modern technology and may contribute to climate change.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

--

Experts are now probing whether this period of inactivity could be a second Maunder Minimum. This was a 70-year period from 1645 to 1715 when hardly any sunspots were observed. For ham radio such a prolonged solar minimum would mean very little in the way of High Frequency DX for a very long time. The complete article titled Scientists Predict Rare Hibernation of Sunspots can be found using the shortcut of tinyurl.com/slowsun (Space.com, Yahoo News, others)

**

RESCUE RADIO: NORWEGIAN HAMS PROVIDE FLOOD COMMUNICATIONS

Norway's national amateur radio society, the NRRL, reports that radio amateurs have been providing communications assistance following recent flooding in that nation.

The NRRL says that as a result of the flooding and landslides in Oppland and Hedmark, the telecoms company Telenor has had substantial problems with its mobile phone network. Because of the outages the Main Rescue Coordination Centre for Southern Norway has requested assistance from NRRL.

Communications were set up between southern Norway and Lillehammer. Repeaters around Oslo have also been used. More about the situation in Google translated English is on the web at tinyurl.com/NorwayNRRL. (Southgate)

**

RESCUE RADIO: GAREC 2011 REGISTRATION CLOSES JUNE 19th

The organizers of the International Amateur Radio Union Region 1 General Conference have announced that registrations for the 2011 Global Amateur Radio Emergency Conference in Sun City, South Africa must close on June 19th. This, if accommodations are to be guaranteed.

Planners say that payment for accommodations and conference fees must arrive to them no later than June 30th. They ask that those registering to attend to please ensure that your callsign, association and name are in the payment documents sent by your bank.

More information about the event and registration documents are available at tinyurl.com/garec2011. Information from earlier conferences is available at www (dot) iaru (dot) org/emergency. (GAREC)

**

RESCUE RADIO: FIRST EVER NATIONWIDE TEST OF THE EMERGENCY ALERT SYSTEM WILL OCCUR ON NOVEMBER 9, 2011 AT 2 PM EST

Back in the United States, the FCC has set November 9th at 2 PM Eastern Standard Time that the first nationwide test of the Emergency Activation or EAS System. The purpose of the test is to assess the reliability and effectiveness of the EAS as a mechanism to alert the public of emergencies.

Although EAS Participants currently take part in state-level monthly tests and local-level weekly tests, there has never been a nationwide test of the system. The Commission, along with the Federal Emergency Management Agency, will use the results of this test to assess what works within the EAS and what does not. Then working together with EAS stakeholders the two agencies say that they will make improvements to the system as appropriate. (FCC)

**

RADIO HEALTH FOLLOW-UP: CTIA SAYS WHO CELLPHONE CANCER STUDY FLAWED

The Cellular Telecommunications and Internet Association, better known as the CTIA has ripped into a recent United Nations' report that claims cellphones can cause cancer.

As reported here on Amateur Radio Newsline two weeks ago, a United Nations agency known as the World Health Organization issued a report stating that radiation from cellular telephones can possibly cause cancer. It said that based on the U.N.'s International Agency for Research on Cancer working group, and in reviewing peer-reviewed studies, that it found some evidence of an increase in Glioma and acoustic Neuroma brain cancers among mobile phone users. As such, the agency now lists mobile phone as a carcinogenic hazard.

Now the CTIA has issued a broad based rebuttal that begins by quoting previous studies by the Federal Communications Commission that concluded there is no scientific evidence that proves that wireless phone usage can lead to any form of cancer. The cellular lobby group also quoted the Food and Drug Administration as stating that the weight of scientific evidence has not linked cellular phones with any health problems.

In its rebuttal barrage, the Cellular Telecommunications and Internet Association also pointed out that the World Health Organization made no effort to conduct its own scientific study of cellular telephone use. Instead, it only reviewed previous studies made by other investigators over the years in reaching its conclusion.

Before its announcement on Tuesday, May 31st the World Health Organization had assured consumers that no adverse health effects from cellular telephones had been established. Now the WHO and the CTIA are on opposite sides of a public relations battle over the still unknown

effects of cellular telephone radiation effects on the human body. A battle that is bound to intensify in coming years. (Published news reports)

ENFORCEMENT: NEW ORLEANS CB'ER ISSUSED $15,000 NOTICE OF APPARENT LIABILITY FOR OVER POWER OPERATION

The FCC has issued a $15,000 Notice of Apparent Liability to Monetary Forfeiture against John Hays of New Orleans. This for operating an over power Class D Citizens Radio transmitter that the regulatory agency says constitutes operating a radio transmitter without the requisite Commission authorization. We have more in this report:

--

The case dates way back to November 29th 2007. In response to a complaint of interference, the Enforcement Bureau's New Orleans Office warned Mr. Hays in writing of the penalties associated with operating his CB radio with excessive power.

On December 3, 2007, Hays responded to the New Orleans Office by telephone. At that time he is said to have admitted to overpower operation, and was again warned orally to cease any operation of his CB station that violated the Rules.

Fast forward to June 3, 2010. In response to another complaint of interference, agents from the New Orleans Office traced the source of the interference to a signal on CB channel 20 emanating from Mr. Hays's residence. The same day, the agents inspected the CB station and observed a linear amplifier attached to Mr. Hays' CB transmitter. The agents, using a wattmeter, measured the output power of the CB station with the in-line linear amplifier at 750 watts. The agents then orally warned Mr. Hays that the use of linear amplifiers or any device that results in power levels greater than the authorized limit of 4 watts is prohibited and voids the authority to operate the CB station. Mr. Hays admitted to the agents that he operated his CB station overpower, and, at the conclusion of the inspection, Mr. Hays voluntarily destroyed his linear amplifier.

You would think that it would have ended there, but it didn't. This past February 10th, in response to another complaint of interference, agents from the New Orleans Office used direction-finding techniques to

again identify a signal on CB channel 20 as once again coming from Hays' residence. The same day, the agents inspected Hays CB station and observed a linear amplifier attached to Mr. Hays's CB transmitter. This time the agents measured the output power of the CB station with the in-line linear amplifier at 75 watts. And once again, Hays admitted to the agents that he was operating his CB overpower.

Now, the FCC has taken a strong punitive measure to see to it that Hays does not again violate its rules governing Part 95 Class D Citizens Radio operation. This by issuing him the a $15,000 Notice of Apparent Liability to Monetary Forfeiture for apparently and willfully violating section 301 of the Communications Act and sections 95.410 and 95.411 of the FCC's Citizens Radio Service rules. Specifically his use of an amplifier that raised the output of his transmitter to way above the 4 watts as permitted under the Part 95 Citizens Radio Service rules.

In Scottsdale, Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

Hays was given the customary 30 days to pay the forfeiture or to file an appeal. (FCC)

ENFORCEMENT UPDATE: FLORIDA UNLICENSED BROADCASTER FINED $20000

An update on an unlicensed radio case that we first reported here on Newsline. This with word from the FCC that a $20,000 Notice of Apparent Liability issued to Marckenson Bazile for operating an unlicensed station in Miami has progressed to a forfeiture order.

The FCC originally issued the Forfeiture Order against Brazile for operating an unlicensed station on 103.9 MHz from his home. In affirming the fine, the regulatory agency said that Bazile had not responded to its correspondence on the matter. Therefore, based on the evidence it had before it, that it had affirmed the $20,000 fine and issued a forfeiture order.

Bazile was given 30 days to pay or the FCC can turn the case over to the Justice Department for collection. (FCC)

RADIO LAW: FCC REESTABLISHES TECHNICAL ADVISORY COUNCIL BUT HAM RADIO NOT INCLUDED

The FCC has reestablished its Technology Advisory Council for a two-year period. The council, made up of various tech experts, will help give the commission expertise it needs to identify areas of innovation and develop policies to keep America competitive.

The initial assignment for the group is to focus on the broadband rollout. Specifically how broadband communications can help deliver and contain costs for healthcare, energy and environmental conservation. Other assignments may include the evolution of broadband networks and devices and their implications, spectrum management and how to promote innovation and investment.

The council chairman is Tom Wheeler, managing director, Core Capital Partners and a former Chief Executive Officer of the Cellular Telecommunications and Internet Association. Representatives from several organizations like Google, MIT, Intel, Microsoft, Harris Broadcast are on the council. Also serving are representatives of trade associations such as the Consumer Electronics Association and the National Association of Broadcasters.

To our knowledge no individual or group directly representing the interests of amateur radio has been invited to serve on the panel. This, even though the recommendations it makes could eventually impact on the spectrum utilized by radio amateurs.

The group's next meeting is slated for June 29th. (RW)

EMERGING TECHNOLOGY: GPS VS LIGHTSQUARED - CHAPTER 2

The war of words between LightSquared Corportation over its proposed high power national 4 G network and those who use the Global Positioning System has escalated. This as the lobbying group known as the Coalition to Save Our GPS says that recent tests in New Mexico prove conclusively the operation of LightSquared system proved detrimental to G-P-S.

James Kirkland is Vice President of Trimble Navigation and a founding member of the coalition. He says that test data discussed several days ago makes clear that there is substantial interference to GPS if LightSquared turns on high-powered terrestrial facilities in the spectrum next door to GPS.

During a meeting sponsored by the federal government's GPS Advisory Board, Kirkland, along with government representatives and LightSquared representatives discussed the results of two separate tests conducted to measure interference to GPS receivers used in aviation and other government applications. Kirkland said the testing data confirms what the industry told the FCC and also confirms that there is no viable technical fix.

Kirkland contended that in at least one test LightSquared didn't deliver test equipment that matches its proposed operations, thus causing optimistic results. However, even those optimistic results showed interference.

Kirkland is quoted as saying that the FCC should stop trying to find a solution to an unfixable problem. Instead it should focus its efforts

on finding spectrum that LightSquared can operate in where its broadband system won't interfere with GPS.

LightSquared plans a satellite- and terrestrial-based 4G network to provide terrestrial- and satellite-based voice and data service on a wholesale basis to retailers, cable operators, and other companies that want to offer service under their own brand.

The Coalition to Save GPS is made up of companies in the aviation, agriculture, transportation, construction, engineering, and surveying industries as well as suppliers of GPS-based equipment and services. Hams who use GPS devices in both T-hunting and emergency communications also have a vested interest in the outcome of the final FCC decision on the LightSquared nationwide broadband system. (Published reports)

NAMES IN THE NEWS: HARVARD PROFESSOR JOINS FCC

The FCC now has a new distinguished scholar as a part of its staff. Harvard University law professor Jonathan Zittrain will be based in the FCC's Office of Strategic Planning and Policy Analysis and will work on issues related to modern communications networks. He succeeds Duke University law professor Stuart Benjamin, who was the commission's first Distinguished Scholar.

Professor Zittrain's research interests include issues related to digital property and content, cryptography, electronic privacy and the roles of intermediaries in the Internet's architecture. He's also a computer science professor at Harvard and a board member of the Internet Society; he is also on the board of advisors for Scientific American, a member of the Council on Foreign Relations and a forum fellow of the World Economic Forum. Previously, Zittrain was professor of internet governance and regulation at Oxford University. The professor will continue to teach at Harvard while working at the FCC. (FCC, RW)

**

NAMES IN THE NEWS: ZL3DWS NAMED NEW ZEALAND AMATEUR OF THE YEAR

And a hearty congratulations to David Searle ZL3DWS who has been named to receive New Zealand's Amateur of the Year Award. This in acknowledgement of the tremendous results he achieved in his Buildathon projects.

David recently moved from Christchurch to Bondi, Australia. Speaking from Australia's 2nd favorite beach, David said that he was greatly surprised, yet proud, to learn that he had become N-Z-A-R-T Amateur of the Year. He adds that his pride is in the fact that the award acknowledges the success achieved by so many Canterbury radio amateurs and beyond, with the Zed-L-3 Radio Buildathon project. (NZART)

HAM RADIO PUBLIC RELATIONS: PROMOTING ARRL FIELD DAY 2011

The ARRL has released a new press kit along with a set of two new Public Service Announcements to publicize Field Day, 2011. The press kit contains just about everything a club needs to publicize Field Day and its own operations. But it's the Public Service Announcements that will likely get the most attention if you are willing to download them, burn them to C-D's and drop off copies at your local radio stations.

What do they sound like? Heres one of them. Take a listen:

--

Actual PSA (less music track) - Please download our newscast MP3 audio file to hear it.

--

Yes that's Don Carlson, KQ6FM, whose voice you regularly here on Amateur Radio Newsline. But this week Don is in another role as spokesman for the upcoming ARRL Field Day event. To get a copy of the new Field Day promotional spots that Don has created please take your web browser to tinyurl.com/fielddaypsa and download the audio file marked Field Day 2011. The complete ARRL Field Day press kit itself is at tinyurl.com/fielddaypress. (ARRL, audio supplied by KQ6FM)

HAM RADIO IN SPACE: CORNELL UNIVERSITY SEEKS HAM RADIO ASSISTANCE IN SATURN MISSION PREPARATIONS

Ham radio has been invited to take part in the preparations for the upcoming exploration of the planet Saturn by remote satellites. This if a group of tiny Cornell University-developed satellites travel to the ringed planet sometime within the next decade.

The exploration will be done using tiny micro-sized chip satellites called Sprites. As they flutter down through Saturn's atmosphere, they will collect data about chemistry, radiation and particle impacts while transmitting as beacons with 10 milliwatts of RF power.

Tests of the Sprites is ongoing. Three prototypes of these chip satellites were mounted on the International Space Station after the space shuttle Endeavour delivered them on its final flight.

During testing of these micro sized birds, the help of radio amateurs is required. If you would like to serve as one of those trying detecting this signal from one of the Sprites, please follow up with Zac Manchester by e-mail to zrm3 (at) cornell (dot) edu. More information is on-line at tinyurl.com/3fs5ks7 and www.spacecraftresearch.com/blog (ANS)

**

WORLDBEAT: OPEN UNIVERSITY STUDENTS ASSN ARC - QRT

The Open University Students Association Amateur Radio Forum is going QRT. The decision to shut down was brought about by changes to the new virtual learning environment.

Over its life the forum has had many a world wide radio enthusiast who are students of the Open University call in to the forum. Founders hope that a new forum can eventually be created under the new Open University environment. (Southgate)

**

WORLDBEAT INTRUDER WATCH: ONE NEW AND ONE GONE ON 15 METERS

The May issue of the IARU Monitoring System newsletter reports that the Australian Over-The Horizon Radar has been heard in the 15 meter amateur band. On a more positive note the same issue of the newsletter reports that the The Russian Yakhta vocoder system has disappeared from its self ascribed home on 21 dot 0015 MHz. The complete newsletter can be read on-line in PDF format tinyurl.com/may2011iarums. (IARU)

**

DX

In DX, word that the 2011 Macquarie Island VK0KEV operation has been approved for DXCC credit. If you've had this operation rejected in a recent application please send a note to dxcc (at) arrl (dot) org. You can verify the update to your record either by checking your Logbook of the World account, or, you'll see a change in the live daily listing on the DXCC web site.

On the air, keep an ear open for EF8M operating from the Canary Islands during the RSGB Islands on the Air Contest on July 30th and the 31st as a Multi-Operator, All-Band, High-Power entry. Operators mentioned are RD3A, EA8CAC and UA5C. QSL via UA3DX.

W7GJ plans to be active from Samoa on a 6 meter E-M-E DXpedition during the final week of August. His callsign will be 5W0GJ and he says that his license and airline tickets are now in hand. QSL direct to W7GJ.

Lastly, PY2FN will be operational as PY0FO from Fernando de Noronha between July 2nd to the 9th. Activity will be on 160 through 6 meters on CW only. Logs will be uploaded to Logbook of the World. QSL via his home callsign, direct or by the bureau.

(Above from various DX news sources)

WITH NEWSLINE: WILL THERE BE A 2011 YHOTY WINNER?

And finally this week, a word about the 2011 Young Ham of the Year Award. Here's our producer, Bill Pasternak, WA6ITF:

--

While we find it rather sad to report, its beginning to look as if there may not be an Amateur Radio Newsline Young Ham of the Year Award made this year. The reason is that with only two weeks until the closing date of nominations, only one has been received and there is no way to know if the judging committee will consider it as being valid.

Unlike other award programs, the Amateur Radio Newsline Young Ham of the Year Award does not carry over past years nominations. As soon as a winner is announced all other nomination forms are discarded. Every year is a new year and requires a nominator to submit a new nominating form and associated documentation.

As I record this, only 7 forms have been downloaded from our website and only one of these has been returned. By contrast, in years past, by this time we have had hundreds of downloads and dozens of completed nominating packages returned for the judging committee to peruse.

What we cannot understand is why, with there supposedly now thousands of hams age 18 or younger, only one person has seen fit to take the time to nominate someone for this years award. And just because there is only one nomination does not mean that person will be selected. This is because a candidate must meet the criteria as set forth by the committee in regard to overall service to ham radio, the community or the nation.

Yes, we know it takes time and effort to put together a good nominating package, but in the end those are energies well spent. This is because each award winner is a kind of guarantee that the next generation of hams will help the hobby to prosper and to grow.

The bottom line is that the nominating period closes at midnight on June 30th. A valid nomination consists of a completed nomination form that you can download from our webaite at www dot arnewsline dot org along with substantiating documentation for any and all claims made on the nominating form. Incomplete nominating packages or those postmarked after midnight on June 30th will not be considered for the 2011 award program.

Whether or not there is an Amateur Radio Young Ham of the Year Award for 2011 is entirely in your hands. We and our corporate underwriters provide the presentation ceremony and provide the winner his or her gifts that include a week at Spacecamp along with transportation to and from the city of Huntsville, Alabama. Giving the Young Ham of the Year Awards Committee the necessary nominations and back-up documentation is

up to you.

All nominating packages must be postmarked no later than midnight local time on June 30th 2011 and should be sent to the Young Ham of the Year Award, in care of the Amateur Radio Newsline, 28197 Robin Avenue, Saugus, California 91350.

If you really care about the future of our hobby and making sure there will be a next generation of young hams to carry on, now is the time to prove it by taking the time to nominate a worthy youngster for this years Amateur Radio Newsline Young Ham of The Year Award.

I'm Bill Pasternak, WA6ITF.

--

As we watch the mailbox, the next two weeks will definitely determine whether or not there will be a Young Ham of the Year Young Ham of the Year Award presented this year.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, in central Florida saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 19th June 2011

The news headlines:

* Southern 80m news readings to end
* Near-vertical incidence skywave measurements published
* New Olympic radio information website

Last month an appeal was made on GB2RS for members to come forward as volunteer news readers for the South of England news readings on 3640kHz. Unfortunately no-one has come forward. The result is that the South East and South West readings at 0900 and the East Anglia reading at 0930 on 3640kHz will terminate next Sunday, 26 June. The RSGB takes this opportunity to thank the four retiring newsreaders involved, G3WDY, G3WUZ, G4NZQ and G4DYC, for their dedication to the news service over many years. G4NZQ will, however, be able to continue with the 2m evening news reading via the Norwich repeater. Listeners are reminded that they can find alternative news readings by accessing the RSGB Members' Only website, clicking on News and then selecting the Broadcast Schedule tab.

Dr Marcus Walden, G0IJZ, recently attended the 13th International Ionospheric Effects Symposium in Alexandria, USA. Marcus gave a presentation titled Comparison of Propagation Predictions and Measurements for Mid-Latitude HF NVIS Links at 5MHz. This compared near-vertical incidence skywave measurements from the UK 5MHz beacon network with HF propagation predictions using VOACAP and ASAPS software. Further information and a link to the paper can be found on the RSGB website at www.rsgb.org/spectrumforum/hf/5mhzintro.php. Marcus will also be at this year's RSGB Convention to give a presentation on NVIS frequency selection, the 5MHz beacon measurements and HF NVIS propagation predictions.

Further to the recent 70cm tests in support of the Olympic sailing at Weymouth & Portland, the RSGB has introduced a more permanent presence for Olympics news and information at www.rsgb.org/olympics. It is also linked from the Operating section of the RSGB website. Additional information will be added in due course as further details become available.

The West Yorkshire Repeater Group is going digital. Their new repeater, GB7HX, will go on air this morning, 19 June. The group were hoping to run GB3HD in parallel but because of delays in new frequency

allocations for GB7HX, they have opted to put the new digital repeater on the old HD frequencies for now, with a 1.6MHz split. This means that GB3HD will be temporarily off air, but the group aims to re-instate it once a new frequency pair has been allocated for GB7HX. The repeater will operate from the group's excellent site at Scapegoat Hill near Huddersfield and will provide good coverage of Huddersfield, Brighouse, Elland, Halifax and the M62 corridor from Junction 22 to 32 and beyond. The solution is Icom based with an Intel server for the internet gateway. The repeater is connected to the K5TIT trust environment. The group would like to thank the RSGB Emerging Technology Co-ordination Committee for all their help with this proposal. You can get more information from the repeater group's website at www.wyrg.org. And now for the details of rallies and events for the coming week

The Newbury Radio Rally and Boot Sale will take place on Sunday 19 June at the Newbury Showground, next to M4 J13. There will be a big display area of amateur radio stations, exhibitions, special groups, clubs and societies. There is free car parking, admission is £2 and doors open at 9am. Sellers have access from 8am and pitches cost £10. Details from rally@nadars.org.uk.

On Friday 24 June, from 6 to 9pm,The Radio Society of Harrow are holding a mini field day and picnic at Old Redding View Point Car park, Harrow Weald HA3 6SE. During the evening, some satellite operation is planned, although some expertise would be welcome in this area. All are welcome to attend.

The Hamtronic Show takes place in Friedrichshafen, Germany from 24 to 26 June. Several UK companies will be exhibiting and there will also be a large RSGB bookstall.

On 25 June an Amateur Radio Jumble will be held at Kilham Village Hall, near Driffield, East Yorks YO25 4RG. Doors open at 9.30am and entry is £1, which includes tea or coffee. Details from John, G3XYF on 01377 254441.

Next Sunday, 26 June, the West of England Radio Rally will be held in the Cheese & Grain, Bridge Street, Frome, Somerset BA11 1BE. There will trade stands and an RSGB bookstall. Contact Shaun, G8VPG, 01225 873 098.

Now for the news of special events

Reading and District Amateur Radio Club will be operating GB2MBA for Museums on the Air today, 19 June, at the Museum of Berkshire Aviation, Mohawk Way, Woodley.

Welland Valley Amateur Radio Society will put GB0BON on the air today, 19 June, to commemorate the 366th anniversary of the Battle of Naseby. The station will be located at Rupert's Viewpoint, just south of Market Harborough in Leicestershire, on the Clipston Road. Rupert's Viewpoint is one of the highest vantage points in the area.

Special event station GB4CVM will be active from 24 to 26 June. It will be operated by Mike, G4SMB, a member of the World Association of Christian Radio Amateurs and Listeners. Operating frequencies and times will run generally as per the net schedules shown on the WACRAL website, www.wacral.org. However, the station will be on the air at other times where activities permit. Mike invites everyone to call in and say hello if you can.

Central Lancs ARC will be activating Hoghton Tower on 26 June. This stately home, located in Preston, Lancashire has been the ancestral home of the De Hoghton family since William the Conqueror. For more details go to www.cashota.co.uk. And now the HF DX news compiled from 425 DX News and other sources

Several Greek amateurs plan to activate Kastri lighthouse on Othonoi Island, which is IOTA reference EU- 052, for the very first time until 26 June. Details at www.j48o.com. QSLs for J48O should be sent to SP2FPU either via the bureau or direct.

SD1B/5 plans to become active from Aspoja, which is IOTA reference EU-177, from 19 June until 1 July. QSL via DL8AAV.

K2EFG will be on the air from Fire Island, which is IOTA reference NA-026, on 20m and 40m until 23 June. QSL via K2EFG either via the bureau or direct.

A group of eight operators will be active as BY4QA/5 from Tantou Shan Island, which is IOPTA reference AS-137, from 30 June to 3 July. They will operate mainly SSB with some CW on the HF bands. QSL via BD4QK, direct or via the bureau.

Nigel, G3TXF plans to be active as ZD7XF on St Helena between 22 and 30 June. He will operate CW only, mainly on the HF bands, but he will also be taking antennas for 80 and 160 metres as well as for 6m. There will not be any Internet access in the shack; logs will be uploaded to both LoTW and ClubLog whenever practical. QSL via G3TXF.

Now the contest news

The biggest RSGB VHF event of the month is undoubtedly the 50MHz Trophy, which takes place for 24 hours this weekend, 18-19th June. There will be plenty of UK portables operating, some from rarely activated squares, so unless your locator map has all the squares coloured in there's likely to be potential for working some new ones. This event is often blessed with enhanced propagation for at least part of the time, so as well as the potential to work some new UK squares, some new Continental ones might also come your way. From 1400 to 1400UTC and using all modes the exchange is signal report, serial number and locator.

The Worked All Britain 50MHz phone contest takes place today, Sunday 19 June, from 0900 to 1500UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and logsheets may be obtained from the WAB website, www.worked-all-britain.co.uk, or from

the Contest Manager, G3XKT by e-mail to aebbooks@ntlworld.com.

The IRTS 80m Counties contest also takes place today, the 19th, from 1400 to 1700UTC. For those outside EI/GI, work EI and GI only. Send a report and serial number, and expect to receive the same plus County

The 1.3GHz UK Activity Contest takes place on 21 June from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

23 June sees the SSB leg of the 80m Club Championships take place from 1900 and 2030UTC. The exchange is signal report and serial number.

The fourth 70MHz Cumulative contest takes place on 26 June from 1400 to 1600UTC. The exchange is signal report, serial number and locator. And now the solar factual data for the period from the 6th to the 12th of June, compiled by Neil Clarke, G0CAS on the 13th of June.

Solar activity varied between very low and moderate levels. The largest solar flare of the week was a M2/2N which took place on the 7th from a small region that had been quiet till then. A large coronal mass ejection was associated with this flare. Six C class solar flares took place during the week on different days. Solar flux levels declined from 100 units on the 6th to 85 by the 11th and the 12th. The average was 90 units. The 90 day solar flux average on the 12th was 103 units, that's three units down on last week. A sharp fall like this in the 90 day solar flux average is not that unusual as the very high daily solar flux levels from around 90 days ago come out of the calculations. Just goes to prove that the progress from sunspot minimum to maximum is not a smooth curve. X-ray flux levels remained steady all week and averaged B1.5 units. Geomagnetic activity was at unsettled levels all week. Several weak effects from glancing blows from coronal mass ejections continued to take place all week. The quietest day was the 6th with an Ap index of 7 units. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 380 and 500 kilometres per second. Particle densities were into the teens during the 7th, 8th, 10th and the 11th, the remaining days were low. Bz varied between minus and plus 4 nanoTeslas during the quietest day and between minus 11 and plus 8 nanoTeslas during the most disturbed day.

And now the solar forecast. The active side of the Sun is expected to be rotating into view later in the week. Solar activity should increase to low levels, with a small chance that activity could increase to moderate levels. Solar flux levels are expected to increase to slightly above the one hundred mark by next weekend. Geomagnetic activity is expected to be quiet till midweek before a coronal hole disturbance is expect to arrive and last till well into the weekend. MUFs during daylight hours at equal latitudes should be around 21MHz for the south and 18MHz for the north. Darkness hour lows should be about 12MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of about 21MHz. The optimum working frequency with a 90 per cent success rate will be around 16MHz.

The best time to try this path will be between 1200 and 1900 hours. Also this path should be workable via double hop sporadic-E on 28 and 50MHz. Occasional Sporadic-E openings could take place on 144MHz.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE MIDLANDS On Sunday 19 June Coventry Amateur Radio Society commences its weekend event, operating GB4H from The Herbert Art Gallery & Museum, Jordon Well, Coventry CV1 5QP, for International Museums on the air. Contact John, G8SEQ, on 07958 777363.

On Monday 20 June Gloucester Amateur Radio & Electronics Society is having a picnic and draw, inviting members to operate with their own choice of equipment and antennas. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 20 June South Birmingham Radio Society is having a film show of 1960s club events, plus holding a committee meeting. Contact Don, on 0121 458 1603.

On Monday 20 June South Normanton Alfreton & District Amateur Radio Club is holding a junk sale. Details from A Lawrence, 2E0BQS, by email to adylawri@btinternet.com.

On Monday 20 June Welland Valley Amateur Radio Society is having demonstrations and explanations of slow scan television and direction finding. For more information contact Peter D Rivers, G4XEX, on 01858 432105.

On Tuesday 21 June Derby & District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 21 June Loughborough & District Amateur Radio Club is holding a 160m DF event. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 22 June Lincoln Short-Wave Club is having a formal meeting. For more information contact Pam Rose, G4STO, on 01427 788356.

On Wednesday 22 June Midland Amateur Radio Society is holding training classes and making its final plans for the 80th birthday celebrations. Details from Norman, G8BHE, on 01214 229 787.

On Wednesday 22 June Telford & District Amateur Radio Society is preparing for VHF NFD. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 23 June South Birmingham Radio Society is having training classes with Dave Murphy, G8OWL. Contact Don, on 0121 458 1603.

On Friday 24 June Bromsgrove & District Amateur Radio Club is having an HF night and preparing to operate GB1AMB. Contact Chris, M0BQE on 01905 776 869. On Friday 24 June Coventry Amateur Radio Society is holding a radio workshop and portable competition. Contact John, G8SEQ, on 07958 777363.

On Friday 24 June Nunsfield House Amateur Radio Group has a fox hunt with Brian Reid. Details from Ken Frankcom, G3OCA, on 01332 720976.

On Friday 24 June South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 25 June Lincoln Short-Wave Club commences its weekend event for Museums on the Air at East Kirkby and is in the shack. For more information contact Pam Rose, G4STO, on 01427 788356.

On Saturday 25 June Midland Amateur Radio Society is holding an open day from 10am to 4pm to celebrate its 80th birthday. There will be an exhibition, stalls, refreshments and a chance to meet the training staff. Special event station GB80TH will be on the air to celebrate. More information is on the club website, www.radioclubs.net/mars.

On Saturday 25 June South Birmingham Radio Society is paying a visit to Midland Amateur Radio Society to see their 80th birthday exhibition. Contact Don, on 0121 458 1603.

On Sunday 26 June Hucknall Rolls Royce Amateur Radio Club is hosting a classic car show at the club site. More information from Dave Wilde, G1YAI, on 0844 4355593.

NEWS FOR THE NORTH OF ENGLAND On Monday 20 June Angel of the North Amateur Radio Club is on the air and having a natter night. Contact Nancy Bone, G7UUR, on 0191 477 0036.

On Monday 20 June Sheffield Amateur Radio Club is holding a mini flea market and quiz night. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 20 June Thornton Cleveleys Amateur Radio Society is having a talk on the history of compact fluorescent lights by John, G4FRK. Details on the web at www.tcars.org.uk.

On Tuesday 21 June Halifax & District Amateur Radio Society is operating /P from around 6.30pm, at the car park near the wind farm above Wainstalls, map reference SE 043 309. If the weather is bad the event may be cancelled at short notice. Contact Martin, M0GQB, on 01422 341317.

On Wednesday 22 June Hambleton Amateur Radio Society is having an operating night. More information from Tony Wilson, G3MAE, on 01609 881530.

On Wednesday 22 June Hornsea Amateur Radio Club Shack is visiting to G3LZQ. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 23 June Hornsea Amateur Radio Club is taking part in the 80m CC SSB. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Thursday 23 June Ripon & District Amateur Radio Society is on the air and having a club night. Details from Rob Hall, M0RBY, on 0787 608 5631. On Thursday 23 June South Manchester Radio and Computer Club is holding its summer solstice BBQ. Details from Ron, G3SVW, on 0161 969 3999.

On Friday 24 June East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 25 June East Cleveland Amateur Radio Club commences its weekend event running Museums on the air station, GB0ZLB, from the Zetland Lifeboat Museum on the Esplanade in Redcar. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 25 June Halifax & District Amateur Radio Society is at the Brighouse Charity Gala. Contact Martin, M0GQB, on 01422 341317.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 21 June Livingston & District Amateur Radio Society is holding a club evening. Details from Norman, on 07740 946192.

On Wednesday 22 June Cockenzie & Port Seton Amateur Radio Club is having a 20m activity night from 7 until 10pm. More information from Bob, GM4UYZ, on 01875 811 723.

On Wednesday 22 June Lothians Radio Society is holding its summer BBQ. Contact Andy Sinclair, by email to secretary@lothiansradiosociety.com.

On Wednesday 22 June West of Scotland Amateur Radio Society has Solder Group homebrew projects & licence training. More information from Fred Coombes, 2M0BIN, on 01415 715512.

On Thursday 23 June Aberdeen Amateur Radio Society is having a discussion night. More information from Lewis, GM4AJR, on 01224 575 663.

On Friday 24 June Cockenzie & Port Seton Amateur Radio Club is having a normal club night but asks members to note the change of night. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 24 June West of Scotland Amateur Radio Society is having presentations, guest speakers, a quiz and a raffle. More information

from Fred Coombes, 2M0BIN, on 01415 715512.

NEWS FOR THE SOUTH EAST and EAST ANGLIA On Sunday 19 June Bedford and District Amateur Radio Club is having a BBQ and picnic field day in Ravensden. Details from Bob Leask, G3XNG, by email to g4ceotalk21.com.

On Sunday 19 June Newbury & District Amateur Radio Society is running the Newbury Radio Rally. For more information contact Rob, G3LMW, on 01635 862737. On Sunday 19 June South Essex Amateur Radio Society is operating GB2BM at Bay Museum for International Museums on the Air. Contact Norman, M0FZW, on 01268 692776.

On Monday 20 June Braintree & District Amateur Radio Society is holding a BBQ. For more information contact John, M5AJB, on 01787 460 947.

On Monday 20 June Burnham Beeches Radio Club is having a fox hunt. Contact Dave, G4XDU, on 01628 625 720.

On Monday 20 June East Kent Radio Society is having a talk on RAYNET by Brian Tutty, M0DCO. Details from Karl Davies, M1DFM, on 01227 710120.

On Monday 20 June Surrey Radio Contact Club is having a fix-it, advice, chin wag and move-it-on evening. Contact John, G3MCX, on 020 8688 3322.

On Tuesday 21 June Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720815.

On Tuesday 21 June Bromley & District Amateur Radio Society is having a direction finding contest. Details from Andy, G4WGZ, on 01689 878089.

On Tuesday 21 June Chelmsford Amateur Radio Society is having a club net night. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 21 June Verulam Amateur Radio Club is having a club night. Details from Tony, 2EOWAP, on 01727 853087.

On Wednesday 22 June Chesham & District Amateur Radio Society is having CW practice and a talk on getting started on the air. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 22 June Hastings Electronics and Radio Club has an all day barbecue and /P operation, including a kite aerial demo. Details from Gordon, on 01424 431 909.

On Wednesday 22 June Havering & District Amateur Radio Club is having an informal evening & Morse class by Peter, G3JSR. More information from John, M0UKD, on 07890 222111.

On Wednesday 22 June Loughton & Epping Forest Amateur Radio Society is at North Weald Airfield, operating GB2NWA for International Museums Weekend. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Wednesday 22 June Newbury & District Amateur Radio Society is having a presentation on linear amplifiers by Paul, G4KTZ of Linear Amp UK. For more information contact Rob, G3LMW, on 01635 862737.

On Wednesday 22 June Norfolk Amateur Radio Club is holding its trophy fox hunt, leaving CNS school at 19.30. Details from Chris Danby, G0DWV, on 01603 898678.

On Wednesday 22 June Worthing & District Amateur Radio Club is having a discussion evening. Contact Phil, G4UDU, on 01903 816684.

On Thursday 23 June Echelford Amateur Radio Society has CW practice, a natter night and a Bring & Buy. Contact John, G4GSC, on 01784 451898.
On Thursday 23 June Edgware & District Radio Society is having a visit by Alison Johnston, G8ROG, RSGB Region 9 Regional Manager. More information from Mike, G4RNW, on 0208 950 0658.

On Thursday 23 June Norfolk Amateur Radio Club is taking part in the RSGB CC SSB contest. Details from Chris Danby, G0DWV, on 01603 898678.

On Thursday 23 June Reading & District Amateur Radio Club is having a talk on the GR2HQ Contest by Tony Canning, G0OPB. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 23 June Shefford & District Amateur Radio Society is holding a BBQ. Details from David, G8UOD, on 01234 742 757.

On Friday 24 June Cambridge & District Amateur Radio Club is having a junk exchange and general discussion evening. Contact Ron, G3KBR, on 01223 501712.

On Friday 24 June Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Peter, G4AKG, on 01444 239371.

On Friday 24 June Radio Society of Harrow is having a mini field day and picnic at Old Redding View Point Car park, Harrow Weald HA3 6SE. All are welcome to attend and some operations via satellite are planned. More information from Linda, G7RJL, on 0208 386 8586.

On Friday 24 June Wimbledon & District Amateur Radio Society is having a talk on modern photography by Peter, G1SHV. Contact Andrew Maish, G4ADM, on 020 8335 3434.

On Saturday 25 June Bedford and District Amateur Radio Club is putting on its mobile operation at Ravensden Village Fete. Details from Bob Leask, G3XNG, by email to g4ceotalk21.com.

On Sunday 26 June Coalhouse Fort Amateur Radio Society is holding an open day. Contact John Parker, M1DUC, by email to coalhouserad1o@yahoo.com.

On Sunday 26 June East Kent Radio Society is having a meeting and picnic at Stelling Minnis. Details from Karl Davies, M1DFM, on 01227 710120.

NEWS FOR THE SOUTH WEST On Monday 20 June Appledore & District Amateur Radio Club is having a natter night and operating at Laurence's QTH. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

On Tuesday 21 June Blackmoor Vale Amateur Radio Society is having an HF evening. Contact Tony, G0GFL, on 01258 860741.

On Tuesday 21 June West Devon Radio Club is having an operating night featuring beginners DXing with Zoli Ritter, M0ZOL. Further information from Jules Cuddy, M1AGY, on 01752 291588.

On Thursday 23 June South Bristol Amateur Radio Club is on the air. Details from Andrew Jenner, G7KNA, on 07838 695471.

On Thursday 23 June Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317750. On Thursday 23 June Yeovil Amateur Radio Club is holding a field event at Bruton School. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 24 June Torbay Amateur Radio Society is having an audio visual presentation on K5D Desecheo Island by Derrick, G3LHJ. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 25 June Appledore & District Amateur Radio Club is running a special event station at Abbotsham Fete. Contact Brian Jewell, M0BRB, on 01237 473251 for more information.

NEWS FOR WALES On Monday 20 June Dragon Amateur Radio Club is having a talk on antenna modelling by GW0ETF. More information from Stewart Rolfe, GW0ETF, on 07833 620733.

On Tuesday 21 June Wrexham Amateur Radio Society is on the air as GC4WXM/P. More information from Patrick, 2W0HUU, on 07947 701 927.

On Thursday 23 June Marches Amateur Radio Society is having a video evening. For more information contact Dave, MW0AYM, on 01691 777242.

581. SARL NEWS - SUNDAY 19 JUNE 2011

SorSry, here is the right bulletin!

SARL NEWS - SUNDAY 19 JUNE 2011

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 7,066 and 3,695 MHz SSB.

In the news today:

SCIENTISTS SAY SOLAR CYCLE HEADED INTO LIMBO

WHAT DO YOUNG PEOPLE THINK ABOUT AMATEUR RADIO?

IARU REGION 1 CONFERENCE

CELL PHONES ARE SAFE AFTER ALL

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting news items.

SCIENTISTS SAY SOLAR CYCLE HEADED INTO LIMBO

For years, astronomers and space scientists have been predicting the Sun would move into solar maximum by around 2012. During this period there would be many intense flares and lots of sunspot activity. Now they are thinking that the opposite may be happening.

Newsline reports that according to three studies released in the United States on Tuesday 14 June experts believe the familiar sunspot cycle may be shutting down and heading toward a pattern of inactivity unseen since the 17th century.

According to experts from the National Solar Observatory and Air Force Research Laboratory, the signs of this include a missing jet stream, quickly fading spots, and slower activity near the poles.

At a meeting of the American Astronomical Society's Solar Physics Division in Las Cruces, New Mexico, Frank Hill, the Associate Director

of the National Solar Observatory's Solar Synoptic Network said that the fact that three completely different views of the Sun point in the same direction is a powerful indicator that the sunspot cycle may be going into hibernation.

According to Hill, the current cycle, number 24, may be the last normal one for some time but the next one, cycle 25, may not happen for some time. He adds that this is important because the solar cycle causes space weather which affects modern technology and may contribute to climate change.

Read more about this on www.sarl.org.za and select Amateur Radio Today.

WHAT DO YOUNG PEOPLE THINK ABOUT AMATEUR RADIO?

In an interview with 5 young radio amateurs between the ages of 11 and 17, they shared their views about amateur radio. It was transmitted in a special youth day broadcast which was on the air just before the Youth Day Sprint on 16 June. You can listen to it on www.hamradio.org.za, the new website the SARL is developing with the focus on young people.

SARL WEBSITE

The SARL is in the process of moving its website to another provider. The process is expected to cause little or no disruption. We will however keep you up to date with developments and inform you when the move has been completed.

SUBSCRIPTIONS ARE NOW DUE

As the end of June approaches please pay your subscription for the 2011/2012 financial year as soon as possible. Invoices were mailed a few weeks ago. When making electronic transfers or bank payments, please make sure you give your name and callsign on the payment slip or electronic payment notification. If you have already paid your subscription, thank you we value your continued support.

IARU REGION 1 CONFERENCE

Although the SARL Council have appointed delegates from its ranks to represent the SARL at the conference, individual amateurs may attend as observers. The full registration details are on www.iaru2011.org.za. Accommodation at Sun City is limited. If you like to attend as an observer at either the conference, or the GAREC meeting, please get you registration in as soon as possible but by not later than 24 June as after that date accommodation may not be available.

WINNERS OF PRIZES IN SARL CONTESTS

If you are one of the lucky winners in any of the recent SARL contests the good news is that the book prizes have been mailed to the winners. The SARL apologizes for the delay which was caused by a short supply of the various books selected as prizes.

CELL PHONES ARE SAFE AFTER ALL

The Cellular Telecommunications and Internet Association, better known as the CTIA, has ripped into a recent United Nations' report that claims cellphones can cause cancer.

The World Health Organization recently issued a report stating that radiation from cellular telephones can possibly cause cancer. It said that based on the U.N.'s International Agency for Research on Cancer working group, and in reviewing peer-reviewed studies, that it found some evidence of an increase in Glioma and acoustic Neuroma brain cancers among mobile phone users. As such, the agency now lists mobile phone as a carcinogenic hazard.

Now the CTIA has issued a broad based rebuttal that begins by quoting previous studies by the US Federal Communications Commission that concluded there is no scientific evidence that proves that wireless phone usage can lead to any form of cancer. The cellular lobby group also quoted the Food and Drug Administration as stating that the weight of scientific evidence has not linked cellular phones with any health problems.

In its rebuttal barrage, the Cellular Telecommunications and Internet Association also pointed out that the World Health Organization made no effort to conduct its own scientific study of cellular telephone use. Instead, it only reviewed previous studies made by other investigators over the years in reaching its conclusion.

Before its announcement on Tuesday, May 31st the World Health Organization had assured consumers that no adverse health effects from cellular telephones had been established. Now the WHO and the CTIA are on opposite sides of a public relations battle over the still unknown effects of cellular telephone radiation effects on the human body.

So should you use your VHF/UHF handheld transceiver? Yes! It is most likely safer than crossing the street.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low to moderate levels. Currently the visible solar disk consists of two big sunspot groups 1 234 in the south and 1 236 in the north. Both are producing C Class flares and there is a chance for another M Class event. A third sunspot group will soon rotate into view on the southeast limb and was the source of another C Class flare early on Thursday. For the people doing their own frequency predictions the expected effective sunspot number for the week will be about 40.

With the winter here 20 m will provide the best opportunities for DX followed by 30 m and some sporadic 15 m openings may also appear.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

25 June - West Rand flea market starting at 12:00 in Kroton Street, Weltevredenpark.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 750 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 18:30 CAT on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

From The Business Manager ZL2DL

Debby says...

I am off work until next Tuesday. Seems the conference flu bug has taken
a firm hold on me...have been off work all week with a chest infection.

Debby

****
Ann Fraser ZL3TNT has resigned from NZART council
Midlands District councillor, Ann Fraser ZL3TNT has resigned from NZART
council. This creates a casual vacancy which council will have to fill.
Would any NZART member who resides in the Midland District, and is
interested in becoming a councillor, please advise the president, HQ, or
any councillor of their interest so that council will be able to make a
decision.
Roy ZL2KH

****

Kordia Agreement Signed

On behalf of NZART Council I am very pleased to be able to report that a
new lease agreement has been signed between your Association and Kordia

Ltd. The agreement is for a five year term and covers all the existing Kordia sites which have amateur equipment installed.

The agreement signals a return to the terms and conditions which existed prior to Kordiaï¿½s decision to charge site rentals ï¿½ i.e. there is no charge for the equipment rack space or antenna space and the only cost is a contribution towards the power used. This is less than $1000 per year and will continue to be paid for by your Association, as it has been since the original agreement was reached with Kordiaï¿½s predecessors, BCNZ and BCL.

Particular thanks must go to Otago Branch for their excellent submission to the Minister for State Owned Enterprises, the Hon. Tony Ryall. This submission titled ï¿½Save Our Systemï¿½ clearly struck a note with the Minister and resulted in a political directive to Kordia resulting in their return to an arrangement which is financially sustainable for the amateur community.

I would also like to acknowledge with thanks the contributions made by Christchurch Branch, Whangarei, Kawerau and Gisborne for their work in raising the political noise level with their local MPï¿½s which I am sure made the Minister and his predecessor aware of the situation.

I have received some comment regarding the apparent lack of action by NZART at a national level in lobbying the Minister for SOEï¿½s over the Kordiaï¿½s situation. I did make two attempts to get an appointment in Wellington. The first was deferred by the then Minister (Simon Power) and the second opportunity late in November 2010 I had to cancel due to work overseas. A reply received from the Hon. Simon Power in October 2010 read as follows:

ï¿½You will appreciate that my responsibility as Minster for State Owned Enterprises does not extend to the operation of a SOE. In accordance with section 5(2) of the State-Owned Enterprises Act 1986, matters of an operational nature, including charges, are legally the responsibility of SOE boards.ï¿½

This did not give me any great expectation that the then SOE Minister would be responsive to representations from NZART at a national level.

What I did do through this time was to encourage the various people who had contacted me to try lobbying their own local MP to try and raise the political ï¿½noiseï¿½ level. In early March this year came the announcement that the Hon Simon Power was retiring from politics at the end of 2011 and early April, the announcement that the Hon. Tony Ryall was appointed as the new Minister for State Owned Enterprises. Otago Branchï¿½s very timely letter to the new minister was sent on 13 April and as you now know, resulted in prompt action by the new minister.

The new agreement recognises Kordia Ltd as a platinum sponsor of NZART and we will be working with Kordia to both recognise and promote them via the NZART web site and also in Break-In. The value of the new sponsorship agreement with Kordia is $92,300 ï¿½ this is the figure we

would have to pay if we were paying commercial rates for the eleven Kordia owned sites where amateur radio equipment is located. Other NZART branches that have their own web sites are encouraged to also place appropriate acknowledgement of this generous sponsorship on their own web sites. More information on this will available in the near future.

Many of you will be aware that ARTANZ made a submission to Kordia. This proposed a five year term and to provide publicity for Kordia in exchange for a return to the ï¿½status quoï¿½ ï¿½ i.e. no charge for the sites. While the ARTANZ submission may have assisted Kordia in drafting up the new terms of the agreement, I am in no doubt that it was not their submission that brought about the change of heart on Kordiaï¿½s part. In my recent discussions with Kordia, it was clear that it was political pressure which resulted in their change of position regarding charging for our use of their sites.

While the new agreement only covers existing sites, I would be happy to approach Kordia in the future to seek approval for additional sites for amateur repeater equipment. To this end ARTANZ have completed and submitted to Kordia the required engineering evaluation for Hedgehope with a view to the possible use of this site as an extension to the National System on to Invercargill and this site will be included in the new co-location schedule. Both Dunedin and Eastern Southland Branches have been actively investigating alterative sites for a National System extension which does not require the use of Hedgehope. I expect a final decision on the most appropriate site for an extension of the National System into the ï¿½deep southï¿½ will be made by the Branches concerned.

Vaughan Henderson ZL1TGC

NZART Vice-President

****

FMTAG Notes For HQ Infoline-232

PROPOSALS

1. Branch 53 Te Puke has applied for an APRS Digipeater at Shaw Road, Topo50 map reference BE37 870.20 014.96. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan.

2. Branch 53 Te Puke has applied for an APRS I-Gate at the Branch 53 Club Rooms, Topo50 map reference BD37 913.75 142.71. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan.

Comments and Applications

Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz
<mailto:fmtag@nzart.org.nz?subject=FROM_INFOLINE-232_PAGE>

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:
http://www.nzart.org.nz/nzart/fmtag/

Completed forms should be sent by e-mail to fmtag@nzart.org.nz <mailto:fmtag@nzart.org.nz?subject=FROM_INFOLINE-232_PAGE>

****

NZART Top Monitoring System Observer Award

The purpose of this NZART Top Monitoring System Observer Award is to encourage all listeners and radio amateurs to actively report unusual signals or suspected intruders on the allocated international and IARU Region 3 radio frequencies from VLF to Microwave. The purpose of these reports to assist the NZART Monitoring System Co-ordinator who collates and verifies potential intruders, who invade our precious finite radio frequencies. This information will be recorded for evidential purposes and where appropriate action taken to remove the intruder. There is a very long history of radio amateurs and listeners' providing such reports to ensure that the allocated frequencies are protected for the enjoyment of all.

What do you need to do?

Merely enjoy your scientific hobby, but report signals via the different means available via the NZART web site to the Monitoring System Co-ordinator. All reports will be verified and collated into an annual league table and shown in the bi-monthly Break-in magazine and NZART Web pages. The person judged to be a prolific and solid Intruder Watch contributor during each year. The recipient will receive a free one year NZART (single) membership subscription and will be provided with an official certificate of merit of their achievement. The NZART Monitoring System Coordinator will ask for clarification or additional information as required to verify the report.

Conditions:

1.

All past and present Monitoring System Co-ordinators are barred from entry for this award.

2.

Send reports including date/time in GMT, Frequency, Readability, Strength, Tone (RST), Mode, direction of signal (if possible), and any relevant comments.

3.

Send your reports to:
MS@nzart.org.nz or via:

intruderwatch@googlegroups.com

4.

You do not need to be a current member of NZART to contribute
towards the Top Watcher Award or to participate.

5.

The award winner will be declared in November of the current year.

John ZL1GWE NZART Monitoring Service Coordinator

****

DX Code of Conduct Update

DX CODE OF CONDUCT

Dear DX Code of Conduct supporter,

Most of you have seen much more evidence of our progress in spreading
the word about the DX Code of Conduct to the ham radio community. Our
site has had almost 16,000 unique visitors. The distribution of visitors
is world-wide, one of our key objectives. Click on
http://s07.flagcounter.com/more/NoSG
to see our statistics. It has been gratifying to see that the
overwhelming majority of DXpeditions have endorsed the Code.

For the coming year, our goals are to:

1.

Work with DXpedition team leaders to encourage training exercises
so that every operator's proficiency at pileup management is at a
level consistent with their team's objectives.

2.

Continue to get DXPeditions to incorporate the Code EARLY on in
their website planning. Many of these sites have 50,000 visitors
and we'd sure like more of their visitors come see our website.
Whatever click thru rate we can get, it would be better if we were
part of their thinking from Day 1.

3.

Work with the national societies to get them on board to
promulgate the Code to their members through clubs as well as
directly to their membership. 'We hope they will post the Code in
their language or put a link on their websites.

4.

Work with the higher profile DX clubs to get them on board on a
consistent basis to always work on educating the members about the

importance of ethical conduct.

5.

We would like to have every National Society send every member -
or at least every new member - an e-mail version of John and
Mark's book as Standard Operating Procedure, and continue to do it
forever. OK, so many new members aren't destined to be DXers, but
at least they can get the message that ethical behavior is
important to the ham community.

At the individual level, you will note that the vast majority of new
supporters have incorporated the logo of the Code at their websites. If
you signed up before this feature was ready, please take a few minutes,
go to
http://www.dx-code.org/link.htm
and follow the directions to put it at your website or QRZ page. You can
also ï¿½talk us upï¿½ at your club meetings, perhaps using the Power Point
presentation we've prepared. Feedback I received from clubs about the
Power Point is enthusiastic.

The World Wide Radio Operators Foundation -
http://www.wwrof.org <http://www.wwrof.org/>
- has put together a Contester's Code of Ethics that incorporates our
Code. We wish them great success in promulgating that Code to their
constituency.

So our thanks to you all for your support of the cause of striving for
the best possible ethical operating practices. We hope you take pride in
the role you have played in our mutual success.

Finally, please take a minute to forward this e-mail to your DX-pals.

For the Committee,
Randy W6SJ

Proposed Changes to VHF-SHF Records Keeping

Simon Lewis ZL4PLM - NZART VHF-SHF Records Keeper

Last year I offered to take over the running of NZART's VHF-SHF records
system and as part of that changeover, I decided to carry out a review
of how the records program was being run, the records formats in use and
the rules and guidelines being used to govern the process.

Following on from that review I wrote a proposal to Council on how I
would like to restructure the records system, the changes I would like
to see in the way the records are recorded and some proposed changes to
the rules and guidelines used, all of which are intended to bring the
records program inline with globally recognised standards, provide a set
of guidelines and rules that match modern operating methods and more
importantly, provide a new baseline that will encourage new record

attempts and increased participation in the VHF-SHF records program.

This proposal was reviewed and accepted by council at the F2f meeting at Silverstream and as part of the change process we are now publishing the proposed changes for comment from interested VHF-SHF operators and would like to hear your comments and feedback on the proposed changes. I have also included a sample of what the 144 MHz record table would look like under the new format so you can see the proposed look and feel to the tables.

Closing date for comments / feedback is 17 July 2011 after which fine tuning will take place and the new formats placed online onto the website. Feedback and comment should be sent to the NZART VHF-SHF Records keeper zl4plm@nzart.org.nz

To further encourage participation in records attempts a new certificate of achievement is being created and will be awarded to all new successful records submission to ecognise the achievement. A hall of fame and firsts list will also be created so that that past history is not lost.

Simon ZL4PLM

Use this link to see the proposed rules and sample image:

RSM Newsflash

17 June 2011

Release of E, X and Y callsign suffixes to the amateur radio service

Radio Spectrum Management will allow the use of E, X and Y callsign suffixes for amateur radio service callsigns from Noon, Wednesday 22 June 2011.

Amateur radio operators that wish to have an amateur callsign issued that contains an E, X or Y callsign suffix should approach an Approved Radio Examiner (ARX) to complete this work.

A list of Approved Radio Examiners (ARX) is located on the RSM website.

http://www.rsm.govt.nz/cms/engineers-and-examiners/information-for-rsm-approved-radio-examiners-arx/list-of-approved-radio-examiners-arx-available-for-public-work

The effective time and date from which Approved Radio Examiners (ARX) are permitted to allocate the new callsign series is:

Noon, Wednesday 22 June 2011

Until then, *ARXï¿½s are not permitted to allocate E, X and Y callsigns.*

At Noon on the 22 June 2011 SMART will process ARX allocations on a ï¿½first come, first, servedï¿½ basis.

A new edition of the Radio Operator Certificate and Callsign Rules (PIB 46) permitting the use of the new callsign series will be published on the RSM website on the morning of 22 June 2011.

VAUGHAN HENDERSON ZL1TGC

Contest News

VHF/UHF/SHF Contest

VHF++ Brass Monkey Contest (1st SAT AUG) 06/07-AUG-2011

FROM THE VHF-UHF-SHF CONTEST MANAGER

A reminder that the cut-off date for receipt of Hibernation Contest logs is only seven days away.

The next contest is the Brass Monkey Contest, 50 MHz and up, on Saturday the 6th and Sunday the 7th of August 2011. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The contest after that is the Microwave Contest, 921 MHz and up, on Saturday the 1st and Sunday the 2nd of October 2011. The operating times are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz <mailto:zl2wa@clear.net.nz>

with Contest Log in the subject line, or by post to:

Licence Examination

The next exam will be held on Thursday, 7 July, at 2.00 p.m. in the ComReg offices in Dublin. The closing date for receipt of applications to sit this exam is Wednesday 22 June. Full details including entry procedure and examination fee are available at www.irts.ie/exam or just click on the 'Licence Exam' button on the IRTS webpage.

World Castle Weekend

Scrabo Tower Activation

Bobby - MI0RYL will be activating Scrabo Tower on Friday 1st july 2011, in Newtownards using various HF Bands (propogation allowing). All details can be found at www.cashota.co.uk.

QUIOLE CASTLE ACTIVATION Bobby - MI0RYL will be activating Quoile Castle, Downpatrick, on Friday the 8th July 2011 using various HF Bands (propagation allowing). All details can be found at www.cashota.co.uk

---

Shannon Basin Radio Club

The next meeting of the Shannon Basin Radio Club will be held Friday 1st July in Shearwater Hotel Ballinasloe 19.00 hours. More information is available from EI8IU or EI9HX at QTHR. All members are requested to attend.

Limerick Radio Club

The LRC 2m Repeater is off the air until further notice due to vandalism. The services affected are the voice repeater function, IRLP and Echolink. Club members are doing their utmost to restore the repeater as soon as possible. Significant damage has been done which will incur additional unplanned expense on the club funds. Anybody who wishes to make a contribution towards the repair can do so by sending it to Mr Tony Condon EI2AW, LRC Treasurer at QTHR.

Summits On The Air

Filip ON4TA, who has been holidaying in Ireland for the past few weeks, spent some of his time here climbing the hills with his HF and VHF gear. Filip is an avid fan of the SOTA (Summits On The Air) programme. Despite the poor weather while he was here, he managed to activate 24 Irish summits during his stay. On his final day in Ireland, Joe EI7GY joined him to co-activate Croghan, on the Wicklow / Wexford border, followed by Croaghanmoira in Wicklow. Filip and Joe operated on 2 metres, 70 cms, 30 metres and 40 metres. See www.sota.org.uk for more information on the SOTA programme.

Amateur Portable Group

EI0Z, will be active on Saturday 25th June for the museum's on the air from the "hurdy gurdy" museum the martello tower howth and the group would like to thank the crew there for giving us the use of this very unique location.

It is well worth a visit if you've never been there, and a great day out.

Sun Spot Activity

US scientists say the familiar sunspot cycle seems to be entering a hibernation period unseen since the 17th century, a pattern that could have a slight cooling effect on global temperatures. For years, scientists have been predicting the Sun would by around 2012 move into solar maximum, a period of intense flares and sunspot activity, but lately a curious calm has suggested quite the opposite.

"Enjoy our stormy sun while it lasts," so says Victoria Jaggard of the National Geographic Daily News, recently. "When our star drops out of its latest sunspot activity cycle, the sun is most likely going into hibernation, scientists announced today. Three independent studies of the sun's insides, surface, and upper atmosphere all predict that the next solar cycle will be significantly delayed-if it happens at all. Normally, the next cycle would be expected to start roughly around 2020. The combined data indicate that we may soon be headed into what's known as a grand minimum, a period of unusually low solar activity. The predicted solar 'sleep' is being compared to the last grand minimum on record, which occurred between 1645 and 1715. Known as the Maunder Minimum, the roughly 70-year period coincided with the coldest spell of the Little Ice Age, when European canals regularly froze solid and Alpine glaciers encroached on mountain villages." - Sudden intense solar activity can disrupt shortwave transmissions, but the higher end of the 11-year sunspot cycle is generally good for shortwave, opening up propagation on frequencies from 12 to 30 MHz.

DX News

The Japan A1 Club is celebrating the 200th Anniversary of the birth of Samuel Morse by airing the call 8J1MORSE until November 30th 2011. Calls from other areas of Japan to look for are 8J1MORSE/2, 8J1MORSE/3 etc. Not surprisingly CW will be the preferred mode.

Stan SQ8X is leading a multi-national team which will be active from the island of Jan Mayen from 4 - 16 July. The callsign will be JX5O. They hope to have up to 3 stations on the air and will be QRV on 40 - 6m. More details can be found on <http://janmayen2011.org>

The Brazilian island of Fernando de Noronha will be put on the air by Marcelo PY2KN during the period 2 - 9 July. This is a separate entity for DXCC purposes and also counts as SA-003 for the Islands on the Air Award. He will be paying particular attention to 6m during his time there.

A group of mainly Greek operators will activate the islet of Othonoi during the period 17 - 25 June. The callsign will be J48O and the expedition will count as EU-052 for the IOTA Award.

LJ2T was the callsign of the Radio Telegraphers School of the Norwegian Army's Signal Corps from 1945 until 1982. The call can be heard again from the Signals Museum of the Norwegian Armed Forces in Lillehammer from 30 June until 3 July. The QSL manager is LA5EAA

The well-known DXer Nigel G3TXF will be on St Helena in the South Atlantic from 22 - 30 June using the call ZD7XF. As usual with Nigel this will be an all CW trip and QSLs go via his home call.

The US National Association of Shortwave Broadcasters

The NASB will team with Dallas-based transmitter maker Continental Electronics to host the first U.S. meeting of a High-Frequency Coordination Conference/Arab States Broadcasting Union conference, Sept. 12-16, in Dallas. Officially the B11 HFCC/ASBU conference, the gathering of shortwave broadcast professionals is expected to pull approximately 100 delegates from 40 countries. The NASB is encouraging shortwave professionals in the U.S. to attend to make a good showing. These twice-yearly conferences rotate among various countries. According to a release: 'This will be an excellent opportunity - to meet with the world's shortwave broadcasters, and to discuss some of the new platforms of delivery for international broadcasting, such as the Internet, satellites, podcasts, etc. Topics dealing with programming, audience research and others are also being planned for the agenda.

Power Line Transmission Technology (PLT)

At an ITU forum discussing the problem of polluting PLT devices, Dr Hamadoun Tour&#65533;, Secretary-General, ITU, cautioned service providers and

others against rolling out technologies conforming to specifications that do not meet ITU requirements. Concerns that home networking products using power line transmission (PLT) technology may cause interference with radio services led to a forum last week in Geneva to address the issue.

Emerging Technology:

Laser and Fiber Optics Set Net Data Speed Record

Researchers have set a new record for the rate of data transfer using a single laser. The speed reached is 26 terabits per second.

The trick was to use what is known as a "fast Fourier transform" to unpick more than 300 separate colours of light in a laser beam. Each is then encoded with its own string of information.

The technique is described in the journal Nature Photonics. The report says that at those speeds, the entire Library of Congress collections could be sent down an optical fibre in about 10 seconds. Source: www.wia.org.au

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2GB, NG3K & ADXO, N4AA & QRZ DX, N4JF, K5TR, KH6BZF, K8GI, K8YSE, W8GEX (60m News), W9ILY, K0HB, AT International, DL1SBF, DL7MAE & The DX News Letter, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HB9PL, I1JQJ/IK1ADH & 425 DX News, IW3SQY, JG2GSY, OZ6OM & 50 MHz DX News, PD9DX, Pete's-DX-Newsdesk, PS7AB, PT7WA, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VK4FW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-June, through Sunday, 19th-June there were 224 countries active. Countries available: 3A, 3B8, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY0, CY9, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0T, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK0M, VP2E, VP2M, VP2V, VP5, VP8, VP9, VR, VU, XE, XT, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

9N, NEPAL (Update). A multi-national team, all members of Mediterraneo DX Club (MDXC), will be active as 9N0MD from Nepal during November. Operators mentioned are Dov/4Z4DX, Ziv/4Z4OQ, Marco/CE6TBN, Gabriele/I2VGW, Pino/I8YGZ, Dario/IT9SSI, Antonello/IT9YVO, Al/IV3BSY, Giuliano/

IV3RLB, Fabricio/IZ2KXC, Tony/IZ3ESV, Sergio/IZ3NXC, Ant/IZ8CCW, Luis/
XE1L and Adhi/YB3MM. The pilot station will be Pino/IZ8BGY. Activity
will be on all HF bands and modes. The DXpedition now has a survey on
their Web page for band and mode needs at:
http://www.mdxc.org/nepal/topic1/index.html
Also, the team plans to give away trophies and prizes (see their Web for
details). Look for more details and updates at:
http://www.mdxc.org/nepal/topic1/index.html

A2 & ZA, BOTSWANA AND SOUTH AFRICA. Frosty, K5LBU, will once again be
heading back to Africa and is looking for operators. He states, "I will
be going over to South Africa-Botswana in September and if any one would
like to operate from Botswana for a week or 10 days they can contact me.
I will be setting up antennas at a new lodge and their web page is:
http://www.lotsane.com
I most likely will be there or going there around the 17th. I can meet
anyone at the airport in Johannesburg or in Gaborone Botswana." If
you are interested, contact him at: frosty1@pdq.net

AT8, INDIA (Special Event). Members of the Bangalore Amateur Radio Club
(VU2ARC) have activated the first special event station from India from
the Visvesvaraya Industrial and Technology Museum in Bangalore. Look
for AT8VTM to be active until June 27th. Activity is taking place during
the 10th International Museum Weekend 2011. Details of the Musuem is
available on: http://www.vismuseum.org.in
Details about the International Museum Weekend are available at:
http://www.ukradioamateur.co.uk/imw

C9, MOZAMBIQUE. Operators Dave/ZR6DG and Helge/ZS6HB will be active as
C92DG from the Timbavati Game Reserve in Tofo between July 14-28th.
Activity will be on the HF bands. QSL via ZR6DG. Look for photos to be
posted on QRZ.com

IOTA NEWS.....
AF-008. Alex, IW3SGT, will be active as EA8/IW3SGT from Fuerteventura
Island between June 21st and July 3rd. Activity will be during
his evening hours on SSB and PSK. QSL via his home callsign,
by the Bureau, eQSL (AG) and LoTW.

AF-018. Franco/IK4YCQ is now active as IH9/IK4YCQ from Pantelleria
Island until June 23rd. Activity will be on the HF bands
SSB only. QSL via his home callsign.

EU-008. Operators Graham/MM0GHM, Gordon/MM0GOR, Peter/GM7AAJ and
Allan/2M0VNW will be active as GM7A from Gigha Island, part
of the Hebridean Islands, during the RSGB IOTA Contest (July
30-31st), as a Multi-Op entry. QSL via GM7AAJ direct.

EU-016. Pontus, SM0RUX, will be active as 9A/SM0R from Hvar Island
(ACIA IC-668, CIA-13, IOCA CI-028, MIA MC-132, WLOTA 1206)
between July 10-15th. Activity will be holiday style and
from different beaches mainly during daytime! QSL via SM0RUX,

direct or by the Bureau.

EU-120. Members of the Newbury and District Amateur Radio Society (NADARS) will once again be active as G7N from Isle of Wight during the RSGB IOTA Contest (July 30-31st), as a Multi-Op entry. Operators mentioned are Ray/G4FON, Colin/M0DDT, Richard/ G3ZGC and Dave/G3KLH. QSL via G5XV.

EU-124. Roger, MW0IDX, will be active as homecall/p from Puffin Island (WFF EIFF-047), Ireland, on June 27th. Activity will depend on the weather because he is travelling to the island by kayak. Operations will be mostly 20 meters SSB, higher bands if open. QSL via his home callsign, by the Bureau or direct.

EU-135. Anders, SM5EFX, will be active as SF2X/p from Ledskar Island (WLOTA 0291) between July 1st and August 1st. Activity will be on all HF bands and modes. He will also participate in the RSGB IOTA Contest (July 30-31st). QSL via SM5EFX, direct or by the Bureau.

EU-136. Massimo, IZ5LDD, will be active as 9A/homecall from Losinj Island (ACIA IC-116, CIA-25, IOCA CI-058, MIA MC-204, WLOTA 4295) between June 19-27th. Activity will be on or near the IOTA frequencies using SSB and the Digital modes. QSL via his home callsign direct (see QRZ.com).

EU-136. Dante, IK5ASN, will be active as 9A8ASN from the Cres Island (ACIA-90, CIA-06, IOCA CI-012, MIA MC-056, WLOTA 0553) between July 13-30th. Activity will be on all HF bands, propagation permitting. QSL via IK5ASN by the Bureau.

EU-137. Lars, SM6CUK, will be active as SA6G/7 from Ven Island (WLOTA 0780) between July 28th and August 1st. Activity will include participation in the RSGB IOTA Contest (July 30-31st). QSL via SM6CUK (QRZ.com address).

EU-177. Bernd, DL8AAV, will be active as SD1B/5 from Aspoja Island between June 19th and July 1st. Activity will be on the HF bands, mostly SSB and CW. QSL via his home callsign direct or by the Bureau.

NA-026. Yigal, K2EFG, is once again active as K2EFG/p from Fire Island (USI NY013S, Suffolk County, New York) and the lighthouse (ARLHS USA-286, TWLHD WLH K-060, WLOTA LH 1922) until June 23rd. Activity will be mainly on 40/20 meters, but he may go to 15/10 meters if the conditions allow. Yigal will use a FT-857 (w/75-100 watts) into a Buddipole antenna on the eastern part of the island. There may be a time when Yigal will be directing a YP3 Yagi to the west (in-land). He will only be able to operate for 3-4 hours as there is no power available at the dunes where he can set up an antenna. QSL via his home callsign, direct or by the Bureau.

NA-112. Todd, N4LA, will be active as N4LA/p from a beach house on
Bogue Banks (USI NC010S, Carteret County, North Carolina)
between June 19-25th. Activity will be limited to his free
time, but look for him on 40/20/17/15/12/10 meter SSB. He will
be using a Yaesu FT-857D w/100 watts into a Par End Fedz and
Shock Cord Vertical. There will be the possibility of actual
oceanside beach operations (if time permits) using a battery
pack. QSL via his home callsign direct or LoTW. Visit his
Web site at: http://www.n4la.com

NA-213. Joe, K5KUA, will be active as K5KUA/4 from Dauphin Island
(USI AL002S, Mobile County, Alabama) between July 4-10th.
Activity will be holiday style on the HF bands, propagation
permitting. QSL via his home callsign by the Bureau or direct.

SA-045. (Update) Operators Orlando/PT2OP and Fred/PY2XB plan to activate
an island in the Amapa State Group, in August, during the second
fortnight (second week). Rony/PS7AB and Luciano/PT7WA, informed
OPDX this past week that Orlando/PT2OP and Fred/PY2XB have
received authorization from the environmental authorities
of the State of Amap&#65533; to have a DXpedition to the Bailique
Archipelago (DIB AP-01, ARLHS BRA-009, WLOTA L-1123 and DFB
AP-04) and lighthouse. The Amap&#65533; State is in the extreme
northern part of Brazil, and the islands in SA-045 are located
in the northern hemisphere. Amap&#65533; has few hams, and the state
is highly requested by colleagues who wish to achieve the
diploma "Worked All Brazil" (WAB). It has been a long time
since an Island in IOTA SA-045 was activated. The islands
are part of a biological reserves under environmental pro-
tection. The second fortnight of August was chosen due to the
HF propagation forecast, the climate conditions of the region
and the moon season which affects the sea tide and the op-
portunities to reach the islands. The callsigns will be PQ8OP
(QSL via PT2OP) and PQ8XB (QSL via PT7WA). More details will
be forthcoming.

J2, DJIBOUTI. John, F4FUC, will be active as J28UC from Djibouti starting
in July and will stay there until 2013. Activity will be on 40-10 meters
using a TS-480 w/100 watts into a vertical (20/15/10m) and dipole
(40/20/10m) antenna. QSL via his home callsign.

J6, ST. LUCIA. Howard, WB4WXE, will be active as J68HS from St. Lucia
Island (NA-108) between June 25th and July 15th. Activity will be on
160/40/17/12/6 meters. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (June 20-26th)....
Jun 20 AN SOLAR REFERENCE KEYS
Jun 21 AN --------------------
Jun 22 HN BN - Below Normal
Jun 23 HN AN - Above Normal/Geomagnetic Level is QUIET
Jun 24 HN LN - Low Normal
Jun 25 HN HN - High Normal/Geomagnetic Level is UNSETTLED

Jun 26 HN DIS - Disturbed
VDIS - Very Disturbed

GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LU7/LW6, ARGENTINA (Field Day Op). Look for the following stations/clubs to be active in the ARRL Field Day activities this coming June 25-26th. Operation will be concentrated on CW and the Digital modes. The callsigns (clubs) and QSL info is as follows:
LU7EO - AVELLANEDA RADIO CLUB <www.lu7eo.org.ar>; QSL via LU7EO:
C.C. 41, C.P.1870, Avellaneda, Bs. As., ARGENTINA

LW6DW - GRUPO DX NORTE <www.gdxn.com.ar>; QSL via LU5AVD:
Francia 3643, C.P. 1605 Munro, Bs. As., ARGENTINA

OJ, MARKET REEF (Update). Operators Max/ON5UR, Marc/ON8AK, Jelmer/PA5R and Dervin/PD9DX will be active as OJ0UR from Market Reef (IOTA EU-053, ARLHS MAR-001, TWLHD WLH OJ0-001, WLOTA LH-0542 and Admiralty C4472) between from August 13-20th. Activity will be on the HF bands using a Stepp-IR Big Vertical and a Stepp-IR 2 element beam. QSL via M0URX, direct (w/SAE plus 1 IRC/2 USDs), by the Bureau, or LoTW. Alternatively, QSLs may be requested using M0URX's OQRS form at:
http://www.m0urx.com/qsl-request-form
For more info, visit their Web page at:
http://www.united-radio.be/index.php

PACIFIC DX NET REVIVAL. Bill, VK4FW, informs OPDX of the "re-commencement of 'THE PACIFIC DX NET'". The net will be on the air from 0600z every Monday-Wednesday-Friday [UTC day] on 14.265 MHz [plus-minus QRM]. The primary Net Control is VK4AN, with alternates assisting. It is a net for members, DXpeditions and rare DX. Check-in are only accepted from these categories. If you wish to become a member of the 'PACIFIC DX NET', send your CALLSIGN and NAME to vk4an@pacific-dxers.com and a number will be assigned commencing from 501. Pacific DXer members are auto-matically members of the net using their membership number. If you are interested in DX throughout the Pacific Region, then consider joining the 'Pacific DXers' at: http://pacific-dxers.com
Any Dxpedition or rare DX that checks in will be asked to announce what frequency they will QSY to after working members for the benefit of others that want to work them.

PJ6, SABA ISLAND (Update). The six meter expedition to Saba Island (NA-145) by team Dick/K5AND, Pat/W5OZI and George/K5TR have now been issued the callsign PJ6D. QSL via K5AND. Log will be uploaded to LoTW. Their Web page is available at: http://dkhanson.com/pj6

PS150PLM QSL UPDATE. QSL Manager Rony, PS7AB, informs OPDX that all QSLs for the PS150PLM (January 2011) operation have been sent via the Bureau in February 2011. If you did not receive one, please let him know and he will send you another. His E-mail address is: ps7ab@yahoo.com

QSL RECEIVED VIA LoTW: 4K9W, ER4DX, F4FJH, HB9ESS, HP1WW, IK2DJV, J79FCG, LZ855SKRM, OK1KSL, P43E, P40W, PU8TEP, PW7T, S59ABC, ST2SR, TJ9F, V5/DJ2HD, VE7SZ, VP5/W4QX, VY2TT, XE1GRR and XE2AC

QSLS RECEIVED VIA MAIL: 1B1AB, 3D2A, 4A4A, 5M2TT, 5N5K, 6O0CW, 9H1XT, AO9IB, CE2/VE7SV, EA9IB, ED9M, FM/F6ARC, HI3/W1JNZ, J28RO, J79M, JD1BLY, JX9NOA, JY5HX, K8LEE/CY0, N1SNB/CY0, N0TG/CY0, P29CS, PJ4/K4BAI, PZ5T, SU1SK, TA0/WA2KBZ, UK7F, UK8OM, V73QQ, VP8ORK, XV2RZ and XV4YY

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SILENT KEY. Peter, HB9PL, informs OPDX that Pierre Pasteur, HB9QQ, became a "Silent Key" (SK) on Saturday, June 11th, after a short but ferocious illness at the age of 80. Peter states, "Pierre was a multi-faceted Ham who was not only a seasoned DX&#65533;er but a highly regarded expert in VHF/UHF work and the 'magic band'. He was author of numerous technical papers and a book about VHF/UHF 'Operating Modes and Techniques'. Unforgettable were his VHF and EME expeditions to HB0, 8Q7, V51 and lectures of these adventures at many conventions and other Ham gatherings. Pierre achieved the WAC on 144 mc EME in 1984 and the DXCC on 50 MHz in 2002. An ex-Maritime Radio Operator, he was an Honorary Member of USKA (Union of Swiss Short Wave Amateurs) and a number of other distinguished societies in Amateur Radio. He leaves his wife Inge, a son and a daughter. He will forever remain in our hearts." OPDX and its readers would like to send out our deepest sympathy to the family and friends of HB9QQ.

ST0, SOUTHERN SUDAN (Look for more Ops!). Paul, N6PSE, Co-Leader for the DXpedition to Southern Sudan states, "I anticipate having 1-2 openings on our DXpedition team to the newly created country of South Sudan. We are targeting our start date to coincide with the admission of the country by the UN. Currently, the feeling is that may be mid-August, 2011. If you are a good CW or SSB operator, strong team player and have a sense of adventure and would seriously consider going with us to Juba, South Sudan via Cairo, please contact me directly at: paul@n6pse.com We are taking the bulk of our gear with us. This is a well planned and well funded DXpedition. The focus will be on providing new ones and on having fun at the same time." The official Web site is at: http://www.dxfriends.com/SouthernSudan2011

SY2011, GREECE (Special Event). Special event station SY2011BVM is now active until July 4th. Activity is to celebrate the Special Olympics Games in Athens. QSL via Bureau, eQSL or direct to SV7BVM (w/SASE). ADDED NOTE: Also, look for SY2011JJZ. QSL via SV7JJZ.

SY7, GREECE (Special Event). Members of the Xanthi's Ham Club TELETHRA, (SZ7XAN) will be active as SY7SOG during the Special Olympics Games until July 4th. Activity will be on all bands,160m-70cm and all modes

(SSB, CW, RTTY, PSK, SSTV etc). There will be a special QSL card which will be sent for all QSOs via the Greek QSL Bureau (arrangements are to be made).

T6, AFGHANISTAN. Eric, K9GY, is now active as T6MO and is expected to be here (he mentions Grid MM44) for at least a year. Activity will be on 40-10 meters using a windom antenna. Most of his operations have been on CW. Eric states, "No 30m operation allowed here per Theater Spectrum Management. No 160m or 80m at this time. QRN levels can be high. Please be patient." Also, look for him to be in contests. QSL via K9GY (USA - SASE [no return postage, no return QSL]--- Outside USA - SAE + 1 USD or SAE + 1 IRC [if you don't have both then no return QSL]). He will upload to the ARRL LoTW and ClubLog periodically.

TY, BENIN. A group of operators are planning to activate Grand Popo, Benin, between August 5-14th. They have the licenses in their hands and all the other permissions to enter and operate. Callsign will be TY1KS. Operators mentioned are Salvador/EA3QS, Giorgio/IZ4AKS, Fabri/ IW3SQY, Francesco/IZ8GCE and Antonello/IT9YVO. Their DXpedition experiences are: 1A3A, 1A4A, 3A, 3B8, 3B9, 5R8KS, C31CT, E44M, HV5PUL, T70A, T70DXC, UK8AXA and others locations. Activity will be on all HF bands and 6 meters, using 3 three Elecraft K3s, and two Elecraft KPA500 new solid state amplifier. Due to the high demand for this country, the focus will be on the lower bands and the Digital modes, but also SSB and the higher band will be well worked especially during the TEP openings. QSL via IZ8IYX or by the OQRS (for direct/Bureau) and LoTW. Their Web site is still under construction, but you can still preview it at:
http://www.dxcoffee.com/ty1ks
The group is looking for sponsors for this DXpedition. Details for funding this operation are available on their Web page.

ZM, NEW ZEALAND (Special Event). Look for special event station ZM2KBR to be active between September 1st and October 31st. Activity is to promote the 2011 Rugby World Cup games. QSL via ZL2KBR, eQSL, by the Bureau or direct.

Highlights of Solar and Geomagnetic Activity
13 - 19 June 2011

Solar activity ranged from very low to moderate levels during the
period. The period began with low levels on 13 June with a C1 x-ray
event at 13/0055 UTC from an area on the east limb near N20. A
partial halo CME (estimated plane-of-sky speed of 600 km/s) was
observed off the southeast limb; first observed in C2 SOHO LASCO
imagery at 13/0424 UTC, also observed in C3 imagery at 13/0454 UTC.
Activity increased to moderate levels on 14 June when an M1 X-ray
event occurred at 14/2147 UTC from Region 1236 (N17, L=166,
class/area Ehi/350 on 16 June). A north-south oriented filament
channel erupted near the southeast limb between 0609 and1500 UTC on
14 June. A partial halo CME off the east limb was associated with
the filament eruption (first seen in STEREO-Behind COR2 imagery at
14/1500 UTC). The plane-of-sky speed was estimated at approximately
750 km/s. Activity decreased to low levels for 15 - 17 June. Two
C-class X-ray flares were observed on 15 June: a C2/Sf at 15/1150
UTC from Region 1236, and a C3/1f at 15/1432 UTC from Region 1234
(S16, L=246, class/area Dsi/150 on 19 June). Four C-class events
were observed on 16 June. The most significant was a C7/1N at
16/1022 UTC from Region 1236 associated with weak radio emissions in
the 2695 MHz to 15.4 GHz range, including a 130 sfu 10cm burst. Two
C-class flares were observed on 17 June: C1/Sf X-ray flare on
17/2313 UTC and a C3/Sn X-ray flare at 17/2342 UTC from Region 1234.
Activity decreased to very low levels on 18 June. Activity returned
to low levels on 19 June as two C-class events were observed. The
most significant was a C4 event from Region 1234 at 19/1522 UTC.

The greater than 10 MeV proton flux at geosynchronous orbit was
slightly enhanced during 12-18 June (peak 8 pfu at 17/0805 UTC),
likely associated with an eruptive prominence on the limb at 10/1828
UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during the period.
```

Geomagnetic activity ranged from quiet to minor storm levels during the period. Activity was at quiet to unsettled levels, with an isolated active period at high latitudes on 13-14 June due to a coronal hole high speed stream (CH HSS). Activity was at quiet levels on 15 - 16 June. A geomagnetic sudden impulse (SI) was observed at Boulder at 17/0244 UTC (31 nT) and indicated the arrival of the partial-halo CME observed in C2 SOHO LASCO imagery at 13/0424 UTC. The geomagnetic field was at quiet to unsettled levels, with isolated active and minor storm periods at high latitudes. Activity decreased to quiet levels for 18-19 June.

Forecast of Solar and Geomagnetic Activity
22 June - 18 July 2011

Solar activity is expected to be at low levels, with a slight chance for isolated M-class flares during 22 - 27 June. Activity is expected to decrease to very low to low levels during the rest of the period as Region 1236 departs. Activity is expected to remain very low until 03 July with the return of old Region 1234. Activity is then expected to be low with a chance for isolated M-class activity for the remainder of the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels from 22 - 24 June. An increase to high levels is expected for 25 June - 01 July due to a recurrent CH HSS. A brief return to normal to moderate levels is expected on 02 July and then high levels are expected once again from 03 - 05 July due to another recurrent CH HSS. Normal to moderate levels are expected for the remainder of the period.

Geomagnetic field activity is expected to be mostly quiet on 22 - 23 June. An increase to mostly active conditions is expected on 24 June with a chance for isolated minor to major storm periods due to the combination of the CH HSS and a halo CME observed early on 21 June. Unsettled to active conditions are expected from 25 - 26 June as the effects persist. The geomagnetic field is expected to be quiet to unsettled on 26 - 28 June as the disturbance subsides. Quiet conditions are expected from 29 June - 01 July. An slight increase to quiet to unsettled conditions is expected from 02 - 03 July due to another recurrent CH HSS followed by a return to quiet conditions until 07 July. A third CH HSS is expected to bring unsettled conditions from 08 - 09 July. Predominately quiet conditions are expected until the arrival of a fourth CH HSS due to arrive on 17 July. Quiet to unsettled conditions are expected for the remainder of the period.

RAC Bulletin 2011-015E - Manitoba Declares ‘Amateur Radio Week’ as local ‘Hams’ prepare for a Public Demo of Emergency Communications
2011-06-21

Winnipeg, MB June 21st 2011 – The Province of Manitoba has declared June 20-24th as ‘Amateur Radio Week’ in response to the support local Amateur Radio Operators have supplied in the last year. The Proclamation, which is posted at the website of the Winnipeg Amateur Radio Club (http://www.mts.net/~warc/), was signed by the Minister responsible for the Emergency Measures Organization (EMO), Steve Ashton.

This weekend, the public will have a chance to meet and talk with Winnipeg’s ham radio operators and see for themselves what the Amateur Radio Service is about. Showing the newest digital and satellite capabilities, voice communications and even historical Morse code, hams from across the North America will be holding public demonstrations of emergency communications abilities. Several dignitaries including the Director of EMO and the Deputy Mayor will also be visiting.

There are over 65,000 Amateur Radio licensees in Canada, and more than 2.5 million around the world. Through the Radio Amateurs of Canada (RAC) Amateur Radio Emergency Services program, ham volunteers provide emergency communications for thousands of provincial and local emergency response agencies, all for free.

Credit is to go to the Public Information Officer for the Winnipeg Amateur Radio Club Mr. Jim Sutton, ve4sig. The Winnipeg Amateur Radio Club is a RAC Affiliated Club. A lengthier press release went out to all media in Manitoba.

Geoff Bawden, VE4BAW
President - Radio Amateurs of Canada

RAC Bulletin 2011-016E - Mike Kelly, VE3FFK appointed to the
National Field Organization Secretariat
2011-06-21

I am very pleased to introduce the latest addition to the RAC National Field Organization Secretariat. Mike Kelly VE3FFK joins us as EP Canada Advisor. With a wealth of Emergency Preparedness knowledge and experiance, he will be a much needed presence in the Ottawa area in dealing with both the Federal and Provincial governments on matters relating to Wireless Radio Interoperability.

Mike has had a long standing relationship with the Canadian Emergency Management College and is the "go to" guy to be registered for their training programs. Mike is also a regular volunteer at RAC HQ in Ottawa.

Welcome aboard Mike!

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

NEW HF OPERATORS - THINGS TO DO

It would be hard to prescribe anything other than a mega-dose of Field
Day <http://www.arrl.org/field-day> this weekend - all bands, all
modes. Have fun! Regardless of whether that experience wets your
whistle or whets your appetite, the annual July 1st Canada Day contest
is a great opportunity to point your beams north and join our neighbors
in their national day of celebration.

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

Elecraft founder call signs and names were swapped in the story about
the new KX-3 last time - for the record, Wayne is N6KR and Eric is
WA6HHQ. Also, the call of the Grid Pirates VHF+ team is K8GP, not W8GP
- apologies for the busted calls! Log checkers...apply the penalty
stick...

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

June 25-26
```

- ARRL Field Day
- QRP ARCI Milliwatt Field Day
- NAQCC Milliwatt Sprint--CW (Jun 22)
- SARL Top Band QSO Party (Jun 23)
- His Majesty King of Spain--Phone
- Marconi Memorial HF Contest--CW

July 2-3

- Canada Day Contest (Jul 1)
- 070 Club Firecracker PSK31 Sprint
- Venezuelan Independence Day Contest
- DL DX RTTY Contest
- DARC 10-Meter Digital Corona
- Ten-Ten Spirit of 76 QSO Party (Jul 4)
- MI QRP July 4th Sprint--CW (Jul 4)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

If you have been on the HF bands lately, you may have noticed that a number of new prefixes are in use by stations in the Russian Federation. Here is a summary of the changes recently adopted by the Russian telecommunication authorities as reported in a recent ARRL Web story <http://www.arrl.org/news/new-russian-prefix-system-in-use> containing the numerous details of the new prefix structure. Make sure your logging software's CTY files <http://www.country-files.com/cty> are up to date before the IARU HF Championship in July! (Thanks, SRR President Roman R5AA, ex-RZ3AA)

More from Dayton - Scott N7SS reports that Icom American was showing off a new mapping feature for VHF+ products. Redhawk <http://www.icomamerica.com/en/features/lm_redhawksa.aspx> is a GPS mike for virtually any radio that features a real GPS display and other features like text messaging. It also allows a user to poll another and get their current location without having to wait or request they transmit. Mapping software will be able to use this data to show live locations on a map - such as for a rover or mobile station.

Graphene <http://en.wikipedia.org/wiki/Graphene> is not the new fragrance of spreadsheet users, it's a single-atomic-layer allotrope (form) of carbon that makes up graphite. It also has interesting electronic properties that are being put to work in wireless applications, such as a recent frequency mixing ability up to 10 GHz as reported by IBM researchers <http://www.nytimes.com/2011/06/10/technology/10chip.html>. Carbon is cheap and ubiquitous so the electronics industry is watching these developments with interest. (Thank, Bob N6TV)

The US Representative for serious VHF+ operating-magazine DUBUS <http://www.dubus.org/>, Ed KL7UW, has a new email address <dubususa@gmail.com> that can be used for correspondence with DUBUS or Teckniks, the books of articles from prior issues.

Young contest operator Manu LU9ESD <http://www.qrz.com/db/lu9esd> has been selected as part of the upcoming 2012 DXpedition to Malpelo Island, HK0NA <http://hk0na.com/>. Manu's experiences at 6Y1V and PT5T have given him the necessary "chops" to contribute on what will surely be a major operation from a most-needed DXCC entity!

Starting with the 2011 edition of the ARRL UHF Contest <http://www.arrl.org/general-rules-for-arrl-contests-above-50-mhz>, the upper power limit for Low Power entries will be 50 watts - an increase from 10 watts. Also note that the power must be measured at the output of the final stage of amplification (see Rule 2). This is a change from the old rules that allowed power measurement at the input to the antenna. Feed line loss is now part of the game. (Thanks, Lloyd N9LB and ARRL Contest Branch Manager, Sean KX9X)

Pete N4ZR <n4zr@contesting.com> writes to let us know that, "At Contest University <http://contestuniversity.com/> (CTU) in Dayton this year, I gave a "class" on the three most widely used contest logging programs - WriteLog, N1MM Logger, and Win-Test." This was very well received by the CTU attendees! "I have posted PDF versions of the review <http://pvrc.org/n4zr/dayton_2011_presentations.htm>, as well as my CTU presentation on CW Skimmer and the Reverse Beacon Network."

But will they operate EME? China is reported as starting the construction of the world's biggest radio telescope <http://www.gizmag.com/five-hundred-meter-aperture-spherical-radio-telescope/18930/> in the remote Guizhou Province of southern China. It will have a diameter of 305 meters and a collecting area of just over 73,000 square meters - the largest aperture ever constructed. This will extend the range of to three times further into space than the famed Arecibo 'scope. Game on!

This may be old news by the time of publication, but in case there are rooms left, the North Coast Contesters (<http://www.northcoastcontesters.com/>NCC) are pleased to announce that the Crowne Plaza in Dayton, Ohio started taking room reservations for the 2012 Hamvention week on Monday, June 20th under the previously announced agreement for a block rate arranged by the NCC. To make a reservation at the special rate ($135/night) You MUST either call this telephone number to make reservations 937-229- 9852 (special number) or you can make them online <http://contesthotel.com/>. If you call the special number and get the voicemail box - DO NOT leave a message - they cannot call you back. Call back yourself. You must talk to a live operator to make a reservation. A deposit is required at the time of reservation and the hotel cancellation policy applies. (Thanks, Tim K3LR)

Web Site of the Week - Although neither of these gentlemen was highly-connected to the radiosport world, both Jim Williams <http://www.edn.com/article/518496-Analog_guru_Jim_Williams_dies_after_stroke.php> and Bob Pease <http://www.edn.com/article/518568-Analog_engineering_legend_Bob_Pease_killed_in_car_crash.php>

were intimately involved with the electronic technology that underlies much of what we do, both on and off the air. They were legends in the world of analog electronics design and both died suddenly in the past week. Hams will recognize a kindred soul in this NPR story <http://www.npr.org/templates/story/story.php?storyId=4053122> about Jim's travels through the surplus electronics catacombs of Silicon Valley and his appreciation for technology as shown by this video beginning with him standing in front of his living-room art installation - a recreated Minuteman missile guidance computer <http://www.youtube.com/watch?v=I6ODi7qSpYg>. Similarly, the workbench of Bob Pease is legendary for its apparent disorder <http://www.rfcafe.com/references/electrical/bob-pease-breadboard.htm> from which sprouted well-crafted and engineered designs. Both were also legendary for their abilities to write and present with clarity and inspiration - references to Bob's "Pease Porridge <http://electronicdesign.com/article/analog-and-mixed-signal/Bob-Pease-Remembered-For-Peas e-Porridge-And-A-Whole-Lot-More.aspx>" and "What's All This..." columns have made an occasional appearance in this newsletter and both men have authored books considered classics in the field. Personally, both were a huge inspiration to your editor as a writer and author of technical material - having demonstrated how to do it right. To say they will be missed is a gross understatement. (Thanks, Doug K1DG and others for links)

WORD TO THE WISE

Mentor - this Field Day is an excellent opportunity to mentor new hams, to advise and guide and teach. Take the time to show them what effective operating looks and sounds like - there will be plenty of opportunities to score points and run rate in the weekends ahead of us.

==> SIGHTS AND SOUNDS

Igor, UA9CDC has contributed several videos from the recent Ural Contest Group Championship - the 12th annual competition, held during the first six hours of IARU Region I Field Day. (Part 1 <http://www.youtube.com/watch?v=-gPQfb9fBcE>, Part 2 <http://www.youtube.com/watch?v=OBfmgGiDFDc>, Part 3 <http://www.youtube.com/watch?v=LQ4xeyN0r_A> - the videos were taken and edited by Valery R9DA) Teams are only limited by the 12 meter mast height, Spiderbeam antennas, and 100 watt output power. All the participants are spread out along a North-South line, separated by 200 meters. A video tour of the R9DX contest station <http://www.youtube.com/watch?v=Wbj76DVuAoo&NR=1> is also available.

Brothers Dave N2TEB and Andrew K2FR operated portable from Mount Beacon, NY (FN31al) in the recent ARRL June VHF QSO Party. They managed to work stations out to about 1000 miles before the rain moved in. Enjoy this video of the mountaintop adventure <http://www.youtube.com/watch?v=YEGyMqRaekE> put together by Andrew.

Morse Madness strikes when you least expect it, as evidenced by this Bench Press key <http://www.youtube.com/watch?v=OntZ4-4vEz4>, a Rocking Chair key <http://www.youtube.com/watch?v=RgqYGls_uB4>, a CW gun <http://www.youtube.com/watch?v=k05eM2xMn0c> (this has potential), a Cheese Slicer key <http://www.youtube.com/watch?v=7DUZ6IrxmSc>, and even a Rotary dial phone CW key <http://www.youtube.com/watch?v=9_whymHQWoU>. Listen for OH6DC in the Straight Key Night! (Thanks, Mark K6UFO)

If you think contesters are nuts, how about this woodpecker who found a great place to stash acorns <http://www.dump.com/2011/05/20/woodpecker-fills-antenna-with-acorns-video>?

==> RESULTS AND RECORDS

The 2010 ARRL 10 Meter and 2011 January VHF QSO Party results are now online <http://www.arrl.org/contest-results-articles>. The ARRL Contest Branch extends its thanks to retiring 10 Meter Contest author Ken WM5R who is a new father and will need to devote more time to his junior operator. ARRL Contest Branch Manager, Sean KX9X notes, "I'm seeing several log submissions for the ARRL June VHF QSO Party that [were submitted in] the Single Operator category, but claim the use of spotting assistance. As a reminder, the use of spotting assistance (packet cluster, DX Summit, Internet chat rooms, etc) places you in a Multioperator category: If you operated on four or fewer bands, you can enter Limited Multioperator; if you operated on five or more bands, you should enter the Multioperator category. If you used spotting assistance during the weekend and submitted as a Single Operator, please resubmit your log in the correct category."

The Seventh District QSO Party <http://7qp.org/> (7QP) results have been turned around with the customary blazing speed this group exhibits every year. Click the "2011 Results" tab for the complete story. (Thanks, 7QP Contest Manager, Dick K4XU/N7XU)

WRTC2014 <http://wrtc2014.org> Chairman, Doug K1DG notes, "We have been receiving questions about the Team Selection process lately via email at the info@wrtc2014.org address. Please send questions on that subject to selection@wrtc2014.org." In addition, Mark K6UFO sent a pointer to Marek SQ2GXO's WRTC2014 operator comparison website <http://wrtc-rank.com/> based on claimed results. Marek encourages you to report any bugs or problems.
